well-lit place after sitting in the dark, an object is not clear at first: until it becomes clear, one
rounds of continuity should be understood [to pass] meanwhile.¡¨ They are explaining this be
have watches in those days. In these days we would say five minutes, ten minutes or somet

is present by continuity. ¡¥Present by extent¡¦ means one life. ¡§What is delimited by a single
called ¡¥present by extent¡¦.¡¨ There are three kinds of present - present by moment, presen
and present by extent. ¡§And here ¡¥present by continuity¡¦ is used in the Commentaries wh
extent¡¦ is used in the Suttas.¡¨

¡§Herein some say that consciousness ¡¥present by moment¡¦ is the object of knowledge of
minds.¡¨ They say that, but the Visuddhi Magga does not approve of that because ¡¥present
be the object of this direct knowledge. ¡§What reason do they give? It is that the consciousn
possessor of supernormal power and that of the other arise in a single moment.¡¨ Then there

¡§That, however, is rejected in the Commentaries as erroneous because even if one went o
100,000 years, there is never co-presence of the two consciousnesses, that is to say, of tha
and that [of impulsions] with which he knows.¡¨ In order to get direct knowledge first there is
Then there is preliminary. They are two different kinds of consciousness. They cannot arise

¡§Even if one went on adverting for a 100,000 years, there is never co-presence of the two c
that is to say, of that with which he adverts and that [of impulsions] with which he knows, an
flaw of dissimilarity of objects of both adverting and impulsion where it is not desired¡¨ - wait
should say ¡§because of the flaw of dissimilarity of objects¡¨, then we strike out ¡¥follows if p
the same object]¡¦. Then instead of ¡¥to¡¦ we say ¡¥of¡¦. ¡§The flaw of dissimilarity of objects
adverting and impulsion¡¨ and then we add some words here ¡§where it is not desired. What
is that the object is present by continuity and present by extent.¡¨ In this direct knowledge th
dissimilarity of objects. If they say direct knowledge knows the present by moment, then the
why it is rejected. One is that two consciousnesses cannot arise at the same time. The other
will be dissimilarity of objects. That is because at the moment of adverting there is one objec
consciousness and at the moment of impulsion there is another consciousness. There will b
objects if we take that way. That is why it is rejected.

There are many more. You can check with this sheet. In paragraph 122 at the end of the pa
too¡¨ we should put the word ¡¥only¡¦ there - ¡§only profitable and unprofitable [aggregates a
of knowledge of faring according to kamma.¡¨

Then the last paragraph 129 is to be translated as given on this sheet. ¡§Here, it is said [in t
Commentary] that this knowledge has both internal and external objects. That was said to m
knows now internal and now external objects, it is said to have internal-external objects as w
Ancient Commentary it is said this knowledge (the last one) has both internal and external o
does not mean that it can have internal and external objects at the same time, although the
opinion appears to mean that. It says both internal and external, but really it means sometim

internal as object and sometimes he takes external as object. So it can be said that it takes i
external objects, but not at the same time. OK. That is the end of this chapter. There is so m
about. At least we have a general idea about what is in the book.

Student: Thank you very much.

Teacher: Thank you so much. If you didn¡¦t ask me to teach Visuddhi Magga, I would not be
years. I am very glad that all of you are at least acquainted with what is in the Visuddhi Mag
helpful in the study of Abhidhamma too. The next section will deal with Abhidhamma. So if y
Abhidhamma to someone, you can get much information from The Path of Purification. The
not available to people in the West. They are all in P??i, not yet translated. This book is mor
available than the other books. The only thing is where to find what, where to find the inform
good to make notes, to write on index cards. The index in the book is not so helpful. It is fair
comprehensive, but not so helpful. When you go through the book, you know what informati
remember. Then you write down on a card and keep the card with you. Then when you wan
information easily. OK.

S?dhu! S?dhu! S?dhu!

Chapter 14
(Tape 29 / Ps: 1 ¡V 60)

Now we come to part 3 of the Path of Purification. The author gives us information on three
sam?dhi and pa???. Up through chapter 13 the first two stages of s?la and sam?dhi are exp
chapter the explanation of understanding or pa??? begins the third stage in spiritual develop
¡§Description of the soil in which understanding grows¡¨ - this is the soil of understanding or
pa???. Chapter 14 deals with the aggregates. First there is discussion about pa???.

¡§Now concentration was described under the heading of consciousness in the stanza,

¡¥When a wise man, established well in Virtue,
Develops Consciousness and Understanding¡¦.¡¨

This stanza appeared at the beginning of the book. There we find the word ¡¥consciousness
is meant sam?dhi or concentration. Concentration has been explained with different kinds o
meditation.

Now it is time to talk about pa???. ¡§And that has developed in all its aspects by the bhikkhu
possessed of the more advanced development of concentration that has acquired with direc
benefits. But Understanding comes next. And that has still to be developed.¡¨ Up to this poin
developed understanding. We have developed concentration.

¡§Now that is not easy (the development of pa???), firstly even to know about, let alone to d
is taught very briefly. In order, therefore, to deal with the detailed method of its development
following set of questions.¡¨ These questions will be answered one by one.

¡§What is understanding? Understanding (pa???) is of many sorts and has various aspects.
kinds of pa???. ¡§An answer that attempted to explain it all would accomplish neither its inte
purpose and would, besides lead to distraction; so we shall confine ourselves to the kind int
is understanding consisting in insight knowledge associated with profitable consciousness.¡¨
¡¥understanding¡¦ means kusala (wholesome or profitable) which accompanies the wholeso
which consists in insight knowledge. The word ¡¥vipassan?¡¦ in P??i is in fact a synonym for
and pa??? are synonymously in many places. By pa??? is meant vipassan?, insight knowle

¡§In what sense is it understanding?¡¨ It is the definition of the word ¡¥pa???¡¦. ¡§It is unders
the sense of act of understanding.¡¨ These definitions are actually very difficult to translate i
language. Understanding is pa???. Understanding is understanding.

¡§What is this act of understanding? It is knowing in a particular mode separate from the mo

and cognizing.¡¨ There are three kinds of understanding or knowing. There is knowing of pa?
knowing of sa???. And there is knowing of consciousness or vi????a. These three are differ
is said to be called understanding or knowing because it knows in a particular mode separat
different from) the modes of perceiving and cognizing.

¡§For though the state of knowing is equally present in perception, in consciousness, and in
nevertheless perception is only the mere perceiving of an object as, say, ¡¥blue¡¦ or ¡¥yellow
perceiving of an object is called ¡¥perception (sa???)¡¦. ¡§It cannot bring about the penetrati
characteristic as impermanent, painful and not-self.¡¨ Maybe it is the first reaction to the obje

The next one is consciousness. ¡§Consciousness knows the object as blue or yellow, and it
penetration of its characteristics.¡¨ At the consciousness stage it knows the characteristics. ¡
bring about, by endeavoring, the manifestation of the [supramundane] Path. Understanding
the way already stated - (That means by both mere perception and penetration of characteri
about, by endeavoring, the manifestation of the path.¡¨ Pa??? is said to be the best of the th
through pa??? can there be penetration into the nature of things.

Then a simile is given. Suppose there were three people, a child, a villager, and a money-ch
who is familiar with coins and money. The understanding of these three persons is different.
that the coin is a round thing. It may not know that is used in exchange for other things. It wi
it is a round thing, that it is yellow or it is white or something like that. But a villager an ordina
that it is a round thing made of copper or silver, or gold. He also knows that it can be used a
money-changer or the person who is familiar with money know all of what the villager and ch
knows that it is a coin, when it was struck, when it was made. He knows the value of the coi
knows everything there is to know about the coin.

In the same way ¡§perception is like the child without discretion seeing the coin, because it a
mere mode of appearance object.¡¨ Consciousness is like the villager seeing the coin. Unde
the money-changer seeing the coin and then understanding everything about the coin. This
between kinds of knowing - knowing of sa???, knowing of consciousness, knowing of pa???

In these three words there is the root ¡¥?a¡¦. In sa??? there is ¡¥?a¡¦. In vi????a there is ¡¥?
pa??? there is ¡¥?a¡¦. The root ¡¥?a¡¦ means to know. All these three know the object, but th
different. The knowing of pa??? is the most penetrating.

¡§That is why this act of understanding should be understood as ¡¥knowing in a particular m
the modes of perceiving and cognizing¡¦. For that is what the words ¡¥it is understanding in t
of understanding¡¦ refer to.¡¨

¡§However, it is not always to bee found where perception and consciousness are.¡¨ There a
consciousness. Not all are accompanied by pa???. Only some are accompanied by pa???.
consciousness are not accompanied by pa???. Then among the wholesome and functional
some which are not accompanied by pa???. ¡§However, it is not always to be found where p
consciousness are. But when it is, it is not disconnected from those states.¡¨ So pa??? can b
types of consciousness, but perception accompanies every type of consciousness. Wherever
and consciousness, there is not necessarily pa???. Wherever there is pa???, there is also p
consciousness. When it is found with perception and consciousness, it is not disconnected f
That means it arises with these states. It is not mixed up with perception and consciousness
of characteristic and so on.

¡§And because it cannot be taken as disconnected thus ¡¥This is perception, this is conscio
understanding¡¦, its difference is consequently subtle and hard to see.¡¨ For ordinary people
difficult to see, to differentiate, this is perception, this is consciousness, this is understanding
contact and so on.

Here Venerable Nagasena said to King Milinda that the Buddha has done a very difficult thin
difficult thing? ¡§Defining of the immaterial states of consciousness and its concomitants wh
single object.¡¨ That means consciousness and mental concomitants arise at the same time
object. Although they take the same object, they are by characteristic or by nature different.

¡§The difficult thing, O King, done by the Blessed One was the defining of the immaterial sta
consciousness and its concomitants, which occur with a single object, and which he declare
contact, this is feeling, this is perception, this is volition, this is consciousness.¡¨ It is very diff
for ordinary people to see these states clearly, to be able to say this is contact, this is feeling
Following the Buddha¡¦s teachings and through practicing vipassan? meditation many of the
be seen, or known, or experienced. Many meditators come to see these mental states clearl
practice of vipassan? meditation.

Then Venerable Nagasena gave a simile. You pick up a handful of water from the ocean. It
this water is from one river and that water is from another river and so on. It is much more di
that this is contact, this is feeling and so on when consciousness and its concomitants arise
object. Pa??? when it arises with consciousness and perception is a different dhamma. It is
other concomitants. It is like people walking together. Each person is different from the other
together and they do some job together.

¡§What are its characteristic, function, manifestation and proximate cause?¡¨ We have to un

regard to these four aspects taught in Abhidhamma - characteristic, function, mode of manif
proximate cause. You will find these a lot in this chapter and the next chapter.

¡§Understanding has the characteristic of penetrating the individual essence of states.¡¨ Tha
penetrating the nature of things, penetrating the individual nature or characteristic of things a
penetrating the common characteristic of things. Each state has its own characteristic. If you
you will come to see the characteristic of these states. Then there is the common characteri
states, of all conditioned states. That is impermanence and so on. That you also see through
understanding. The characteristic of pa??? is penetrating the individual essence of states or
states.

¡§Its function is to abolish the darkness of delusion.¡¨ It is like lightening. When lightening fla
darkness is dispelled. The dispelling of darkness or here darkness of delusion is its function.
which conceals the individual essences of states. So delusion or ignorance is compared to d
is darkness, we cannot see things in this room. If this room is dark, we cannot see things in
there is light, we can see things. Just as darkness hides things from being seen, so ignoranc
conceal the individual essences of states. We do not know the individual essence of states b
ignorance or delusion.

¡§It is manifested as non-delusion.¡¨ When you watch pa??? itself, it will appear to your mind
non-delusion. ¡§Because of the word ¡¥One who is concentrated knows and sees correctly¡¦
is concentration.¡¨ The pa??? meant here, that is vipassan? pa???. Its proximate cause is co
is why I always say concentration is important. When there is no concentration, no pa??? or
the nature of things can arise.

There are many kinds of pa???. Pa??? is one according to its characteristic of penetrating th
essence. It is two, paragraph 9 ¡§As regards the twofold section, the mundane is that associ
mundane path.¡¨ ¡¥Mundane path¡¦ means the factors of Path especially during vipassan? m
vipassan? meditation the factors of Path arise in your mind - Right Effort, Right Mindfulness,
Concentration and Right Understanding. So mundane understanding is that associated with
means vipassan? meditation.) ¡§And the supramundane is that associated with the supramu
at the moment of enlightenment. At the moment of enlightenment what is called ¡¥Path cons
Pa??? accompanying that consciousness is called supramundane pa???. So it is of two kind

¡§In the second dyad, that subject to cankers is that which is the object of cankers.¡¨ Or we c
mental defilements, which can be the object of mental defilements. ¡§That free from cankers
object¡¨, so which cannot be the object of mental defilements. ¡§This dyad is the same in me
mundane and supramundane.¡¨ ¡¥Subject to cankers¡¦ means mundane. ¡¥Free from canke

supramundane. ¡§The same method applies to the dyads, ¡¥subject to cankers and free fro
on.¡¨

¡§In the third dyad, when a man wants to begin insight, his understanding of the defining of t
immaterial aggregates is understanding as defining of mentality.¡¨ ¡¥Defining of mentality¡¦, t
clearly seeing or clearly understanding mentally. Clearly seeing or clearly understanding ma
defining of materiality. It is of two kinds. In short it is understanding of mind and understandi

¡§In the fourth dyad, understanding belonging to two of the kinds of sense-sphere profitable
and belonging to sixteen of the kinds of Path consciousnesses with four of the jh?nas in the
is accompanied by joy.¡¨ Sense-sphere profitable consciousness that is k?m?vacara kusala.
two of them, belonging to 16 kinds of the Path consciousness with four of the jh?nas in the f
accompanied by joy. What is sixteen? The four Paths with the first jh?na and those with the
fourth out of the five. Now the Commentator is using the fivefold method of jh?nas, not the fo
jh?nas. The first, second, third, and fourth jh?nas are accompanied by joy. The fifth is accom
equanimity. ¡¥Accompanied by joy¡¦ means jh?nas up to the fourth.

¡§Understanding belonging to two of the kinds of sense-sphere profitable consciousness, an
remaining) four kinds of Path consciousness with the fifth jh?na is accompanied by equanim
pa??? accompanied by joy and there is pa??? accompanied by equanimity. In the sense-sp
are accompanied by joy and two are accompanied by equanimity.

¡§In the fifth dyad, understanding belonging to the first Path is the plane of seeing.¡¨ ¡¥Seein
seeing Nibb?na in the first place or the initial seeing of Nibb?na. ¡¥Plane of seeing¡¦ means
to the first Path. The first Path is called ¡¥seeing¡¦ or ¡¥dassana¡¦ in P??i because it sees Nib
Understanding belonging to the remaining three Paths, that is the second, third and fourth P
of development (bh?van?).¡¨

¡§As regards the triads, understanding acquired without hearing from another is that consist
reasoned.¡¨ That means understanding from one¡¦s own thinking. It is understanding which a
own thinking. It is not heard from others or not from having read books. That is understandin
reasoned or from what is thought.

The second one is understanding from what is heard. That means understanding attained th
others or through reading books.

The last one is understanding consisting in development. Here ¡¥development¡¦ means the p
meditation. So understanding obtained through the practice of meditation is that which consi

development. There are three kinds of pa??? mentioned.

Then there is a quotation about five lines down. ¡§That concerns ownership of deeds (kamm
understanding that beings have kamma only as their own. ¡§Or is in conformity with truth¡¨ -
vipassan? because vipassan? helps us to see the true nature of things. So ¡¥in conformity w
just means vipassan?.

Paragraph 15 ¡§The understanding that occurs contingent upon sense-sphere states has a l
means understanding that takes sense-sphere states as object. That is called ¡¥understandi
limited object¡¦. Then there is understanding that takes the fine-material-sphere states or imm
states as an object. It is called an exalted object or pa??? having an exalted object. This is n
insight. ¡§That which occurs contingent upon Nibb?na has a measureless object. That is sup
¡¥Insight¡¦ means vipassan? and vipassan? is mundane, not supramundane. When you reac
or the enlightenment moment, it becomes supramundane. In fact there is no supramundane
always mundane. Here by supramundane insight the author meant Path understanding, unc
not vipassan? understanding. So understanding is of three kinds.

¡§It is increase that is called ¡¥improvement¡¦. That is twofold as the elimination of harm and
of good. Skill in improvement is skill in these, according as it is said.¡¨ This is skill in improve
skill in development. The next one is skill in detriment. That means taking the diminution of g
arousing of harm. Then the third one in paragraph 18 ¡§But in either of these cases any skill
causes of production¡¨ - ¡¥means and ¡¥causes of production are the same here. ¡¥Means¡¦
of production. ¡§Of such and such things, which skill occurs at that moment and is aroused c
what is called ¡¥skill in means¡¦.¡¨ I think you are familiar with the word ¡¥up?ya¡¦. It is used a
people here. ¡¥Up?ya¡¦ is translated here as means. So skill in means is up?ya kosalla, skill
how to do things in a given moment. ¡§And it is aroused on that occasion.¡¨ That means it ju
there is some occasion. It is not pre-meditated.

¡§In the fourth triad, insight understanding initiated by apprehending one¡¦s own aggregates
the internal.¡¨ Here ¡¥interpreting¡¦ means reflecting upon or paying attention to. That is inter
is taking other people¡¦s aggregates as object of meditation. That is external. ¡¥Both¡¦ is inte
internal and external. There is a footnote for the word ¡¥abhinivesa¡¦ in P??i. The author said
is interpretation or misinterpretation and insistence. ¡¥Interpretation¡¦ means something like
given object.

Then we have tetrads. There are four kinds of knowledge or four kinds of understanding - th
suffering (the First Noble Truth), the understanding of the origin of suffering (the Second Nob
understanding of the cessation of suffering (the Third Noble Truth), and understanding of the

the cessation of suffering (the Fourth Noble Truth).

Then the next tetrad is the four kinds of discrimination. These four kinds of discrimination are
the Commentaries very often. Sometimes when the enlightenment of a person is described
say that he gained enlightenment along with the four discriminations. That is a special know
have to practice in a special way. We just practice vipassan? meditation. When you become
these four kinds of knowledge automatically come to you. These are called ¡¥the four discrim
¡¥pa?isambhid?¡¦. ¡§Knowledge about meaning is the discrimination of meaning. Knowledge
discrimination of law. Knowledge about emancipation of language dealing with meaning and
discrimination of language. Knowledge about kinds of knowledge is discrimination of perspic
four kinds of discrimination.

¡§Herein, meaning (attha) is briefly a term for the fruit of a cause.¡¨ The P??i word is attha. ¡
mean result, or purpose, and also fruit, and meaning. If we just translate it as ¡¥meaning¡¦, it
some misunderstanding. It is difficult to translate this word into any language. As we will see
¡¥attha¡¦ here means five things - (1) anything conditionally produced, (2) Nibb?na, (3) the m
is spoken (That means the meaning of words.), (4) result of kamma, (5) functional conscious
should be understood as ¡¥meaning (attha)¡¦. When we say ¡¥knowledge about meaning¡¦ o
meaning¡¦, it means knowledge about these five things. ¡§When any one reviews that meani
his, falling within the category concerned with meaning, is the discrimination of meaning.¡¨ S
¡¥discrimination of meaning¡¦ means understanding of things conditionally produced, unders
understanding the meaning of words, understanding of result of kamma, and understanding
consciousness.

The next one is law. ¡§Law (dhamma) is briefly a term for condition. For since a condition ne
whatever it may be, makes it occur or allows it to happen, it is therefore called ¡¥law (dhamm
¡¥Discrimination of law¡¦ means understanding of the condition or understanding of the caus
particular the five things, namely, (1) any cause that produces fruit, (2) the Noble Path (It is t
the Fruition.), (3) what is spoken (That means words or language.), (4) what is profitable (ku
is unprofitable (akusala), should be understood as law.¡¨ By the word ¡¥dhamma¡¦ these five
¡§When any one reviews that law, any knowledge of his, falling within the category concern
discrimination of law.¡¨ Discrimination of condition or discrimination of causes is law.

¡§This same meaning is shown in the Abhidhamma by following the following analysis.¡¨ The
from the second book of Abhidhamma.

Let us go to paragraph 25. ¡§Knowledge about enunciation of language dealing with meanin
language that is individual essence.¡¨ The word ¡¥sabh?va¡¦ is normally translated as individ

here the meaning of the word ¡¥sabh?va¡¦ is explained in the Sub-Commentary as correct o
not change or which does bit deteriorate. That is called ¡¥sabh?va nirutti¡¦ in P??i.

¡§The usage that has no exceptions¡¨ - that means that is definite, that is not ambiguous. ¡§A
that meaning and that law. And knowledge falling within the category concerned with the en
with the speaking, with the utterance of that, concerned with the root-speech of all beings, th
language that is individual essence¡¨ - in Therav?da Buddhism the Magadhan language is s
speech of all beings, the original language of all beings. So the belief of Therav?da Buddhis
Magadhan language or the P??i language as we know it now is the original language of all b
many years different people developed different dialects. Then they became different langua
belief of Ancient Teachers.

Student: So the mother language is P??i?

Teacher: Yes, the mother language is taken to be P??i.

Student: Is this true or is it legend?

Teacher: I think the present day P??i is the closest to the language used by the Buddha. It is
say that it is the language of the Buddha because we really don¡¦t know which language the
the Buddha used the language that was current at his time and which was understood by all
high-class people only. Once two Brahmans who became monks asked him to turn his teach
Sanskrit. The Buddha rejected them. The Buddha said ¡§My Dhamma is for all people, not f
he used the language which was understood by all people, the common language.

Student: Now there are many languages in India. Buddha traveled great distances in India. C
there was a more common language at that time?

Teacher: We don¡¦t really know. There may be different languages in different parts or differ
different parts of the country. The language he spoke may have been understood by all peo
That language is said to be m|la bhassa (root-speech) of all beings.

¡§In other words, the language of law as soon as it hears it spoken, pronounced, uttered, kn
individual-essence language; this is not the individual-essence language¡¦ - [such knowledge
discrimination of language.¡¨ That means it is the correct language, this is not the correct lan
something like that. A person who has this kind of discrimination knows that this is grammat
this is not. Then an example is given here. ¡§one who has reached the discrimination of lang
hearing the words ¡¥phasso, vedan?,¡¦ etc., that this is the individual-essence language (Tha

the correct language.) and on hearing ¡¥phass?, vedano¡¦, etc., he knows that this is not the
individual-essence language.¡¨ It is not the correct word or correct language because the wo
masculine gender ands when it is in the nominative case it is phasso. It can never be phass
case. When phass? is said, you know this is wrong. This is grammatically wrong. The word
the feminine gender. It is never in the masculine gender. So if you say ¡¥vedano¡¦, then you
word into masculine gender and so it is wrong. If you do not know P??i and you try to get en
get these four kinds of discrimination, then you will automatically understand P??i. That is w
here. So P??i language is said to be the root-speech of all beings, of the rest of the languag

The language that we will call P??i is never mentioned as P??i in the Commentaries. In the
referred to as Magadhan language or root language. The word ¡¥P??i¡¦ means simply Text a
Commentaries and Sub-Commentaries. Later on since it was the language in which the Tex
call it P??i language. The term ¡¥P??i language¡¦ is of recent origin. The term was not used
Commentaries or the Sub-Commentaries. What they used were the words ¡¥m|la bhassa¡¦,
¡¥Magadhi bhassa¡¦ - the language of the Magadhan country. It was like a state in this count
time of the Buddha there were what we call ¡¦16 countries¡¦. However they were not countrie
districts. Magadha was one of them.

¡§Knowledge about kinds of knowledge¡¨ - that is know. This is knowledge of perspicuity. Th
discrimination - we can make them clear, we can make them sharp. We can make ourselves
of discrimination by five means.

The five means are given in paragraph 28. ¡§And though they come into the categories of t
they are nevertheless distinguishable in five aspects, that is to say, as achievement¡¨ and so
they can be brought to perfection by these five things - by achievement (That means by enli
mastery of scriptures, by hearing, by questioning, by prior effort.¡¨

¡§Achievement is the reaching of Arahantship.¡¨ It is the best mentioned here. Reaching of t
enlightenment is also meant here. ¡§¡¥Mastery of scriptures¡¦ is mastery of Buddha¡¦s word.
learning the Dhamma carefully and attentively. ¡¥Questioning¡¦ is discussion of knotty passa
explanatory passages in the Texts, Commentaries and so on. ¡¥Prior effort¡¦ is devotion to i
dispensation of former Buddhas (So it is like a p?ramit?.), up to the vicinity of [the stages of]
and change-of-lineage by one who has practiced [the duty of] going [with the meditation sub
and coming back [with it].¡¨Monks are described as of different kinds. There are monks who
even when they go to the village for alms and also take back meditation to the monastery. T
go to the village, they go with meditation and when they come back from the village, they co
meditation. There are such persons. They have practiced meditation in this way. That is wha
¡¥going with the meditation subject on alms round and coming back with it¡¦. They may have

of vipassan? just short of enlightenment. If they are enlightened, they don¡¦t have to worry a
again to gain enlightenment. So here ¡¥up to the vicinity of the stages of conformity and cha
simply means just short of enlightenment. ¡¥Those who have practiced vipassan? in the disp
Buddhas¡¦ (That means in their former lives just short of enlightenment.) such endeavor is ca
effort¡¦. Such people may get enlightenment in this life and may get these four kinds of discr

Some others said in a different way, but they are more or less the same. They are prior effor
learning, knowledge of dialects, knowledge of scriptures, questioning, and achievement.

It was believed that there were only 101 languages during the time of the Buddha. ¡§ ¡¥Diale
in the 101 tongues, particularly in that Magadha.¡¨ But even in one country there are more th
or 100 dialects. It is the stock phrase used in the Commentaries whenever they want to refe
they say 101 languages. It may be something like saying 1001 things, an expression.

¡§Herein, Buddhas and Undeclared Buddhas (That means Pacceka Buddhas.) reach the dis
effort and through achievement. Disciples do so through all these means. And there is no sp
developing a meditation subject in order to attain discriminations. But in trainers the attaining
discriminations comes about next upon the liberation consisting in trainer¡¦s Fruition, and in
(That means Arahants.) it does so next upon the liberation consisting in non-trainer¡¦s Fruitio
have reached the first, second, and third stages of enlightenment are called ¡¥trainers¡¦. Tho
reached the fourth stage, the Arahants, are called ¡¥non-trainers¡¦.

¡§How is it developed? Now the things classed as aggregates, bases, elements, faculties, tr
origination, etc., are the soil of this understanding (or the field of this understanding), and th
two purifications, namely, Purification of Virtue and Purification of Consciousness, are its roo
called ¡¥root purification¡¦. The other five are called ¡¥trunk purification¡¦ or ¡¥body purificatio
are seven kinds of purification with regard to the practice of vipassan? meditation. The first o
Purification of Virtue. Actually it is not yet vipassan?, but preparing for vipassan?. Then the s
Purification of Consciousness or Purification of Mind. That means concentration. Then there
View. Next is Purification by Overcoming Doubt. Next is Purification of Knowledge and Visio
Path and What is not the Path. Then there is Purification by Knowledge and Vision of the Wa
is Purification by Knowledge and Vision. These are the seven stages of purity with regard to
vipassan? meditation. This book will describe these purifications one by one beginning with
means Purification of View because Purification of Virtue and Purification of Consciousness
described.

Now we come to the aggregates, the five aggregates. You are all familiar with the five aggre
khandhas. The first one is r|pa, aggregate of corporeality or aggregate of matter. The seco

aggregate of feeling. The third is the aggregate of perception. The fourth is the aggregate of formations. And the fifth is the aggregate of consciousness. In this chapter they are not desc order. First the aggregate of r|pa is described and then the aggregate of consciousness. The feeling and so on are described.

The first one is the aggregate of r|pa. R|pa is defined as, in paragraph 34, ¡§that have the ch being molested by cold, etc.¡¨ In Myanmar we understand this word as meaning to change. changes because of cold, heat, hungry, thirst, bite of insects and so on is called ¡¥r|pa¡¦. ¡¥R to change When it is cold, you have one kind of material properties. When it is hot, there is a material property and so on. ¡¥Change¡¦ here does not mean that something changes into s the arising of a different continuity of matter is called ¡¥change¡¦. According to Abhidhamma lasts for a few moments, only 17 thought moments. After that they disappear. So ¡¥change¡¦ arising of a different kind of material property due to heat, cold, etc. That is what we call ¡¥ch

And broadly there are two kinds of matter - primary entity and derived material properties. ¡¥ not mean descended from, but it means depending on. I prefer to use the word ¡¥dependent ¡¥derived¡¦. There are the primary ones and the depending ones.

We need a house in which to live. The house is what we depend upon. In the same way the to be mentioned later depend upon the four primary elements for their arising and for their e are not derived from these four, but they depend upon these four for their existence. For our depend upon buildings, on houses. We are not produced by houses, but we depend upon th have shelter and protection. In the same way the 24 material properties are not derived from elements, but they depend upon these four for their existence, for their arising. That is why t ¡¥up?d?ya¡¦ in P??i. That means depending ones.

¡§Primary materiality is of four kinds as the earth element, water element, fire element, and a We have met with these four elements in chapter 6 of The Manual of Abhidhamma.

¡§Depending materiality is of 24 kinds as eye, ear, nose, tongue, body, visible datum, sound femininity faculty, masculinity faculty, life faculty, heart-basis; bodily intimation, verbal intima space element; lightness of matter, malleability of matter, wieldiness of matter, growth of ma of matter, aging of matter, death of matter, and physical nutriment.¡¨ There are 24. 24 plus 4 Abhidhamma there are said to be 28 material properties. 4 are primary and 24 are those dep

If you look at the list closely, you will notice that there is eye, ear, nose, tongue and body. An corresponding to them there should be five, but there are only four here - visible datum for th for the ear, odor for the nose, flavor for the tongue. For the body nothing is mentioned. That

we call tangible datum is just the group of three primary elements (earth element, fire eleme
element). The combination of these three elements is what we call tangible datum. That is w
mentioned here. If it is mentioned, then we would have 25 and there would be confusion. We
understand that there is no such thing as tangibility. Corresponding to the bodily sensitivity t
tangible objects. We have body sensitivity. For example I have body sensitivity in my skin ar
something, I have the feeling of touch. I experience the feeling of touch, that tangible object.
tangible object, but it is not different from the three primary elements mentioned above. That
not mentioned here. There are 24. These 24 are explained in detail . Their characteristic, fur
manifestation and proximate cause are all mentioned.

Paragraph 37 towards the end ¡§Its function is to pick up [an object] among visible data.¡¨ A
picking up. The P??i word is ¡¥?vi?chana¡¦. That means to pull, so to pull the mind to the obj
mind to the object. It is not like picking up an object, but to pull or maybe push the mind to th
¡§It is manifested as the footing of eye consciousness.¡¨ I think we should say ¡¥the basis of
consciousness¡¦. That is better. That means eye consciousness cannot arise if there is no ey
sensitivity in our bodies. So it is the basis for eye consciousness. ¡§Its proximate cause is pr
born of kamma sourcing from desire to see.¡¨ We have some desire to see. That desire mak
causes the elements. So the primary elements caused by kamma are its proximate cause.

Then we have ear, nose, tongue. They can be understood without much difficulty. Paragraph
say that eye is sensitivity of primary elements that have fire in excess¡¨ and so on. ¡§ ¡¥Som
Mah?sa~ghikas.¡¨ Mah?sa~ghikas are those who divided themselves from the original Sa~g
Buddhist Council. Before the second Buddhist Council there was a difference of opinion amo
practice of certain Vinaya Rules. They could not come to agreement. So they divided thems
original Sa~gha and they are called ¡¥Mah?sa~ghikas¡¦. Mah?sa~ghikas have this view. On
Vasudhamma. Maybe, I don¡¦t know, in Sanskrit or among the teachers of this sect there is a
Vasubhantu. It may be the same person. The name Vasudhamma was given in the Sub-Com
Magga. This is a difference of opinion.

Let us go to paragraph 46. Even among Therav?da Buddhists there is a difference of opinio
sensitivities take the objects when they come into contact with them or before the objects re
Paragraph 46 explains this. ¡§Now among these [sensitivities thus] possessed of difference
of kamma, the eye and the ear apprehend non-contiguous objective fields since consciousn
the supporting [primaries] of the objective fields do not adhere to the [faculties] own supporti
primaries.¡¨ The meaning is this: Eye and ear take the object which has not reached them. B
reach them, they take the object. That is what is meant here. It may or may not be correct, b
Venerable Buddhaghosa and later teachers is that. The eyes and ears take objects which ha
Before the objects reach them, they take the objects, before they come into physical contact

sensitivities. Eye takes the visible object. ¡¥Visible object¡¦ just means color. Before it really
eye, it takes the object. That is because if you say eye sensitivity only takes the object when
then the object would have to come an would block the passage of light. The opinion of the
including the Venerable Buddhaghosa was that these two sensitivities take the objects befor
them. But the other three (nose, tongue and body) only take the object when it comes to the
object adheres to the sensitivities. Let us take smell as an example. Unless it adheres to the
experience smell. If the smell is some distance away from us and does not come into contac
then we do not experience smell.

Student: What is the difference between the eyes going out to meet the object and the objec
eyes? How would you know which is correct? What is the difference in understanding?

Teacher: That¡¦s right. There are arguments on both sides. Considering sound waves, we m
Venerable Buddhaghosa said here. Because only when sound waves strike against the ear
Right? So sound must come into physical contact with the ear sensitivity in order to hear. So
later Teachers like Venerable Buddhaghosa or with former Commentators. Venerable Buddh
later or new Commentator. Before him there were older Commentators. Those Commentato
and ear took objects which came into contact with them. That is the difference of opinion. If
Expositor, I will give you the page number for reference. It is explained more fully there. It is
Expositor, page 410.

The eye sensitivity is described here. It says that it looks like a blue lotus petal. During the ti
Commentators they thought that the black part of the eye was a solid thing, not a window. T
like a window, right? It can become small or big. What we gather from the writings of the Co
they take this to be a real thing. So eye sensitivity is supposed to reside in that place - ¡§sur
black eyelashes and varied with dark and light circles. The eye [sensitivity as meant] here is
the place in the middle of the black circle surrounded by the white circle in that [feature of th
its accessories¡¨ and so on. Eye sensitivity resides on a place that looks like a blue lotus pet
part of the eye is compared to a blue lotus petal. It is said that many particles of eye sensitiv
that place.

Then we have ear sensitivity. Ear sensitivity resides in a place like a finger-stall. What is a
¡¥finger-stall¡¦? Is it a ring? Please look at paragraph 49. ¡§The ear [sensitivity] is to be found
[feature of the] ear hole with its accessories in the place that is shaped like a finger-stall.¡¨ T
ring. It is something like a ring in the inner ear.

Then the nose is like a goat¡¦s hoof. The tongue is like a lotus petal tip. And the body is like
soaks a layer of cotton. The body sensitivity is found everywhere. The whole of the body is p

body sensitivity except for the nails and the hair. ¡§In this physical body where there is matte
clung-to¡¨ - I think the footnote is good. ¡§It is vaguely renderable by ¡¥organic or sentient or
matter¡¦.¡¨ That is right. ¡§Technically it is matter of the four primaries that is ¡¥clung-to¡¦ or
¡¥derived¡¦ by kamma.¡¨ It is not necessarily born of kamma. Everything that is connected w
is called ¡¥up?di??a¡¦ in P??i. Something like organic or sentient is better.

Then these are compared to snakes, crocodiles, birds, dogs and jackals. The eyes are comp
ears to crocodiles, the nose to birds, the tongue to dogs, and the body to jackals. They gravi
own respective resorts. Snakes live in ant-hills. Crocodiles live in water. Birds live in air or sp
live in villages. Jackals live in charnel grounds.

Eye is said to be like a snake. A snake likes to be in a place where there are many things. T
to see many things. If the wall is plain the eye does not want to see. The eye wants to see d
intricate patterns, paintings, things like that. The eye is compared to a snake. A snake does
where there is nothing. It wants to be where there is debris. So the sensitivities are compare
animals. You can read in more detail in The Expositor, page 411.

Then we come to visible datum. That means the visible object or color. Then there is sound,

Next there is femininity faculty. ¡§The femininity faculty has the female sex as its characteris
function is to show that ¡¥this is a female¡¦. It is manifested as the reason for the mark, sign,
ways, of the female.¡¨ Please read The Expositor, page 419. Women have different marks, c
different work, and different ways of doing things than men. By looking at them, we know ¡¥t
and ¡¥this is a man¡¦. That peculiarity in a woman is called ¡¥femininity¡¦ and in a man it is ca
¡¥masculinity¡¦. Sometimes we may see someone by a silhouette and we know that it is a m
woman. Or sometimes we know that it is a man or that it is a woman by how they walk. Som
they are children by how they play and so on. Boys would play fighting with each other. Girls
cooking or something like that. These two also extend throughout the whole body, not just in
body. ¡§But it does not follow that they have to be called either ¡¥located in the space where
sensitivity is located¡¦ or ¡¥located in the space where that is not located¡¦.¡¨ Body sensitivity
the whole body also. And masculinity and femininity pervade the whole body. It does not foll
to be located where body sensitivity is located. When there is body sensitivity, then we cann
the same place there is masculinity or femininity.

Student: I heard once that the first thing we notice about somebody is their sex, whether the
woman. That¡¦s the first thing we notice. That¡¦s what you are saying.

Teacher: Yes. We may not see a person, but we hear them talk and we know ¡¥this is a wor

man¡¦. There are marks or signs of feminine sex or masculine sex. Femininity or masculinity
whole of the body.

Next is the life faculty. This is j?vita in P??i. In this paragraph instead of ¡¥occur¡¦ we should
¡¥exist¡¦. ¡§Its function is to make them occur.¡¨ It is not ¡¥to make them occur¡¦, but ¡¥to ma
continue to exist¡¦. They occur by some other causes. After they arise this life faculty mainta
protects them. Its characteristic is not to make them occur, but to make them to continue to
short moment. So instead of ¡¥occur¡¦ we should use ¡¥exist¡¦. About the middle of the parag
occurs itself only through its connection with the states that occur, like a pilot.¡¨ Here also ¡§
itself only through its connection with the states that it maintains.¡¨

It is said that life faculty maintains the conascent material properties. J?vita is the one that m
them, that keeps them from dissolving. If life faculty maintains others, then what maintains th
That is the problem here. If you are the protector of others, who is the protector of you? The
it protects itself. In protecting others it protects itself too. It is like a boatman. When a boatma
you to the other shore, he takes himself too. That is the point here, but it is not so clear read
sentence. The meaning is just this. If life faculty protects others, what protects it? It protects
¡¥Like a pilot¡¦ means like a man who rows the boat, a boatman. It is important to understan

¡§It does not cause occurrence after dissolution, because of its own absence and that of wh
occur. It does not prolong presence at the moment of dissolution (There are three moments
and dissolution.) because it is itself dissolving, like the flame of a lamp when the wick and th
getting used up. But it must not be regarded as destitute of power, to maintain, make occur
¡¥make exist¡¦.), and make present, because it does accomplish each of these functions at t
stated.¡¨

Then we come to the heart-base. I have talked about heart-base many times. So I think you
heart-base. There is a discussion of the heart-base in footnote 26. In brief the heart-base is
in the first book of Abhidhamma. Even in the last book of Abhidhamma, the Pa??h?na, it is
name. Buddha just said ¡§Depending upon a certain material property mind element and mi
consciousness arise.¡¨ That ¡¥certain material property¡¦ is interpreted to mean the heart-ba
is how that is to be known, how do you know that it is heart-base. Two lines of argument are
from the scriptures and one is from logical reasoning. ¡¥Logical reasoning¡¦ means by the m
elimination. Buddha said that there is a certain material property which is the basis of mind e
element consciousness. That basis cannot be the eye, cannot be the ear and so on. Elimina
other, there is something remaining and that is the heart-base. So when the Commentators
heart-base, it is somewhat arbitrary.

These two arguments are given. There is this argument and also one from the scriptures. Fr
also I said that no where in the scriptures is the heart-base mentioned by name by the Budd
the Buddha did not mention the hear?-base in the first book of Abhidhamma because Buddh
certain way of preaching, a certain way of teaching, for unity of his method of teaching. In or
break the unity of teaching he left the heart-base out when he described the material propert
argument in brief. The second one is arrived at by the method of elimination. So the Comme
arrive at saying heart-base is what is meant by the Buddha. Please read footnote 26. It may
difficult to understand.

OK. Please read up to consciousness aggregate for next week, up to page 518.

S?dhu! S?dhu! S?dhu!

(Tape 30 / Ps: 61 ¡V 124)

We haven¡¦t finished the first aggregate yet. We are in the middle of the aggregate of matter
deals with bodily intimation and paragraph 62 deals with verbal intimation. There is a long fo
very difficult to understand. Part of the translation is incorrect.

¡§Bodily intimation is the mode (conformation) and the alteration (deformation) in the consci
originated air element that causes the occurrence of moving forward, etc., which mode and a
condition for the stiffening, upholding, and moving, of the conascent material body.¡¨ What is
intimation? After reading this definition, you don¡¦t know what it is. So I will tell you. We let ot
know our intentions by bodily gestures. That bodily gesture is what we call ¡¥bodily intimatio
language of the books. Bodily intimation is one of the 28 material properties. Bodily intimatio
element. That is because if air element were bodily intimation, then wherever there is air ele
be intimation and there is not. So air element cannot be bodily intimation. Then is citta born
intimation? There are other citta born material properties too. They are not intimation. They
to know the intention of people. Therefore citta born matter is also not bodily intimation. Is m
intimation? If it were, there would be intimation in the movement of trees, in the movement o
things. There is no intimation from these things. So bodily intimation is a particular mode of a
which is caused by citta, citta which causes going forward, going back and so on. This mode
for there to be stiffening or upholding of the limbs of the body and so on. That particular mod
meant by bodily intimation. We cannot pick up bodily intimation and show you this is bodily i
just a particular mode of the air element. Here the air element is predominate. Where there i
is this air element. Movement is caused by the air element. This air element is caused by cit
intimation means just a particular mode of the air element which is caused by citta. That citta
arising of moving, of going forward, stretching, bending and others. But there is not intimatio
movements, it is only in the movements of beings, especially human beings. If we want to le

he should come, we use a kind of gesture. In this country you use this gesture. If he sees th
he knows that we want him to come. That particular mode in the movement of the hand is w
intimation.

Verbal intimation means a particular mode of earth element. For bodily intimation it is air ele
it is earth element, a particular mode of earth element which is caused by citta which causes
want to say something, then there is citta or the intention. That citta cause the earth element
where voice is made in the vocal chords. ¡¥Vocal chords¡¦ is not the word used in the books
vocal chords. In these vocal chords there is matter caused by kamma. There is kamma born
chords along with other kinds of material properties. When we want to say something, our m
earth element, many particles of earth element. These come together - the earth elements c
the material properties in the vocal chords. There is something like friction. That friction caus
to arise. So there is the voice. So verbal intimation is not just the voice. It is not just the earth
It is not just kamma born matter, but it is a particular mode in the earth element which cause
speech. Through speech we understand what the other person intends or what the other pe
You hear my voice. It is not just the voice. These are words. Through these words you unde
For the sake of convenience we can say that the articulation of words is what we call verbal
actually it is a particular mode of the earth element caused by citta coming together with the
matter in the vocal chords. That is called verbal intimation. For convenience we can just say
intimation. Through speech, through word we make people understand.

In order to understand other people¡¦s intention or the meaning of words we need two condit
hear the words. Second we must have known the meaning of the words before. Only when t
met, will there be understanding. That is why when you speak quickly, I do not understand y
I do not hear the words distinctly. Sometimes you may use a word which I do not know the m
not understand you. There are two conditions. The words or voice must come into the avenu
must hear clearly. The other condition is that you must have known the meaning of the word
understand. Otherwise you do not understand. If I say a word in P??i, then you may not und
hear the word distinctly. You may not know this word, so you do not understand. So just by h
sound or a voice cannot make us understand.

The verse in the second part in footnote 27 is not translated correctly. The first two lines are

¡§Sounds that have entered no objective field
Do not awaken any kind of meaning.¡¨

Sounds which we do not hear will not make us understand any meaning at all. The third and
correct. Venerable ???amoli misunderstood one word in the P??i original. That word is satt?
¡¥A¡¦ as a long ¡¥?¡¦. The word ¡¥satta¡¦ with a short ¡¥A¡¦ means a being, like Bodhisatta. ¡¥
being. ¡¥Satt?¡¦ with the second ¡¥?¡¦ long means the state of being or the state of being pre

existent, being present. That is the word used in this verse, not satta. That means ¡¥not just present will these sounds or words make us understand¡¦. That means we may hear the wor learned the meaning of the words before, we will not understand. This is verbal intimation. T so difficult to understand. These two (bodily intimation and verbal intimation) are said to be c citta.

Student: so in the last two lines of the verses, it would be ¡¥words merely recognized¡¦ or so that?

Teacher: ¡¥If their meaning is not known before-hand, by their presence they cannot make u should be something like that. Let me see. ¡§They will not show any meaning just by their pr if their meaning is not known before-hand.

The next material property is space element or just space. In paragraph 63 ¡§The space ele characteristic of delimiting matter.¡¨ ¡¥Delimiting matter¡¦ really means delimiting a group of r just one material property, but a group of material properties. Material properties arise in gro eight material properties that arise together, or nine, or ten and so on. This space element is between these groups. Between one group and another there is what we call space. That is one group, this is another group, this is still another group. That is called space. So ¡¥delimit does not mean delimiting one material property from another, but delimiting one grouping of another.

Then come three - lightness of matter, malleability of matter, and wieldiness of matter. Thes some qualities of the material properties - lightness, malleability and wieldiness. They are ex paragraph 65. ¡§Lightness of matter is alteration of matter such as any light state in material in one who is healthy.¡¨ So when you are healthy, your body is something like light or agile. lightness of matter in the body.

Malleability of matter is compared to a well-pounded hide. When you want to make leather, salt water, and then you pound it again and again so that it will become soft and malleable. with it whatever you may want. Something like that is called malleability of matter.

The third one (wieldiness) is compared to well-refined gold. People make some ornaments o gold is refined. When gold is well-refined, that is when it is without any other impurity, it beco make into anything you want. Something existing in the body or in matter is called wieldines

These three always arise together. At the beginning of paragraph 65 it says ¡§These three, found apart from each other.¡¨ When there is one, there are the other two. These three are a

of the material properties.

Next we have growth of matter and continuity of matter. You are familiar with the three phas
Right? Arising, continuation and death or disappearing. The phase, arising, is described her
growth of matter and continuity of matter. It is called rebirth here. It is just the arising of matt
arising of matter is divided into two. One is growth of matter. The other is continuity of matte
matter is first arising. Continuity of matter as the word says is ¡¥continuing¡¦. ¡§Continuity of
the characteristic of occurrence.¡¨ It is not occurrence. It is continuing. Is there such a word a
continuance? (Yes, there is.) Or we can just say continuing. It has the characteristic of conti
continuing to exist, not just occurrence. The P??i word can mean to occur, as well as to con
arising. ¡§Its function is to anchor.¡¨ That means to join one with the other.

¡§Both of these are terms for matter at its birth.¡¨ The birth or the arising of matter is called h
the growth of matter and the continuity of matter. Just one birth or arising is described here
names because it is owing to difference of mode. There is a little difference between the gro
the continuation of matter. This is also ¡§according to [different persons¡¦] susceptibility to in
That means there are some beings who will understand better when birth is described as gr
continuity of matter.

It plays an important role at least in explaining why the Buddha taught in this way or why the
in that way. The Buddha always had in mind the susceptibility of the minds of the listeners.
thought ¡§If I use this word will they understand?¡¨ If they were not going to understand, he
another word. That¡¦s why there are many kinds of teachings in the teachings of the Buddha
taught by way of the five aggregates. Sometimes he taught by way of twelve bases. Sometin
of eighteen elements. Actually they are all the same things. They are different names given
thing. Sometimes we may be familiar with one word but not the other. When a familiar word
readily understand. If we are not familiar with the word, then we don¡¦t understand. If we do
we cannot penetrate into the nature of things. Buddha always exercised this -

Student: Buddha took into consideration if people were sharp or fast learners.

Teacher: That¡¦s right, and their likes and dislikes. This is one ability that is not shared even
disciples. Even Venerable S?riputta did not have this ability to enter into the minds of listene
out what would be suitable for them. Once Venerable S?riputta gave the wrong meditation s
student. Here Buddha wanted to teach so that the teaching is susceptible to the listener¡¦s a

¡§The teaching in the Summary (Uddesa) in the Dhammasa?gan? is given as ¡¥growth and
there is here no difference in meaning (That means no difference in reality.), consequently i

(That means a detailed description.) of these words ¡¥the setting up of the sense-bases is th
matter¡¦ and ¡¥the growth of matter is the continuity of matter¡¦.¡¨ This is said in the Dhamma

¡§And in the Commentary, after saying ¡¥It is genesis that is called ¡§setting up¡¨, increase t
¡§growth¡¨, occurrence that is called ¡§continuity¡¨.¡¦¡¨ So here three terms are given - setting
and continuity. Then a simile is given here. ¡§Genesis as setting up is like the time when wa
hole dug in a river bank (So when water comes up that is genesis.); increase as continuity is
when it fills [the hole]; occurrence or continuity is like the time when it overflows.¡¨ These are
similes to understand the two phases of one arising or one birth of material property - growth
continuity of matter.

According to this there will be four kinds of matter which will be called characteristic matter.
are different phases of matter - the arising, the continuance and disappearing. These two (g
continuity) are called arising.

Next we have aging in paragraph 68. ¡§Aging has the characteristic of maturing (ripening) m
instances.¡¨ This is getting old. This is the continuing phase of existence - arising, continuing
disappearing. It corresponds to the second phase. ¡§This is said with reference to the kind o
evident through seeing alteration in teeth, etc., as their brokeness, and so on.¡¨ Three kinds
given - evident aging, hidden aging, and incessant aging. Evident again is aging which is ev
see someone with broken teeth or someone with eyeglasses maybe. Then we know that per
immaterial states there is no such evident aging. We cannot see the brokeness of cittas and
them it is called hidden aging, that is aging which cannot be seen by the eyes, but which is s
wisdom or the mind. ¡§And that in earth, water, rocks, the moon, the sun, etc., is called inces
¡¥Incessant aging¡¦ is also a hidden aging. This book looks new for one month, two months
if you don¡¦t use it much. There is aging going on, but we do not see it getting old or aged. S
earth, water and so on is also hidden aging, but here it is called incessant aging. There is no
difference between one stage and another. Here by aging is meant the aging of material pro
immaterial states. The last one is impermanence of matter. That means the death of matter,
of matter. ¡§Impermanence of matter has the characteristic of complete breaking up.¡¨

The last one is physical nutriment. ¡§Physical nutriment has the characteristic of nutritive ess
then ¡§Its proximate cause is a physical basis that must be fed with physical food.¡¨ Here als
translation is a little inaccurate. The P??i word is kabil?k?ra. ¡¥Kabala¡¦ means a morsel. ¡¥k
means making a morsel. That means before you eat you make a morsel if you eat with your
morsel and then put it in the mouth and eat it. Food is called kabil?k?ra in P??i. Food which
making it into a morsel is the meaning. ¡§Its proximate cause is a physical basis¡¨ - here ¡¥b
good word. The P??i word is vatthu. ¡¥Vatthu¡¦ can mean a base, like eye-base, ear-base an

¡¥vatthu¡¦ can also mean a thing, just something. Here ¡¥physical basis¡¦ just means a mater
must be swallowed after being made a morsel. This is the word used in P??i. It is simply just
the food. The food itself is not the physical nutriment that is meant. Physical nutriment is sor
food, something which helps us destroy hunger and so on. That nutritive essence is what is
physical nutriment, not the food itself. The proximate cause is the food we eat because we g
from the food that we eat.

These are all together the 28 material properties. If you count them, you will get 28. There a
elements and 24 dependent ones, so all together 28. ¡§These, firstly, are the material instan
been handed down in the Texts. But in the Commentary others have been added as follows
matter as procreation, matter as birth, matter as sickness: and in the opinion of some, matte
Sloth and torpor are two mental factors included in the formation aggregate. But there were
took it to be matter. So it is mentioned here. ¡§In the first place, matter as torpor is rejected a
non-existent by the words:

¡¥Surely thou art a sage enlightened,
There are no hindrances in thee¡¦.¡¨

The common opinion is that torpor is not matter. There were some teachers belonging to an
the Therav?da sect who took torpor to be matter. That is rejected as non-existent. There is n
matter. The proof that they show is the Buddha¡¦s words:

¡§Surely thou art a sage enlightened,
There are no hindrances in thee.¡¨

These two lines state that there are no hindrances in the mind of the Buddha. Torpor is inclu
hindrances. In other places especially in Abhidhamma it is said that material properties cann
or cannot be destroyed. Only the mental defilements can be destroyed. When a person beco
eradicates mental defilements. Only the mental defilements can be eradicated and not the m
Here it says that the Buddha had no hindrances and torpor is included among the hindrance
eradicated. If it can be eradicated, it is not r|pa. It is not a material property.

¡§As to the rest, matter as sickness is included by aging and by impermanence; matter as bi
continuity; matter as procreation, by the water-element (because when there is water eleme
and mother as power by the air element. So taken separately not even one of these exists: t
agreement reached.¡¨ This was the agreement of the majority of teachers.

¡§So this derived (dependent) matter of 24 parts and the aforesaid matter of the primary ele
four sorts, together amount to 28 sorts, neither more nor less.¡¨ These are the 28 material pr

Then they are described as of one kind, two kinds and so on. ¡§And all that [matter of 28 sor
kind as ¡¥not-root-cause, root-cause-less, dissociated from root-cause, with conditions, mun

cankers.¡¨ According to this there is only one kind of material property. Although we are all d
people, as human beings we are one. It is like that. Although there are 28 material propertie
root cause, or as having conditions, or as being mundane, then there is only one r|pa, one m

Then they can be two. ¡§It is of two kinds as internal and external, gross and subtle, far and
(produced by four causes - kamma, consciousness, temperature, nutriment) and unproduce
insensitive matter, faculty and non-faculty, clung-to and not-clung-to, and so on.¡¨ ¡¥Clung-to
by kamma. ¡¥Not-clung-to¡¦ means not caused by kamma. Then the detailed explanation of
and so on is given. They are not difficult if you have a list ready at hand. Read this paragrap
list and you will understand easily.

At the end of paragraph 73 ¡§What we shall later describe as ¡¥kamma-born¡¦ is clung-to be
¡¥clung-to¡¦, [that is, acquired], by kamma.¡¨ I think instead of saying ¡¥acquired¡¦, we should
by kamma¡¦. Literally it is clung-to by kamma. ¡¥Clung-to by kamma¡¦ or ¡¥grasped by kamm
kamma and its object. That simply means caused by kamma.

¡§Again, all matter is of three kinds according to the ¡¥Visible (sanidassana)¡¦ triad, the kam
etc. Herein, as regards the gross, a visible datum is visible with impact; the rest are invisible
all the subtle kinds are invisible without impact.¡¨ There are three kinds of material properties
with impact, invisible with impact and invisible without impact. Visible with is only one which
datum, that is visible object. The rest are all invisible with impact. All the subtle kinds are inv
without impact. ¡¥Gross¡¦ and ¡¥subtle¡¦ are explained in paragraph 73 above.

¡§According to the ¡¥kamma-born¡¦ triad, etc., however, that born from kamma is kamma-bo
difficult to understand - kamma-born, not kamma-born, neither-kamma-born-nor-not-kamma
for consciousness, nutriment and temperature.

Paragraph 76 ¡§Herein, the visible-data base is seen because it is the objective field of seei
object of seeing. Visible-data base is called seeing. ¡§The sound base is heard because it is
field of hearing. The three, that is to say, odors, flavors, and tangible data, are sensed (litera
contacted) because they are the objective fields of faculties that take contiguous [objective f
rest are cognized because they are the objective field of consciousness only. So firstly it is
according to the ¡¥seen¡¦, etc., tetrad.¡¨

In footnote 32 there is a discussion of whether the water element can be touched. ¡§Is not c
touching?¡¨ Do you think so? ¡§And is that the water element? Certainly it is apprehended, b
water element. What is it then? It is just the fire element (or temperature). For there is the se
cold when heat is sluggish.¡¨ When there is little temperature we say that it is cold. When the

rises, we say that it is hot. Cold and hot are just variations in temperature. That is not the wa

¡§There is no quality that is called cold; there is only the assumption of coldness due to the s
the state of the sensation of cold, like ¡¥¡¦.¡¨ ¡¥Beyond and not beyond¡¦ is not a correct rend
should be ¡¥this bank and the other bank¡¦. When we are on this bank, we call the other, ¡¥th
When we cross over to the other bank, this bank becomes ¡¥the other bank¡¦ and the other b
bank¡¦. When the temperature is low, we call it cold. When the temperature has risen, we ca
and cold are relative terms. ¡§For in hot weather while those who stand in the sun and go int
the sensation of cold, yet those who go to the same place from an underground cave have t
heat.¡¨

¡§And if coldness were the water element it would be found in a single group along with hea
found.¡¨ If coldness is water element then it must co-exist with heat. But heat and cold do no
is not water element because there are four elements everywhere. ¡§That is why it may be k
ought to say ¡¥it should be known¡¦) that coldness is not water element. And that is conclusiv
agree in the inseparable existence of the primary elements; and it is conclusive too even for
agree because it is disproved by associate existence¡¨ and so on. That is difficult to understa
conclusive too for those who say that coldness is the characteristic of the air element; for if c
the air element, coldness would be found in a single group along with heat, and it is not so fo
the same argument.

¡§But those who hold the opinion that fluidity is the water element and that that is apprehend
should be told: That fluidity touched is merely the venerable ones¡¦ assumption as is the cas
We think that we see the shape. We see something and we think that we see the shape. Wh
visible object there. Shape we do not see, but we think that we see. In other words we see th
minds and not with our eyes. What we see is just visible data.

¡§Three elements coexisting with fluidity
Together form what constitutes a tangible;
That I succeed in touching this fluidity
Is a common misconception in the world.¡¨

So you put your hand in the water and you say that it is cold. Then you think that you can tou

¡§And as a man who touches elements,
And apprehends a shape then with his mind,
Fancies ¡¥I really have been touching shape¡¦,
So too fluidity is to be understood.¡¨

So you pick up a pencil and you think that you touch the shape of the pencil. What you touch
of the pencil, but the material properties of the pencil. So water element cannot be touched.

and think of as water element is not actually water element, but is the fire element (heat or c

Paragraph 78, one word is missing in my book. ¡§Here, however, what is called the material physical basis, not door.¡¨ Heart-base is basis but not door. ¡§The two intimations are door, basis.¡¨ The two intimations are said to be doors because they are those through which we c body and kamma by speech. So bodily intimation and verbal intimation are said to be doors read this in the fifth chapter of The Manual of Abhidhamma. They are doors, but not physica vatthu. We should say that they are doors, but not physical basis. ¡§Sensitive matter is both and door (like eye sensitivity, ear sensitivity and so on); the rest are neither physical basis n there are four kinds. Then there are five kinds, born of one, born of two and so on.

At the beginning of paragraph 80 ¡§That is all the rest except ¡¥matter as characteristic¡¦. Bu characteristic¡¦ is called not born of anything.¡¨ ¡¥Matter of characteristic¡¦ means the four m paragraph 66 - growth of matter, continuity of matter, aging and impermanence of matter. Th to be not born of anything, not caused by anything. ¡§Why? Because there is no arising of a other two are the mere maturing and breaking up of what has arisen.¡¨ That means they are phases of the material properties which have arisen. Actually they are not separate material they are not said to be caused by anything. ¡¥Anything¡¦ refers to kamma, consciousness, te nutriment.

¡§Though in the passage ¡¥The visible data base, the sound base, the odor base, the flavor data base, the space element, the water element, lightness of matter, malleability of matter, matter, continuity of matter, and physical food - these states are consciousness originated¡¦. an Abhidhamma Text. In the Abhidhamma it is said that the growth of matter and the continu caused by or are originated by consciousness. Likewise in other passages where they are s kamma and so on.

So what about that? The answer is that they are not caused by anything, but they are evider functions of kamma and so on are said to still be existing. Suppose there is relinking or rebir first sub-moment of rebirth there is kamma-born matter. Kamma is always concerned about Only after it has produced something will it give up this concern . It is concerned with produc the very moment of arising its concern has not yet disappeared. And birth or these two (grov continuity of matter) are seen at that moment. That is why they are said to be caused by kar on, although, in fact, they are not caused by anything. They are said to be caused by kamm exercising of the function of kamma is still there. Kamma¡¦s concern for producing material p exercised at the moment of genesis or at the moment of arising. That is why they are said to kamma. With regard to citta it is the same thing.

Then we come to consciousness aggregate (vi????a khandha). ¡§Among the remaining agg
has the characteristic of being felt should be understood all taken together, as the feeling ag
is not ¡¥being felt¡¦, but ¡¥feeling¡¦. He misunderstood the word. The P??i word is ¡¥vedayita
like a passive past participle here. It is something like a verbal noun. It is not ¡¥that which is
¡¥that which feels¡¦ or just ¡¥feeling¡¦. Here the word ¡¥vedayita¡¦ means feeling. If you know
you will understand that. The suffix ¡¥TA¡¦ is added to mean the passive. So here ¡¥vedayita
which is felt, but here it is used in the sense of just ¡¥feeling¡¦, not ¡¥being felt¡¦. So it should
characteristic of feeling should be understood, all taken together, as the feeling aggregate.¡¨
feeling aggregate is that which has feeling as characteristic and not that which is felt. If it is f
must be another feeling. Feeling is explained here in the Sub-Commentary as experiencing
That is what we call feeling. We can say enjoying the taste of objects.

Now we have the aggregate of consciousness. The aggregate of consciousness is describe
order given in the original Abhidhamma Texts. This order is different from the order we are f
because we are familiar with the order given in The Manual of Abhidhamma. The order in Th
Abhidhamma is different from the order given in the original Abhidhamma Texts. The Visudd
order given in the original Abhidhamma Texts. That is why I have made these notes. This ch
the dots, but just the numbers are given so you can pinpoint it. There is also a handout show
the citta in The Path of Purification and in The Manual of Abhidhamma.

Student: Thank you.

Teacher: The numbers given in the book are different from the numbers given in The Manua
us read paragraph 83. ¡§Herein, 1-8 that of the sense-sphere is eightfold, being classified ac
equanimity, knowledge, and prompting; that is to say: (1)¡¨ - this # 1 given in this book is # 3
chart. Now you can identify it. Then # 2 in The Path of Purification is # 32 in this chart. It can
identify the cittas.

The plan of the types of consciousness given in The Path of Purification is done according to
the original Abhidhamma Texts. They are classified in this way: First there is kusala. Second
akusala. Third there is aby?kata. There are these three major divisions - kusala (wholesome
(unwholesome), and aby?kata (indeterminate). Then kusala is divided into k?m?vacara (bel
sense-sphere), r|p?vacara (belonging to form-sphere), ar|p?vacara (belonging to immaterial
lokuttara (supramundane). Akusala is divided into three - lobham|la (That is cittas accompan
attachment), dosam|la (cittas accompanied by dosa or having dosa as a root), and moham|l
English translation in The Path of Purification. On the handout I gave the paragraph number
them easily in the book. Aby?kata is the most comprehensive. Aby?kata is divided into vip?k
kiriya (functional). Then vip?ka is subdivided into k?m?vacara vip?ka, r|p?vacara vip?ka, ar|

lokuttara vip?ka. K?m?vacara vip?ka is divided into kusala vip?ka and akusala vip?ka. Then
divided into ahetuka (without root) and sahetuka (with root). This is the plan. Then kiriya is d
k?m?vacara, r|p?vacara, ar|p?vacara. K?m?vacara kiriya is divided into ahetuka and sahetu
given in The Path of Purification.

There are all together 89 types of consciousness explained in this chapter, not 121. 89 and
because the 8 types of supramundane consciousness when we multiply by the 5 jh?nas, we
supramundane. Then the number of cittas becomes 121. If we take supramundane conscio
get 89 types of consciousness. These 89 types of consciousness are described in this book

In footnote 35 there is a discussion about the words n?ma, vi????a, mano, citta and ceto. T
¡§While their etymology can be looked up in the dictionary, one or two points need noting he
by ¡¥mentality¡¦ when not used to refer to a name) is almost confined in the sense considere
expression n?ma-r|pa (mentality-materiality) as the fourth member of the Dependent Origina
comprises the three mental aggregates of feeling, perceptions, and formations, but not that
(vi????a).¡¨ I cannot agree with the word ¡¥almost¡¦ here. ¡¥N?ma¡¦ means the three mental
says here, only when it is used in the Dependent Origination. If it is used as a link in Depend
Origination, ¡¥n?ma¡¦ means feeling, perception and mental formations. In other places ¡¥n?
and cetasikas both, not cetasikas only. So I do not like ¡¥almost¡¦ here. Maybe ¡¥is sometim
better, not ¡¥almost¡¦ but ¡¥sometimes¡¦. Only when given as a link of Dependent Originatio
If you go to Chapter 18 paragraph 8 it says ¡§the immaterial states¡¨. ¡¥Immaterial states¡¦ ju
It is described as: ¡§That is to say, the 81 kinds of mundane consciousness consisting of the
consciousness¡¨ and so on. ¡¥N?ma¡¦ means both consciousness and mental factors. In and
is said that ¡¥n?ma¡¦ also means includes Nibb?na. Nibb?na is also called ¡¥n?ma¡¦ althoug
Nibb?na is something different than mentality and materiality. In P??i it is called n?ma. If yo
to get confused, just leave it alone. Let us take it that ¡¥n?ma¡¦ mostly means consciousness
factors together, but in the Dependent Origination, as the fourth member of Dependent Origi
the word ¡¥n?ma-r|pa¡¦. There ¡¥n?ma¡¦ means only the mental factors. Do you know why?
consciousness above it. Depending on ignorance there are mental formations. Depending o
there is consciousness. And depending on consciousness there is n?ma-r|pa. When we say
consciousness, then n?ma cannot include consciousness. That is why n?ma is made to mea
perception and mental formations in the Dependent Origination. Outside Dependent Origina
means citta and cetasikas together. So n?ma, vi????a, mano, citta and ceto are all synonym
citta. Vi????a means citta. Mano means citta. Citta means citta. And ceto sometimes also m

In footnote 36 there is an explanation of k?m?vacara (sense-sphere). Here there are two kin
It is not that there are two kinds of sense-desire. Let us say there are two kinds of k?ma. Ple
P??i word ¡¥k?ma¡¦. There are two kinds of k?ma. Do you see the word ¡¥vatthu-k?ma¡¦ the

and the other is kilesa-k?ma. ¡¥Vatthu-k?ma¡¦ means objects of desire - sights, sounds, sme
touch. Those are called vatthu-k?ma. ¡¥Vatthu¡¦ here means the thing which is desired. Whe
five things, then the word ¡¥k?ma¡¦ is to be known, in the passive sense, as desired. Someth
desired is called ¡¥k?ma¡¦. When we mean k?ma to mean kilesa-k?ma - ¡¥kilesa¡¦ means m
k?ma is used in the active sense. It is something that desires. So sense-desire is defilement
There are two kinds of k?ma. Whenever we use the word ¡¥k?ma¡¦, we must be sure that we
kilesa-k?ma. So whenever we find the word ¡¥k?ma¡¦, we cannot always translate it as sens
prefer the word ¡¥sense-objects¡¦, the objects of the senses, the objects of desire actually. S
kinds of k?ma - vatthu-k?ma and kilesa-k?ma. ¡§Of these, sense-desire as [objective] basis
the objects.) particularized as the five cords of sense-desire.¡¨ They are called five cords of s
objects. They are simply sight, sound, smell, taste and touch. ¡§Sense-desire is defilement,
desire.¡¨ Here it is the active meaning. ¡§The sense-sphere is where these two operate toge
¡¥Sense-sphere¡¦ means the world of human beings, the four woeful states, and the worlds o
beings. Those planes of existence are the sense-sphere. Both vatthu-k?ma and kilesa-k?ma
what is that? It is the elevenfold sense-desire becoming i.e., hell, Asura demons, ghosts, an
beings, and six sensual-sphere [heavens]. So too with the fine material sphere and the imma
taking ¡¥fine material¡¦ as craving for the fine material sphere¡¨ and so on. These are the exp
r|p?vacara and ar|p?vacara. Lokuttara is explained as something that crosses over from the
called ¡¥lokuttara¡¦ (supramundane). When we find the word ¡¥k?ma¡¦, we must be careful n
translate it as sense-desire. Sometimes it means sense-desire. Sometimes it means sense-
desire.

In paragraph 85 there is an explanation of the word ¡¥sa~kh?ra¡¦. ¡§For in this sense ¡¥prom
for a prior effort exerted by himself, or others.¡¨ When we describe consciousness, we use th
¡¥sa~kh?ra¡¦. It is with sa~kh?ra or it is without sa~kh?ra. The word ¡¥sa~kh?ra¡¦ here mean
effort before doing something. So it has a special sense here. I think you are familiar with the
¡¥sa~kh?ra¡¦. ¡¥Sa~kh?ra¡¦ means those that are conditioned and also those that condition.
particular context ¡¥sa~kh?ra¡¦ means just prior effort. So with effort and without effort - that
prompting and without prompting. This is the definition of the word ¡¥sa~kh?ra¡¦. We should
explanation when we teach Abhidhamma. ¡§In this sense ¡¥prompting¡¦ is a term for a prior
himself or others.¡¨ Then examples of the different kinds of consciousness are given. They a
to understand.

At the end of paragraph 86 ¡§The fifth is associated with equanimity.¡¨ ¡¥Equanimity¡¦ here m
feeling. You know there are pleasant feeling, unpleasant feeling and neither pleasant nor un
The third one is called ¡¥neutral feeling¡¦ (upekkh?). The word ¡¥upekkh?¡¦ can mean neutra
equanimity. Here ¡¥upekkh?¡¦ means neutral feeling, neither somanassa nor domanassa.

The numbers are given here. When you see the numbers, you can check with the handouts
sheet if you are already familiar with the dots.

Paragraph 91 ¡§When a man is happy and content in placing wrong view foremost of the so
no danger in sense-desire¡¦¡¨ and so on. I want to strike out the word ¡¥in¡¦. He is not happy
wrong view foremost. He is happy and he is content, and he places wrong view foremost in
with wrong view he does something. It should be ¡§When a man is happy and content, and
foremost¡¨ and so on. The word ¡¥in¡¦ is not needed here. Towards the bottom of the paragra
consciousnesses are devoid of joy in these four instances through encountering no excellen
sense-desires¡¨ - here it should be sense-objects, not sense-desires. It should be sense-obj
sense-desire.

Paragraph 96 ¡§Herein, eye-consciousness has the characteristic of being supported by the
visible data. ¡§Herein, eye consciousness has the characteristic of being supported by the e
visible data. Its function is to have only visible data as its object.¡¨ That means eye consciou
sees the visible object. When it sees, it just sees it. It does not see it as blue or that it is red
whatever. The eye consciousness sees the object just as a visible object. We know that it is
green, by manodv?ra (by mind -door), by mind-door thought process, not by eye-door thoug
why it is said that it sees only visible data and not shape and so on. ¡§It is manifested as occ
visible data.¡¨ Let us go to paragraph 107 ¡§It is manifested as confrontation of visible data.¡
words are used. Here it does not say ¡¥occupation¡¦. It is being faced with visible data or cor
visible data, not occupation with visible data. ¡§Its proximate cause is the departure of (That
disappearance of.) the functional mind-element that has visible data as object.¡¨

In order to understand these passages you have to understand at least the thought process
Abhidhamma class I talked about the thought processes. If you have notes from that class,
first thought process. Then read these passages. Because here the eye consciousness its p
departure of the functional mind-element that has visible data as its object. That means that
before consciousness is pa?cadv?r?vajjana. The disappearance of that functional mind-eler
five-door-adverting is the proximate cause for eye consciousness. If the functional mind-eler
disappear, then the eye consciousness cannot arise. Functional mind-element disappears s
consciousness can arise. Functional mind-element disappears so that eye consciousness ca
disappearance of functional mind-element is the proximate cause for eye consciousness. It i
you being in a line. The disappearance of the man before is the proximate cause for your be

Then there is the mind-element as receiving or accepting and so on. And then beginning in
modes or the 14 kinds of functions are explained. These 89 types of consciousness have dif
Some kinds of consciousness have one function only, but others may have two functions, fiv

on. These 14 functions performed by different types of consciousness are explained beginni
110. To understand these functions also you need to have a diagram of the thought process
diagram of the thought process, you may read these passages and you will understand ther

In paragraph 111 about seven lines down ¡§entering upon the state of eunuchs¡¨ - that mear
eunuchs. ¡¥Entering upon the state of¡¦ means being reborn as.

Then in footnote 42 the third line ¡§ ¡¥Sign of kamma¡¦ is the gift to be given that was the co
volition¡¨ and so on. After ¡¥given¡¦ please add ¡¥etc.¡¦. ¡§The gift to be given, etc., that was
for the volition.¡¨

Footnote 44 ¡§ ¡¥With that same object¡¦: if kamma is the life-continuum¡¦s¡¨ - it is a mistake.
relinking¡¦s, not life-continuum¡¦s. It is relinking or rebirth. ¡§If kamma is the relinking¡¦s objec
it is that kamma¡¨ and so on.

These 14 modes or 14 functions are explained one by on. In paragraph 123 there is a sayin
life-continuum consciousness of all in one becoming is called ¡¥death (cuti)¡¦ because of fall
[becoming].¡¨ In one given life relinking, life-continuum and death are all the same type of co
Actually relinking consciousness is a resultant consciousness. This consciousness repeats i
the life. After the first moment of arising as relinking, it is called ¡¥life-continuum¡¦. At the end
also that type of consciousness arises. We call that ¡¥death consciousness¡¦ or ¡¥cuti¡¦. In o
the relinking, life-continuum and death consciousness are all the same types of consciousne
is said here ¡§For the last life-continuum consciousness of all in one becoming is called ¡¥de
last life-continuum is what we call ¡¥death¡¦. These three kinds of consciousness are just on
kinds of consciousness.

OK. When I taught Abhidhamma the chapter on citta took me how many talks? Six or sever
doing in one hour. Next week we will go to about paragraph 185. Do you have the notes fro
class. Next week we will have the description of the mental states. If you have those notes w
good.

S?dhu! S?dhu! S?dhu!

(Tape 31 / Ps: 125 ¡V 184)

Last week we finished consciousness aggregate. Today we begin with feeling aggregate. Pa
was said above, ¡¥Whatever has the characteristic of being felt (Here also ¡¥being felt¡¦ shou
to feeling.) should be understood, all taken together, as the feeling aggregate¡¦.¡¨ I told you l

Venerable ???amoli misunderstood the word ¡¥vedayita¡¦. He took it as a passive past partic
a passive past participle. It is a verbal noun here. The word ¡¥vedayita¡¦ simply means feelin
see the words ¡¥being felt¡¦ or ¡¥felt¡¦ change to feeling. ¡§And here, too, what is said to have
characteristic of feeling (not ¡¥being felt¡¦) is feeling itself, according as it is said ¡¥It feels¡¦ (
¡¥is felt¡¦), friend, that is why it is called ¡¥feeling¡¦.¡¨ We have to take the active voice. In the
paragraph also ¡§But though it is singlefold according to its individual essence as the charac
feeling, it is nevertheless threefold as to kind¡¨ and so on.

They are profitable, unprofitable and indeterminate. This is the division found in the first boo
Abhidhamma. The Commentator, the Venerable Buddhaghosa, is following that division. Sin
divided into profitable, unprofitable, and indeterminate, feeling too is so divided. ¡§Herein, it
understood that when associated with the profitable consciousness described in way beginn
sense-sphere is eightfold, being classified according to joy, equanimity, knowledge and pron
profitable.¡¨ Then we find a footnote. ¡§This should be regarded as a secondary characterist
feeling.¡¨ Here also there is a misunderstanding of the word ¡¥upalakkha?a¡¦. ¡¥Lakkha?a¡¦ m
characteristic and ¡¥upa¡¦ can mean secondary or subordinate. But here ¡¥upalakkha?a¡¦ me
stating of the fact. The statement that ¡¥when it is associated with profitable consciousness,
profitable¡¦ is just a statement of fact; it is not giving a reason for it being profitable. It is desc
in the Sub-Commentary by the word ¡¥upalakkha?a¡¦. Sometimes ¡¥upalakkha?a¡¦ means s
say only one thing but other things are meant. We may say that the president visited San Fr
president does not come alone. He comes with other people too, but we just say that the pre
city. It is something like that. It is called ¡¥upalakkha?a¡¦. It is not a secondary characteristic.
kind of figure of speech often used especially by Commentators. Here it is not an explanatio
being profitable, but it is just stating the fact. As is stated in the footnote, its being profitable
unprofitable is determined by right reflection or wrong reflection. ¡§That associated with unpr
consciousness is unprofitable; that associated with indeterminate consciousness is indeterm
always accompanies consciousness. Every type of consciousness is accompanied by feelin
is divided into three (profitable, unprofitable, and indeterminate), feeling is also divided acco

¡§It is fivefold according to the analysis of its individual essence into [bodily] pleasure, [bodily
[mental] joy, [mental] grief, and equanimity.¡¨ Here there are five kinds of feelings. The first c
(bodily pleasure). Bodily pain is dukkha. Mental joy is somanassa. Mental grief is domanass
is upekkh?. There are five kinds of feelings.

¡§Herein, pleasure is associated with profitable resultant body consciousness and pain with
consciousness¡¨ and so on. If you have the chart for consciousness from last week, you may
read it. The numbers given here are different than those on the chart for cittas. You may loo
handout and determine what they are. It will take much time if we check every statement wit

you have to do it yourself.

¡§Joy is associated with 62 kinds of consciousness.¡¨ That means somanassa 62, in our cha
are ¡§namely as to sense-sphere, with 4 kinds of profitable, with 4 resultant with root-cause,
resultant without root-cause, with 4 functional with root-cause, with one functional without ro
with 4 unprofitable; and as to fine material sphere, with 4 kinds of profitable, 4 resultant, and
functional, leaving out that of the fifth jh?na in each case.¡¨ The fifth jh?na is accompanied b
(equanimity or indifferent) feeling. The fifth jh?na is left out of these 62.

¡§But there is no supramundane without jh?na and consequently the [eight] kinds of supram
the five jh?nas make forty.¡¨ This is where the 40 types of supramundane consciousness are
description of the consciousness aggregate the Commentator did not say that there are 40 t
consciousness. The Commentator mentions 8 - 4 Path consciousness and 4 Fruit conscious
40 types of supramundane consciousness. There are 8 supramundane consciousness and
the 5 jh?nas. So they become 40. Among the 40 the first, second, third and fourth jh?na con
accompanied by joy. The fifth jh?na is accompanied by equanimity or indifferent feeling.

Grief is associated with two kinds of unprofitable consciousness. That the dosam|la, those a
among the akusala cittas (the unwholesome consciousness).

Equanimity is associated with the remaining 55 types of consciousness, that is the blue dots
you have a chart with color, then it is easy. Red dots represent somanassa. Blue dots repres
crosses - the red cross represents bodily pleasure and the blue cross represents bodily pain
represent mental grief.

Now we come to the characteristic, etc., of these five kinds of feeling paragraph 128. ¡§Plea
characteristic of experiencing a desirable tangible datum (That is something that can be touc
function is to intensify associated states. It is manifested as bodily affliction. Its proximate ca
body faculty.¡¨ ¡¥Body faculty¡¦ simply means body sensitivity. From when we studied the co
aggregate I think you remember there are five sensitivities - eye, ear, nose, tongue, and boc
Body sensitivity is here called ¡¥body faculty¡¦. It is the same thing.

¡§Pain has the characteristic of experiencing an undesirable tangible datum.¡¨ That is when
the body. When you hit yourself with something or when someone hits you, there is pain in t
function is to intensify associated states.¡¨ When there is pain, your mind and your mental st
withered. They are not happy. ¡§It is manifested as bodily affliction.¡¨ When you look at it thr
meditation, then you see it as bodily affliction. Its proximate cause again is the body sensitiv

¡§Joy has the characteristic of experiencing a desirable object.¡¨ This is somanassa. It is in t
mental joy. ¡§Its function is to exploit in one way or another the desirable aspect.¡¨ I want to
or not the word ¡¥exploit¡¦ has a bad meaning or does it also have a good meaning?

Students: In modern times it mostly has a bad meaning. It means that someone takes advar
also can mean to make good use of.

Teacher: It is used in the good sense here, not the bad sense. So it fully enjoys. ¡§It is mani
mental affliction. Its proximate cause is tranquillity.¡¨ Joy comes from tranquillity.

¡§Grief has the characteristic of experiencing an undesirable object. Its function is to exploit
another the undesirable aspect.¡¨ Undesirable aspect - we cannot use the word ¡¥enjoy¡¦ he
experiences the undesirable aspect thoroughly. ¡§It is manifested as mental affliction. Its pro
invariably the heart-basis.¡¨ These two types of consciousness associated with domanassa
of the sensual sphere. So it always depends on the heart-base.

Equanimity - ¡¥equanimity¡¦, here means neutral feeling or indifferent feeling. ¡§Equanimity h
characteristic of feeling neutral¡¨, not ¡¥being felt as neutral¡¦. Not feeling pleasure, not feeli
displeasure, feeling the middle feeling is what is meant. ¡§Its function is not to intensify or wi
associated states. It is manifested as peacefulness. Its proximate cause is consciousness w
That is because if there is happiness there can be no indifferent feeling. Its proximate cause
consciousness that is not accompanied by somanassa.

In footnote 56 it is explained why the dvipa?cavi????a other than those associated with bod
only indifferent feeling accompanying them and the others that are associated with bodily fe
accompanied by pleasure and displeasure. This is a good explanation when you talk about t
consciousness. ¡§Just as when a man places a piece of cottonwool on an anvil and strikes i
hammer, and his hammer goes right through the cotton and hits the anvil, the violence of th
so too because the violence of the impact¡¦s blow is great, body consciousness is accompar
the object is desirable or desirable-neutral one, and by pain when the object is an undesirab
undesirable-neutral one.¡¨ Here there is an anvil, cottonwool and a hammer. So there are th
When someone hits you, there are the great elements. What shall I say? There is body sen
data or those that can be touched. Those that can be touched, what are they? The three gr
three great elements are what we call ¡¥touch¡¦. When these hit against the body sensitivity,
the cottonwool here, because of the impact, the great elements upon which the body sensiti
are great elements. On these great elements body sensitivity depends. There are great elem
sensitivity and tangible data which is the combination of the three great elements. When the
strikes against body sensitivity, it goes through bodily sensitivity and reaches the great elem

it. It is like great elements hitting great elements. It is like the hammer hitting the anvil. The i
strong. And so when the object is pleasurable or pleasurable-neutral, there is sukha. When t
displeasurable or displeasurable-neutral, there is dukkha. There can be no upekkh? here wi
sensitivity. With regard to seeing consciousness and so on there is only upekkh?. You may
consciousness and so on are accompanied by indifferent feeling and not by pleasurable or d
feeling. That is at the very moment of seeing, hearing and so on. That is because the visible
are depending r|pa. Visible object is not one of the great elements. So when visible object st
eye sensitivity which is again a depending one, it is like a ball of cotton striking another ball o
The impact is not so great. It does not go through the cotton ball to the anvil. So here it is a s
striking a soft sensitivity. The impact is not so great. Whether the object is desirable or unde
feeling is always indifferent feeling. This explanation is given by the Sub-Commentary here.

The next aggregate is the perception aggregate. There is nothing difficult here about percep
have talked about perception. ¡§whatever has the characteristic of perceiving should be und
together, as the perception aggregate¡¨ and so on. It is also divided into profitable, unprofital
indeterminate. Perception accompanies all types of consciousness. Wherever there is consc
perception. Its characteristic, etc., are given. What is its characteristic? Perceiving. ¡§Its func
make a sign as a condition for perceiving again that ¡¥this is the same¡¦, as carpenters, etc.¡
case of timber, and so on. It is manifested as the action of interpreting by means of the sign
apprehended.¡¨ That means it may be apprehended rightly or wrongly. If it is apprehended w
interpretation will depend upon that wrong apprehension and so the conclusion will be wrong
men seeing the elephant. ¡§Its proximate cause is an objective field in whatever way that ap
perception that arises in fawns that see scarecrows as men.¡¨ These animals think they are
fact they are seeing scarecrows.

Then we come to the formation aggregate. The formation aggregate is important and has m
word is sa~kh?ra khandha (formation aggregate). ¡¥Sa~kh?ra¡¦ here means just that which
characteristic is forming that which has the characteristic of agglomerating. It is just forming
together. ¡§What is that? It is formations themselves, according as it is said ¡¥They form the
bhikkhu, that is why they are called ¡¥formations¡¦.¡¨

¡§They have the characteristic of forming. Their function is to accumulate. They are manifes
intervening.¡¨ It may be better to say ¡¥activeness¡¦ instead of ¡¥intervening¡¦. You will see th
¡¥vipph?ra¡¦ in footnote 58. Vipph?ra is explained in the Sub-Commentary by vy?p?ra. ¡¥Vy
activeness, being active. ¡¥Intervening¡¦ really means being active. They are manifested as
active. ¡§Their proximate cause is the remaining three [immaterial] aggregates.¡¨ That is bec
with the other three immaterial aggregates (consciousness aggregate, feeling aggregate, pe

Please bear in mind that consciousness is always accompanied by mental factors. These fo
aggregates always arise together, that is consciousness aggregate, feeling aggregate, perc
some of the formation aggregate. When one is taken as the principle thing, then the others b
proximate cause. ¡¥Cause¡¦ here means condition. They are profitable, unprofitable and inde

Then the 52 cetasikas are mentioned here following the order given in the first book of Abhid
Dhammasa~ga?? first consciousness is mentioned. Buddha said that with this consciousnes
arise - contact arises, volition arises and so on. Following that, the description is given in this

First we find kusala here, right? ¡§Herein, firstly, those associated with the first sense-sphere
consciousness (That means the first k?m?vacara kusala.) amount to 36, that is to say, the c
are 27 given in the Texts as such, and the 4 ¡¥or-whatever-states¡¦, and also the 5 inconstan
to understand these three - constant ones, or-whatever-states, and inconstant ones. ¡¥Cons
ones that always accompany the consciousness assigned to them. The most obvious one is
contact accompanies this type of consciousness, it always accompanies that type of conscio
Such mental states are called ¡¥constant¡¦. ¡¥Inconstant¡¦ means they may or may not asso
certain consciousness. For example let us say compassion. Compassion accompanies som
but only when you practice compassion will compassion arise in your mind, not at other time
compassion, it will arise in your mind. If you do not arouse it, then it will not arise. Such men
are called ¡¥inconstant¡¦. Although they are said to accompany a certain type of consciousne
accompany that type of consciousness every time it arises, only sometimes. Envy (issa) is s
inconstant. Only when you envy other people¡¦s success is there envy in you. Otherwise it w
that type of consciousness. Such mental factors are called ¡¥inconstant¡¦. Do you remember
The Manual of Abhidhamma? Fixed adjuncts and unfixed adjuncts. In the manual you will fi
unfixed adjuncts. Here the words ¡¥constant¡¦ and ¡¥inconstant¡¦ are used. They mean the s

The other one, or-whatever-states, is important. When the Buddha described the mental sta
certain type of consciousness, he did not give all the mental states. He gave most of the me
by one, by name. Let us say the consciousness is accompanied by 36 mental states. He wo
states one by one, by name. Then he would say there are some others also that accompani
All those are called kusala or all those are called akusala and so on. The words used in the
are in footnote 59. ¡§Ye v? pana tasmim samaye a??e pi atthi pa?icca-samuppan? ar|pino d
Some of those mental states are not mentioned by name, but they are mentioned by the wo
They are called ¡¥yev?panaka¡¦ in P??i. It is translated as ¡¥or-whatever-states¡¦. I don¡¦t like
¡¥or¡¦ here. Although there is ¡¥v?¡¦ in P??i, it does not mean ¡¥or¡¦ here. It means ¡¥also¡¦. A
there are 36 mental states accompanying the first k?m?vacara kusala citta. After describing
say, the Buddha said that there are others also. So here the P??i word ¡¥v?¡¦ means ¡¥also¡
Maybe ¡¥also other states¡¦ is good. They may be given by name in the list.

So ¡¦27 given as such¡¦ means 27 are given in the Texts by name. Then there are the 4 wha
the 5 inconstant ones. If you look at the list, they are well divided. The 4 whatever-states are
desire, resolution, attention and specific neutrality. The 5 inconstant ones are compassion, g
abstinences from bodily misconduct, abstinence from verbal misconduct and abstinence fro
These five are called ¡¥inconstant¡¦ and the 4 above ¡¥whatever-states¡¦. The others are co
the author describes the characteristic, function, mode of manifestation and proximate caus
them.

The first one is phassa (contact) in paragraph 134. It is contact which is born of convergenc
is visible object, the eye and seeing consciousness. When these three arise, contact also ar
it says because of the convergence of these three contact arises. Contact is seen as someth
of the convergence of these three, the coming together of these three. Its characteristic is to
¡¥Touching¡¦ means mentally touching. ¡§Its function is the act of impingement. It is manifes
concurrence. Its proximate cause is an objective field that has come into focus.¡¨

¡§Although this is an immaterial state, yet it occurs with respect to an object as the act of tou
It is not ¡¥too¡¦ here. We can leave out ¡¥too¡¦ all together or we may substitute ¡¥only¡¦. It is
immaterial, so it does not really touch anything. It really does not come into contact with any
arises, it arises as the act of touching. That is why it is called ¡¥phassa¡¦ in P??i.

In footnote 60 ¡§As the act of touching (not ¡¥too¡¦): by this he shows that this is its individua
even though it is immaterial.¡¨ The examples given here are very good. We experience phas
we come across these instances - ¡§watering of the mouth in one who sees another tasting
mango.¡¨ When one sees another eating something sour, water is produced in our mouth. ¡§
in a sympathetic person who sees another being hurt, the trembling of the knees in a timid m
ground when he sees a man precariously balances on a high tree branch¡¨ - if you watch the
that feeling when the performers are on the high wire. ¡§The loss of power of the legs in one
something terrifying such as a pis?ca (goblin)¡¨ - so when you are afraid, you cannot run. Yo
frozen. That happens to dogs when they have the smell of leopards or when they see leopa
away. They are too afraid. That is the manifestation of phassa (contact).

¡§And [as to its function] although it is not adherent on any one side as eye-cum-visible-obje
ear-cum-sound are, yet it is what makes consciousness and the object impinge.¡¨ I do not un
it is not quite what the original means. What it means here is: although it is not adherent on
it impinges on consciousness and object as does visible object on the eye and sound on the
eye and the ear are said to take objects before they reach them. Like them phassa is not stu
at all. It impinges on consciousness and the object, like visible object and eye, and like soun

¡§It is said to be manifested as concurrence because it has been described as its own action
misunderstood one word. ¡§Because it has been described by way of its cause, namely, the
three.¡¨ You know sometimes there is a difference between a short vowel and a long vowel.
different meaning. You just mispronounce or you read a short vowel for a long vowel, or a lo
short vowel, then you get a different meaning. Here the P??i word used is ¡¥karan?¡¦. ¡¥Kara
cause. When you read it as karana instead of karan?, it means doing. So here he translated
action¡¦. ¡¥Karana¡¦ means doing or action. This is not a correct reading. The correct reading

¡¥The concurrence of the three¡¦ is actually the cause for contact to arise. Concurrence itself
contact. Contact arises through the concurrence of these three, that is the eye, the visible ob
consciousness. Here it is said to be manifested as concurrence. Actually it comes about with
of these three. When these three come together, it arises also.

¡§And it is said to have as its proximate cause an objective field that has come into focus be
automatically through the appropriate [conscious] reaction and with a faculty when the objec
presented.¡¨ So here ¡¥appropriate reaction¡¦ really means appropriate adverting, turning tow
¡¥Faculty¡¦ here means the eye faculty. So it arises on the object without obstruction prepare
though the object is prepared by the adverting and eye faculty. When you see something, th
thought process. Before seeing consciousness there is five-sense-door adverting. The seein
takes the object which is prepared by or which is made ready by the five-sense-door adverti
five-sense-door adverting turns the mind towards the object. So it is said to prepare the obje
moment of consciousness. So it is prepared by appropriate adverting and faculty.

I think I will have to get rid of the ¡¥buts¡¦ today. ¡§It should be regarded as like a hideless co
it is the habitat of feeling.¡¨ We do not need a ¡¥but¡¦ here in this statement. This simile is de
the Sa?yutta Nik?ya. The Buddha said that phassa should be viewed as a hideless cow. Wh
is removed, it is a place for flies, or mosquitoes, or insects to come. In the same way when t
there is vedan? (feeling). It is the place for vedan? or feeling. That is why it is regarded as lik
hideless cow. If you want to read the Sutta, it is Kindred Sayings, volume 2, page 69.

The next one is cetan? (volition). Here also we need to get rid of ¡¥but¡¦. In the fifth line of pa
¡§It is evident when it occurs in the marshaling (driving) of associated states in connection w
work, remembering and so on.¡¨

¡§What should be said about applied thought, sustained thought and happiness, has already
commentary on the first jh?na in the description of the earth kasi?a.¡¨ They are explained in

Then we come to viriya (energy). ¡§Its characteristic is marshaling (driving). Its function is to
conascent states. It is manifested as non-collapse. Because of the words ¡§Bestirred, he str
its proximate cause is a sense of urgency; or its proximate cause is grounds for the initiation
think we have not met with it before. If you want to read about all these grounds, please rea
the Buddha, part 3, page 239 for the grounds for the initiation of energy.

I will tell you only two. There is something you have to do. You have to do something. Befor
say to yourself, when I am doing that work, I will not get the opportunity to practice meditatio
practice now before I get to that work. In this way you initiate energy. You make effort and p
meditation. Then after the work you practice meditation saying to yourself, I did not have the
then to practice, so now I will practice. This way you arouse energy in yourself. With regard
are two. With regard to traveling there are two - before traveling and after coming back from
there is sickness. Before you get sickness you practice meditation. And after sickness you p
meditation. Then there is going for alms. Before going for alms and after going for alms you
meditation. Actually every time you have to arouse energy in order to practice. These are ca
for the initiation of energy. ¡§When rightly initiated, it should be regarded as the root of all
attainments.¡¨

Then the next one is j?vita. J?vita is like j?vita for corporeality. Next is sam?dhi. ¡§It puts co
evenly on the object, or it puts it rightly on it.¡¨ In the word ¡¥sam?dhi¡¦ there is the prefix ¡¥s
prefix, ¡¥sam¡¦, can mean evenly (sama?) or rightly (samm?), so evenly or rightly. ¡§Or it is j
collecting of the mind, thus it is concentration. Its characteristic is non-wandering, or its char
is non-distraction.¡¨ That is with regard to conascent states. It does not let the conascent sta
distracted and it itself is non-wandering. ¡§Its function is to conglomerate conascent states a
bath powder.¡¨ So it keeps them together. ¡§It is manifested as peace. Usually its proximate
It is not always the cause. Therefore it says ¡¥usually¡¦. Sam?dhi can be without sukha in th
¡§It should be regarded as steadiness of the mind, like the steadiness of a lamp¡¦s flame wh
draught.¡¨ So steadiness of mind, that is sam?dhi. Sam?dhi is a mental state which puts the
evenly and rightly. ¡¥Evenly¡¦ means keeping the conascent states together. ¡¥Rightly¡¦ mea
distracted. That is what we call ¡¥sam?dhi¡¦. It is on the object and it also keeps the other m
together, keeps them from being scattered. That is what is called ¡¥sam?dhi¡¦.

The next one is saddha (faith or confidence). With regard to its function it ¡§is to enter into, li
setting out across a flood.¡¨ The reference is given. I will give you another reference - The E
158. That will give you the meaning of setting out across a flood. In brief a brave man could
across a flood or across a river, crossing in a boat or by themselves. In the same way saddh
faith or confidence, you can plunge into things and you can accomplish. So saddha is comp
flood, or one who crosses the flood himself and who takes others with him. That is what we

¡§It should be regarded as a hand [because it takes hold of profitable things], as wealth, and
regarding faith as a hand please read Gradual Sayings, volume 3, page 245. If you have a h
things that are profitable for you, that are good for you. In the same way if you have faith, if y
confidence, you can get kusala. That is why it is compared to a hand. Sometimes it is compa
sometimes to a seed.

Then we have sati (mindfulness). All of you about mindfulness. ¡§It has the characteristic of
That means not floating on the surface. ¡§Its function is not to forget.¡¨ ¡¥Not to forget¡¦ mean
the object. ¡§It is manifested as guarding¡¨ and so on. ¡§Its proximate cause is the foundatio
mindfulness.¡¨ Here ¡¥the foundations of mindfulness¡¦ really means the objects of the found
mindfulness - the body, feelings, consciousness and dhamma objects. ¡§It should be regard
a pillar because it is firmly founded, or like a door-keeper because it guards the eye door, an

Then there are two things, hiri and ottappa. Hiri is translated as conscience and ottappa is tr
shame. I do not think this is quite correct. Ottappa is fear or dread. Hiri is shame. I think we s
translate hiri as shame or conscience and ottappa as fear or dread. ¡¥Fear¡¦ here means mo
ashamed to do what is morally wrong. That is hiri or moral shame. We are afraid to do what
do not want to get the painful consequences of these actions. ¡§This is a term for an anxiety
Herein, conscience (hiri) has the characteristic of disgust at evil, while shame (ottappa) has
characteristic of dread of it.¡¨ Right. So shame and dread or shame and fear are these two th
rejects evil through conscience (hiri) out of respect for himself, as the daughter of a good fam
rejects evil through fear (not shame) out of respect for another, as a courtesan does. These
will strike out the ¡¥but¡¦.) should be regarded as the Guardians of the World.¡¨ They are des
guardians of the world will go on. When these two leave the minds of beings, the world will b
undifferentiated. Beings will not act according to conscience. There will be no moral restricti
beings will become like animals. That is why they are called the Guardians of the World. Mo
fear - that means shame to do immoral things and the fear to do these things.

The next ones are alobha (non-greed), adosa (non-hate) and amoha (non-delusion). Amoha
what? Pa??? (wisdom). Amoha and pa??? are the same. About the middle of paragraph 143
lay hold, like a liberated bhikkhu. It is manifested as a state of not treating as a shelter like th
man who has fallen into filth.¡¨ It means not attached to or not adhering to, or something like
fall into filth, you are not attached to the filth. You want to get rid of it as soon as possible. So
not being attached. Two or three lines down ¡§Its (adosa) function is to remove annoyance,
to remove fever as sandlewood does.¡¨ That means to remove heat, not necessarily fever. W
people use sandlewood. They apply sandlewood paste to their bodies and then they becom
familiar thing in Myanmar. You may have seen Burmese girls with something like a paste on
only used in Myanmar. It is like makeup, something you apply on your face. So when it is no

kind of thing, especially sandlewood. They make sandlewood into a paste. They apply it to t
parts of the body and it keeps them cool.

¡§Non-delusion has the characteristic of penetrating [things] according to their individual ess
on. This is pa???. ¡§It has the characteristic of sure penetration.¡¨ So it will never miss. If it is
pa???, it will never miss, ¡§like the penetration of an arrow shot by a skillful archer. Its functi
illuminate the objective field, like a lamp.¡¨ If this room is dark, we cannot see things in this r
there is light, we see things clearly. In the same way when there is no pa???, we do not see
are. When pa??? enters our mind, we see things as they are. So it is like a lamp. ¡§It is man
non-bewilderment, like a guide in the forest.¡¨ You may be lost in the forest, but if you have a
will not get lost. ¡§The three should be regarded as the roots of all that is profitable.¡¨

Now there is tranquillity of body, tranquillity of consciousness and so on. There are pairs. He
does not mean the material body. Here ¡¥body¡¦ means the three mental aggregates (feeling
mental formations). They are called here in P??i ¡¥k?ya¡¦.

The next pair is lightness of the body and lightness of consciousness. There are several ma
among the mental properties. The next pair is malleability of body and malleability of conscio
pair is wieldiness of body and wieldiness of consciousness. The next pair is proficiency of bo
proficiency of consciousness. And then there is rectitude of body and rectitude of consciousn

Now we come to zeal (chanda). Chanda is just the desire to act, the mere will. ¡§So that zea
characteristic of desire to act. Its function is scanning for an object (searching for an object).
manifested as need for an object. That same [object] is its proximate cause. It should be reg
extending of the mental hand in the apprehension of an object.¡¨ That means if you want to p
you put out your hand. It is not attachment. It is just the mere will-to-do, the desire-to-do.

The next one is resolution. ¡§It has the characteristic of conviction. Its function is not to grop
manifested as decisiveness. Its proximate cause is a thing to be convinced about. It should b
like a boundary-post (or it is a gate-post) owing to its immovableness with respect to the obje

The next one in P??i is manasik?ra. ¡§ It is the maker of what is o be made, it is the maker i
This definition is difficult to translate. The P??i is manasi and k?ra. ¡¥K?ra¡¦ means doing, m
¡¥Manasi¡¦ means mind. So ¡¥manasik?ra¡¦ means doing in the mind or making the mind. Th
means paying attention. The other meaning is making the mind. That means making the min
the mind different from the previous [life-continuum] mind, thus it is attention.¡¨ After the wor
should put the word ¡¥also¡¦. We need to put the word ¡¥also¡¦ because it is a different defini
first one. The first one says it is making in the mind. The second one says making the mind.

mind¡¦ means making the mind different. This definition refers to the second and third kind o
described later towards the end of the paragraph.

There are three kinds of manasik?ra - controller of objects, controller of cognitive series (Tha
controller of thought process.), controller of impulsions. ¡¥Controller of cognitive series¡¦ mea
of five-door-adverting. Five-door-adverting is called of thought process because the real thou
begins with that moment of consciousness. ¡¥Controller of impulsions¡¦ means mind-door-ad
the mind-door-adverting come impulsionss. But they are not meant here. What is meant is ju
is called ¡¥controller of objects¡¦. So there are three kinds of manasik?ra - controller of objec
controller of cognitive series and controller of impulsions. The last two are not meant here. T
the controller of objects is what is meant here. That means paying attention.

The next one is specific neutrality. It is often called upekkh?. The P??i is tatramajjhattat?, ne
regard thereto - that means being in the middle, not falling into liking or disliking. ¡§It has the
characteristic of conveying consciousness and consciousness concomitants evenly. Its func
deficiency and excess, or its function is to inhibit partiality. It is manifested as neutrality. It sh
regarded as like a conductor (driver) who looks with equanimity on thoroughbreds progressi
compare this to cruise control in a car. You put on the cruise control and you don¡¦t have to w
speed. When horses are drawing the cart evenly, you don¡¦t have to worry about them. You

The compassion (karun?) and gladness (mudit?) are described in the section on divine abod
difference is that there they belong to jh?nas and here they belong to k?m?vacara. In paragr
should not be admitted for, as to meaning¡¨ - instead of ¡¥as to meaning¡¦ we should say ¡¥in
¡§that should not be admitted for, in reality, non-hate itself is loving-kindness, and specific ne
itself is equanimity.¡¨

Then we have the three abstinences. I think you understand about them.

Then the mental states that arise with the different kinds of consciousness are described. It
for you if you do not have the 89 types of consciousness and the 52 mental factors in mind.
Manual of Abhidhamma or during the Abhidhamma class here I distributed handouts. You m
handouts and read these passages.

Then we come to the unprofitable (akusala) in paragraph 159. There are, as regards the unp
constants, inconstants and or-whatever states. They are clearly mentioned here.

Beginning in paragraph 160 we have consciencelessness and shamelessness. Here we ma
shamelessness and the second one is fearlessness. Ahirika is shamelessness and anottapp

Lobha and moha are described in paragraph 161 and 162. Greed is compared to bird lime o
explanation or the description of greed being like monkey lime can be read in Kindred Sayin
127. When a monkey is stuck to that lime it cannot get itself free from that lime, from that sti
In the same way when you have greed, when you have attachment, you cannot get away fro
the object.

In paragraph 163 ¡§It is manifested as the absence of right theory.¡¨ What is theory? Is it und

Student: It is an idea that has not been proven yet.

Teacher: I see. The word used here is pa?ipatti. It means understanding or knowing. So her
of right understanding. Then wrong view, agitation and so on are described. I think that they
difficult to understand.

I brought these two sheets. The cetasikas are given in the order as in The Manual of Abhidh
numerals are those given in this book. If you look at the end of paragraph 166, you will find s
torpor given only one number, 43, the Roman numeral. For ekaggat? it gives two numbers h
Actually that should have only one number. Steadiness of consciousness is the same as con
#8. It should not be given a separate number because it is the same mental factor as concen
and torpor should each be given a number. So there may be some corrections to be made. A
at this sheet and then find out what is meant in The Manual of Abhidhamma. In this book th
not given in the groups in which they belong. They are given as accompanying different type
For example contact is repeated in paragraphs 170, 176, 179 and so on.

We find another theory in paragraph 179. ¡§It should be regarded as obstructive of theory.¡¨
think we should say ¡§It should be regarded as obstructive of understanding.¡¨ In Myanmar
as meaning obstructive of practice. If you have doubt, then you do not practice. So it obstruc
practice. You have doubt about the teaching. You have doubt about the efficacy of this meth
not practice. So it is obstructive to practice. We interpret the word as practice in Myanmar.

Then the book describes which mental factors accompany which kinds of consciousness. As
confusing if you do not have the 89 types of consciousness in mind. It is better to read The M
Abhidhamma to find out which types of consciousness accompany which cetasikas.

Now there is one thing. At the beginning of paragraph 133 it is said that the first type of cons
accompanied by 36 mental factors. ¡§Herein, firstly, those associated with the first sense-sp
consciousness amount to 36.¡¨ Is that correct? Yes. Why 36 and not 38? Actually there mus

will give you a hint.

Student: Feeling and perception are in other aggregates.

Teacher: That¡¦s right. We are talking about formation aggregate here. So vedan? and sa??
here. But in The Manual of Abhidhamma vedan? and sa??? are counted because they are r
Manual of Abhidhamma you will find 38 mental factors accompanying this consciousness. T
Here the author is describing the mental formations aggregate. That is why the two are miss

Student: I thought there were 52.

Teacher: There are 52 mental factors, but for sa~kh?ra aggregate there are only 50, not 52.
like The Manual of Abhidhamma. You are really studying Abhidhamma. With these I think yo
is which. That is why there are no numbers for vedan? and sa???. The asterisks are for or-v
the plus signs are for inconstants. ¡¥Inconstant¡¦ means these mental factors do not always
consciousness. They accompany that type of consciousness sometimes only. For example
(middha) on this handout accompany the five kinds of prompted consciousness, not every ty
is stealing something, actively stealing. His consciousness may not be accompanied by thin
when there is sleepiness or something similar is the consciousness accompanied by thina a
they do not arise. So they are called inconstants, unfixed adjuncts.

Next week we will go up to the end of bases, up to chapter 15, paragraph 16. We have com
five aggregates. Next week there will be some more to know about the five aggregates. The
of five aggregates is complete now. What are the five aggregates? Aggregate of matter, agg
aggregate of perception, aggregate of mental formations, aggregate of consciousness. Here
consciousness is given before the three other aggregates. The usual order given in the Sutt
feeling, perception, mental formations and consciousness. These five can be reduced to two
Corporeality aggregate is r|pa. The other four are n?ma. When we say n?ma and r|pa, we m
aggregates. They mean the same thing actually.

S?dhu! S?dhu! S?dhu!

(Tape 32 / Ps: 185 ¡V 230)

We are on page 535, paragraph 185, the classification of the five aggregates under eleven h
of the handouts you can locate the cittas and the cetasikas in the Path of Purification. The o
of Purification is different than that in The Manual of Abhidhamma. We are primarily acquain
in The Manual of Abhidhamma, so we always go from that reference. Today is the classifica
aggregates. We have finished the five aggregates in detail.

¡§The foregoing section, firstly, is that of the detailed explanation of the aggregates accordin
Abhidhamma Bh?janiya.¡¨ That is one treatment of the aggregates in the second book of Ab
the second book of Abhidhamma.

¡§But the aggregates have been given in detail by the Blessed One [in the Suttanta Bh?janiy
In the Vibha~ga when the Buddha treated the aggregates and also other subjects, he treate
exposition and then Abhidhamma exposition. Then there was an exposition of questions and
expositions he treated the aggregates. Here the author of The Path of Purification took the fi
exposition, that is Suttanta Bh?janiya.

¡§Any materiality whatever, whether past, future or present, internal and external, gross or s
or superior, far or near: all that together in the mass and all that together in the gross is calle
materiality aggregate¡¨ and so on. This can be found in the other parts of the canon, the Maj
and in other Suttas also.

Then the author explains the words ¡¥whatever¡¦ and ¡¥materiality¡¦. ¡§Herein, the word wha
without exception.¡¨ In P??i the word is ya? ki?ci. ¡¥Ya? ki?ci¡¦ means whatever or it can me
¡¥whatever¡¦ or ¡¥ya? ki?ci¡¦ includes everything. When we say, let us say ¡¥all materiality¡¦,
¡¥all¡¦ we have to take all materiality as well as mentality. The word ¡¥all¡¦ or ¡¥whatever¡¦ inc
without exception everything. But to limit its scope the word ¡¥materiality¡¦ is put. So materia
overgeneralization, overextension. When we say ¡¥all¡¦, it covers both mind and matter. Whe
matter¡¦, then you take only matter, but not mind. So the word ¡¥materiality¡¦ prevents overex
word ¡¥whatever¡¦ or ¡¥all¡¦. With these two words we just mean materiality, all kinds of mate
present, future and so on.

The P??i word here is patisanga for overgeneralization. ¡¥Pasanga¡¦ actually means to stick
something, it extends to this thing, that thing and so on. In order to restrict the extension of t
¡¥materiality¡¦ is put here. Here ¡¥all materiality¡¦ means all materiality and not mentality. ¡§T
materiality is comprised without exception by the two expressions.¡¨ So all materiality is inclu
by these two words. ¡§Then he undertakes its exposition as past, future and present, etc.¡¦

Here the Commentator explains past, future and present in the fourfold way - according to e
continuity, according to period and according to moment. So he explains as extent past, con
period past, moment past, like that.

¡§Herein, firstly, according to extent: in the case of a single becoming (That is one life.) of or
being], previous to rebirth-linking is past, subsequent to death is future, between these two i

The present life is present. The life before it is past. The life after it is future. That is accordin
extent.

According to continuity that means a series of matter or a series of mind. ¡§That [materiality]
or single origination by temperature and single origination by nutriment, though it occurs suc
present.¡¨ Here it is not single origination but origination by single temperature. So you can s
[materiality] which has origination by single temperature and origination by single nutriment.
temperature¡¦ here means just one kind of temperature. For example you are in the sun. The
temperature, heat. You go into the shade. Then the temperature changes to cold. That one s
temperature is said to be present. Then before that there was some dissimilar temperature a
And another dissimilar temperature after that is future. So here we have origination by single
originated by single nutriment.

¡§That which, previous to that, was of unlike origination by temperature and nutriment. That
unlike temperature and unlike nutriment is past. That which is subsequent is future. That wh
consciousness and has its origination in one cognitive series, in one impulsion, in one attain
present.¡¨ This is with regard to materiality born of consciousness. ¡¥Has its origination in on
series¡¦ that means thought processes of five-door. ¡¥In one impulsion¡¦ really means mind-d
process. In the mind-door thought process there is only adverting and impulsions or javanas
called ¡¥javana¡¦. So origination in one impulsion means origination in one thought process i
mind-door. ¡¥In one attainment¡¦ - that is attainment of jh?na.

¡§Previous to that is past. Subsequent to that is future. There is no special classification into
continuity, etc., of that which has its origination in kamma (That which is caused by kamma.)
regard to materiality caused by kamma there is no classification into past continuity, present
future continuity. ¡§But its pastness, etc., should be understood according as it supports thos
their origination through temperature, nutriment and consciousness.¡¨ Although kamma does
supports the materiality caused by other causes (temperature, nutriment and consciousness
there is no classification into past, present and future continuity with regard to matter born of
they can be said to be past, present and future because they support the materiality caused
caused by nutriment and caused by consciousness.

Footnote 74 is in fact for this passage. Even in the Sub-commentary it is a little confusing. T
for this passage. It looks like it is explaining the word ¡¥cause¡¦ and ¡¥condition¡¦ in paragrap
subsequent paragraph in the footnote that begins ¡§Because there is similarity¡¨ and so on r
sentence. ¡§There is no special classification into past continuity, etc., of that¡¨ and so on.

In footnote 74 about three lines down ¡§Just as the seed¡¦s function is to arouse the sprout a

earth, etc., is to consolidate it, and just as kamma function is to arouse result as matter that
kamma performed,¡¨ - there are some words missing. ¡¥And resultant consciousness¡¦ - we
words after ¡¥performed¡¦. That is because the result of kamma is not only matter but also c
know at the moment of relinking, there is relinking consciousness which is the result of kam
this relinking consciousness there are material properties caused by kamma that arise. Kam
kamma-born matter but also consciousness. So here we should say ¡§to arouse result as m
kamma performed and resultant consciousness.¡¨

¡§And that of nutriment, etc., (Etcetera is missing there.), is to consolidate it¡¨ and so on. Th
kinds of causes or whatever we may call it - one that produces and the other that supports o
consolidates. There are two kinds of conditions. With regard to a seed becoming a tree or a
the producing cause of the tree. Earth, water and temperature are the supporting conditions

With regard to those that are born of kamma we cannot say this belongs to the past, this bel
present, this belongs to the future. ¡§Because there is similarity or dissimilarity in temperatu
the way stated the pastness, etc., of material instances originated by it are stated according
But there is no such similarity and dissimilarity in the kamma that gives birth to a single beco
instead of stating according to continuity the pastness, etc., of material instances originated
stated according to what consolidates.¡¨ With regard to what it consolidates the matter born
to belong to past, present or future.

Then the Sub-Commentator added his own observation with the words beginning ¡§Howeve
reversal of sex¡¨ and so on. It may not please the ladies. Especially in the Vinaya there are i
people have their sex change. It is changed by kamma, not by surgery. There are instances
the Vinaya Pitaka. You know men are supposed to be superior to women. ¡§The male sex d
powerful unprofitable kamma (akusala).¡¨ As a result of akusala the male sex disappears. ¡§
appears owing to weak profitable kamma.¡¨ It is due to kusala kamma, but it is weak kusala
strong kusala kamma, then it will be male sex and not female sex and so on. It is the additio
Sub-commentator. According to the Visuddhi Magga there can be no classification into past
with regard to kamma-born matter. But here it is said there can be past, present and future e
to kamma-born matter because of sex change. Before the change it was past. The change i
maybe in the future there is change to the previous sex. So there can be classification into p
future even with regard to kamma-born matter. This addition was made by the Sub-Commen

¡§According to period: any period among those such as one minute, morning, evening, day
occurs as a continuity, is called present.¡¨ This minute is present. The past minute is past. T
minute is future and so on.

¡§According to moment: what is included in the trio of moments [that is to say, arising, prese
dissolution, (the three sub-moments),] beginning with arising is called present.¡¨ So this is th
present. ¡§At a time previous to that it is future. At a time subsequent to that it is past.¡¨

¡§Furthermore, that whose functions of cause and condition have elapsed is past.¡¨ Here ¡¥c
producing and ¡¥condition¡¦ means supporting. ¡§That whose function of cause is finished ar
condition is unfinished is present.¡¨ That means something is caused by some other thing. S
caused is in existence now. Its origination is over, but its continuation or its being supported
going on. That¡¦s why it says ¡§whose function of cause is finished, and whose function of co
unfinished is present.¡¨

¡§That which has not attained to either function is future. Or alternatively, the moment of the
present.¡¨ That means when a certain matter or mind is doing its own function, then that is th
moment. At the time previous to that it is the past and subsequent to that is the future. That
according to moment.

Next is the division into internal and external. ¡§The division into internal and external is as a
stated. Besides, it is internal in the sense of one¡¦s own that should be understood here as in
of another person as external.¡¨ In the footnote the four kinds of internal are given. ¡§Niyak-a
internally in the sense of one¡¦s own: four kinds of ajjhatta (internal, lit. ¡¥belonging to onese
mentioned in the Commentaries and Sub-Commentaries.¡¨ The first one is gocarajjhatta. Go
internally as range or resort. Then ajjhattajjhatta is internally as such. Niyakajjhatta is interna
sense of one¡¦s own. And visayajjhatta is internally as objective field. Do you understand? T
gocarajjhatta, is simply any internal object. Any internal object is called ¡¥gocarajjhatta¡¦. The
ajjhattajjhatta, means very internal because the word ajjhatta is repeated, ajjhattajjhatta (inte
internal). By that is meant the five senses - eye, ear, nose, tongue and body sensitivity. They
ajjhattajjhatta. In the section on matter they are called internal, in P??i ajjhattika. The third o
niyakajjhatta. That means anything which arises in one¡¦s own continuity. That is called niya
last one, visayajjhatta, is really the attainment of Fruition or sam?patti. It is not internally as o
field. We can say ¡¥internally as scope¡¦. Because when the Buddha is in the Phala attainme
over it. So it is called visayajjhatta. So there are four kinds of ajjhatta. Sometimes we are no
ajjhatta is meant and so we have to find out.

The first division into internal and external is just as stated in paragraph 73. Another way of
is internal in the sense of one's own. That means everything in me is internal and everything
external. For you everything in you is internal and everything in others is external.

¡§Gross and subtle are also as already stated.¡¨

¡§Inferior and superior are twofold, namely, figurative (relative) and absolutely literal. Herein
materiality of the Sudassin deities is inferior to the materiality of the Akani??ha deities.¡¨ You
remember the 31 planes of existence. He is referring to that. Akani??ha is the highest of the
That is the most superior. Sudassin is one stage below the Akani??ha. ¡§The same material
deities] is superior to the materiality of the Sudassa deities. Thus, firstly, should inferiority an
superiority be understood figuratively down as far as the denizens of hell.¡¨ One is superior t
below it and so on until you reach hell.

¡§But absolutely literally it is inferior where it arises as unprofitable result, and it is superior w
arises as profitable result.¡¨ Absolutely or in the ultimate sense inferior arises as the result of
unprofitable kamma (akusala kamma). That which arise as the result of kusala kamma (prof
superior.

¡§Far and near, this is also as already described.¡¨ That which is difficult to see is far. That w
difficult to see or which is easy to see is near. ¡§Besides, relative farness and nearness shou
understood here according to location.¡¨ According to location we may say this is near and t

¡§All that together in the mass and in the gross: by making all that materiality separately des
words ¡¥past¡¦, etc., into a collection by understanding its oneness, in other words, its charac
being molested, it comes to be called materiality aggregate.¡¨ This shows why they are calle
¡§Materiality, separately described by the words ¡¥past¡¦, etc.¡¨ - so it is described as past, p
future, internal, external, gross, subtle, far, near and so on. That materiality described in that
¡§into a collection by understanding in its oneness.¡¨ I think the word ¡¥in¡¦ is missing there.
oneness¡¦, in other words , its characteristic of being molested or its characteristic of change
characteristic of r|pa is change or being molested. With regard to this characteristic all the m
described as past, present and future are collected by understanding. That is why it is called
¡¥By understanding¡¦ should go with ¡¥making a collection¡¦. ¡¥making a collection¡¦ means y
in your mind with understanding. Past, present and future cannot exist at the same time. We
present matter here. The past is already past and we cannot collect and we cannot take it an
we cannot take the future and put it with the present physically. But in our minds we can gro
¡¥By understanding¡¦ means by our minds we group them together and we call it an ¡¥aggre

¡¥Aggregate¡¦ does not necessarily mean a group of different material properties. There are
material properties. These 28 are also called ¡¥the aggregate of matter¡¦. Each one of the m
can be called an ¡¥aggregate of matter¡¦. This is true not only when they are taken together.
eye sensitivity. Only one eye sensitivity is called an ¡¥aggregate¡¦. That is because there is e
which is past, which is present, which is future, which is gross, which is subtle, which is infer

superior, which is far, which is near. We group these different kinds of eye sensitivity togethe
a group or call it an aggregate. Aggregate or group does not necessarily mean that there mu
of matter. Even one material particle, one feeling, one perception is called an ¡¥aggregate¡¦.
why they are called ¡¥aggregates¡¦. ¡¥By understanding¡¦ should go with ¡¥making into a col
making into a collection in the mind. In its oneness that is its characteristic. Here it is with re
matter being molested or changed. With regard to feeling it is with regard to its characteristic
With regard to perception it is with regard to its characteristic of perception. With regard to c
it is with regard to its knowing the object and so on. This is the reason why even one particle
even one mental factor is called an ¡¥aggregate¡¦.

¡§By this, too, it is shown that the materiality aggregate is all materiality, which all comes into
collection with the characteristic of being molested; for there is no materiality aggregate apa
materiality.¡¨ Feeling and the others are the same. It is the classification of the first aggregat
aggregate, into eleven headings.

Now we have the feeling aggregate. ¡§In the classification into past, etc., the past, future an
of feeling should be understood according to continuity and according to moment and so on
in the material aggregate. ¡¥According to continuity - that included in a single cognitive serie
means five-door thought process. ¡¥A single impulsion¡¦ means mind-door thought process.
attainment, and that occurring in association with objective field of one kind (one object) is p
that is past. Subsequent is future.¡¨

¡§According to moment, etc.; that feeling included in the trio of moments (three moments), w
the past time and the future time, and which is performing its own function (which is doing its
so it is really present now), is present. Before that is past. Subsequent is future. Then there
and external.

Next there is gross and subtle. Gross and subtle should be understood according to kind, ac
individual essence, according to person, and according to mundane and supramundane. ¡§A
unprofitable feeling is a state of disquiet, because it is the cause of reprehensible actions an
produces burning of defilement.¡¨ That means defilement that is burning, not the burning aw
¡¥Burning of defilement¡¦ means defilements that are called burning. So it is gross.

¡§And because it is accompanied by interestedness (That means activeness.) and drive and
of the burning of the defilements (because they are burning), and because it is reprehensible
compared with resultant indeterminate¡¨ and so on. So here one is described as gross or su
other kinds of feeling. There is kusala feeling, akusala feeling, indeterminate (aby?kata) feel

Then we have according to individual essence. ¡§Painful feeling, is gross compared with the
is without enjoyment, it involves intervention.¡¨ ¡¥Intervention¡¦ really means shakiness or no
¡§It causes disturbance, creates anxiety, and is overpowering. The other two are subtle com
painful because they are satisfying, peaceful, and superior, and, respectively agreeable, and
is the reason for their being subtle and gross. Also their states of subtleness and grossness

¡§According to person: feeling in one who has no attainment¡¨ - I would say ¡¥feeling in one
attainment¡¦. A person may have attainment but if he is not in attainment at the moment his f
gross. So ¡§According to person: feeling in one who is not in attainment, is gross compared
(Say?daw corrected in the same manner.) who is in attainment, because it is distracted by a
In the opposite sense the other is subtle. This is how grossness and subtlety should be unde
to person.¡¨ When a person is in attainment (in attainment of jh?na or in attainment of phala)
said to be subtle. If the person is not in attainment, the feeling is said to be gross.

¡§According to the mundane and supramundane: feeling subject to cankers is mundane (¡¥S
means object of cankers, which can be the object of ?savas or just mental defilements.), and
compared with that free from cankers, because and that is gross compared with that free fro
it is the cause for the arising of cankers, is liable to floods, liable to the bonds, liable to the ti
liable to the hindrances, liable to the clingings, defilable, and shared by ordinary men.¡¨ Thes
bonds, ties, hindrances, clingings and the defilable can be understood by referring to The M
Abhidhamma, chapter 7. In the fact the mental defilements are given different names. The s
defilements are given different names. For example lobha is a mental defilement. Lobha is g
canker, flood, bond, hindrance, clinging and so on. Buddha described these in different ways
susceptibility to understanding of his listeners. They are taught in Abhidhamma as well as in
understand them the best place to go is The Manual of Abhidhamma. In chapter 7 of The Ma
they are described. Almost or towards the end of the book we will find them again when how
are eradicated by Path consciousness is described. The first path consciousness eradicates
defilements. That comes later almost at the end of the book. ¡¥Shared by ordinary men¡¦ me
in puthujjanas. ¡§The latter, in the opposite sense, is subtle compared with that subject to ca
that are not subject to cankers, those that are not the object of cankers are subtle. ¡§This is
and subtlety should be understood according to the mundane and supramundane.¡¨

Then there is a warning. ¡§One should beware of mixing up¡¨ - because if you mix them up,
confused. Beware of - the P??i word actually means avoid. So one should avoid mixing up t
according to kind and so on. So just do according to one, say according to kind or to some o
not mix them together. If you mix them together, then there will be contradiction. According t
subtle and to another it may be gross. That is what the Commentary gives here.

¡§It is said ¡§Indeterminate feeling is subtle, painful feeling is gross. The feeling in one with a
attainment is subtle.¡¨ This is a passage from the Viba~ga. ¡§And like painful feeling, so also
etc., is gross according to kind and subtle according to individual essence.¡¨ Let us say there
(pain). Pain is gross according to its individual essence because it afflicts us. It is indetermin
aby?kata in another sense. It is neither kusala nor akusala. It is aby?kata. So it is subtle bec
is described as subtle. If we mix these two, we will get nowhere. According to one it is subtle
to another it is gross. Do not mix them up. ¡§For instance, [when it is said] ¡¥The indetermina
kind is subtle compared with the profitable and the unprofitable¡¦, the individual essence clas
not be insisted upon like this: ¡¥Which kind of indeterminate¡¦?¡¨ You don¡¦t ask the question
painful? Is it the pleasant? Is it that one with an attainment? Is it that one with no attainment
subject to cankers? Is it that free from cankers?¡¦, and so in each instance.¡¨ So you cannot
questions.

¡§Furthermore, because of the words ¡¥Or feeling should be regarded as gross or subtle in
or that feeling¡¦, among the unprofitable, etc., feeling accompanied by hate, too, is gross con
accompanied by greed because it burns up its own support, like a fire; and that accompanie
subtle. Also that accompanied by hate is gross when the hate is constant, and subtle when i
wonder whether you understand that. In order to correctly understand it, you have to unders
You have to go to the first book of Abhidhamma. The words ¡¥constant¡¦ and ¡¥inconstant¡¦
as what we had before. Formerly ¡¥constant¡¦ and ¡¥inconstant¡¦ referred to cetasikas. cetas
constant go along with a given citta all the time. Every time that citta arises, that cetasika als
That is called ¡¥constant¡¦. There are some cetasikas that do not arise every time that a citta
are called ¡¥inconstant¡¦. So cetasikas may be constant or inconstant. But here although the
same, the meaning is very different. You have to have a knowledge of the first book of Abhid
understand this. ¡¥Constant¡¦ here actually means fixed as to giving results in the next life. T
to give results in the next life. Such kamma, or hate, or anger is called ¡¥constant¡¦. ¡¥Incons
not fixed as to giving results in the next life. Examples are killing one¡¦s own mother, killing o
father and so on. When you kill your own father or mother, there is dosa. That dosa is called
because it will invariably give results in the next life. That means you will go to hell. There is
avoiding that. Now you may kill an animal. There also you have dosa. That dosa will give yo
states but not necessarily in the next life. You may get the result of killing that animal in othe
you may get the result in the next life. So that is not fixed. Killing one¡¦s own mother, or killin
own father, killing an Arahant, wounding the Buddha, causing schism in the Sa~gha are call
in Buddhism. If you do one of these, you will surely go to hell in the next life. There is no way
that. Such kamma is called ¡¥constant¡¦ here.

¡§And subtle when it is inconstant. And the constant is gross when giving result that lasts for
the other is subtle.¡¨ Among the fixed as to giving results there are two subdivisions - those w

last for the eon and those whose results do not last for the eon. I will give an example. You k
and Devadatta. Aj?tasattu was the son of King Bimbis?ra. Devadatta was Buddha¡¦s cousin
Aj?tasattu killed his own father at the instigation of Devadatta. Devadatta wanted to become
himself. So he thought ¡§Nowadays people live long lives. We cannot wait until they die. You
father and be a king and I will kill my brother-in-law and be a Buddha.¡¨ So he instigated Aj?
his own father. Aj?tasattu did kill his own father. Among the five grievous sins Devadatta did
the Buddha. In fact he tried to kill the Buddha, but he was not successful. So the Buddha wa
pushed the rock onto the Buddha as he was walking up and down. That was one. The other
division in the Sa~gha or schism in the Sa~gha. He did two of the grievous sins. It is said tha
the lowest hell. He will be there for the rest of this eon, for the rest of this world cycle. That is
meant here by ¡¥that which lasts for the eon¡¦. Aj?tasattu also went to hell immediately after
will not suffer in hell for the rest of the eon. That is the difference. The constant is gross whe
result that lasts for the eon, and it is not gross, it is subtle, when the result lasts not for the e

¡§And of those giving result lasting for the eon the unprompted is gross, while the other is su
their relative subtlety and grossness. ¡§But that accompanied by greed is gross when assoc
view, while the other is subtle¡¨ and so on.

Student: Devadatta instigated all these things. Would he go to hell on account of instigating
King Bimbis?ra?

Teacher: His instigation can be taken as killing a being. But for Aj?tasattu that being was his
Ah?tasattu¡¦s akusala was grosser that that of Devadatta for this action.

Student: So it only counts as this heavy kamma if one kills or instigates someone to kill one¡

Student: I¡¦m not recommending any of these.

Teacher: ¡§furthermore, the profitable of the sense-sphere is gross; that of the fine-material
subtle.¡¨ They are just relative.

¡§Then according to location, painful feelings in hell are gross, while in the animal generatio
they are subtle.. Those among the Paranimmitavasavatti deities (That is the highest of the lo
realms.) are subtle only. And the pleasant should be construed throughout like the painful w
By planes also there can be subtlety and grossness.

¡§And according to physical basis, any feeling that has an inferior physical basis is gross, wh
superior physical basis is subtle.¡¨

¡§What is gross should be regarded as inferior in the inferior - superior classification, and wh
superior.¡¨

Then we have far and near. ¡§The unprofitable is far from the profitable and indeterminate a
in the way beginning ¡¥Unprofitable feeling is near to unprofitable feeling¡¦. Therefore unprof
is far from profitable and the indeterminate because of dissimilarity, unconnectedness, and r
The profitable and the indeterminate are likewise far from the unprofitable.¡¨ Kusala and aby
from akusala. ¡§And so in all instances. But unprofitable feeling is near to unprofitable feelin
similarity and resemblance.¡¨ This is the detailed explanation dealing with the past, etc. Perc
formations and consciousness should be understood similarly.

Next is the classes of knowledge of the five aggregates. That is the order of the five aggrega
distinction and so on. There are different kinds of order that we find in the Abhidhamma and
describes all the orders. The first is what? The order of arising. Sometimes things are descri
of arising. ¡§First there comes to be the fetus in the first stage, then there comes to be the fe
second stage¡¨ and so on. That is the order of arising. The first stage arises first, then the se
arises, and the third stage arises and so on. If it is described in this way, then it is described
order of arising.

¡§Things to be abandoned by seeing, things to be abandoned by development (This comes
is the order of abandoning.¡¨ ¡¥Things to be abandoned by seeing¡¦ means mental defilemen
first Path (Sot?patti Magga). ¡¥Things to be abandoned by development¡¦ means those defil
three Maggas. So it is in the order of abandoning. ¡§Purification of virtue: purification of cons
etc., is order of practice.¡¨ You know there are seven purifications or seven stages of purity i
of vipassan? - purity of morals (here virtue), purity of consciousness, purity of view, purity o
doubt, and so on. These are described in the order of practice. With regard to these stages
cannot skip. You cannot practice purification of consciousness before you practice purificatio
practice one after the other in this order. It is the order of practice.

Sometimes they are described in order of plane. That means the sense-sphere, the fine-mat
on (k?m?vacara, r|pavacara, ar|p?vacara). This is in order of plane. Sometimes things are ju
order of teaching. That means in teaching the Buddha gave this first, the other second, and
There is no particular merit in putting this first and the other second and so on. ¡§The four fo
mindfulness, the four right efforts, etc., Dhamma talk on giving, Dhamma talk on virtue, etc.,
teaching.¡¨ There are four foundations of mindfulness. The first is contemplation on the body
feelings, the third is on consciousness and the last is on dhamma objects. They are not to b

after the other. It is not meant that you must practice body contemplation first and then go to
contemplation, and then go on to contemplation of consciousness. It is not to be done in this
description here is not according to the order of practice, but it is just the order of teaching.

Student: The practice of giving and virtue are the first two of the p?ramit?s in Mah?y?na. Wh
come from?

Teacher: Here it is a stock phrase that we often come across in the Suttas. When the Buddh
mentioned in summary, it is mentioned in this way. Buddha would talk first about giving, then
then about the celestial worlds, then about getting dispassioned about sensual things and so
Buddha¡¦s way of teaching people was to first talk about giving. Then he would talk about s?

Student: The others don¡¦t follow?

Teacher: No, just the first two. You can find it in the Majjhima Nik?ya, but such passages are
throughout the whole of the P??i Canon.

¡§Of these, firstly, order of arising is not applicable here.¡¨ Here we have first r|pa, then veda
(feeling), sa??? (perception), then sa~kh?ra (mental formations) and consciousness. This or
order of arising. We are not to understand that r|pa arises first, then feeling arises, then perc
and so on. This order of arising is not applicable here.

What about the order of abandoning? No because r|pa in fact cannot be abandoned. Then is
No. Is it an order of plane? No. Only one remains, that is the order of teaching. Buddha happ
this way, in this order. The order of teaching is explained in paragraph 213.

¡¥As to distinction¡¦ - that means there are two kinds of aggregates, just the aggregates and
as objects of clinging. Buddha taught under two names. Sometimes he taught just as aggreg
taught as aggregates of clinging. What is the difference between these two? When the Budd
meant all that there is: For example the aggregate of feeling here means both mundane feel
feeling. When he says aggregate of clinging, he means only the mundane, those that are the
That is the difference.

Further down paragraph 214 you will see ¡§Any kind of materiality whatever,..far or near, tha
cankers and liable to the clingings: this is called the materiality aggregate [as object] of cling
is the explanation of why they are called ¡¥the aggregates of clinging¡¦. ¡¥Aggregates of clin
aggregates which are subject to cankers which are liable to clinging. Briefly they are aggreg
objects of clinging, that are objects of mental defilements.

When the Buddha explained the First Noble Truth, at the end of that explanation, he said tha
five aggregates of clinging are dukkha. He used the words ¡¥five aggregates of clinging¡¦. Th
meant the mundane cittas and cetasikas and r|pa. That is the difference. ¡¥Aggregates¡¦ me
¡¥Aggregates of clinging¡¦ means only those that are the objects of clinging or that are the ob
cankers.

In paragraph 215 about the middle of the paragraph ¡§But feeling, etc., are only mentioned a
aggregates when they are free from cankers.¡¨ What do you think about that? Can you agree
simple aggregates and aggregates of clinging. ¡¥Aggregates¡¦ means all. ¡¥Aggregates of cl
those that are the objects of clinging. Now here ¡§Feeling, etc., are only mentioned among th
they are free from cankers.¡¨ I think that is all right.

Student: Because when they are not free of cankers -

Teacher: They are mentioned when they are free from cankers. When they are not free from
included in the aggregates of clinging. I think that is correct. In P??i the word ¡¥only¡¦ is to be
¡¥simple aggregates¡¦ and not before ¡¥mentioned¡¦. ¡§But feeling, etc., are mentioned amon
aggregates only when they are free from cankers.¡¨ When they are not, they are included in
clinging.

As to neither less nor more - why are there only five aggregates, neither less nor more? ¡§B
things that resemble each other fall into these groups¡¨ and so on. This is the explanation of
five and not four or six.

Paragraph 220 ¡§As to simile: the materiality aggregate [as object] of clinging is like a sick-ro
is the dwelling-place, as physical basis, door, and object, of the sick man, namely, the conso
aggregate as object of clinging. The feeling aggregate as object of clinging is like the sickne
afflicts.¡¨ Feeling is like sickness. Perception is like what? ¡§The provocation of the sickness
actually the cause of the sickness. The causes of sickness are said to be blood, or bile, or w
This is traditional Indian medicine¡¦s understanding of the causes of diseases. It is accepted
Commentaries too. The ¡¥provocation of sickness¡¦ really means the cause of sickness, the
sickness. The formation aggregate is like what? ¡§Recourse to what is unsuitable.¡¨ That me
that are not suitable for your health, like eating bad food. So eating bad food is like sa~kh?ra
the disease, like blood or phlegm, is sa???. ¡§The formations aggregate as object of clinging
recourse to what is unsuitable.¡¨ So it is like eating unsuitable food, staying in the cold for a l
It is something like that. ¡§Because it is the source of feeling, which is sickness; for it is said
as feeling is the formed that they form¡¦ and likewise ¡¥Because of unprofitable kamma havi

and stored up, resultant body consciousness has arisen accompanied by pain: the consciou
object of clinging is like the sick man because it is never free from feeling, which is the sickn
have the sick dwelling-place, the sickness, the cause of the sickness, then another cause of
the sick man. These five aggregates are compared to this. They are also compared to a pris
offense, the punisher, and the offender. They are also compared to the dish, food, curry sau
food, the server and the eater. These are all similes to be understood.

Twice as to how to be seen - this is how we should view them. ¡§The exposition should be k
to be seen, namely, in brief and in detail.¡¨ So they should be seen as ¡§an enemy with draw
snake simile, as a burden according to the Burden Sutta, as a devourer according to the To-
Discourse, and as impermanent, painful, not-self, formed, and murderous, according to the
so on. According to these Suttas we should view them as being the enemy and so on.

Paragraph 225 ¡§As to good for one seeing thus: good comes to be accomplished in one wh
thus in brief and in detail. And the way of definition should be known according to that, that i
firstly, one who sees the five aggregates as objects of clinging in the form of an enemy with
etc., is not worried by the aggregates, but one who sees materiality, etc., in detail as a lump
etc., is not one who sees a core in the coreless.¡¨

¡§And in particular one who sees internal materiality as foul (ugly) fully understands nutrime
understands¡¦ really means not having akusala with regard to that thing. So ¡¥fully understar
means one does not get akusala with regard to nutriment, with regard to ?h?ra and so on. W
word ¡¥fully understands¡¦, we have to understand in that way.

¡§He abandons the perversion [of perceiving] beauty in the foul (ugly), he crosses the flood
he is loosed from the bond of sense desire.¡¨ So floods, bonds, and all these come again. ¡§
canker-free as regards the cankers of sense desire, he breaks the bodily tie of covetousnes
cling with sense desire clinging¡¨ and so on.

¡§One who sees feeling as pain fully understands nutriment consisting of contact.¡¨ You kno
four kinds of nutriment. There are real food, contact, volition and consciousness. The descri
according to that. So we come to the end of this chapter.

Chapter 15
(Tape 32 / Ps: 1-16)

We will have to go a little into chapter 15. Next we have bases. There are twelve bases. The
is different from the order given in The Manual of Abhidhamma. In the manual the six interna
external are grouped together. Here they are described in pairs. Here we have the eye base
base, ear and sound, nose and odor, tongue and flavor, body and tangible data, mind and d

Then there is meaning. I want to ask you the meaning of this expression in paragraph 3. ¡§It
is an eye; the meaning is that it enjoys a visible datum and turns it to account.¡¨ What is the
¡¥turns it to account¡¦? The P??i word here is vibh?veti. It means to make it clear or to show
¡¥Enjoys a visible datum¡¦ means make a visible datum clearly seen.

Then with regard to sound: ¡§It is emitted, thus it is sound; the meaning is that it is uttered.¡¨
Visuddhi Magga the meaning is that it is uttered. But if we take it just as it is, sadda (sound)
include sounds of others like sounds of trees, sounds of rivers. Because it is said it is uttered
is uttered limits the sounds, but actually any sound is meant here. So we have to understand
That you can find in the footnote.

The next one is: ¡§It smells, thus it is a nose. It is smelt; thus it is odor.¡¨ The real meaning is
betrays, therefore it is odor. That is because you know where something is when you get the
betraying its place. You may hit something. Then somebody gets the smell and somebody k
like betraying. ¡§It betrays, thus it is odor. The meaning is that it betrays its own physical bas

These are all grammatical definitions of the words. Now the next one. ¡§It evokes life, thus it
(jivh?).¡¨ Footnote 1 ¡§This is the linguistic characteristic of the word ¡¥jivh?¡¦. Linguistic
characteristic, what does that mean? What the Sub-Commentary is saying - if you look at th
word jivh?, you get j?vita and v?, not jivh?. J?vita is life and v? means to call. It should be ca
v?, but it is contracted into jivh?. That is what is meant by the linguistic characteristic. It is a
explaining words. Instead of saying j?vita v?, people just say jivh?.

At the bottom of paragraph 3 with regard to dhamma. ¡§They cause their own characteristic
is incorrect. ¡§They bear their own characteristics, thus they are dhamma.¡¨ You see word ¡¥
took it in the causative sense, but it is not causative here because the root here belongs to t
conjugation. It belongs to the seventh conjugation. Therefore it is dh?rayati like corayati. It is
causative. The meaning is: ¡§That which bears its own characteristic is called dhamma.¡¨ Dh
meanings. I have told you this again and again. Dhamma is here defined as that which bear
characteristic. They bear their own characteristics, thus they are dhammas. I don¡¦t want to

data¡¦.

Then there is the explanation of the word ?yatana in P??i. The Commentators take much de
words in different ways as much as they can. So the word ¡¥?yatana¡¦ can be divided into ?y
into ?yata and nayana. And so very fanciful explanations are given. That is what he does in
if you don¡¦t understand this, I think it is all right. They are the bases. If you know P??i, it¡¦s g
read this. If you don¡¦t know P??i, it is not so helpful.

In this section the translator uses eye-cum-visible datum, door-cum-objects, and so on. Wha

Student: It is Latin. It means with.

Teacher: Oh, eye with visible datum. We can just say ¡¥and¡¦, eye and visible datum.

The word ?yatana can have many meanings. The Commentator explains ?yatana according
Whenever you find the word mental data, you should change to dhamma because mental da
paragraph 9 mental data appears. Please change to dhammas. In that paragraph ¡§As to jus
means there are only twelve bases. Why are there only twelve? Here the Commentary expla
this: The eye, etc., are dhammas too (not mental data).¡¨ He misunderstands the two words
¡¥dhamma¡¦ by itself and the word ¡¥dhamma with ?yatana¡¦, so dhamma and dhamm?yata
just means something which bears its own characteristic. We can translate it as state. In dha
untranslatable. He mixed these two. So here it should be: ¡§The eye, etc., are dhamma too;
is ¡¥twelve bases¡¦ said instead of simply ¡¥dhamma base¡¦? That means everything is calle
eye is called ¡¥dhamma¡¦. The ear is called ¡¥dhamma¡¦. Why not call all of them dhamm?ya
saying there are twelve ?yatanas? Why not have only one base, the base of dhamma? The
here. ¡§Instead of simply dhamma base, it is for the sake of defining door and object for the
consciousness groups.¡¨ That means there are six doors and there are six objects. Therefor
doors and objects we have six bases, not only one base. Because there are six doors (eye
on) and six corresponding objects, so there have to be twelve bases.

Paragraph 10 ¡§For only the eye base is the door of arising, and only the visible-data base is
the consciousness group comprised in a cognitive series containing eye consciousness.¡¨ In
there is another ¡¥mental data¡¦ that needs to be changed to ¡¥dhamma¡¦. So ¡§But only one
base, in other words, the life continuum mind, is the door of arising, and only the dhamma ba
all is object, of the sixth [consciousness group].¡¨

In paragraph 15 ¡§As to how to be seen: here, however, all formed bases should be regarde
provenance and no destination.¡¨ What is that? The P??i word is simply ¡¥not coming from a

going to anything¡¦. Not coming from anything and not going to anything, they just arise. The
from anything and they will not go to anything. They just arise and they disappear. That is w
here. What is provenance? Coming?

Student: No. Could be lineage, sort of where it came from.

Teacher: What more? Let me see. How they should be viewed. Paragraph 16 ¡§The interna
regarded as an empty village because they are devoid of lastingness, pleasure, and self; an
as village - raiding robbers because they raid the internal ones. And this is said: ¡¥Bhikkhus,
harassed by agreeable and disagreeable visible objects¡¦¡¨and so on. That is from the Sa?yu
want to read the whole Sutta, it is in Kindred Sayings, volume 4, page 109.

¡§Furthermore, the internal ones should be regarded as like the six creatures and the extern
their resorts.¡¨ That is also in Sa?yutta Nik?ya, Kindred Sayings, volume 4, page 131. The s
snake, a crocodile, a bird, a dog, a jackal, and a monkey. Suppose a man were to tie these
with a rope. Then the rope is tied in the middle. So they are tied to one place. Then let them
like. The snake wants to go into a pit or hole. The bird wants to fly. The crocodile wants to g
water and so on. They cannot go because they are tied to one place. The strongest among
others with him. It is something like that. The six senses are something like that.

OK. We now come to the end of the ?yatanas or bases. What is meant by dhamma base? ¡¥
sensitivity. Ear base, nose base, tongue base, body base and then visible data base, sound
so on. But what is dhamma base? Do you find that? We have twelve bases - eye base-eye
data base-visible object. It¡¦s OK. Ear-sound, nose-smell, tongue-taste, body-tangible data.
dhamma base. ¡¥Mind base¡¦ means all 89 cittas. What is dhamma base?

Students: 69 things. Chapter 7.

Teacher: You have it at the end of paragraph 14. ¡§The dhamma base is of many kinds whe
to the several (different) individual essences of feeling, perception, formations, subtle matter
Nibb?na.¡¨ Dhamma base is vedan?, sa???, sa~kh?ra, subtle matter and Nibb?na. You ge
seventh chapter of The Manual of Abhidhamma. So dhamma base means one of these thin
formations. Actually feeling, perception and formations are the 52 cetasikas. So we have ce
matter and Nibb?na. How many? 69, good.

Next time we will study elements, faculties and maybe some truths, about 20 pages.

S?dhu! S?dhu! S?dhu!

(Tape 33 / Ps: 17 ¡V 43)

Just two days after the earthquake we come to the description of the elements. Here Venera
many mistakes. It is impossible to follow them. The P??i word for element is dh?tu. The wor
familiar to you. The meaning of the word ¡¥dh?tu¡¦ is explained in nine ways. One is a little d
the other. Venerable ???amoli misunderstood some words so much that it is impossible to f

The first meaning is those which make or create (suffering in sa?s?ra). He uses ¡¥sort out¡¦.
what the meaning of ¡¥sort out¡¦. Sort out means what? In paragraph 20 ¡§The mundane sc
defined according to their instrumentality, sort out the suffering of the round of rebirths¡¨ and

Students: To seek, to find, to separate, look for.

Teacher: I see. That is not the meaning of the P??i word here. The P??i word here is to mak
They are called dh?tus because they make or they create suffering in sa?s?ra.

The P??i word ¡¥dh?tu¡¦ is composed of the root ¡¥dh?¡¦ and the suffix ¡¥tu¡¦. ¡¥Dh?¡¦ has m
the first definition it has the meaning of making or creating. That is the first meaning.

The second meaning is those which are borne by beings. According to the second, the root
or to bear. Here the meaning is passive. So those which are borne by beings are called dh?
ear element and so on). We carry them, something like that, so they are called ¡¥dh?tus¡¦.

The third meaning is that which are mere creating or making the suffering of sa?s?ra. Here t
the abstract noun is used to describe it. Here ¡¥dh?tu¡¦ means just creating or making. That
one who creates. There is just the act of creating, just the act of making.

The fourth one is those by which suffering is made or created by beings. Here they are taken
They are instrumental making and creating suffering by beings. That means beings create s
help of these dh?tus. By the eye, by the ear, by the nose and so on we create suffering. The
the meaning of instrument. The meaning of dh? is making or creating. (The video man arrive

Today we only have a few students because it is just two days after the earthquake. Many p
to normal yet, so people probably couldn¡¦t come. We will carry on with our class. Today we
description of the elements. The P??i word for element is dh?tu. That word is explained in T
Purification or Visuddhi Magga. Nine explanations of the word ¡¥dh?tu¡¦ are given in the Visu
translation is so incorrect in this place that is impossible to follow it. So we will explain accor

what I understand to be the real meaning in the Visuddhi Magga. The word ¡¥dh?tu¡¦ is expl
Please look at the sheets.

The first is those which make or create (the suffering in sa?s?ra). Those are called ¡¥dh?tus
¡¥dh?¡¦ has the meaning of making or creating. It has the active sense.

The second explanation is those which are borne by beings, those which are held by beings
¡¥dh?¡¦ has the meaning of bearing. And it has the passive sense. Those which are borne by
¡¥dh?tus¡¦.

The third is those which are mere creating or making the suffering of sa?s?ra. Here just the
verbal noun is used. Although dh?tu is explained is explained in active sense or passive sen
explanation or the ultimate explanation is by abstract noun. The act of making or the act of c
we call ¡¥dh?tus¡¦.

Then the fourth one is those by which suffering is made or created by beings. Here dh?tus a
instruments. They are instrumental in beings making or creating suffering. We create sufferi
suffering occur by the help of these dh?tus, by the eye, by the ear and so on. The sense is i
will explain to you later about this.

Then the next one is those where suffering is stored or placed. Here the root ¡¥dh?¡¦ means
to store. The sense is a place or location. Here dh?tus are those where suffering is stored o
means we create suffering with these eyes and so on. So suffering is said to be stored in the
and so on. Sometimes the Buddha said the eye is burning, the ear is burning and so on. Tha
eye we get akusala, through the ear we get akusala and so on.

Then the next one is those which bear their own individual essence. Here the root ¡¥dh?¡¦ m
bear, to hold their own individual essence. This is also in the active sense but it is different th
first meaning. In the first meaning the root ¡¥dh?¡¦ has the meaning of making or creating. He
¡¥dh?¡¦ has the meaning of bearing. The meaning is different although the sense is active he
which make or create are dh?tu. Here those which bear their own individual essence are cal

Then those that resemble dh?tus (I don¡¦t know these.) such as, malachite, cinnabar and so
the Path of Purification. These are parts of rocks. (Minerals found in rocks) They are called d
malachite or cinnabar are the constituents or parts of rocks, these dh?tus are parts of oursel
called ¡¥dh?tus¡¦. Here it is a figure of speech that we call them dh?tus. It is like calling an A
American. Maybe he imitates everything American and somebody says that he is an Americ
American. He is like an American. In the same way they are dh?tus because they are like th

Then #8 again there are those which resemble dh?tus, such as, chyle, blood, etc. There are
dh?tus in our bodies. I think that we met these dh?tus in one of the previous chapters, in the
the four elements. They are also called ¡¥dh?tus¡¦ in Ayuvedic medicine they say there are s
dh?tu in the body - chyle, blood, bone, bone marrow, flesh, bile and semen. Just as chyle, b
part of ourselves, of our bodies, the dh?tus, the eye, the ear and so on, are part of ourselves
called dh?tus through resemblance.

The last one, #9, here we are not to follow any etymology. It is a non-etymological meaning.
¡¥dh?tu¡¦ just means no-soul. You don¡¦t have to worry about how this word is made or from
derived. It is a word that means no-soul. These nine meanings are given in the Visuddhi Ma

There are words in both P??i language and Sanskrit language especially nouns that are forn
are suffixes are combined to form words or nouns. When they are formed, the root has one
suffix has another meaning. For example the word ¡¥dh?tu¡¦ - the root ¡¥dh?¡¦ has one mean
hold, to create, or whatever. The suffix ¡¥tu¡¦ has another meaning, that is that can be an ag
one, or that which can be done to it, passive one, or it can show us the instrument or someti
person to whom something is given, or sometimes it is a place or person from whom we dep
sometimes it means a place. These are called in P??i s?dhanas. I don¡¦t know how to transl
It is a P??i and Sanskrit grammatical term. Different nouns denote different things. I mean th
one word, but that one word can mean different things according to the meaning denoted by
According to that grammatical teaching the word ¡¥dh?tu¡¦ is explained here. It is not so imp
understand all of these. If you understand that the word ¡¥dh?tu¡¦ is used to mean eye, ear,
think that is enough. But if you take delight in knowing the etymological meaning of the word
interesting. These nine meanings are mentioned in the Visuddhi Magga.

In The Path of Purification only A-E are given, but not the other ones. Paragraph 21 ¡§Furthe
self of the sectarians does not exist with an individual essence, not so these.¡¨ That should b
of lines down ¡§And just as in the world¡¨, that should be G. Three or four lines down ¡§or jus
generalization elements¡¨, that should be H. In paragraph 22 ¡§Furthermore, ¡¥element¡¦ is a
soulless¡¨ - that should be I. Those correspond to the numbers on the sheet. You may comp

In paragraph 21 he misunderstood the word ¡¥dh?renti¡¦. He took its meaning to be in the ca
actually it is not a causal verb. It looks like a causal verb, a causal form. It is not really a cau
¡¥Dh?renti¡¦ just means to bear or hold. It is not cause to bear or cause to be borne. That is
misunderstanding of the word ¡¥dh?renti¡¦. Paragraph 23 is not difficult to understand. Footn
hopeless. I don¡¦t know how he misunderstood so much in this place. So the verb ¡¥dharent
in the causative sense.

Paragraph 24 ¡§As to order: here too, from among ¡¥order of arising¡¦, etc. mentioned above teaching¡¦ is appropriate.¡¨ These twelve are given just in the order of teaching, not accordin of arising, or not according to other orders¡¦. ¡§It is set forth according to successive definitio and fruit (or cause and effect). For the pair, eye-element and visible-data-element, are the ca eye-consciousness-element is the fruit. So in each case.¡¨

If you look at these elements on the handout, the three are given in a line: eye-element, visible-data-element and eye-consciousness element. Eye-element and visible-data-elemen here. Then eye-consciousness element is the fruit or effect. Eye-element and visible-data-el conditions for eye consciousness to arise. Only when there is eye-element or just the eye ar datum can the eye consciousness arise. So eye consciousness is said to be the result of ey visible datum. This is the order here taken.

In paragraph 25 a lot of elements are mentioned. It gives us some knowledge about, some i word ¡¥element¡¦. The word ¡¥element¡¦ is used to mean almost anything here. That is why t ¡¥dh?tu¡¦ to mean element always is not so helpful. One may translate it as element, but pec understand. You can see here ¡§the illumination element, beauty element, base-consisting-o element, base-consisting-of-boundless-consciousness element, base-consisting-of-nothingn base-consisting-of-perception-and-feeling element, sense-desire element, ill will element, cr and so on. The word ¡¥dh?tu¡¦ is made to mean many things in the Suttas and also in Abhid took all these elements from the Suttas and then explained here that all of them are the sam included in one of the elements mentioned here. Only 18 are mentioned here. But there are described as elements such as illumination element, beauty element and so on. But they ar elements actually. They can be the same as ones mentioned here. They can be included in elements. Paragraphs 26 and 27 explain this.

Paragraph 26 ¡§The visible-data element itself is the illumination element.¡¨ So visible data a are the same here. ¡§The beauty element is bound up with visible-data and so on.¡¨ Beauty visible data because it is just visible data. ¡§Why? Because it is the sign of the beautiful. The beautiful is the beauty element and that does not exist apart from visible data and so on.¡¨

About three lines down ¡§As regards the base-consisting-of-boundless-space element, etc. formless jh?nas or cittas.), the consciousness is mind-consciousness element only, while the [states] are the mental-data element.¡¨ ¡¥Mental-data element¡¦ means in P??i dhamma dh? the second column, the last line, mental-data-element or dhamma-element?

¡§Consciousness is mind-consciousness-element only, while the remaining [states] (That me

the mental-data element but the cessation-of-perception and feeling-element does not exist
essence.¡¨ ¡¥Cessation-of-perception and feeling-element¡¦ means a kind of attainment (s?m
person gets into this s?mapatti, his mental activity is suspended. There is no mental activity
attainment. That is called cessation of perception and feeling. Actually not only perception a
all mental activity ceases. That attainment can be entered into only by An?g?mis (Non-Retu
Arahants. We will have this given in detail at the end of the book. That is just the absence of
activity. So the absence of mental activity has no individual essence. It is a concept. ¡§For th
the cessation of two elements.¡¨

Now this is important. ¡§The sense-desire element is either merely the mental-data element
said ¡¥Herein, what is the sense-desire element? It is thought. Applied thought..wrong think
associated with sense desires¡¦.¡¨ You know applied thought (vitakka) or we call it initial app
it means initial application, then it is included in dhamma element (mental data element). Dh
consists of cetasikas, some r|pas and Nibb?na. It is given on the bottom line. Dhamma base
cetasikas, subtle matter, Nibb?na. There are 16 subtle material properties. These cetasikas,
Nibb?na are called ¡¥dhamma base¡¦ or ¡¥dhamma element¡¦. If it is taken to be applied thou
element.

¡§Or it is the 18 elements, according as it is said ¡§making the Avici hell the lower limit and n
Paranimmitavasavatti (This is the highest of the 6 celestial worlds.) deities the upper limit, th
elements, bases, materiality, feeling, perception, formations and consciousness, that are cal
¡¥sense-desire element¡¦.¡¨ In this sense the ¡¥sense-desire element¡¦ means just the sensu
remember the 31 planes of existence. There are 11 sensual sphere existences. The 11 sens
sense-desire element here. It is important because in some places Venerable ???amoli und
wrongly. So sense-desire element can mean the 11 sense-desire realms.

And then the renunciation element is also mind-data-element because it is also vitakka. ¡¥R
element¡¦ means thinking of getting out of sense desires. It is vitakka, so it is mental-data ele
all profitable states are the renunciation element.¡¨ According to this definition it is the
mind-consciousness element too. All profitable states (all kusalas) - all kusala means all kus
consciousness and mental states. They belong to mind-consciousness element also. That m
mental-data element as well as mind-consciousness element. That means dhamma elemen
mind-consciousness element.

Then the elements of ill will, cruelty, non-ill will, non-cruelty, bodily pleasure, bodily pain, joy,
equanimity, ignorance, initiative, launching, persistence are mental-data element too. They b
element.

Then the inferior, medium and superior are not separate elements. They are the 18 element
eyes, etc., are the inferior element, and medium and superior eyes, etc., are the medium an
elements.¡¨

Paragraph 30 ¡§The earth, fire and air elements (These you know.) are the tangible-data ele
element and the space element are mental-data element only.¡¨ Water element and space e
subtle matter. So they belong to dhamma element. ¡§ ¡¥Consciousness element¡¦ is a term s
consciousness elements beginning with eye consciousness. They are eye consciousness, e
consciousness, tongue consciousness, body consciousness, mind-consciousness element,
elements and one part of the mental-data element are the formed element.¡¨ ¡¥Formed¡¦ me
¡¥unformed¡¦ means unconditioned. All of them are formed except for Nibb?na. Nibb?na is a
element. 17 other elements and part of dhamma element are formed. ¡§The unformed elem
mental-data element only.¡¨ Unformed element is a part of the dhamma element which is Nib
world of many elements, of various elements is merely what is divided up into the 18 elemen
is divided into 18 elements. They are not different from or separate from the elements menti
have to understand that there are other things that are called ¡¥dh?tus¡¦ in P??i. Sometimes
difficult to understand when we just use the word ¡¥element¡¦ when we translate dh?tu. It is t
but it is not so understandable. For example when you say the sense-desire element meani
realm (the sensual desire realm), it is very difficult to understand.

¡§Furthermore they are stated as 18 for the purpose of eliminating the kind of perception to
who perceive a soul in consciousness, the individual essence of which is cognizing¡¨ and so
Buddha wanted to do away with the idea of self, the idea of soul. That is why the Buddha m
elements. That is why I always say that Abhidhamma is just one doctrine, the doctrine of ana
things are described as 5 aggregates, 12 bases, 18 elements, 22 faculties. In different ways
analyzed, but you do not find any soul or eternal substance. So the whole of Abhidhamma is
of anatta.

Paragraph 34 ¡§As to reckoning: the eye element firstly, is reckoned as one thing according
eye sensitivity. Likewise the ear, nose, tongue, body, visible data, sound, odor and flavor ele
reckoned as ear sensitivity and so on.¡¨ But tangible data is just the combination of earth, fir
element. ¡§The eye consciousness element is reckoned as two things.¡¨ The eye consciousn
two eye consciousnesses. The eye consciousness element means cittas #13 and #20. So th
profitable and unprofitable kamma-result. #13 is result of unprofitable and #20 is the result o
In the chart at the end of the book the numbers will be different. There the numbers are 34 a
give the numbers at the beginning of the passage. I think you should put the numbers after p
unprofitable kamma results. Those are the numbers given in table 3 at the end of the book.

¡§And likewise the consciousness elements of the ear, nose, tongue and body.¡¨ They are th
element is reckoned as three things, namely, five-door adverting (70), and profitable (39) an
(55) resultant receiving.¡¨ You can locate them easily because there are numbers here.

¡§The mental-data element as 20 things, namely, three immaterial aggregates¡¨ - do you kn
aggregates? Feeling, perception and formations - ¡§16 kinds of subtle matter, and the unfor
means Nibb?na.).¡¨ So mental-data element or dhamma element means 20 things here - 3 r
subtle matter and Nibb?na. The 3 mental aggregates are simply the 52 cetasikas. 52 + 16 +
called ¡¥dhamma element¡¦ or ¡¥mental-data element¡¦. You may refer to paragraph 14 and
is described similarly. Actually we have to take it to mean the same thing. ¡§The dhamma ba
when classified according to the different essences of feeling, perception, formations (Those
aggregates.), subtle matter and Nibb?na.¡¨ These two explanations mean the same thing. If
what mental element or mental-data base, you may read these paragraphs. They mean the

¡§Mind-consciousness element is reckoned as 76 things.¡¨ That means cittas apart from the
(dvipa?cavi????a) and then these three (mandh?tu). In this chart the numbers are 13-17, 20
and 28. They are called ¡¥mind-consciousness element¡¦. Actually they are all cittas less the
hearing consciousness and so on and the mind element. The mind element consists of 28, 1
called ¡¥mind element¡¦.

Paragraph 35 ¡§Condition: the eye element, firstly, is a condition, in six ways, namely, disso
prenascence, presence, non-disappearance, support and faculty for the eye consciousness
the end of paragraph 39. ¡§This is in brief. But the kinds of conditions will be explained in de
description of the Dependent Origination. So if you don¡¦t understand the conditions here lik
prenascence, presence, and so on, please be patient. These 24 conditions will be explained
chapter on Dependent Origination. ¡¥Dissociation¡¦ means not arising together. ¡¥Prenascen
arises before another thing arises and it is still existing when the other one arises. Let us say
before #2 arises. And when #2 arises, #1 is still in existence. That is called ¡¥prenascence¡¦.
something, there is seeing consciousness. The seeing consciousness sees the visible datum
arises before that moment and is still existing until the 17th moment. That is why it is called
¡¥prenascence¡¦. There is also presence. Disappearance and presence are the same actual
support, support for eye consciousness. In this way eye sensitivity is the condition for eye co
You will understand after we finish the chapter on Dependent Origination. If you don¡¦t unde
be depressed.

Paragraph 40 ¡¥to be seen¡¦ means to be viewed, how you should view them, how you shou
to be seen: the meaning is that here too the exposition should be understood as to how they
regarded. For all formed elements are to be regarded as secluded from the past and future.¡

past cannot be seen clearly and the future also cannot be seen clearly. Here the Commenta
the present dh?tus. They have no past and no future. Just the present ones are the real one
¡§secluded from the past and future, as void of any lastingness, beauty, pleasure, or self, ar
dependence on conditions.¡¨ So we are to view them like this.

And then another kind of viewing is given in paragraph 41. I think they are good examples. ¡
should be regarded as the surface of a drum, the visible-data element as the drum-stick, the
as the sound.¡¨ You strike a drum and the sound arises. Sound is like eye consciousness. T
visible datum. And the eye sensitivity is like the drum. They are good examples of the eleme

Paragraph 42 ¡§The mind element, however, should be regarded as the forerunner and follo
consciousness, etc., as that arises.¡¨ The mind element consists of #18, #25 (the two sampa
(pa?cadv?ravajjana). In the seeing thought process immediately before #13 or #20 (eye con
is #28 (pa?cadv?rajjana). You may look at the diagram of the thought process. First there is
and then there is #13 or #20 (seeing). After seeing there is receiving. Receiving is #18 or #2
element which is #18, #25 and #28 comes before and after eye consciousness (#13 or #20)
Commentary is saying here. ¡§The mind element, however, should be regarded as the forer
eye consciousness.¡¨ If you look at the diagram, it is very easy to see. Eye consciousness is
consciousness is five-sense-door adverting (28). After eye consciousness is #18 or #25 whi
the mind element comes before and after eye consciousness, etc.

Paragraph 43 ¡§The mind consciousness element should be regarded as a forest monkey, b
still on its object; or as a wild horse, because it is difficult to tame; or as a stick flung into the
because it falls anywhere.¡¨ It should be ¡¥anywhere¡¦ not ¡¥anyhow¡¦ because it falls where
means anywhere. ¡§Or as a stage dancer because it adopts the guise of the various defilem
and hate.¡¨

This is the section on the 18 elements. You can see the 18 elements on this sheet. They are
different colors.

Chapter 16
(Tape 33 / Ps: 1-31)

The next one is the faculties and truths. There are 22 faculties, namely, eye faculty, ear facu
This is the order given in the Visuddhi Magga. The order is a little
different than that given in The Manual of Abhidhamma.

Then the Commentator explains the words ¡¥cakkhu¡¦, ¡¥sota¡¦ and so on. We are referred b
Please look at the last three in the fourth column of the handout - I-shall-. Final-knowledge-fa
final-knower. We have understanding faculty, I-shall faculty, final-knowledge faculty, and fina
faculty. The last three are also understanding. Understanding is pa??? and the last three are

The first one, I-shall etc., is pa??? at the moment of first Magga. Final knowledge faculty me
moment of first Fruit, and then at second Path and Fruit, third Path and Fruit and at fourth Pa
Final-knower is the faculty arising with the fourth Fruit consciousness. The first one is first M
Path). The middle one is the six in between. The last one is the fourth Fruit. They are given
here - I shall come to know the unknown faculty, the final knowledge faculty, and final knowe
are explained in paragraph 3.

Then the word ¡¥indriya, whose English translation is faculty, is explained in paragraph 4 an
When explaining the P??i word ¡¥indriya¡¦, the Commentators just followed the aphorism giv
grammar by P??ini. You can find the aphorism in footnote 2. There you see ¡§P??ini V, 2, 9
indralingam indradrstam indrasretam indrjustam indradattam iti v?.¡¨ This is the aphorism fou
Sanskrit grammar of P??ini. When explaining the word ¡¥indriya¡¦ here, the Commentator, V
followed this aphorism. Only the last one is not taken, indradattam. In the word ¡¥indriya¡¦ th
word ¡¥inda¡¦ or ¡¥indra¡¦. It is explained here that the word ¡¥inda¡¦ or ¡¥indra¡¦ means good
kusala or akusala; or it means the Buddha. If you understand this, then you will understand
¡¥indriya¡¦ we have the word ¡¥inda¡¦ or ¡¥indra¡¦. Inda or indra is explained to mean two thin
what? Kusala and akusala. And the other is the Buddha.

Then there is the ¡¥ya¡¦ or the ¡¥iya¡¦ in the word ¡¥indriya¡¦. The suffix is explained to mean
That is what here? The mark, prepared by, taught by, seen by, fostered by. When we take ¡¥
then the word ¡¥indra¡¦ means kamma, so the mark of kamma. The mark of kamma is called
looking at one¡¦s eye, we can say that he has good kamma in the past or he has bad kamma
good kamma creates good eye sensitivity and bad kamma creates bad eye sensitivity. Some
use eye glasses all their lives, but some people have to use eye glasses from their childhood
their kamma. The eye sensitivity is the result of kamma. We all have had bad kamma in the
to use glasses. You have good kamma in the past.

Student: Just for the eyes.

Teacher: We know kamma from the eye, ear and so on. So they are called ¡¥the mark of ka
here as the mark of a ruler. ¡¥Ruler¡¦ here means good or bad kamma. The second meaning
That means made by or caused by kamma. ¡¥Ruler¡¦ here also means kamma. The third me
It is not taught by kamma, but taught by the Buddha. The third meaning is that which is taug
The fourth meaning is seen by. Again it is seen by the Buddha. The last meaning is fostered
the Buddha. That means ¡¥in his cultivation of domain and some in his cultivation of develop
¡¥Cultivation of domain¡¦ simply means that he takes them as object. ¡¥Cultivation of develo
he develops them. The faculties were cultivated by the Buddha. That is why they are called
did the Buddha cultivate them? He cultivated them in two ways. One is taking them as objec
the Buddha took Nibb?na as object and entered into attainment, he was fostering Nibb?na b
object. At other times he may be practicing or he may be in some other attainment, so in tha
the cultivation of development. So the Buddha acts towards Dhamma in two ways - taking a
them happen in his mind. ¡¥Fostered by a ruler¡¦ means fostered by the Buddha. So there a
meanings. The first meaning is mark of kamma. The second meaning is prepared by kamma
taught by the Buddha. The fourth meaning is seen by the Buddha. The fifth meaning is foste

As to characteristic and as to order are not difficult to understand. Paragraph 9 ¡§As to divid
undivided: here there is only division of the life faculty.¡¨ Only the life faculty has division. Th
are only one. ¡§For that is twofold as the material life faculty and the immaterial life faculty.¡¨
there are two kinds of j?vita - n?ma j?vita and r|pa j?vita (mental j?vita and physical j?vita). I
kinds and the others are of one kind. ¡§There is no division of the others.¡¨

Then we have their function. Since they are called ¡¥faculties¡¦ or ¡¥indriyas¡¦, that means th
predominate. So they make others follow their wish. That is what is meant by the word ¡¥ind
means making other people follow your wish. That is indriya. Or it may be exercising his wis
here ¡§The eye faculty¡¦s function is to cause by its own keenness, dullness, etc., the occurr
consciousness and associated states, etc., in a mode parallel to its own.¡¨ That means maki
own mode. That means when you have good eye sensitivity, you have good eye consciousn
sensitivity, you have bad eye consciousness. The keenness or dullness (I don¡¦t think ¡¥slow
here.) etc., of eye consciousness is governed by the keenness or dullness of eye sensitivity.
sensitivity has something like authority, exercising authority over. Then the different function
mentioned and they are not difficult to understand.

Towards the end of paragraph 10 ¡§That of the final-knowledge faculty is both to attenuate a
respectively lust, ill will, etc., and to subject conascent states to its own mastery.¡¨ ¡¥Final kn

means the knowledge between the first Magga and the last Fruit. The understanding concor
Path is called ¡¥I shall and so on¡¦. The knowledge or understanding concomitant with first F
fourth Magga is called ¡¥final knowledge¡¦. ¡§The final-knowledge faculty is both to attenuate
respectively lust, ill will, etc.¡¨ ¡¥Attenuate¡¦ refers to second Path because the second Path
eradicate any more mental defilements, but it does make the remaining mental defilements
¡¥attenuates¡¦ is for the second Magga. ¡¥Abandon¡¦ is for third and fourth Magga. The third
sensual desire and ill will all together. Then the fourth Magga eradicates the remaining ment
So ¡¥attenuate¡¦ refers to second Magga and ¡¥abandon¡¦ refers to third and fourth Magga.
final-knower faculty is both to abandon endeavor in all functions.¡¨ That is because it has alr
own duty and there is no more to be done.

As to plane - that means which faculty belongs to which plane. The faculties of eye, ear, nos
and so on belong to k?m?vacara (sense-sphere plane) because they are all r|pas. ¡§The mi
faculty, equanimity faculty, faculties of faith, energy, mindfulness, concentration and underst
included in the four planes.¡¨ That means they belong to all four planes - k?m?vacara, r|p?va
and lokuttara. Mind faculty is consciousness. Life faculty and others are mental states (cetas
are included in all four planes. ¡§The joy faculty (somanassa) is included in three planes, na
sense-sphere, fine-material sphere, and supramundane (not the immaterial sphere). The las
supramundane only.¡¨ That is ¡¥I shall come to know¡¦ and so on. ¡§This is how the expositio
here as to plane.¡¨ So according to this we understand that eye faculty belongs to sense-sph
belongs to sense-sphere and so on. Mind faculty belongs to four planes and so on. ¡¥Four p
sense-sphere (k?m?vacara), fine material sphere (r|p?vacara), immaterial sphere (ar|p?vaca
sphere (lokuttara). Lokuttara is also called a ¡¥sphere¡¦.

Please look at the sheet. Let us go through the bases, elements and faculties. In order to ple
listeners or to suit the susceptibility of listeners the Buddha taught in different ways. One and
thing is called base, element, faculty and so on. Here I colored them. Eye base, eye elemen
are one and the same thing. They are actually eye sensitivity. They mean the same thing, so
color. Sometimes it is called eye base, sometimes eye element, sometimes eye faculty. So
nose base, tongue base, body base, ear element, nose element, tongue element, body elem
faculty, tongue faculty, body faculty. It is the same thing. And then visible data base and visi
element are the same thing. The same is true for sound, odor, flavor and tangible data with
and elements.

Mind base is a little different. ¡¥Mind base¡¦ means all cittas. So in the elements mind base i
seven. There are mind element, eye consciousness and so on. They are called ¡¥vi????a d
consciousness elements. Mind base is divided into seven elements - mind element, eye con
so on. ¡¥Mind element¡¦ means again #28, #18 and #25 in the chart. Those are the mind ele

consciousness element means #13 and #20. Ear consciousness element is #14 and #21. N
is #15 and #22. Tongue consciousness element is #16 and #23. Body consciousness is #17
are mind consciousness element. And among the faculties mind faculty and mind base are t
means all consciousness and mind faculty also means all consciousness.

Now we come to dhamma base, mental data base. I want to call it dhamma base. Dhamma
are the same. In faculties however they are mentioned in different ways. There are femininit
masculinity faculty, life faculty, pleasure (sukha), pain (dukkha), joy (somanassa), grief (dom
equanimity (upekkh?). Pleasure and pain are bodily pleasure and bodily pain. Joy, grief and
mental. Then there are faith faculty, energy, mindfulness, concentration, and understanding.
the other three kinds of understanding also. They all belong to dhamma element or dhamma
may color them some other color or leave them as they are. So femininity belongs to dhamm
dhamma base. The same is true for the others. This way you have a clear vision of bases, e
faculties. When you read the Visuddhi Magga again, please have it ready and refer to it.

We can go into the truths (sacca) a little. The P??i word ¡¥sacca¡¦ is translated as truth here
will come later. ¡§Herein as to class: the meanings of [the truths of] suffering, etc., are analy
in each case that are ¡¥real, not unreal, not otherwise¡¦ and must be penetrated by those pe
suffering, etc., according as it is said.¡¨ There are said to be four meanings for each truth. Su
the meaning of oppressing, being formed, burning and changing. These four meanings belo
Then these meanings belong to the second Truth - accumulating, source, bondage and imp
Truth¡¦s meaning is escape, seclusion, being unformed and deathlessness. And the fourth T
of outlet, cause, seeing and predominance.

¡§Likewise suffering¡¦s meaning of oppressing, meaning of being formed, meaning of burnin
are its meaning of penetration and so on. So suffering, etc., should be understood according
meanings analyzed in each case.¡¨ When you look at dukkha, you see that it is oppressing,
formed, that is burning, that it is changing.

Then there is as to derivation, as to division by character and so on. The definitions of dukkh
nirodha and nirodha-g?min? pa?ipad? are given in paragraphs 16, 17, 18, 19. The meaning
you take delight in finding out the meanings of words, it may be interesting.

Dukkha is said to come from ¡¥du¡¦ and ¡¥kha¡¦. Du is bad. ¡§The word ¡¥du¡¦ (bad) is met w
vile.¡¨ Then ¡¥kham¡¦ means empty. So something which is bad, something which is vile and
¡¥dukkha¡¦. ¡§And the first Truth is vile because it is the haunt of many dangers, and it is em
is devoid of the lastingness, beauty, pleasure, and self, conceived by rash people. So it is ca
(badness)¡¦ = suffering, pain), because of vileness and emptiness. If we do not go further an

sukha, it is all right. But if we try to explain sukha in this way, we run into difficulties. The wo
¡¥sukha¡¦ means happiness. Let us say ¡¥su¡¦ means good. If ¡¥kha¡¦ is to mean devoid of la
of beauty, devoid of pleasure, devoid of self, then what about Nibb?na? Nibb?na is called th
Nibb?na lasts forever. Nibb?na could be said to be beauty. Nibb?na is pleasure. Nibb?na is
apply similarly the explanation given here to sukha, then we run into trouble. It is just an exp
the word.

Samudaya has three parts - ¡¥sam¡¦, ¡¥ud¡¦ and ¡¥aya¡¦. Sam has the meaning of concourse
¡¥Ud¡¦ or ¡¥U¡¦ means rising up. Then ¡¥aya¡¦ denotes a reason. So we get the coming toget
reason. That is the meaning of samudaya, the Second Noble Truth, the origin of suffering. ¡§
is the reason for the arising of suffering when combined with the remaining conditions.¡¨ So
for the arising of suffering when it is combined together with other conditions. That means it
condition for dukkha. It is the prominent condition for dukkha. There are other conditions like
Without ignorance there can be no craving. Craving is here the origin of dukkha, but it does
craving is the only origin of dukkha. It is the prominent one. That is why it is called the origin
But others like ignorance are also the origin of dukkha. When craving comes into combinatio
conditions it produces dukkha. It is the reason or cause for the arising of suffering when it is
the remaining conditions.

The next one is nirodha, the Third Noble Truth, Nibb?na. Nirodha here is divided into ¡¥ni¡¦ a
¡¥Ni¡¦ means no or absent. ¡¥Rodha¡¦ means a prison. ¡¥Rodha¡¦ really means restriction. W
prison, you are restricted. Nibb?na is the opposite of that - no restriction, freedom. Nibb?na
¡¥dukkha nirodha¡¦. It is just translated as the cessation of suffering.

Then we have nirodha-g?min? pa?ipad?. That is the road leading to cessation. The Fourth N
¡¥dukkha nirodha-g?min? pa?ipad? (the way leading to the cessation of suffering)¡¦.

In paragraphs 20, 21, 22 the P??i word ¡¥Ariya Sacca¡¦ is explained in four ways. According
Ariya Sacca is the truth to be penetrated by the Ariya or the Ariya penetrable truth becomes

According to the first part of paragraph 21 ¡¥Ariya Truth¡¦ means the Truth of the Ariya. ¡¥Ar
Buddha, so the Truth of the Buddha or Ariya¡¦s Truth, Buddha¡¦s Truth.

The third one in paragraph 21 beginning with ¡§or alternatively, according to that passage ¡¥
means that Truth which makes people into Ariyas. That means when you penetrate the Trut
So Truth that makes people into Ariyas.

The fourth one is paragraph 22. The P??i word ¡¥Ariya Sacca¡¦ means the Truth which is rea

is real, not unreal. The word ¡¥Ariya Sacca¡¦ is explained in four ways. It is usually translated
Truth. In paragraph 22 ¡¥noble¡¦ means ¡¥true¡¦, true Truth or real Truth.

Paragraph 24 ¡§As to ¡¥meaning¡¦ firstly, what is the meaning of truth?¡¨ The word ¡¥sacca¡¦
explained. ¡§For the eye of those who examine it with the eye of understanding, it is not mis
illusion.¡¨ ¡¥Misleading¡¦ really means untrue. It is not untrue like an illusion. Illusion is the tra
of the word ¡¥m?y?¡¦ which can mean magic. Magic is untrue. When you go to a magic show
that are untrue, but you think they are true. So it is like magic.

Paragraph 25 ¡§There is no pain but is affliction
And naught that is not pain afflicts.¡¨
The meaning is there is no dukkha which does not afflict, and there is nothing other than dul
afflicts.

Paragraph 26 tracing out the meaning - here the meanings of the word ¡¥sacca¡¦ are given.
what? What is the first one? Verbal truth. Saying something true is also called ¡¥sacca¡¦. Th
abstinence from lying is also called ¡¥sacca¡¦. The third one is what? Truth is views. View is
¡¥truth¡¦. ¡§And in such passages as ¡¥Truth is one, there is no second¡¦ it is, as truth in the
sense, both Nibb?na and the Path. In such passages as ¡¥Of the four truths how many are
Noble Truth. And here too it is proper as Noble Truth. This is how the exposition should be u
tracing out the meaning.¡¨ Sometimes the Commentary has the habit of showing us many m
Then it says among the meanings this is proper here, that is proper there. That means givin
word can denote and then choosing the meaning that is appropriate here. So ¡¥sacca¡¦ can
abstinence from lying and so on. But what is proper here is just Noble Truth.

The next passages are not difficult. Paragraph 31, as to expounding birth and so on - from h
detailed exposition of the Four Noble Truths. The First Noble Truth is described by the Budd
Truth of Suffering. It is expounded as ¡§Birth is suffering, aging is suffering, death is sufferin
lamentation, pain, grief, and despair, are suffering, association with the unloved is suffering,
from the loved is suffering, not to get what one wants is suffering, in short, the five aggregat
of clinging are suffering.¡¨ These explanations you find in the first sermon, the setting in moti
wheel of Dhamma. Then he explains them in detail. We will not come to the end of the expla
Let¡¦s stop here.

S?dhu! S?dhu! S?dhu!

(Tape 34 / Ps: 32-74)

In paragraph 4 I want to correct something. ¡¥A¡¦ is mark of kamma. ¡¥Mark of a ruler¡¦ mea
kamma. ¡¥Mark of a ruler¡¦ just means mark of kamma. ¡¥B¡¦ is taught by the Buddha. There
¡¥Ruler¡¦ means the Buddha, so taught by the Buddha actually. ¡¥C¡¦ should be seen by the
ruler¡¦ is seen by the Buddha. Then ¡¥D¡¦ is prepared by kamma. That means the result of ka
fostered by the Buddha. So A. mark of kamma, B. taught by the Buddha, C. seen by the Bud
kamma, E. fostered by the Buddha. These are the meanings given for the word ¡¥indriya¡¦ in

Today we come to the explanation of birth and so on. The Truth of Suffering - Birth - paragra
meanings of the word, the meanings of the P??i word ¡¥j?ti¡¦ can have. The word ¡¥j?ti¡¦ can
meanings. Its meanings are given here in this paragraph. From this paragraph on the explan
given again - birth is suffering, aging is suffering, death is suffering and so on. These are exp
one. Paragraph 32 gives the meanings that the P??i word ¡¥j?ti¡¦ can have. Then the meanin
appropriate here is pointed out at the end. J?ti has how many meanings?

¡§For in the passage ¡¥[He recollects..] one birth (j?ti), two births¡¦ it is becoming.¡¨ That mea
life, two lives. ¡§In the passage ¡¥Vis?kh?, there is a kind (j?ti) of ascetics called Niga??has
is a monastic order.¡¨ In this passage the word ¡¥j?ti¡¦ means a monastic order or something
denomination. ¡§In the passage ¡¥Birth (j?ti) is included in two aggregates¡¦ it is the characte
whatever is formed.¡¨ That means the first phase of existence. You know that there are three
existence - arising, continuation and death. So it is the first phase of existence that is arising
the characteristic of whatever is formed.¡¨ That means all formations have the characteristic
continuation and disappearing. In this passage j?ti means that. ¡§In the passage ¡¥His birth
first consciousness arisen, the first cognition manifested, in the mother¡¦s womb¡¦, it is
rebirth-relinking.¡¨ In that passage the word ¡¥j?ti¡¦ means real relinking at the first moment in
life. ¡§In the passage ¡¥As soon as he was born, ?nanda, the Bodhisatta..¡¦ it is parturition.¡¨
act of being born.) ¡§In the passage ¡¥One who is not rejected and despised on account of b
clan.¡¨ Here ¡¥j?ti¡¦ or ¡¥birth¡¦ means clan. One is not rejected or despised because one is b
caste or whatever. ¡§In the passage (This was uttered by Venerable A~gulim?la.) ¡¥Sister, s
with the Noble birth¡¦ it is the Noble Ones¡¦ virtue.¡¨ Here ¡¥birth¡¦ means becoming a Noble

¡§Here it should be regarded as the aggregates that occur from the time of rebirth-linking up
the mother¡¦s womb in the case of the womb-born, and as only the aggregates of rebirth-link
the rest.¡¨ Here the word ¡¥j?ti¡¦ means the aggregates that occur from the time of rebirth-lin
exit from the mother¡¦s womb. That means during pregnancy. That is called ¡¥j?ti¡¦ here. ¡§A
aggregates of rebirth-linking in the case of the rest¡¨ - now there are beings who are womb-b
beings who are born spontaneously. For those who are born spontaneously just the aggrega
relinking are called ¡¥j?ti¡¦. ¡§But this is only an indirect treatment. In the direct sense, howev
the first manifestation of any aggregates that are manifested in living beings when they are b

that is called ¡¥birth¡¦.¡¨ First it says birth is from conception until the real birth for human bei
for other beings like the devas it is just the relinking.

In paragraph 32 although it is not important here, the translation of one of the passages is q
the middle of the paragraph ¡§His birth is due to the first consciousness arisen, the first cogr
manifested, in the mother¡¦s womb.¡¨ That is wrong. This passage comes from the Vinaya P
become a monk only when he is 20 years of age. If he is younger than 20 years of age, ther
monk. ¡¦20 years¡¦ means 20 years from conception, not from birth. Buddha was saying that
reckoning from the conception. Later on he was doubtful about whether he was really a mor
reported to the Buddha and the Buddha said that it was all right. So one must reckon 20 yea
of conception. That is the passage here. But the translation here is not correct. He misunder

Student: Is time in the womb counted as nine months?

Teacher: Mostly we count it as ten months. But to be on the safe side we do not actually cou
for ordination because sometimes people are born in seven months or whatever. For me I w
19 years and 7 months. This is a passage from the Vinaya Pi?aka. In the translation of Vina
Horner it is correct. You may look it up in Book of Discipline, part 4, page 120. You will get th
translation there.

Paragraph 34 ¡§Its characteristic is the first genesis in any [sphere of] becoming. Its function
[to a sphere of becoming]. It is manifested as an emerging here from a past becoming; or it i
the variedness of suffering.¡¨

¡§But why is it suffering? Because it is the basis for many kinds of suffering.¡¨ Why is this bir
j?ti, suffering? Because it is the basis for many kinds of suffering. Then the many kinds of su
explained here. The most important are the first three because they will be referred to again
explained. At least you have to remember these three even if you do not remember the othe

The first one is what? Dukkha dukkha (intrinsic suffering). The second one is viparin?ma duk
change, suffering when there is change). The third one is sa~kh?ra dukkha (suffering due to
suffering because they are formations. Then they are explained. There is also concealed su
suffering, indirect suffering, and direct suffering.

¡§Herein, bodily and mental painful feeling are called intrinsic suffering.¡¨ That means real su
P??i you see the word dukkha repeated, dukkha dukkha. That means real dukkha. Real duk
mental painful feelings. There are pleasant feeling, unpleasant feeling, and neutral feeling. H
unpleasant or painful feeling is meant, both bodily and mental. Both bodily and mental painfu

called ¡¥intrinsic suffering¡¦ or ¡¥dukkha dukkha¡¦. ¡§Because of their individual essence, the
their painfulness¡¨ because they are real dukkha they are called ¡¥dukkha dukkha¡¦ (intrinsic

The next ¡§[Bodily and mental] pleasant feeling are called ¡¥suffering in change¡¦.¡¨ This is g
pleasant feeling, somanassa and sukha. Even these are called ¡¥suffering (dukkha) becaus
there is dukkha. When you lose the good feeling, you long for that. So you are not happy. Th
¡¥suffering in change¡¦. Here even pleasant feelings are called suffering because they are a
arising of pain when they change.

¡§Equanimous feeling and the remaining formations of the three planes (That means k?m?v
ar|p?vacara) are called suffering due to formations because they are oppressed by rise and
that whatever has rise and fall is impermanent. And whatever is impermanent is suffering. W
and fall is suffering actually. Since everything in the world of formations has a beginning and
everything in the world is suffering. This is called ¡¥sa~kh?ra dukkha¡¦. This is the widest of
At least try to remember these three - dukkha dukkha, viparin?ma dukkha, sa~kh?ra dukkha
sa~kh?ra dukkha. Nothing in this world can escape.

Then there are other kinds of suffering - concealed suffering, exposed suffering, indirect suff
direct suffering. These are easy to understand. For example an earache is called ¡¥conceale
you look at the person from a distance, you don¡¦t know that he is suffering. Exposed sufferi
suffering produced by the 32 tortures. There are 32 tortures mentioned in the Suttas, very fr
tortures. When a person is tortured by one of these 32, it is exposed suffering because you
really suffering even from a distance. ¡§Except intrinsic suffering, all given in the exposition
of suffering beginning with birth are also called ¡¥indirect suffering¡¦ because they are the ba
kind of suffering or another.¡¨ They are the basis for suffering. That is why they are called ¡¥
suffering¡¦. ¡§But intrinsic suffering is called ¡¥direct suffering¡¦.¡¨ Intrinsic suffering is painful
and mental feeling. That is called ¡¥direct suffering¡¦.

¡§herein, this birth is suffering because it is the basis for the suffering in the states of loss as
evident by the Blessed One by means of a simile in the B?lapa??ita Sutta, etc., and for the s
arises in the happy destinies in the human world and is classed as ¡¥rooted in the descent in
so on.¡¨ Suffering in the descent into the womb and others are given here. The fetus is desc
being in a very painful position. I always say that I¡¦m not so much afraid of the fetus becaus
know. The suffering in the mother¡¦s womb is described here.

Paragraph 39 ¡§When the mother has a abortion¡¨ - that is not an abortion. No, he misunder
word is ¡¥gabbham|?ha¡¦. ¡¥M|?ha¡¦ means something like confused. And ¡¥gabbha ¡¦ mean
means difficult delivery. When a woman cannot give birth to a child easily, that means a diffi

¡§When the mother has a difficult delivery, the pain that arises in him through the cutting and
place where the pain arises that is not fit to be seen even by friends and intimates and comp
the suffering rooted in difficult delivery.¡¨ It is not ¡¥abortion¡¦. If it were abortion, it would be
secretly. Here other people help her. It is not abortion but difficult delivery. The others are no
to understand. This is just to make you afraid of the suffering through birth and so on.

The next one is aging (jar?). Here also it is twofold. There are two kinds of jar? or aging; ¡§a
characteristic of whatever is formed (That means the second phase of existence, continuatio
case of a continuity, as the oldness of aggregates included in a single becoming, which oldn
¡¥brokenness¡¦ (¡¥Brokenness¡¦ means broken teeth and so on.) and so on. The latter is inte
not the jar? which is the characteristic of formations. It is getting old. Your teeth are broken.
white hair. You cannot see well and so on.

¡§This aging has as its characteristic the maturing (ripening) of aggregates. Its function is to
death. It is manifested as the vanishing of youth. It is suffering because of the suffering due
and because it is a basis for suffering.¡¨ It is itself suffering and it is also a basis for suffering
is why it is described as dukkha or suffering. These explanations are not difficult to understa
have to get old, then there is leadnness in all the limbs (That means weakness in all the limb
the faculties (You don¡¦t see well, you don¡¦t hear well.), vanishing of youth, undermining of
of memory and intelligence, contempt on the part of others, and so on.

Next is death. ¡§Death is suffering: death too is twofold, as a characteristic of the formed (Th
last phase of existence.), with reference to which it is said ¡¥Aging and death are included in
aggregates¡¦, and as the severing of the connection of the life faculty in a single becoming (
ordinary death. The severing of the life faculty or the disappearance of the life faculty is calle
¡¥death¡¦.), with reference to which it is said ¡¥So mortals are in constant fear.. that they will
latter is intended here. Death with birth as its condition, death by violence, death by natural
from the exhaustion of the life span, death from the exhaustion of merit are names for it.¡¨

¡§It has the characteristic of a fall.¡¨ These are not difficult to understand. ¡§its function is to
It is manifested as absence from the destiny.¡¨ ¡¥Destiny¡¦ really means ¡¥this life¡¦. The P??
¡¥gati¡¦. The P??i word ¡¥gati¡¦ is always translated as destiny. That is why in brackets it say
there was the rebirth], this life. ¡§It should be understood as suffering because it is a basis fo
suffering.¡¨

Then the next one is sorrow. ¡§Sorrow is a burning in the mind in one affected by loss of rela
(loss of relatives, loss of wealth, loss of youth, loss of health). Although in reality (not ¡¥in me
it is the same as grief, nevertheless it has inner consuming as its characteristic¡¨ and so on.

here is attha. ¡¥Attha¡¦ can mean meaning or sometimes ¡¥attha¡¦ means reality. Here it mea
¡§Although in reality it is the same as grief (domanassa)), nevertheless it has inner consumi
characteristic¡¨ and so on.

The next one is lamentation. The P??i word is parideva. ¡§Lamentation is verbal clamor on t
affected by loss of relatives and so on.¡¨ That means crying aloud, saying something. ¡§It ha
its characteristic. Its function is proclaiming virtues and vices.¡¨ When someone dies, then pe
oh, he is good or oh, he is bad. ¡§It is manifested as tumult. It is suffering because it is a sta
suffering due to formations (sa~kh?ra dukkha) and because it is a basis for suffering.

The next one is pain. Here it is bodily pain. Bodily pain is also suffering. It is not difficult to
understand.

The next one is grief. It is mental pain (domanassa). ¡§Its characteristic is mental oppressio
¡§It is suffering because it is intrinsic suffering (It is real suffering.) and because it brings bod
suffering.¡¨ This mental suffering brings bodily suffering. ¡§For those who are gripped by me
their hair, weep, thump their breasts, and twist and writhe; they throw themselves upside do
swallow poison, hang themselves with ropes, walk into fires, and undergo many kinds of suf

The last one is despair. Here he misunderstood one word again. ¡§Despair is the same as th
excessive mental suffering in one affected by loss of relatives and so on.¡¨ The P??i word is
misunderstood the word ¡¥dosa¡¦ here. ¡¥Dosa¡¦ can mean humor in the body. Here it is sim
¡§Despair is the same as anguish produced by excessive mental suffering.¡¨ Despair is men
Despair is anguish.

¡§Some say that it is one of the states included in the formations aggregate.¡¨ The Sub-Com
say who ¡¥some¡¦ were. The Sub-Commentary explained one of the states included in the fo
means it is not included in the unwholesome cetasikas. It is something different from dosa, s
the unwholesome cetasikas. This is just said for information. We have to take it as anguish.
dosa.

¡§Its characteristic is burning of the mind. Its function is to bemoan. It is manifested as dejec
suffering because it is suffering due to formations (sa~kh?ra dukkha), because of the burnin
because of bodily dejection.¡¨

Paragraph 53 gives the difference between sorrow, lamentation and despair. ¡§Sorrow is lik
oil, etc.] in a pot over a slow fire.¡¨ So it is not so intense. ¡§Lamentation is like its boiling ove
the pot when cooking over a quick fire.¡¨ So first you are sorry and then you say something a

is like what remains in the pot after it has boiled over and is unable to do so any more, going
the pot till it dries up.¡¨ A portion remains in the pot which cannot spill over and goes on cool
dries up. Despair is like that. So in this paragraph the difference between sorrow, lamentatio
explained.

Then there is association with the unloved. ¡¥Unloved¡¦ here means both living beings and n
¡§Association with the unloved is meeting with disagreeable beings and formations (inanima
have to live with a person whom you do not like, that is dukkha. If you have to be with a car
you trouble, that is dukkha. That is a disagreeable formation.

The next one is separation from the loved. ¡§Separation from the loved is to be parted from
and formations (inanimate things).¡¨ So now people are suffering from separation from the lo
from beings and also separation from their houses and so on.

The next one, not to get what one wants is also suffering. Here not to get what one wants is
to get what is unobtainable. We wish for something which is unobtainable. It is not that I wish
and then I do not get a car. It is dukkha, but the dukkha here means more than that. That is
passage here ¡§ ¡¥Oh that we were not subject to birth!¡¦ is called suffering since one does n
wanted.¡¨ We are always subject to let us say old age. We say ¡§Oh, that we were not subje
would be good if we did not get old. However much we may not want to get old, still we get o
meaning of not to get what one wants. Old age, death and also rebirth we get even though w
¡§Its characteristic is the wanting of an unobtainable object. Its function is to seek that. It is n
as disappointment. It is suffering because it is a basis for suffering.¡¨

¡§In short the five aggregates [as objects] of clinging are suffering.¡¨ The five aggregates are
suffering. Paragraph 58 ¡§For birth etc., thus oppress the pentad of aggregates [as objects]
fire does fuel, as shooting does a target (Actually it is ¡¥as weapon does a target¡¦.), as gadf
etc. So a cow¡¦s body, as reapers do a field, as village raiders do a village; and they are gen
aggregates as weeds, creepers, etc., are on the ground, as flowers, fruits and sprouts are on
clingings oppress the five aggregates and they live on the five aggregates.

¡§And the aggregates [as objects] of clinging have birth as their initial suffering, aging as the
suffering, and death as their final suffering. The suffering due to burning in one who is the vi
pain that threatens death is sorrow. The suffering consisting in crying out by one who is una
is lamentation¡¨ and so on. All these are shown to be caused by the five aggregates of clingi
the Buddha said ¡§The five aggregates of clinging are suffering.¡¨ This is actually the philosc
of the word ¡¥dukkha¡¦. It is not so difficult to understand that birth is dukkha, aging is dukkh
dukkha and so on. But this is not so easy to understand. In order to understand this you hav

the third kind of dukkha, sa~kh?ra dukkha, suffering through formations. If you understand s
understand this.

Then the Commentator said: ¡§It is impossible to tell it [all] without remainder, showing each
suffering, even [by going on doing so] for many eons, so the Blessed One said ¡¥In short the
of clinging are suffering¡¦.¡¨

Then the next one is the Truth of the Origin of Suffering. First there are the word explanation
making become again¡¨ - that means it causes rebirth. ¡§Thus it is ¡¥becoming again¡¦; beco
habit, thus it ¡¥produces further becoming¡¦.¡¨ These are word explanations.

The next explanation is for the expression ¡¥nandir?gasahagata¡¦ in P??i. It is translated as
concern and greed¡¦. But the explanation that is given here is that it is identical with delight a
it does not mean that it is accompanied by delight and greed. It is delight and greed.

If you studied the Abhidhammatthasa~gaha, you may know the word ¡¥sahagat?¡¦. ¡¥Sahag
together with¡¦. But sometimes the word ¡¥sahagat?¡¦ has no meaning at all. Here the word
special meaning like ¡¥arising together¡¦ or ¡¥accompanied by¡¦. So it is identical with nandir
and greed.

¡§Concerned with this and that¡¨ - that means delighting with this that. ¡§Wherever personali
- that means wherever life is generated. ¡§There is delight (not ¡¥concern¡¦) with that (life).¡¨
according to Abhidhamma when a person takes rebirth there is rebirth thought process. In th
process there are javanas. These javanas are always accompanied by lobha. So we begin c
lobha. We are fresh in this new life and we have attachment to this new life. We begin with t
¡§Wherever personality is generated there is concern with that.¡¨ Actually ¡§Wherever life is
wherever there is rebirth there is delight or attachment to that rebirth.¡¨

¡§The expression ¡¥that is to say (seyyathida?) is a particle; its meaning is ¡¥which is that.¡¦
sense-desires, craving for becoming, craving for non-becoming will be explained in the Desc
Dependent Origination.¡¨ We will come to that later. These are important - craving for desire
becoming, craving for non-becoming. They will be explained later. ¡§Although this is threefol
nevertheless be understood as ¡¥The Noble Truth of the Origin of Suffering¡¦, taking it as on
its generating the truth of suffering.¡¨ So it is the cause of suffering.

Then there is the Truth of the Cessation of Suffering, the Third Truth. ¡§In the description of
of suffering it is the cessation of the origin that is stated by the words that which is.. of that s
craving, and so on. Why is that? Because the cessation of suffering comes about with the ce

origin. For it is with the cessation of its origin that suffering ceases, not otherwise.¡¨ Now wh
described the cessation of suffering, the Buddha said ¡§Cessation of craving is the cessatio
Buddha did not say that the end of suffering is the Third Noble Truth. He said that the cessa
abandonment of the origin or craving is the cessation of suffering. That is because when the
cause, there is no effect.

¡§Just as a tree cut down grows up again
While yet its root remains unharmed and sound,
So with the tendency to crave intact
This suffering is ever reproduced.¡¨

¡§So it is because suffering ceases only through the cessation of its origin that, when teachi
of suffering, the Blessed One therefore taught the cessation of the origin.¡¨ He explained tha
cessation of craving. Cessation of craving equals cessation of dukkha (suffering).

¡§For the Perfect Ones behave like lions. When they make suffering cease and when they te
suffering, they deal with the cause, not the fruit. But the sectarians behave like dogs.¡¨ The a
have something bad to say about those of other faiths. ¡§When they make suffering cease a
the cessation of suffering, by teaching devotion to self-mortification, etc., they deal with the f
the cause. This in the first place is how the motive for teaching the cessation of suffering by
cessation of its origin should be understood.¡¨

How the Buddhas are like lions and how the sectarians are like dogs is explained in footnote
lion directs his strength against the man who shot the arrow at him, not against the arrow, so
deal with the cause, not with the fruit. But just as dogs, when struck with a clod, snarl and bi
and do not attack the striker, so the sectarians who want to make suffering cease devote the
mutilating the body, and to causing cessation of defilements.¡¨

¡§Of that same craving: of that craving which, it was said, ¡¥produces further becoming¡¦, an
classed as ¡¥craving for sense-desires¡¦ and so on. It is the Path that is , called ¡¥fading awa
¡¥With the fading away [of greed] he is liberated¡¦ is said. Fading away and cessation is cess
fading away. Remainderless fading away and cessation is cessation through fading away th
because of eradication of inherent tendencies. Or alternatively, it is abandoning that is called
away¡¦; and so the construction here can be regarded as ¡¥remainderless fading away, rema
cessation¡¦. The P??i word here is ¡¥asesavir?ganirodha¡¦. So there are three words groupe
word. ¡¥Vir?ga¡¦ is translated here as fading away. ¡¥Asesa¡¦ is translated as remainderless
is translated as cessation. So it is remainderless fading away cessation.

According to the first explanation we cannot translate it a fading away and cessation. We sh

through fading away. ¡¥Fading away¡¦ here means actually Path (Magga). The word ¡¥vir?ga According to the first explanation the translation should be remainderless cessation through translation should be remainderless cessation through fading away or remainderless cessat

According to the second explanation ¡¥fading away¡¦ just means fading away, not the Path h cessation. Remainderless should be combined with both words - so remainderless fading av cessation. According to the first explanation it is remainderless cessation through fading awa the second explanation it is remainderless fading away and remainderless cessation. ¡§Or a abandoning that is called ¡¥fading away¡¦; and so the construction here can be regarded as fading away, remainderless cessation¡¦.¡¨

¡§But in essence (not ¡¥as to meaning¡¦), all of them are synonyms for Nibb?na.¡¨ When th the Third Noble Truth, be used the word ¡¥asesavir?ganirodho c?go pa?inissago mutti anal? Commentator is saying is that all these words are synonyms of Nibb?na. ¡§For in the ultimat Nibb?na that is called ¡¥The Noble Truth of the Cessation of Suffering¡¦. But because cravin ceases on coming to that¡¨ - ¡¥on coming to that¡¦ really means depending upon that. That is consciousness arises, it takes Nibb?na as object. Only when there is Nibb?na as object can arise. Only the Path consciousness abandons the mental defilements. So Nibb?na is called Nibb?na is called ¡¥cessation¡¦. ¡¥Fading away¡¦ actually means the cause of fading away, t cessation.

¡§And because there comes to be the giving up, etc., of that [craving] on coming to that [Nib there is not even one kind of reliance here [to be depended upon] from among the reliances cords of sense desires, etc., it is therefore called giving it up, relinquishing it, letting it go, no relying on it.¡¨ All these expressions are synonyms for Nibb?na. Nibb?na is actually not givin the cause of giving up, the cause of relinquishing, the cause of letting go, the cause of not re is something, not just the act of giving up, not the act of relinquishing, not just letting go, not It is something that helps consciousness give up, relinquish, let go and so on.

¡§It has peace as its characteristic. Its function is not to die; or its function is to comfort. It is manifested as the signless; or it is manifested as non-diversification.¡¨ In footnote 17 the wo ¡¥nippapa?ca¡¦ is explained. You may read it later. Footnote 16 about ¡¥on coming to that¡¦ i read. The P??i word used here is ¡¥?gama¡¦.

Next is the discussion of Nibb?na. These are questions and answers, like a debate. One is t is the defender. [Question 1] ¡§Is Nibb?na non-existent because it is unapprehendable, like horn?¡¨ The opponent said that there is no Nibb?na. Nibb?na is non-existent because it can like a hare¡¦s horn. There is no such thing as a hare¡¦s horn. Like that there is no Nibb?na.

[Answer] ¡§That is not so, because it is apprehendable by the [right] means. For it is apprehe
namely the Noble Ones] by the [right] means,, in other words, by the way that is appropriate
of virtue, concentration, and understanding (wisdom);] it is like the supramundane conscious
[which is apprehendable only by certain of the Noble Ones] by means of knowledge of pene
minds.¡¨ So it is like supramundane consciousness. Supramundane consciousness can only
who have attained enlightenment or who have attained the supramundane consciousness. T
can know the supramundane consciousness of the lower Noble Persons. There are four sta
Those who have reached the second stage can know the supramundane consciousness of
and so on. So like that, Nibb?na can be apprehended by right means. That means one may
the path of virtue, concentration and wisdom. So there is Nibb?na. ¡§Therefore it should not
is non-existent because unapprehendable, for it should not be said that what the foolish ordi
apprehend is unapprehendable.¡¨ These people say that it is unapprehendable, but it is not
just because they say it is.

And then the defender continues. ¡§Again it should not be said that Nibb?na does not exist.
it then follows that the Way would be futile.¡¨ ¡¥The Way¡¦ means the practice, the practice o
Eightfold Path. It would be nonsense if you said that there was no Nibb?na. ¡§For if Nibb?na
non-existent, then it would follow that the right way, which includes the three aggregates beg
virtue and is headed by right understanding would be futile. And it is not futile because it doe
Nibb?na.¡¨ I don¡¦t like the word ¡¥aggregates¡¦ here. It may confuse you. I just want to say ¡
¡¥groups beginning with virtue¡¦ means s?la, sam?dhi and pa???. They are described in P??
sam?dhi khandha and pa??? khandha. But ¡¥khandha¡¦ here does not mean the aggregates
on. We can just say ¡¥groups¡¦. ¡§The three groups beginning with virtue and is headed by
would be futile. And it is not futile because it does reach Nibb?na.¡¨ So you cannot say that t
Nibb?na. If you say that there is no Nibb?na, then the Path would be meaningless. The path
The Path leads to Nibb?na. So there is Nibb?na. That is what the author meant.

[Question 2] ¡§But futility of the Way, does not follow what is reached is absence (non-existe
absence of the five aggregates consequent upon the cutting off of the defilements]?¡¨ After o
defilements, the five aggregates do not exist.

[Answer] ¡§That is not so. Because, though there is absence of past and future [aggregates]
nevertheless no reaching of Nibb?na [simply because of that].¡¨ The opponent takes the abs
aggregates to be Nibb?na. If the absence of aggregates is Nibb?na, then the past is not exis
future is not existent now, so there would be Nibb?na. There is no reaching of Nibb?na simp
is not present now, the future is not present now, the past aggregates are not present, the fu
are not present. If you say that the absence or the non-existence of the five aggregates are

will be otherwise.

[Question 3] ¡§Then is the absence of present [aggregates] as well Nibb?na?¡¨ The absence
aggregates is Nibb?na. Could that not be Nibb?na the opponent asks.

[Answer] ¡§That is not so.¡¨ That is because it is a contradiction of terms. The present canno
¡§Because their absence is an impossibility, since if they are absent their non-presence follo
Nibb?na were absence of present aggregates too,] that would entail the fault of excluding th
¡¥arising¡¦ but ¡¥reaching¡¦) reaching of the Nibb?na element with results of past clinging left
moment, which has present aggregates as its support.¡¨ The second part of the paragraph m
entail the fault of excluding the reaching of the Nibb?na element with results of past clinging
That means at the moment of Path consciousness there are aggregates, aggregates in exis
the absence of the present aggregates is Nibb?na, then there should be no reaching of Nibb
Path consciousness because at the moment of Path consciousness there are aggregates. If
of aggregates is Nibb?na, then there can be no Nibb?na at the moment of Path consciousne
the result of past clinging left. That means Nibb?na before death. There are two kinds of Nib
before death of the Arahant and Nibb?na after the Arahant dies. We find out more later. Wh
there are no aggregates. That kind of Nibb?na is possible, but the other kind of Nibb?na is n
you take the absence of aggregates to be Nibb?na because aggregates are not absent at th
consciousness.

[Question 4] ¡§Then will there be no fault if it is non-presence of defilements [that is Nibb?na
the non-presence, the non-existence of defilements if that is Nibb?na, there will be no fault?

[Answer] The defender said that is not so. ¡§Because it would then follow that the Noble Pat
For if it were so, then, since defilements [can be] non-existent also before the moment of the
follows that the Noble Path would be meaningless.¡¨ Non-existence of defilements - there ca
of defilements before the Path arises. Sometimes the defilements do not arise. If that is Nibb
Path would be meaningless. You don¡¦t have to try to reach the Path because you already h
one set of questions and answers.

[Question 5] ¡§But is not Nibb?na destruction, because of the passage¡¨ - now here the ques
aspect. The opponent points out the passage says ¡§That, friend, which is the destruction of
hate..of delusion, ..is Nibb?na.¡¨ Nibb?na is just the destruction of greed, hate and delusion.
separate thing that is Nibb?na, but there is just destruction, just the disappearance of defiler
it that way.

[Answer] Then the defender said ¡§That is not so, because it would follow that Arahantship (

Arahatta Phala, the Fruit), also, was mere destruction. For that, too, is described in the [sam
beginning ¡¥That, friend, which is the destruction of greed..of hate.. of delusion is Arahantsh
answer here is following the passage ¡¥the destruction of greed, of hate, of delusion is Nibb
would follow that passage that Nibb?na is mere destruction, there is another passage in the
says Arahantship is destruction. So Arahantship also would be mere destruction. So it is not
way. Nibb?na is not to be taken as mere destruction nor as mere disappearance of mental c

¡§And what is more the fallacy then follows that Nibb?na would be temporary, etc.; for if it w
follow that Nibb?na would be temporary, have the characteristic of being formed, and be obt
of right effort; and precisely because of its having formed characeristics it would be included
and it would be burning with the fires of freed, etc., and because of its burning it would follow
suffering.¡¨ Nibb?na would be suffering. Nibb?na is the destruction, the disappearance of me
Since mental defilements are formed, they are burning. They are dukkha. Then Nibb?na wo
Therefore it should not be taken that way.

[Question 6] ¡§Is there no fallacy, if Nibb?na is that kind of destruction subsequent to which
more occurrence?¡¨ Suppose defilements are destroyed and they don¡¦t appear again. Then
be called ¡¥Nibb?na¡¦, the opponent is saying. Suppose a person practices jh?na. By the pra
could put off or he could avoid the arising of defilements, not by total destruction but just by
away. Then after that he gets enlightenment. Then Nibb?na would not be at the moment of
the time when he could put off defilements. That is what is meant by the opponent.

[Answer] ¡§That is not so. Because there is no such kind of destruction. And even if there w
fallacies would not be avoided. Also because it would follow that the Noble Path was Nibb?n
Path causes the destruction of defects, and that is why it is called ¡¥destruction¡¦; and subse
there is no more occurrence of the defects.¡¨ After Path consciousness there are no more m
The Path would be called ¡¥Nibb?na¡¦ and not Nibb?na itself. ¡§But it is because the kind of
called ¡¥cessation consisting in non-arising¡¦, [that is Nibb?na,] serves figuratively speaking
support [for the Path] that [Nibb?na] is called ¡¥destruction¡¦ as a metaphor for it.¡¨

Do you understand this? There are two things - cessation consisting in non-arising and Nibb
serves as a decisive support¡¦ simply means let us say as an object. Since Nibb?na serves a
support for the Path, Nibb?na is said to be the cause and cessation consisting in non-arising
But here Nibb?na is called ¡¥destruction¡¦. That is by metaphor. In the passage quoted Nibb
destruction. Destruction of greed, hatred and delusion is Nibb?na. We are to understand tha
not really Nibb?na. Nibb?na is described as destruction because it is the cause or condition
Nibb?na serves as a condition for destruction. That is why Nibb?na is called ¡¥destruction¡¦.
direct expression. There are some kinds of metaphors that are this way.

As an example we say that sugar is phlegm. If you eat much sugar, you have phlegm. So pe
phlegm. Or perhaps salt is blood pressure. Salt is not blood pressure, but it is the cause for
So people say salt is blood pressure. Here Nibb?na is destruction. Nibb?na is not actually de
is the cause for destruction. It is the condition for destruction. That is why Nibb?na is stated
destruction. It is not direct talk. That is the reason for the next question.

[Question 7] ¡§Why is it not stated in its form?¡¨ Why is it not stated directly? Why is it not ca
cause of destruction?

[Answer] Then the answer is because it is extremely subtle. Even the Buddha hesitated to te
because it is so subtle that it would not be readily understood by the listeners.

Student: There is a problem here. If you say that Nibb?na is the cause of destruction, then N
before destruction.

Teacher: ¡¥Cause for¡¦ means a condition for. Nibb?na does not cause destruction, but Nibb
for destruction.

Student: It sounds like destruction is the next step after Nibb?na. Do you know what I mean?
after, a higher step.

Teacher: We cannot say that Nibb?na is past, or present, or future. Nibb?na is some kind of
consciousness arises, it takes Nibb?na as object and at the same time it eradicates mental d
destruction is there. Destruction of mental defilements is at the moment of Path consciousne
consciousness can arise only when it takes Nibb?na as object. If there is no such thing as N
consciousness cannot arise. That is why Nibb?na is said to be a condition for the destruction
defilements.

[Question 8] ¡§Since it is, when the Path is, then it is not uncreated?¡¨ If it is so, then only wh
Path, there is the destruction of mental defilements. It is taken as Nibb?na. So Nibb?na is no
Nibb?na is made by something. That is what the opponent is saying.

[Answer] ¡§That is not so, because it is not arousable by the Path (That means it is not prod
Path.); it is only reachable, not produced (strike out arousable), by the Path; that is why it is
It is because it is uncreated that it is free from aging and death. It is because of the absence
creation and its aging and death it is permanent.¡¨ Then ¡¥permanent¡¦ has been said so her
argument.

[Question 9] ¡§Then it follows that Nibb?na, too, has the kind of permanence [claimed] of the
on?¡¨ I think this is not correct. What the opponent says here is that you say Nibb?na is perm
Nibb?na is permanent, then the atoms. etc. are permanent. The atom etc., are taught in othe
There are six Hindu philosophies. They are called ¡¥darshan¡¦ in Sanskrit. In some of these
accept the atom the atom as a cause of creation or atoms are an ultimate truth. Atoms are ta
indestructible, to be permanent. So if you say Nibb?na is permanent, then the atoms are als
Nibb?na is permanent, so the atoms, etc., are also permanent?¡¨

{Answer] ¡§That is not so. Because of the absence of any cause [that brings about its arising
not correct. Because of the absence of any reason, (not ¡¥cause¡¦); that can prove its truth th
its arising. In this passage the terms used in Hindu logic are used. You have to understand h
order to understand this passage and the Sub-Commentary on it. It is very difficult. The word
reason. Are you familiar with syllogism in logic? I wrote a book on Hindu syllogisms in Burme
forgotten about that. So I had to read it again. There is what is called syllogism in Hindu logi
something.

The classical example is there is fire on the mountain because there is smoke. Wherever the
is fire, for example a kitchen. There is smoke on the mountain, therefore the mountain has fi
five stages of syllogism. In order to convince people you have to make use of these five step
is just the statement of fact. There is fire on the mountain. Then ¡¥Why?¡¦ someone may ask
smoke. How are fire and smoke related? Wherever there is smoke there is fire, for example
kitchens in the United States. You use gas here, so there is no smoke. So wherever there is
fire, for example in the kitchen. Now there is smoke there on the mountain, so there is fire on
This is called ¡¥syllogism¡¦. The second sentence is called ¡¥hetu¡¦ (reason). Why do you sa
the mountain? Because I see the smoke there. That sentence is called ¡¥hetu¡¦. That is not
reason given by the person. Because of the absence of any reason, there is no reason to pr
permanent.

[Question 10] ¡§Because Nibb?na has permanence, then, these, [that is, the atom, etc.] are
well?¡¨ The next question is because Nibb?na is permanent, the atoms are also permanent.

[Answer] ¡§That is not so. Because [in that proposition] the characteristic of [logical] reason
(¡¥Cause does not arise¡¦ is incorrect.), [in other words, to say that Nibb?na is permanent is
reason why the atom, etc., should be permanent.¡¨ According to Therav?da Buddhists the p
not proved. They are not proved. To say because Nibb?na is permanent, they are permanen
reason, valid statement. The reason is not valid.

[Question 11] ¡§Then they are permanent because of the absence of their arising, as Nibb?n

[Answer] ¡§That is not so. Because the atom and so on have not been established as facts. to Buddhists.) The aforesaid logical reasoning proves that only this, [that is Nibb?na,] is perm [precisely because it is uncreated].¡¨ (There should be a period there. Then we should strike ¡§It is immaterial because it transcends the individual essence of matter.¡¨ That is another st Questions and answers for #9, #10, #11 use logical terms. We have to understand Hindu lo understand these passages clearly.

Then Nibb?na is described as immaterial. Nibb?na is n?ma or ar|pa although it is not consci mental factor. It is n?ma. It is ar|pa.

¡§The Buddhas¡¦ goal is one and has no plurality.¡¨ Actually what is meant here is it is a sing there is no difference in the goal of Buddhas etc. Buddhas¡¦ goal, or Buddhas¡¦ enlightenme destruction of defilements and others¡¦ destruction of defilements are the same. ¡§The Budd and has no plurality¡¨ - I think that is not so good. It is a single goal because there is no diffe goal of Buddhas, etc.

Then he describes the two kinds of Nibb?na - Nibb?na with results of past clinging left and N results of past clinging left. That simply means Nibb?na while the Arahant is living or before Nibb?na after the death of the Arahant. Before he dies he still has the aggregates. He still ha mind. They are called ¡¥the results of past clinging¡¦. ¡¥With the results of past clinging¡¦ mea is alive. ¡¥Without the results of past clinging¡¦ means when he dies.

Paragraph 74 ¡§Because it can be arrived at by distinction of knowledge that succeeds throu perseverance; and because it is the word (not ¡¥world¡¦) of the Omniscient One, Nibb?na is regards individual essence in the ultimate sense; for this is said: ¡¥Bhikkhus, there is an unb unbecome, an unmade, an unformed¡¦.¡¨ This is a famous passage quoted by many people.

¡§This is the section of the definition dealing with the description of the Cessation of Sufferin Noble Truth).¡¨ We cannot go to the Fourth Noble Truth tonight. OK.

Student: Bhante, back in paragraph 69 you said that Arahantship really means what?

Teacher: It really means Path of Arahantship and Fruit of Arahantship.

Student: So they want to say that is the same as Nibb?na.

Teacher: No. Nibb?na is a separate dhamma. Path is one thing. Fruit is another thing. Nibb?
thing. We will cross over into Pa?icca Samupp?da next week.

S?dhu! S?dhu! S?dhu!

(Tape 34 / Ps: 32 ¡V 74)

In paragraph 4 I want to correct something. ¡¥A¡¦ is mark of kamma. ¡¥Mark of a ruler¡¦ mea
kamma. ¡¥Mark of a ruler¡¦ just means mark of kamma. ¡¥B¡¦ is taught by the Buddha. There
¡¥Ruler¡¦ means the Buddha, so taught by the Buddha actually. ¡¥C¡¦ should be seen by the
ruler¡¦ is seen by the Buddha. Then ¡¥D¡¦ is prepared by kamma. That means the result of ka
fostered by the Buddha. So A. mark of kamma, B. taught by the Buddha, C. seen by the Bud
kamma, E. fostered by the Buddha. These are the meanings given for the word ¡¥indriya¡¦ in

Today we come to the explanation of birth and so on. The Truth of Suffering - Birth - paragra
meanings of the word, the meanings of the P??i word ¡¥j?ti¡¦ can have. The word ¡¥j?ti¡¦ can
meanings. Its meanings are given here in this paragraph. From this paragraph on the explan
given again - birth is suffering, aging is suffering, death is suffering and so on. These are exp
one. Paragraph 32 gives the meanings that the P??i word ¡¥j?ti¡¦ can have. Then the meani
appropriate here is pointed out at the end. J?ti has how many meanings?

¡§For in the passage ¡¥[He recollects..] one birth (j?ti), two births¡¦ it is becoming.¡¨ That mea
life, two lives. ¡§In the passage ¡¥Vis?kh?, there is a kind (j?ti) of ascetics called Niga??has
is a monastic order.¡¨ In this passage the word ¡¥j?ti¡¦ means a monastic order or something
denomination. ¡§In the passage ¡¥Birth (j?ti) is included in two aggregates¡¦ it is the characte
whatever is formed.¡¨ That means the first phase of existence. You know that there are three
existence - arising, continuation and death. So it is the first phase of existence that is arising
the characteristic of whatever is formed.¡¨ That means all formations have the characteristic
continuation and disappearing. In this passage j?ti means that. ¡§In the passage ¡¥His birth
first consciousness arisen, the first cognition manifested, in the mother¡¦s womb¡¦, it is
rebirth-relinking.¡¨ In that passage the word ¡¥j?ti¡¦ means real relinking at the first moment in
life. ¡§In the passage ¡¥As soon as he was born, ?nanda, the Bodhisatta..¡¦ it is parturition.¡¨
act of being born.) ¡§In the passage ¡¥One who is not rejected and despised on account of b
clan.¡¨ Here ¡¥j?ti¡¦ or ¡¥birth¡¦ means clan. One is not rejected or despised because one is b
caste or whatever. ¡§In the passage (This was uttered by Venerable A~gulim?la.) ¡¥Sister, s
with the Noble birth¡¦ it is the Noble Ones¡¦ virtue.¡¨ Here ¡¥birth¡¦ means becoming a Noble

¡§Here it should be regarded as the aggregates that occur from the time of rebirth-linking up

the mother¡¦s womb in the case of the womb-born, and as only the aggregates of rebirth-link
the rest.¡¨ Here the word ¡¥j?ti¡¦ means the aggregates that occur from the time of rebirth-lin
exit from the mother¡¦s womb. That means during pregnancy. That is called ¡¥j?ti¡¦ here. ¡§A
aggregates of rebirth-linking in the case of the rest¡¨ - now there are beings who are womb-b
beings who are born spontaneously. For those who are born spontaneously just the aggrega
relinking are called ¡¥j?ti¡¦. ¡§But this is only an indirect treatment. In the direct sense, howev
the first manifestation of any aggregates that are manifested in living beings when they are b
that is called ¡¥birth¡¦.¡¨ First it says birth is from conception until the real birth for human bei
for other beings like the devas it is just the relinking.

In paragraph 32 although it is not important here, the translation of one of the passages is qu
the middle of the paragraph ¡§His birth is due to the first consciousness arisen, the first cogn
manifested, in the mother¡¦s womb.¡¨ That is wrong. This passage comes from the Vinaya P
become a monk only when he is 20 years of age. If he is younger than 20 years of age, then
monk. ¡¦20 years¡¦ means 20 years from conception, not from birth. Buddha was saying that
reckoning from the conception. Later on he was doubtful about whether he was really a mon
reported to the Buddha and the Buddha said that it was all right. So one must reckon 20 yea
of conception. That is the passage here. But the translation here is not correct. He misunder

Student: Is time in the womb counted as nine months?

Teacher: Mostly we count it as ten months. But to be on the safe side we do not actually cou
for ordination because sometimes people are born in seven months or whatever. For me I w
19 years and 7 months. This is a passage from the Vinaya Pi?aka. In the translation of Vina
Horner it is correct. You may look it up in Book of Discipline, part 4, page 120. You will get th
translation there.

Paragraph 34 ¡§Its characteristic is the first genesis in any [sphere of] becoming. Its function
[to a sphere of becoming]. It is manifested as an emerging here from a past becoming; or it i
the variedness of suffering.¡¨

¡§But why is it suffering? Because it is the basis for many kinds of suffering.¡¨ Why is this bir
j?ti, suffering? Because it is the basis for many kinds of suffering. Then the many kinds of su
explained here. The most important are the first three because they will be referred to again
explained. At least you have to remember these three even if you do not remember the othe

The first one is what? Dukkha dukkha (intrinsic suffering). The second one is viparin?ma duk
change, suffering when there is change). The third one is sa~kh?ra dukkha (suffering due to

suffering because they are formations. Then they are explained. There is also concealed su
suffering, indirect suffering, and direct suffering.

¡§Herein, bodily and mental painful feeling are called intrinsic suffering.¡¨ That means real su
P??i you see the word dukkha repeated, dukkha dukkha. That means real dukkha. Real duk
mental painful feelings. There are pleasant feeling, unpleasant feeling, and neutral feeling. H
unpleasant or painful feeling is meant, both bodily and mental. Both bodily and mental painfu
called ¡¥intrinsic suffering¡¦ or ¡¥dukkha dukkha¡¦. ¡§Because of their individual essence, the
their painfulness¡¨ because they are real dukkha they are called ¡¥dukkha dukkha¡¦ (intrinsic

The next ¡§[Bodily and mental] pleasant feeling are called ¡¥suffering in change¡¦.¡¨ This is g
pleasant feeling, somanassa and sukha. Even these are called ¡¥suffering (dukkha) becaus
there is dukkha. When you lose the good feeling, you long for that. So you are not happy. Th
¡¥suffering in change¡¦. Here even pleasant feelings are called suffering because they are a
arising of pain when they change.

¡§Equanimous feeling and the remaining formations of the three planes (That means k?m?v
ar|p?vacara) are called suffering due to formations because they are oppressed by rise and
that whatever has rise and fall is impermanent. And whatever is impermanent is suffering. W
and fall is suffering actually. Since everything in the world of formations has a beginning and
everything in the world is suffering. This is called ¡¥sa~kh?ra dukkha¡¦. This is the widest of
At least try to remember these three - dukkha dukkha, viparin?ma dukkha, sa~kh?ra dukkha
sa~kh?ra dukkha. Nothing in this world can escape.

Then there are other kinds of suffering - concealed suffering, exposed suffering, indirect suff
direct suffering. These are easy to understand. For example an earache is called ¡¥conceale
you look at the person from a distance, you don¡¦t know that he is suffering. Exposed sufferi
suffering produced by the 32 tortures. There are 32 tortures mentioned in the Suttas, very fri
tortures. When a person is tortured by one of these 32, it is exposed suffering because you
really suffering even from a distance. ¡§Except intrinsic suffering, all given in the exposition
of suffering beginning with birth are also called ¡¥indirect suffering¡¦ because they are the ba
kind of suffering or another.¡¨ They are the basis for suffering. That is why they are called ¡¥
suffering¡¦. ¡§But intrinsic suffering is called ¡¥direct suffering¡¦.¡¨ Intrinsic suffering is painful
and mental feeling. That is called ¡¥direct suffering¡¦.

¡§herein, this birth is suffering because it is the basis for the suffering in the states of loss as
evident by the Blessed One by means of a simile in the B?lapa??ita Sutta, etc., and for the s
arises in the happy destinies in the human world and is classed as ¡¥rooted in the descent in

so on.¡¨ Suffering in the descent into the womb and others are given here. The fetus is desc
being in a very painful position. I always say that I¡¦m not so much afraid of the fetus becaus
know. The suffering in the mother¡¦s womb is described here.

Paragraph 39 ¡§When the mother has a abortion¡¨ - that is not an abortion. No, he misunder
word is ¡¥gabbham|?ha¡¦. ¡¥M|?ha¡¦ means something like confused. And ¡¥gabbha ¡¦ mean
means difficult delivery. When a woman cannot give birth to a child easily, that means a diffi
¡§When the mother has a difficult delivery, the pain that arises in him through the cutting and
place where the pain arises that is not fit to be seen even by friends and intimates and comp
the suffering rooted in difficult delivery.¡¨ It is not ¡¥abortion¡¦. If it were abortion, it would be
secretly. Here other people help her. It is not abortion but difficult delivery. The others are no
to understand. This is just to make you afraid of the suffering through birth and so on.

The next one is aging (jar?). Here also it is twofold. There are two kinds of jar? or aging; ¡§a
characteristic of whatever is formed (That means the second phase of existence, continuatio
case of a continuity, as the oldness of aggregates included in a single becoming, which oldn
¡¥brokenness¡¦ (¡¥Brokenness¡¦ means broken teeth and so on.) and so on. The latter is inte
not the jar? which is the characteristic of formations. It is getting old. Your teeth are broken.
white hair. You cannot see well and so on.

¡§This aging has as its characteristic the maturing (ripening) of aggregates. Its function is to
death. It is manifested as the vanishing of youth. It is suffering because of the suffering due
and because it is a basis for suffering.¡¨ It is itself suffering and it is also a basis for suffering
is why it is described as dukkha or suffering. These explanations are not difficult to understa
have to get old, then there is leadnness in all the limbs (That means weakness in all the limb
the faculties (You don¡¦t see well, you don¡¦t hear well.), vanishing of youth, undermining of
of memory and intelligence, contempt on the part of others, and so on.

Next is death. ¡§Death is suffering: death too is twofold, as a characteristic of the formed (Th
last phase of existence.), with reference to which it is said ¡¥Aging and death are included in
aggregates¡¦, and as the severing of the connection of the life faculty in a single becoming (T
ordinary death. The severing of the life faculty or the disappearance of the life faculty is calle
¡¥death¡¦.), with reference to which it is said ¡¥So mortals are in constant fear.. that they will
latter is intended here. Death with birth as its condition, death by violence, death by natural
from the exhaustion of the life span, death from the exhaustion of merit are names for it.¡¨

¡§It has the characteristic of a fall.¡¨ These are not difficult to understand. ¡§its function is to
It is manifested as absence from the destiny.¡¨ ¡¥Destiny¡¦ really means ¡¥this life¡¦. The P??

¡¥gati¡¦. The P??i word ¡¥gati¡¦ is always translated as destiny. That is why in brackets it say
there was the rebirth], this life. ¡§It should be understood as suffering because it is a basis fo
suffering.¡¨

Then the next one is sorrow. ¡§Sorrow is a burning in the mind in one affected by loss of rela
(loss of relatives, loss of wealth, loss of youth, loss of health). Although in reality (not ¡¥in me
it is the same as grief, nevertheless it has inner consuming as its characteristic¡¨ and so on.
here is attha. ¡¥Attha¡¦ can mean meaning or sometimes ¡¥attha¡¦ means reality. Here it mea
¡§Although in reality it is the same as grief (domanassa)), nevertheless it has inner consumi
characteristic¡¨ and so on.

The next one is lamentation. The P??i word is parideva. ¡§Lamentation is verbal clamor on t
affected by loss of relatives and so on.¡¨ That means crying aloud, saying something. ¡§It ha
its characteristic. Its function is proclaiming virtues and vices.¡¨ When someone dies, then pe
oh, he is good or oh, he is bad. ¡§It is manifested as tumult. It is suffering because it is a sta
suffering due to formations (sa~kh?ra dukkha) and because it is a basis for suffering.

The next one is pain. Here it is bodily pain. Bodily pain is also suffering. It is not difficult to
understand.

The next one is grief. It is mental pain (domanassa). ¡§Its characteristic is mental oppressio
¡§It is suffering because it is intrinsic suffering (It is real suffering.) and because it brings bod
suffering.¡¨ This mental suffering brings bodily suffering. ¡§For those who are gripped by me
their hair, weep, thump their breasts, and twist and writhe; they throw themselves upside do
swallow poison, hang themselves with ropes, walk into fires, and undergo many kinds of suf

The last one is despair. Here he misunderstood one word again. ¡§Despair is the same as th
excessive mental suffering in one affected by loss of relatives and so on.¡¨ The P??i word is
misunderstood the word ¡¥dosa¡¦ here. ¡¥Dosa¡¦ can mean humor in the body. Here it is sim
¡§Despair is the same as anguish produced by excessive mental suffering.¡¨ Despair is men
Despair is anguish.

¡§Some say that it is one of the states included in the formations aggregate.¡¨ The Sub-Com
say who ¡¥some¡¦ were. The Sub-Commentary explained one of the states included in the fo
means it is not included in the unwholesome cetasikas. It is something different from dosa, s
the unwholesome cetasikas. This is just said for information. We have to take it as anguish.
dosa.

¡§Its characteristic is burning of the mind. Its function is to bemoan. It is manifested as dejec
suffering because it is suffering due to formations (sa~kh?ra dukkha), because of the burnin
because of bodily dejection.¡¨

Paragraph 53 gives the difference between sorrow, lamentation and despair. ¡§Sorrow is lik
oil, etc.] in a pot over a slow fire.¡¨ So it is not so intense. ¡§Lamentation is like its boiling ove
the pot when cooking over a quick fire.¡¨ So first you are sorry and then you say something a
is like what remains in the pot after it has boiled over and is unable to do so any more, going
the pot till it dries up.¡¨ A portion remains in the pot which cannot spill over and goes on cool
dries up. Despair is like that. So in this paragraph the difference between sorrow, lamentatio
explained.

Then there is association with the unloved. ¡¥Unloved¡¦ here means both living beings and n
¡§Association with the unloved is meeting with disagreeable beings and formations (inanima
have to live with a person whom you do not like, that is dukkha. If you have to be with a car
you trouble, that is dukkha. That is a disagreeable formation.

The next one is separation from the loved. ¡§Separation from the loved is to be parted from
and formations (inanimate things).¡¨ So now people are suffering from separation from the lo
from beings and also separation from their houses and so on.

The next one, not to get what one wants is also suffering. Here not to get what one wants is
to get what is unobtainable. We wish for something which is unobtainable. It is not that I wish
and then I do not get a car. It is dukkha, but the dukkha here means more than that. That is
passage here ¡§ ¡¥Oh that we were not subject to birth!¡¦ is called suffering since one does n
wanted.¡¨ We are always subject to let us say old age. We say ¡§Oh, that we were not subje
would be good if we did not get old. However much we may not want to get old, still we get o
meaning of not to get what one wants. Old age, death and also rebirth we get even though w
¡§Its characteristic is the wanting of an unobtainable object. Its function is to seek that. It is m
as disappointment. It is suffering because it is a basis for suffering.¡¨

¡§In short the five aggregates [as objects] of clinging are suffering.¡¨ The five aggregates are
suffering. Paragraph 58 ¡§For birth etc., thus oppress the pentad of aggregates [as objects]
fire does fuel, as shooting does a target (Actually it is ¡¥as weapon does a target¡¦.), as gadf
etc. So a cow¡¦s body, as reapers do a field, as village raiders do a village; and they are gen
aggregates as weeds, creepers, etc., are on the ground, as flowers, fruits and sprouts are o
clingings oppress the five aggregates and they live on the five aggregates.

¡§And the aggregates [as objects] of clinging have birth as their initial suffering, aging as the
suffering, and death as their final suffering. The suffering due to burning in one who is the vi
pain that threatens death is sorrow. The suffering consisting in crying out by one who is una
is lamentation¡¨ and so on. All these are shown to be caused by the five aggregates of clingi
the Buddha said ¡§The five aggregates of clinging are suffering.¡¨ This is actually the philosc
of the word ¡¥dukkha¡¦. It is not so difficult to understand that birth is dukkha, aging is dukkh
dukkha and so on. But this is not so easy to understand. In order to understand this you hav
the third kind of dukkha, sa~kh?ra dukkha, suffering through formations. If you understand s
understand this.

Then the Commentator said: ¡§It is impossible to tell it [all] without remainder, showing each
suffering, even [by going on doing so] for many eons, so the Blessed One said ¡¥In short the
of clinging are suffering¡¦.¡¨

Then the next one is the Truth of the Origin of Suffering. First there are the word explanatior
making become again¡¨ - that means it causes rebirth. ¡§Thus it is ¡¥becoming again¡¦; beco
habit, thus it ¡¥produces further becoming¡¦.¡¨ These are word explanations.

The next explanation is for the expression ¡¥nandir?gasahagata¡¦ in P??i. It is translated as
concern and greed¡¦. But the explanation that is given here is that it is identical with delight a
it does not mean that it is accompanied by delight and greed. It is delight and greed.

If you studied the Abhidhammatthasa~gaha, you may know the word ¡¥sahagat?¡¦. ¡¥Sahag
together with¡¦. But sometimes the word ¡¥sahagat?¡¦ has no meaning at all. Here the word
special meaning like ¡¥arising together¡¦ or ¡¥accompanied by¡¦. So it is identical with nandir
and greed.

¡§Concerned with this and that¡¨ - that means delighting with this that. ¡§Wherever personali
- that means wherever life is generated. ¡§There is delight (not ¡¥concern¡¦) with that (life).¡¨
according to Abhidhamma when a person takes rebirth there is rebirth thought process. In th
process there are javanas. These javanas are always accompanied by lobha. So we begin c
lobha. We are fresh in this new life and we have attachment to this new life. We begin with t
¡§Wherever personality is generated there is concern with that.¡¨ Actually ¡§Wherever life is
wherever there is rebirth there is delight or attachment to that rebirth.¡¨

¡§The expression ¡¥that is to say (seyyathida?) is a particle; its meaning is ¡¥which is that.¡¦
sense-desires, craving for becoming, craving for non-becoming will be explained in the Desc
Dependent Origination.¡¨ We will come to that later. These are important - craving for desire

becoming, craving for non-becoming. They will be explained later. ¡§Although this is threefol
nevertheless be understood as ¡¥The Noble Truth of the Origin of Suffering¡¦, taking it as on
its generating the truth of suffering.¡¨ So it is the cause of suffering.

Then there is the Truth of the Cessation of Suffering, the Third Truth. ¡§In the description of
of suffering it is the cessation of the origin that is stated by the words that which is.. of that s
craving, and so on. Why is that? Because the cessation of suffering comes about with the ce
origin. For it is with the cessation of its origin that suffering ceases, not otherwise.¡¨ Now wh
described the cessation of suffering, the Buddha said ¡§Cessation of craving is the cessation
Buddha did not say that the end of suffering is the Third Noble Truth. He said that the cessa
abandonment of the origin or craving is the cessation of suffering. That is because when the
cause, there is no effect.

¡§Just as a tree cut down grows up again
While yet its root remains unharmed and sound,
So with the tendency to crave intact
This suffering is ever reproduced.¡¨

¡§So it is because suffering ceases only through the cessation of its origin that, when teachi
of suffering, the Blessed One therefore taught the cessation of the origin.¡¨ He explained tha
cessation of craving. Cessation of craving equals cessation of dukkha (suffering).

¡§For the Perfect Ones behave like lions. When they make suffering cease and when they te
suffering, they deal with the cause, not the fruit. But the sectarians behave like dogs.¡¨ The a
have something bad to say about those of other faiths. ¡§When they make suffering cease a
the cessation of suffering, by teaching devotion to self-mortification, etc., they deal with the f
the cause. This in the first place is how the motive for teaching the cessation of suffering by
cessation of its origin should be understood.¡¨

How the Buddhas are like lions and how the sectarians are like dogs is explained in footnote
lion directs his strength against the man who shot the arrow at him, not against the arrow, so
deal with the cause, not with the fruit. But just as dogs, when struck with a clod, snarl and bi
and do not attack the striker, so the sectarians who want to make suffering cease devote the
mutilating the body, and to causing cessation of defilements.¡¨

¡§Of that same craving: of that craving which, it was said, ¡¥produces further becoming¡¦, an
classed as ¡¥craving for sense-desires¡¦ and so on. It is the Path that is , called ¡¥fading awa
¡¥With the fading away [of greed] he is liberated¡¦ is said. Fading away and cessation is cess
fading away. Remainderless fading away and cessation is cessation through fading away th

because of eradication of inherent tendencies. Or alternatively, it is abandoning that is called
away¡¦; and so the construction here can be regarded as ¡¥remainderless fading away, rema
cessation¡¦. The P??i word here is ¡¥asesavir?ganirodha¡¦. So there are three words groupe
word. ¡¥Vir?ga¡¦ is translated here as fading away. ¡¥Asesa¡¦ is translated as remainderless
is translated as cessation. So it is remainderless fading away cessation.

According to the first explanation we cannot translate it a fading away and cessation. We sh
through fading away. ¡¥Fading away¡¦ here means actually Path (Magga). The word ¡¥vir?ga
According to the first explanation the translation should be remainderless cessation through
translation should be remainderless cessation through fading away or remainderless cessat

According to the second explanation ¡¥fading away¡¦ just means fading away, not the Path h
cessation. Remainderless should be combined with both words - so remainderless fading av
cessation. According to the first explanation it is remainderless cessation through fading awa
the second explanation it is remainderless fading away and remainderless cessation. ¡§Or a
abandoning that is called ¡¥fading away¡¦; and so the construction here can be regarded as
fading away, remainderless cessation¡¦.¡¨

¡§But in essence (not ¡¥as to meaning¡¦), all of them are synonyms for Nibb?na.¡¨ When th
the Third Noble Truth, be used the word ¡¥asesavir?ganirodho c?go pa?inissago mutti anal?
Commentator is saying is that all these words are synonyms of Nibb?na. ¡§For in the ultimat
Nibb?na that is called ¡¥The Noble Truth of the Cessation of Suffering¡¦. But because cravin
ceases on coming to that¡¨ - ¡¥on coming to that¡¦ really means depending upon that. That is
consciousness arises, it takes Nibb?na as object. Only when there is Nibb?na as object can
arise. Only the Path consciousness abandons the mental defilements. So Nibb?na is called
Nibb?na is called ¡¥cessation¡¦. ¡¥Fading away¡¦ actually means the cause of fading away, t
cessation.

¡§And because there comes to be the giving up, etc., of that [craving] on coming to that [Nib
there is not even one kind of reliance here [to be depended upon] from among the reliances
cords of sense desires, etc., it is therefore called giving it up, relinquishing it, letting it go, no
relying on it.¡¨ All these expressions are synonyms for Nibb?na. Nibb?na is actually not givin
the cause of giving up, the cause of relinquishing, the cause of letting go, the cause of not re
is something, not just the act of giving up, not the act of relinquishing, not just letting go, not
It is something that helps consciousness give up, relinquish, let go and so on.

¡§It has peace as its characteristic. Its function is not to die; or its function is to comfort. It is
manifested as the signless; or it is manifested as non-diversification.¡¨ In footnote 17 the wo

¡¥nippapa?ca¡¦ is explained. You may read it later. Footnote 16 about ¡¥on coming to that¡¦ i
read. The P??i word used here is ¡¥?gama¡¦.

Next is the discussion of Nibb?na. These are questions and answers, like a debate. One is t
is the defender. [Question 1] ¡§Is Nibb?na non-existent because it is unapprehendable, like
horn?¡¨ The opponent said that there is no Nibb?na. Nibb?na is non-existent because it can
like a hare¡¦s horn. There is no such thing as a hare¡¦s horn. Like that there is no Nibb?na.

[Answer] ¡§That is not so, because it is apprehendable by the [right] means. For it is apprehe
namely the Noble Ones] by the [right] means,, in other words, by the way that is appropriate
of virtue, concentration, and understanding (wisdom);] it is like the supramundane conscious
[which is apprehendable only by certain of the Noble Ones] by means of knowledge of pene
minds.¡¨ So it is like supramundane consciousness. Supramundane consciousness can only
who have attained enlightenment or who have attained the supramundane consciousness. T
can know the supramundane consciousness of the lower Noble Persons. There are four sta
Those who have reached the second stage can know the supramundane consciousness of
and so on. So like that, Nibb?na can be apprehended by right means. That means one may
the path of virtue, concentration and wisdom. So there is Nibb?na. ¡§Therefore it should not
is non-existent because unapprehendable, for it should not be said that what the foolish ordi
apprehend is unapprehendable.¡¨ These people say that it is unapprehendable, but it is not
just because they say it is.

And then the defender continues. ¡§Again it should not be said that Nibb?na does not exist.
it then follows that the Way would be futile.¡¨ ¡¥The Way¡¦ means the practice, the practice o
Eightfold Path. It would be nonsense if you said that there was no Nibb?na. ¡§For if Nibb?na
non-existent, then it would follow that the right way, which includes the three aggregates beg
virtue and is headed by right understanding would be futile. And it is not futile because it doe
Nibb?na.¡¨ I don¡¦t like the word ¡¥aggregates¡¦ here. It may confuse you. I just want to say ¡
¡¥groups beginning with virtue¡¦ means s?la, sam?dhi and pa???. They are described in P??
sam?dhi khandha and pa??? khandha. But ¡¥khandha¡¦ here does not mean the aggregates
on. We can just say ¡¥groups¡¦. ¡§The three groups beginning with virtue and is headed by
would be futile. And it is not futile because it does reach Nibb?na.¡¨ So you cannot say that t
Nibb?na. If you say that there is no Nibb?na, then the Path would be meaningless. The path
The Path leads to Nibb?na. So there is Nibb?na. That is what the author meant.

[Question 2] ¡§But futility of the Way, does not follow what is reached is absence (non-existe
absence of the five aggregates consequent upon the cutting off of the defilements]?¡¨ After
defilements, the five aggregates do not exist.

[Answer] ¡§That is not so. Because, though there is absence of past and future [aggregates] nevertheless no reaching of Nibb?na [simply because of that].¡¨ The opponent takes the abs aggregates to be Nibb?na. If the absence of aggregates is Nibb?na, then the past is not exis future is not existent now, so there would be Nibb?na. There is no reaching of Nibb?na simp is not present now, the future is not present now, the past aggregates are not present, the fu are not present. If you say that the absence or the non-existence of the five aggregates are will be otherwise.

[Question 3] ¡§Then is the absence of present [aggregates] as well Nibb?na?¡¨ The absence aggregates is Nibb?na. Could that not be Nibb?na the opponent asks.

[Answer] ¡§That is not so.¡¨ That is because it is a contradiction of terms. The present canno ¡§Because their absence is an impossibility, since if they are absent their non-presence follo Nibb?na were absence of present aggregates too,] that would entail the fault of excluding th ¡¥arising¡¦ but ¡¥reaching¡¦) reaching of the Nibb?na element with results of past clinging left moment, which has present aggregates as its support.¡¨ The second part of the paragraph m entail the fault of excluding the reaching of the Nibb?na element with results of past clinging That means at the moment of Path consciousness there are aggregates, aggregates in exist the absence of the present aggregates is Nibb?na, then there should be no reaching of Nibb Path consciousness because at the moment of Path consciousness there are aggregates. If of aggregates is Nibb?na, then there can be no Nibb?na at the moment of Path consciousne the result of past clinging left. That means Nibb?na before death. There are two kinds of Nib before death of the Arahant and Nibb?na after the Arahant dies. We find out more later. Whe there are no aggregates. That kind of Nibb?na is possible, but the other kind of Nibb?na is n you take the absence of aggregates to be Nibb?na because aggregates are not absent at th consciousness.

[Question 4] ¡§Then will there be no fault if it is non-presence of defilements [that is Nibb?na the non-presence, the non-existence of defilements if that is Nibb?na, there will be no fault?

[Answer] The defender said that is not so. ¡§Because it would then follow that the Noble Pat For if it were so, then, since defilements [can be] non-existent also before the moment of the follows that the Noble Path would be meaningless.¡¨ Non-existence of defilements - there ca of defilements before the Path arises. Sometimes the defilements do not arise. If that is Nibb Path would be meaningless. You don¡¦t have to try to reach the Path because you already h one set of questions and answers.

[Question 5] ¡§But is not Nibb?na destruction, because of the passage¡¨ - now here the ques
aspect. The opponent points out the passage says ¡§That, friend, which is the destruction of
hate..of delusion, ..is Nibb?na.¡¨ Nibb?na is just the destruction of greed, hate and delusion.
separate thing that is Nibb?na, but there is just destruction, just the disappearance of defiler
it that way.

[Answer] Then the defender said ¡§That is not so, because it would follow that Arahantship (
Arahatta Phala, the Fruit), also, was mere destruction. For that, too, is described in the [sam
beginning ¡¥That, friend, which is the destruction of greed..of hate.. of delusion is Arahantsh
answer here is following the passage ¡¥the destruction of greed, of hate, of delusion is Nibb
would follow that passage that Nibb?na is mere destruction, there is another passage in the
says Arahantship is destruction. So Arahantship also would be mere destruction. So it is not
way. Nibb?na is not to be taken as mere destruction nor as mere disappearance of mental c

¡§And what is more the fallacy then follows that Nibb?na would be temporary, etc.; for if it w
follow that Nibb?na would be temporary, have the characteristic of being formed, and be obt
of right effort; and precisely because of its having formed characeristics it would be included
and it would be burning with the fires of freed, etc., and because of its burning it would follov
suffering.¡¨ Nibb?na would be suffering. Nibb?na is the destruction, the disappearance of me
Since mental defilements are formed, they are burning. They are dukkha. Then Nibb?na wo
Therefore it should not be taken that way.

[Question 6] ¡§Is there no fallacy, if Nibb?na is that kind of destruction subsequent to which
more occurrence?¡¨ Suppose defilements are destroyed and they don¡¦t appear again. Then
be called ¡¥Nibb?na¡¦, the opponent is saying. Suppose a person practices jh?na. By the pra
could put off or he could avoid the arising of defilements, not by total destruction but just by
away. Then after that he gets enlightenment. Then Nibb?na would not be at the moment of
the time when he could put off defilements. That is what is meant by the opponent.

[Answer] ¡§That is not so. Because there is no such kind of destruction. And even if there w
fallacies would not be avoided. Also because it would follow that the Noble Path was Nibb?n
Path causes the destruction of defects, and that is why it is called ¡¥destruction¡¦; and subse
there is no more occurrence of the defects.¡¨ After Path consciousness there are no more m
The Path would be called ¡¥Nibb?na¡¦ and not Nibb?na itself. ¡§But it is because the kind of
called ¡¥cessation consisting in non-arising¡¦, [that is Nibb?na,] serves figuratively speaking
support [for the Path] that [Nibb?na] is called ¡¥destruction¡¦ as a metaphor for it.¡¨

Do you understand this? There are two things - cessation consisting in non-arising and Nibb

serves as a decisive support¡¦ simply means let us say as an object. Since Nibb?na serves a
support for the Path, Nibb?na is said to be the cause and cessation consisting in non-arising
But here Nibb?na is called ¡¥destruction¡¦. That is by metaphor. In the passage quoted Nibb
destruction. Destruction of greed, hatred and delusion is Nibb?na. We are to understand tha
not really Nibb?na. Nibb?na is described as destruction because it is the cause or condition
Nibb?na serves as a condition for destruction. That is why Nibb?na is called ¡¥destruction¡¦.
direct expression. There are some kinds of metaphors that are this way.

As an example we say that sugar is phlegm. If you eat much sugar, you have phlegm. So pe
phlegm. Or perhaps salt is blood pressure. Salt is not blood pressure, but it is the cause for
So people say salt is blood pressure. Here Nibb?na is destruction. Nibb?na is not actually de
is the cause for destruction. It is the condition for destruction. That is why Nibb?na is stated
destruction. It is not direct talk. That is the reason for the next question.

[Question 7] ¡§Why is it not stated in its form?¡¨ Why is it not stated directly? Why is it not ca
cause of destruction?

[Answer] Then the answer is because it is extremely subtle. Even the Buddha hesitated to te
because it is so subtle that it would not be readily understood by the listeners.

Student: There is a problem here. If you say that Nibb?na is the cause of destruction, then N
before destruction.

Teacher: ¡¥Cause for¡¦ means a condition for. Nibb?na does not cause destruction, but Nibb
for destruction.

Student: It sounds like destruction is the next step after Nibb?na. Do you know what I mean?
after, a higher step.

Teacher: We cannot say that Nibb?na is past, or present, or future. Nibb?na is some kind of
consciousness arises, it takes Nibb?na as object and at the same time it eradicates mental d
destruction is there. Destruction of mental defilements is at the moment of Path consciousne
consciousness can arise only when it takes Nibb?na as object. If there is no such thing as N
consciousness cannot arise. That is why Nibb?na is said to be a condition for the destruction
defilements.

[Question 8] ¡§Since it is, when the Path is, then it is not uncreated?¡¨ If it is so, then only wh
Path, there is the destruction of mental defilements. It is taken as Nibb?na. So Nibb?na is no

Nibb?na is made by something. That is what the opponent is saying.

[Answer] ¡§That is not so, because it is not arousable by the Path (That means it is not prod
Path.); it is only reachable, not produced (strike out arousable), by the Path; that is why it is
It is because it is uncreated that it is free from aging and death. It is because of the absence
creation and its aging and death it is permanent.¡¨ Then ¡¥permanent¡¦ has been said so her
argument.

[Question 9] ¡§Then it follows that Nibb?na, too, has the kind of permanence [claimed] of the
on?¡¨ I think this is not correct. What the opponent says here is that you say Nibb?na is perm
Nibb?na is permanent, then the atoms. etc. are permanent. The atom etc., are taught in othe
There are six Hindu philosophies. They are called ¡¥darshan¡¦ in Sanskrit. In some of these
accept the atom the atom as a cause of creation or atoms are an ultimate truth. Atoms are ta
indestructible, to be permanent. So if you say Nibb?na is permanent, then the atoms are als
Nibb?na is permanent, so the atoms, etc., are also permanent?¡¨

{Answer] ¡§That is not so. Because of the absence of any cause [that brings about its arising
not correct. Because of the absence of any reason, (not ¡¥cause¡¦); that can prove its truth th
its arising. In this passage the terms used in Hindu logic are used. You have to understand h
order to understand this passage and the Sub-Commentary on it. It is very difficult. The word
reason. Are you familiar with syllogism in logic? I wrote a book on Hindu syllogisms in Burme
forgotten about that. So I had to read it again. There is what is called syllogism in Hindu logi
something.

The classical example is there is fire on the mountain because there is smoke. Wherever the
is fire, for example a kitchen. There is smoke on the mountain, therefore the mountain has fi
five stages of syllogism. In order to convince people you have to make use of these five step
is just the statement of fact. There is fire on the mountain. Then ¡¥Why?¡¦ someone may ask
smoke. How are fire and smoke related? Wherever there is smoke there is fire, for example
kitchens in the United States. You use gas here, so there is no smoke. So wherever there is
fire, for example in the kitchen. Now there is smoke there on the mountain, so there is fire on
This is called ¡¥syllogism¡¦. The second sentence is called ¡¥hetu¡¦ (reason). Why do you sa
the mountain? Because I see the smoke there. That sentence is called ¡¥hetu¡¦. That is not
reason given by the person. Because of the absence of any reason, there is no reason to pr
permanent.

[Question 10] ¡§Because Nibb?na has permanence, then, these, [that is, the atom, etc.] are
well?¡¨ The next question is because Nibb?na is permanent, the atoms are also permanent.

[Answer] ¡§That is not so. Because [in that proposition] the characteristic of [logical] reason
(¡¥Cause does not arise¡¦ is incorrect.), [in other words, to say that Nibb?na is permanent is
reason why the atom, etc., should be permanent.¡¨ According to Therav?da Buddhists the p
not proved. They are not proved. To say because Nibb?na is permanent, they are permaner
reason, valid statement. The reason is not valid.

[Question 11] ¡§Then they are permanent because of the absence of their arising, as Nibb?r

[Answer] ¡§That is not so. Because the atom and so on have not been established as facts.
to Buddhists.) The aforesaid logical reasoning proves that only this, [that is Nibb?na,] is perr
[precisely because it is uncreated].¡¨ (There should be a period there. Then we should strike
¡§It is immaterial because it transcends the individual essence of matter.¡¨ That is another st
Questions and answers for #9, #10, #11 use logical terms. We have to understand Hindu lo
understand these passages clearly.

Then Nibb?na is described as immaterial. Nibb?na is n?ma or ar|pa although it is not consci
mental factor. It is n?ma. It is ar|pa.

¡§The Buddhas¡¦ goal is one and has no plurality.¡¨ Actually what is meant here is it is a sing
there is no difference in the goal of Buddhas etc. Buddhas¡¦ goal, or Buddhas¡¦ enlightenme
destruction of defilements and others¡¦ destruction of defilements are the same. ¡§The Budd
and has no plurality¡¨ - I think that is not so good. It is a single goal because there is no diffe
goal of Buddhas, etc.

Then he describes the two kinds of Nibb?na - Nibb?na with results of past clinging left and N
results of past clinging left. That simply means Nibb?na while the Arahant is living or before
Nibb?na after the death of the Arahant. Before he dies he still has the aggregates. He still ha
mind. They are called ¡¥the results of past clinging¡¦. ¡¥With the results of past clinging¡¦ mea
is alive. ¡¥Without the results of past clinging¡¦ means when he dies.

Paragraph 74 ¡§Because it can be arrived at by distinction of knowledge that succeeds throu
perseverance; and because it is the word (not ¡¥world¡¦) of the Omniscient One, Nibb?na is
regards individual essence in the ultimate sense; for this is said: ¡¥Bhikkhus, there is an unb
unbecome, an unmade, an unformed¡¦.¡¨ This is a famous passage quoted by many people.

¡§This is the section of the definition dealing with the description of the Cessation of Sufferin
Noble Truth).¡¨ We cannot go to the Fourth Noble Truth tonight. OK.

Student: Bhante, back in paragraph 69 you said that Arahantship really means what?

Teacher: It really means Path of Arahantship and Fruit of Arahantship.

Student: So they want to say that is the same as Nibb?na.

Teacher: No. Nibb?na is a separate dhamma. Path is one thing. Fruit is another thing. Nibb?
thing. We will cross over into Pa?icca Samupp?da next week.

S?dhu! S?dhu! S?dhu!

(Tape 35 / Ps: 75 ¡V 104)

Today we study the Four Noble Truths, the Way Leading to the Cessation of Suffering. The
what we call the Noble Eightfold Path. It consists of eight factors. These eight factors are ac
factors (cetasikas). That is why the author said ¡§They have, of course, already been explai
in the Description of the Aggregates.¡¨ In the chapter on aggregates they have already been
still he will deal with them here because it is a little different here. Although all these are ceta
they belong to the supramundane. So they are a little different.

¡§Briefly, when a meditator is progressing towards the penetration of the Four Truths, his ey
understanding with Nibb?na as its object eliminates the inherent tendency to ignorance, and
View.¡¨ The first factor is Right View or Right Understanding. ¡¥Right Understanding¡¦ means
is concomitant with the supramundane consciousness or Path consciousness.

¡§It eliminates the inherent tendency to ignorance.¡¨ That means it is the highest Path consc
fourth Path consciousness. Pa??? concomitant with the first, second and third Path conscio
View. Here the author states that it is the highest one.

¡§It has right seeing as its characteristic. Its function is to reveal elements (like a floodlight).
manifested as the abolition of the darkness of ignorance.¡¨ When pa??? comes, ignorance c
abolition of the darkness of ignorance.

The next one is Right Thinking or Right Thought. ¡§When he possesses such view, his direc
to Nibb?na, which [directing] is associated with that [Right View]¡¨ - this Right Thinking is ass
Right View. Actually they arise at the same time and they do their respective functions. Here
is concomitant with Right View and it abolishes wrong thinking and that is Right Thinking.

Although it is called ¡¥thinking¡¦, it is actually the cetasika ¡¥vitakka¡¦. Vitakka has the charac
directing the mind on to the object. ¡§Its characteristic is right directing of the mind on to [its
So it is important. Although it is translated as Right Thinking or Right Thought, it is not really
It is a mental factor which takes the mind to the object or which directs the mind to the objec

the abandoning of wrong thinking.¡¨ So Right Thinking is manifested as the abandoning of w

The next one is Right Speech. Right Speech here is also associated with pa???. ¡§And whe
thus, his abstinence from wrong speech, which abstinence is associated with that [Right Vie
verbal conduct (or wrong verbal conduct), and that is called ¡¥Right Speech¡¦. It has the cha
embracing. Its function is to abstain. It is manifested as the abandoning of wrong speech.¡¨

Next is Right Action. ¡§It is abstinence from killing living things, which abstinence is associat
[Right View], cuts off wrong action, and that is called ¡¥Right Action¡¦.¡¨ ¡¥Right Action¡¦ actu
abstinence from killing, stealing and sexual misconduct. ¡§It has the characteristic of origina
function is to abstain. It is manifested as the abandoning of wrong action.¡¨ What is missing
¡¥killing living beings, etc.¡¦ ¡¥Etc.¡¦ is missing. His abstinence is from killing living beings, et
¡¥Etc.¡¦ covers stealing and misconduct.

Right Livelihood is next. ¡§When his Right Speech and Right Action are purified, his abstine
livelihood, which abstinence is associated with that [Right View], cuts off scheming, etc. (Yo
scheming in the first chapter.) and that is called ¡¥Right Livelihood¡¦. It has the characteristic
cleansing. Its function is to bring about the occurrence of a proper livelihood. It is manifested
abandoning of wrong livelihood.¡¨

The next one is Right Effort. It is also accompanied by Right View. ¡§When he is established
virtue called ¡¥Right Speech¡¦, ¡¥Right Action¡¦ and ¡¥Right Livelihood¡¦ (These three belong
virtue.), his energy, which is in conformity and associated with that [Right View], cuts off idle
that is called ¡¥Right Effort¡¦. It has the characteristic of exerting. Its function is the non-arou
unprofitable things, and so on. It is manifested as the abandoning of wrong effort.¡¨ When yo
Effort, you do not produce unprofitable states or unwholesome states.

Then there is Right Mindfulness. ¡§When he exerts himself thus, the non-forgetfulness in his
associated with that [Right View], shakes off wrong mindfulness, and that is called ¡¥Right M
The expression ¡¥wrong mindfulness¡¦ is strange here. In the ultimate sense there is no wro
Mindfulness is always right or always wholesome. There is no wrong mindfulness. What is c
mindfulness¡¦ here is wrong perception or distorted perception of things like taking ugly thing
pleasant, taking impermanent things to be permanent and so on. ¡¥Wrong mindfulness¡¦ her

mental states associated with or headed by wrong perception. ¡§It has the characteristic of e
function is not to forget. It is manifested as the abandoning of wrong perception (not ¡¥wrong
mindfulness¡¦).¡¨

Then there is Right Concentration. ¡§When his mind is thus guarded by supreme mindfulnes
mind, which is associated with that [Right View], abolishes wrong concentration, and that is
Concentration¡¦. It has the characteristic of non-distraction. Its function is to concentrate. It is
manifested as the abandoning of wrong concentration.¡¨ In the first chapter on sam?dhi the
etc., of concentration are given. They are given again with a little difference.

¡§This is the method in the description of the way leading to the cessation of suffering.¡¨ This
description of the eight factors of the Fourth Noble Truth.

¡§As to knowledge¡¦s function¡¨ - that means as to the function of knowledge. ¡§The expositi
understood according to the functions of knowledge.¡¨ Please add those words. It is ¡¥accor
functions of knowledge¡¦, not ¡¥according to knowledge¡¦. It is ¡¥according to the functions o
the truths¡¦. ¡§For knowledge of the truths is twofold, namely, knowledge as idea, and knowl
penetration.¡¨ ¡¥Knowledge as idea¡¦ really means secondhand knowledge, knowledge after
speak. The P??i word is anubodha. ¡¥Anubodha¡¦ means after knowing. ¡¥Knowing¡¦ means
then you know. It is translated as ¡¥idea¡¦ here. I don¡¦t know if that is a good word for it. ¡¥K
idea¡¦ means secondhand knowledge. ¡¥Knowledge as penetration¡¦ means direct knowledg
of knowledge. Knowledge as idea or secondhand knowledge is mundane and occurs throug
by logical thinking, comparing this with that, not through direct seeing of things.

Now about cessation and the Path - ¡§Knowledge consisting in penetration, which is supram
the Four Truths as its function.¡¨ Actually it penetrates the Four Truths by way of function by
cessation its object. Actually the knowledge consisting in penetration takes Nibb?na as obje
take Nibb?na as object and not the other Truths. When it takes Nibb?na as object, then the
Truth is destroyed and the First Noble Truth is completely understood and so on. So it is sai
penetrates the Four Noble Truths. Really what it penetrates is only the Third Noble Truth. Th
mind can only take one object at a time. When mind takes Nibb?na as object, it cannot take
object. But it is said that the functions with respect to these Truths is accomplished at the mo
enlightenment or at the moment of penetrating Nibb?na or the Third Noble Truth. So it pene
Noble Truths by way of function. ¡§By making cessation its object according as it is said, ¡¥B
sees suffering sees also the origin of suffering, sees also the cessation of suffering, sees als
leading to the cessation of suffering, and it should be repeated thus of all [four Truths].¡¨ So
suffering, sees the origin of suffering and so on. ¡§But its function will be made clear in the F
by Knowledge and Vision.¡¨ It will be made clear in chapter 22.

¡§When this knowledge is mundane, then, occurring as the overcoming of obsessions, the k
therein forestalls the [false] view of individuality.¡¨ The knowledge of these Four Noble Truth
abandons a false view. So the first, the knowledge of suffering forestalls the [false] view of in
¡§The knowledge of origin forestalls annihilation view; the knowledge of cessation forestalls
view; the knowledge of the Path forestalls the moral-inefficacy-of-action view.¡¨ That is the b
whatever you do good or bad, there is no moral value.

¡§Or alternatively, the knowledge of suffering forestalls wrong theories of fruit.¡¨ That means
understanding of fruit or results. ¡§In other words, [seeing] lastingness, beauty, pleasure, an
aggregates, which are devoid of lastingness, beauty, pleasure, and self; and knowledge of c
theories (wrong understanding) of cause that occur as finding a reason where there is none,
world occurs owing to an Overlord, a Basic Principle, Time, Nature (Individual Essence), etc
These are the views taken by the teachers during the time of the Buddha and after the time
¡¥The world occurs owing to an Overlord¡¦ means something like Christianity. God creates th
You may look at the footnote. "¡§n Overlord makes the world occur, prepares it, halts it, disp
Hinduism there are three gods - Brahm?, Vishnu, and Shiva. Brahm? creates the world. Vish
Shiva is going to destroy it. Shiva is the god of destruction.

The Basic Principle refers to Samkhya philosophy. In Samkhya philosophy they say that the
Principle. The world is created out of that principle. When that principle comes into contact w
principle, soul which is called ¡¥pulsha¡¦, then the world begins. Time is just time. And Natur
explained in the footnote. ¡§The world is manifested from out of a Basic Principle, and it is re
that again.¡¨ That comes from Samkhya philosophy.

¡§Those who hold the theory of time say:
Disposes of this generation,
¡¥Time it is that creates beings,
Time watches over those who sleep¡¦.¡¨

According to my understanding it means ¡§Time wakes up those who are asleep. To outstrip
indeed.¡¨

¡§Those who hold the theory of Nature (Sabh?va - Individual Essence) say ¡¥The world app
just because of its nature, like the sharp nature of thorns, like the roundness of apples (kabi
¡¥Kabi??haphala¡¦ really does not mean apples. Kabi??haphala has a hard shell. I don¡¦t se
West, but in our countries they are very common. They have hard shells and small seeds ins
sour. When we were young, we played with those fruits. One boy hits the fruit of the other bo
The one whose fruit cracks loses.

¡§Like the variedness of wild beasts, birds, snakes and so on¡¨ - if it meant only the outside
be taken, then Buddhism may be the same as this. It takes not only the outside world, but th
well. That is why it is put here as wrong view.

¡§The word ¡¥etc.¡¦ refers to those who preach fatalism and say the occurrence of the world
All is due to causes effected in the past. The world is determined, like drilled gems threaded
string. (That is fatalism.) There is no doing by a man; and to those who preach chance:

¡¥It is by chance that they occur,
By chance as well that they do not;
Pleasure and pain are due to chance;
This generation [lives] by chance¡¦;

and to those who preach liberation by chance.¡¨ There are many views about the origin of th
world comes to be and also how there can be release from the world.

Student: The theory of Nature or Sabh?va is said to be wrong understanding?

Teacher: Here it is taken to be wrong view because it doesn¡¦t admit kamma as a cause of li

Student: It says that living beings have their own causation within themselves.

Teacher: That¡¦s right. Kamma is their cause.

Student: When you say karma, how do you explain karma?

Teacher: ¡¥Kamma¡¦ actually means mental volition. When you do something good or bad, t
called ¡¥volition¡¦. That volition has the potential to give results in the future. It disappears, b
leaves something like a potential to give results in the continuation of that being.

Student: So you are not saying the karma of apples?

Teacher: No. We do not accept that inanimate things have kamma. Kamma is for living bein

So there are many theories. ¡§Taking final release to be in the immaterial world¡¨ - some tak
reach the highest immaterial world (the highest ar|p?vacara realm), you find release there. ¡
Apex [World Shrine - Lokath|pika]¡¨ - it is not a shrine actually. The P??i word ¡¥th|pika¡¦ me
like a protuberance. ¡¥World Apex¡¦ means the highest of the r|p?vacara worlds. When you
then that is the end of it.

¡§And the Path Knowledge forestalls wrong theories of means that occur by taking to be the
what is not the way of purification and consists in devotion to indulgence in the pleasures of
and in self-mortification.¡¨ The Fourth Noble Truth is the Middle Way. It does not approach o
take the two extremes. One extreme is indulgence in pleasures of the senses and the other
self-mortification. ¡§Hence this is said.¡¨ We have to change this a little.

¡§As long as a man is vague about the world,
About its origin, about its ceasing
About the means that lead to its cessation,
So long he cannot recognize the truths.¡¨

The real meaning of the verse is the other way around.

¡§As long as a man cannot recognize the truths,
So long as he is vague about the world,

(That means he is confused about the world.)

About its origin, its cessation, and going to cessation.¡¨

¡§As to division of content: all states excepting craving and states free from cankers are incl
Truth of Suffering.¡¨ In the Truth of Suffering everything is included except craving and the s
cankers. That means the supramundane states. ¡§The 36 modes of behavior of craving (Tha
kinds of craving.) are explained in footnote 24. First there are sense desire, craving for beco
craving for non-becoming. These three are multiplied by twelve, the six internal bases and th
bases. So they become 36.) are included in the Truth of Origin.¡¨ ¡¥The Truth of Origin¡¦ mea
Craving may be only 3, or 18, or 36, or 108. Whatever it may be it is included in the Truth of
Truth of Cessation is unmixed.¡¨ So it is only one, Nibb?na. ¡§As regards the Truth of the Pa
of Right View includes the fourth Road to Power consisting in inquiry, the Understanding Fa
Understanding Power, and the Investigation of States Enlightenment Factor.¡¨ In order to un
have to understand the 37 constituents of enlightenment, bodhipakkhiya. There are 37 cons
enlightenment. They are called ¡¥bodhipakkhiya¡¦, constituents or actually members of enlig
37 in number. You have to understand those. Please read chapter 7 of The Manual of Abhid
mentioned there. They are the four foundations of mindfulness, the four right efforts, the fou
power, the five faculties, the five powers, the seven factors of enlightenment, and the eight f
These are 37. This paragraph explains this according to these 37 constituents of enlightenm
understand it you have to be familiar with these 37 factors of enlightenment.

Towards the end of paragraph 10 there is the expression ¡¥consciousness concentration¡¦. V
¡¥consciousness concentration¡¦? Do you see the words? ¡¥Consciousness concentration¡¦
iddhip?da (the road to power) as consciousness. There are four roads to power. What are th
viriya, citta and v?ma?s?. Here ¡¥consciousness concentration¡¦ means citta as iddhip?da, o
power.

Then there is as to simile. It is not difficult to understand, but it is very good. ¡§The Truth of S
should be regarded as the burden, the Truth of Origin of Suffering should be regarded as tal
the Truth of Cessation as the putting down of the burden, the Truth of the Path as the means
the burden.¡¨ The next one is my pet example. ¡§The Truth of Suffering is like a disease, the
Origin of Suffering is like the cause of the disease, the Truth of the Cessation is like the cure
disease, and the Truth of the Path is like medicine.¡¨ Then there is a third simile given. ¡§The
Suffering is like a famine, the Truth of the Origin is like a drought, the Truth of Cessation is li
and the Truth of Path is like timely rain.¡¨

Paragraph 88 ¡§As to tetrad: there is suffering that is not the Noble Truth, there is Noble Tru
suffering, there is what is both suffering and Noble Truth, and there is what is neither sufferin
Truth.¡¨ This is just shuffling the contents of the Noble Truths. First you must understand of w
the First Noble Truth, of what consists the Second Noble Truth and so on. Then you try to un
there is something which is only Noble Truth, but not suffering. There is something which is
not Noble Truth and so on.

¡§Herein, though states associated with the Path and the Fruits of asceticism (that means E
suffering since they are suffering due to formations.¡¨ When Magga (Path) consciousness an
consciousness and mental factors. Among the mental factors there are eight factors and the
others are called ¡¥states associated with the Path¡¦. ¡¥States associated with the Path¡¦ rea
consciousness and other mental factors, all other mental factors except the eight Path factor
suffering because they are formations. Since they are formations, they are suffering. But the
included in the Truth of Suffering. So they are not the Noble Truth of suffering. If you read th
of chapter 7 in The Manual of Abhidhamma, you will understand that. There are some states
to any of the Four Noble Truths, strictly speaking. The states associated with the Path and th
associated with the Fruits of asceticism (that means the Fruition.) are all called ¡¥suffering¡¦
have a beginning and an end. They are impermanent. That is why they are called ¡¥suffering
included in the Noble Truth of Suffering.

¡§Cessation is a Noble Truth, but it is not suffering.¡¨ This is easy. ¡§The other two Noble Tru
means the second and the fourth.) can be suffering because they are impermanent, but they
real sense of that for full understanding of which the life of purity is lived under the Blessed O
the full understanding of which¡¦ means for the full understanding of the First Noble Truth. Th
are suffering, but they are not so in the real sense.

¡§The five aggregates of clinging, except craving, are in all aspects both suffering and Noble
the aggregates except clinging (lobha) are both suffering and Noble Truth.

¡§The states associated with the Path and the Fruits of asceticism are neither suffering in th
that for the full understanding of which the life of purity is lived under the Blessed One (That
Noble Truth.), nor are they Noble Truth. Origin, etc., should also be construed in the corresp
you can say there is Noble Truth and not Origin, Origin and not Noble Truth and so on.

¡§As to void, singlefold, and so on: firstly as to void: in the ultimate sense all the Truths shou
understood as void because of the absence of any experiencer, any doer, anyone who is ex
goer. Hence this is said.¡¨ This is a very popular saying quoted by many authors.

¡§For there is suffering, but no one who suffers;
There is only doing, but no doer;
There is only extinction, but not the person who is extinguished
or not a person who experiences the extinction;
There is a path, there is no goer.

Or alternatively:

So void of lastingness, and beauty, pleasure, self,
Is the first pair (The ¡¥first pair¡¦ means the First Noble Truth and the Second Noble Tru
void of self the deathless state (The Third Noble Truth is void of self.)
And void of lastingness of pleasure and of self
Is the Path too (The Fourth Noble Truth is devoid lastingness, void of pleasure, void of s
void of beauty because it is wholesome.) for such is voidness in
these four.¡¨ This is as is according to void.

¡§Or three are void of cessation, and cessation is void of the other three.¡¨ Here ¡¥void¡¦ mea
from. The three are different from cessation, from the third. The first, second and fourth are
the third. And the third is different from the other three.

¡§Or the cause is void of the result, because of the absence of suffering in the origin, and of
the Path; the cause is not gravid with its fruit like the Primordial Essence.¡¨ Here also the ref
Samkhya philosophy. In Samkhya philosophy they say that fruit is inherent in the cause. Acc
philosophy cause and effect are two separate things. Cause is one thing and effect is anothe
originates fruit, but cause is not the fruit and fruit is not the cause. They are two separate thi
Samkhya philosophy they say that fruit is already inherent is the cause, only it is not manifes
make a pot out of clay, actually the pot is in the clay. If there is not a pot in the clay, you can
pot out of the clay. So the pot is existent in the clay in an unmanifest form. You pick up the c
it into a pot. So it becomes a pot. Their view is that the result is already contained in the cau
unmanifest form. ¡§The cause is not gravid with its fruit like the Primordial Essence of those
existence of Primordial Essence.¡¨ In Sanskrit it is called ¡¥asakariavada¡¦. ¡¥A¡¦ means not.

existing. ¡¥Karia¡¦ means fruit. So we get fruit existing in the cause.

There is another philosophy. ¡§The fruit of a cause does not have its cause inherent in it, lik
atoms, etc., of those who assert Inherence.¡¨ It refers to the Vaishishikya philosophy. In that
they almost say the same thing that the result is already in the cause. They say that cloth is
threads because without threads there can be no cloth. If you take the threads out one by o
cloth. That means that cloth and threads are related. Their relation is by inherence. Also the
beginning of the world as combining of two atoms, three atoms and so on. When two atoms
dyad. They say that two atoms is inherent in each atom because when they come together,
does not exist without one and one put together. So two must be in one also. It is called ¡¥T
Inherence¡¦. They are rejected here. ¡§The fruit of cause does not have its cause inherent in
atoms, etc., of those who assert Inherence.¡¨

Paragraph 14 ¡§As to singlefold and so on: and here all suffering is one kind as the state of
a state of occurrence it is only one, but it is of two kinds as mentality-materiality (n?ma-r|pa)
three kinds as divided into rebirth-process-becoming, in the sense sphere, fine material sph
immaterial sphere.¡¨

¡§Also origin is one kind as making occur.¡¨ That means producing something. ¡§It is of two
associated and not associated with [false] view. It is of three kinds as craving for sense desi
for becoming and craving for non-becoming.¡¨ We will find these three kinds of craving later.
kinds as abandonable by the four Paths. It is of five kinds classed as delight in materiality, a
is of six kinds classed as the six groups of craving.¡¨

¡§Also cessation is of one kind being the unformed (or unconditioned) element. But indirectly
kinds.¡¨ You already know the two kinds of Nibb?na - Nibb?na experienced during the life of
the Nibb?na at his death. The first is called ¡¥Nibb?na with the aggregates remaining¡¦. The
¡¥Nibb?na without the aggregates remaining¡¦. When a person becomes an Arahant, he era
defilements, but he still has his body and his mind which are the results of his past kamma.
remainder of aggregates. With remainder of the aggregates he experiences Nibb?na. So the
by an Arahant before his death is called ¡¥Nibb?na with the aggregates remaining¡¦. At deat
cessation. When an Arahant dies his remaining aggregates disappear. That Nibb?na is calle
the remaining aggregates¡¦. There are two kinds of Nibb?na.

¡§Also the Path is of one kind as to what should be developed. It is of two kinds classed acc
serenity and insight.¡¨ Now it is important here, samatha and vipassan?. The Path can be cl
and vipassan?. When it is samatha, it may mean mundane path and insight is also mundane
(it may) be classed according to seeing and developing.¡¨ Here seeing and developing have

¡¥Seeing¡¦ really means the First Path and ¡¥developing¡¦ means the other three Paths. The
the Abhidhamma.

The word ¡¥aggregates¡¦ is not so good here. We should substitute some other word like gro
s?la group, sam?dhi group, pa??? group or something like that. The P??i word is khandha,
mean the same thing as r|pa khandha, vedan? khandha, and so on. Here it is saying s?la kh
khandha, and pa??? khandha. I think ¡¥group¡¦ is a better word than aggregate here. ¡§It is
classed according to the three groups; for the [Path], being selective, is included by the three
are comprehensive, as a city by a kingdom, according as it is said¡¨ and so on. What is the r
Path being selective? ¡¥S?la group¡¦ means both mundane and supramundane. There is mu
supramundane s?la. When we say ¡¥s?la group¡¦, we include both mundane and supramun
comprehensive, but magga is only supramundane. Therefore it is called ¡¥selective¡¦ here. T
better word than ¡¥selective¡¦. I don¡¦t know. The supramundane Path is just a part of the wh
s?la. ¡¥S?la group¡¦ means both mundane and supramundane s?la, but ¡¥Magga¡¦ means o
less comprehensive.

The quotation is from a Sutta in the Majjhima Nik?ya. ¡§The three groups are not included in
Eightfold Path, friend Vis?kha, but the Noble Eightfold Path is included by the three groups.¡
three groups are more comprehensive than the Noble Eightfold Path. So it is not said that th
are included in the Noble Eightfold Path. However the Noble Eightfold Path is included by th
aggregates.

¡§Any right speech, any right action, any right livelihood: these are included in the virtue grou
divide the eight factors into three groups, right speech, right action and right livelihood fall un
virtue (s?la) group. ¡§Any right effort, any right mindfulness, any right concentration: these a
the concentration group.¡¨ These three belong to concentration group. ¡§Any right view, any
these are included in the understanding group.¡¨ So we have s?la, sam?dhi and pa???.

¡§As to the three beginning with right effort, concentration cannot of its own nature cause ab
unification on the object.¡¨ This explanation is very important when you try to explain how the
during meditation. Here it is said that concentration alone by its nature cannot cause absorp
unification on the object. ¡§But with energy accomplishing its function of preventing wobbling
so.¡¨ That means sam?dhi when helped by energy and mindfulness can really penetrate. So
must make effort. We must have mindfulness. Only when there is effort and mindfulness can
concentration. So concentration is helped by effort and mindfulness. That is explained in this
a simile is given. Three people go to a garden and pick fruit.

Paragraph 99 here also pa??? is assisted by vitakka or right thinking. That is why right think

in the pa??? group. ¡§As regards right view and right thinking, understanding cannot of its ov
an object as impermanent, painful, not self. But with applied thought (That is vitakka.) giving
by repeatedly hitting [the object] it can.¡¨ That means right thought or initial application takes
the object, mind together with the concomitants. Only when vitakka takes the mind to the ob
understanding penetrate it. It is like if you do not take a person to a certain place, he will not
anything about that place. You have to take him there. Then he sees it and knows everythin
do not take him there, he will not know about it. In the same way if vitakka or here right thou
take the mind to the object, then pa??? cannot do anything. Pa??? is assisted by vitakka or
they are grouped together in the understanding group. Once again a simile is given.

Paragraph 103 as to similar and dissimilar - they are something like playing with the differen
the Noble Truths. ¡§All truths are similar to each other because they are not unreal, are void
are difficult to penetrate according as it is said ¡¥What do you think, ?nanda, which is more d
more difficult to perform, that a man should shoot an arrow through a small keyhole from a d
time without missing, or that he should penetrate the tip of a hair split a hundred times with t
similar hair]? - This is more difficult to do, venerable sir, more difficult to perform, that a man
penetrate the tip of a hair split a hundred times with the tip [of a similar hair]. - They penetrat
more difficult to penetrate than that, ?nanda, who penetrate correctly thus ¡¥This is suffering
more difficult to penetrate the Four Noble Truths than to penetrate the tip of a hair split a hun
with the tip of another hair.

Student: It¡¦s a real challenge.

Teacher: That¡¦s right. The first two are similar since they are profound and so on. They are
sense and dissimilar in another sense. This is like shuffling the Four Noble Truths as to simi
dissimilarity.

Chapter 17
(Tape 35 / Ps: 1-20)

The next chapter is about the Dependent Origination. First the P??i word for Dependent Orig
look at these sheets and I will explain to you. Then we will read the book. We cannot do awa
words. The word is Pa?iccasamupp?da. In this book Pa?iccasamupp?da is said to mean sta
That means causes. States that are conditions which are, namely, ignorance and so on. Bef
want you to be familiar with the formula for Dependent Origination. Depending upon ignoran
formations. Depending upon formations there is consciousness and so on. In the formula the
formations, consciousness, mentality-materiality, six bases, contact, feeling, craving, clingin
birth, old age and death. This sequence you have to be familiar with.

What does the word ¡¥Pa?iccasamupp?da¡¦ mean? ¡¥Pa?iccasamupp?da¡¦ means the state
is according to this Commentary. Then there is another word, ¡¥pa?iccasamuppanna¡¦. ¡¥Pa
means states that are conditioned. So they are results or fruits. Jar?, mara?a are examples.
dhammas mentioned in Pa?iccasamupp?da are included in both. They are both pa?iccasam
pa?iccasamuppanna. Only the first indicates conditions and the second the conditioned. All
Pa?iccasamupp?da are interdependent. First you should understand this. Then you may rea

Please go to the bottom of the handout. In the word ¡¥Pa?iccasamupp?da¡¦ we have the wo
¡¥upp?da¡¦ has three meanings. One is that which arises. The second meaning is that which
arise. This is the causative sense. And the third meaning is just arising. It¡¦s an action. We c
verbal noun. So the word ¡¥upp?da¡¦ has three meanings. But with regard to the word ¡¥Pa?
the first two meanings are accepted and the last meaning is rejected in the Visuddhi Magga.
can read about in paragraphs 8-13.

Then let us look at the meaning of Pa?iccasamupp?da. There are four meanings given for P
first meaning is that which is to be arrived at (or known). That is the meaning of pa?icca here
that which arises together and rightly. I put the colors to correspond with the meanings of ¡¥
¡¥upp?da¡¦. The word ¡¥samupp?da¡¦ is composed of ¡¥sam¡¦ and ¡¥upp?da¡¦. ¡¥Sam¡¦ is ma
rightly here. ¡¥Upp?da¡¦ is made to mean that which arises. ¡¥Samupp?da¡¦ means that whic
rightly. ¡¥Together¡¦ means not singly - not formations only, not consciousness only, becaus
consciousness arises mental factors also arise. And at the same time there arise material pr
¡¥Together¡¦ means not singly, not one by one. ¡¥Rightly¡¦ means not without cause. ¡¥Right
arise with their respective causes, not without causes. By this definition the conditioned state
¡¥Pa?iccasamupp?da¡¦. By this definition the results are called ¡¥Pa?iccasamupp?da¡¦.

The second meaning is that which depending upon the convergence of conditions (That is th

pa?icca.) arises together. Here ¡¥sam¡¦ has only one meaning, together, and ¡¥upp?da¡¦ has
which arises. ¡¥Pa?icca¡¦ means having depended upon or depending upon. By this definitio
states (the fruits) are meant.

If you look at the first line you see that ¡¥Pa?iccasamupp?da¡¦ means states that are conditi
according to the first and second meanings, ¡¥Pa?iccasamupp?da¡¦ means results and not c
Commentator, Venerable Buddhaghosa, is very persistent in making us accept that ¡¥Pa?ic
conditions or causes and not the effects, not the fruits. How does he explain that with these
given by himself? The first and second definitions mean the results and not the causes. So h
up something.

Although by definitions #1 and #2 ¡¥Pa?iccasamupp?da¡¦ means conditioned states, we are
in a figurative sense, so that it means states that are conditions. Actually we must take it tha
conditions are meant by Pa?iccasamupp?da even though we follow these two definitions. H
in paragraph 16. Sometimes even in the Texts there are sayings which are to be taken figura
statement for example in the Dhammapada which says ¡§The appearance of the Buddhas is
of the Buddhas is not bliss actually. It is the cause of bliss because when Buddhas appear, p
enlightened and so there is bliss for them. So the appearance of the Buddha is not bliss, but
bliss. But it just says ¡§The appearance of the Buddha is bliss.¡¨ Or it is like saying diabetes
Diabetes is not sugar, but it is caused by sugar. We might say diabetes is sugar. It is someth
Although the word ¡¥Pa?iccasamupp?da¡¦ means conditioned things or results, we must und
the conditions or causes and not the results. That is explained in paragraph 16.

Now let us look at the third meaning. Pa?iccasamupp?da is that which is to be gone towards
originates states together. Here the word ¡¥upp?da¡¦ means that which causes to arise, that
¡¥sam¡¦ means together. So that which produces things together, things that arise together.
be gone towards¡¦, that is the meaning of the word ¡¥pa?icca¡¦. ¡¥Which is to be gone towar
in Buddhism the theory of causation is: On account of many causes, there are many results.
that later, not today. There is not one cause and one effect. There is not one cause and man
many causes and one effect, but there are many causes and many effects. That is what is a
So here ¡¥which is to be gone towards¡¦ means the conditions, two or three conditions must
order to produce a result. It is like three sticks put together. They must come together and d
other in order to produce something. That is why they are called here ¡¥which is to be gone
they produce states, they produce states together, not one state only. The obvious example
kamma produces its effects, there is relinking. ¡¥Relinking¡¦ means what? At the same mom
consciousness, there are mental factors, and there are material properties born of kamma. T
So ¡¥Pa?iccasamupp?da¡¦ means here that which is to be gone towards and which originate
this definition what is meant? Causes. That is because they originate or produce other state

Then the fourth meaning is that which depending upon one another originates evenly and to
less the same as the third meaning. Here ¡¥sam¡¦ is made to mean two things - evenly and t
it is translated as ¡¥equally¡¦. ¡¥Evenly¡¦ means not piecemeal, not one and then the next on
next one, but two or three things together, so not piecemeal. And ¡¥together¡¦ means not on
Whether the product or the result is consciousness or material properties, it arises with othe
When consciousness arises there are mental factors too. When material properties are prod
produced in what are called ¡¥kalapas¡¦ or ¡¥groups¡¦. They arise in groups. So they are tog
not produced one at a time. If there are eight properties in a kalapa, they are produced at th
They are produced evenly and they are produced together. By this definition too the conditio
definitions #3 and #4 tell us that ¡¥Pa?iccasamupp?da¡¦ means conditions. Here we don¡¦t h
recourse of figurative usage. Here directly the word ¡¥Pa?iccasamupp?da¡¦ means condition

In all these definitions you see the word ¡¥that¡¦. ¡¥That¡¦ means group of conditions or grou
are conditioned. The singular number is used here although actually it means a multiplicity o
a multiplicity of states that are conditioned.

What about Pa?iccasamupp?da as a doctrine? Here ¡¥Pa?iccasamupp?da¡¦ means not a do
effects, but we call this Pa?iccasamupp?da a doctrine. As a doctrine what should we call it i
translated as Dependent Origination, Dependent Arising, Dependent Co-Arising. Dependent
direct translation because there is ¡¥together¡¦. But I have one fear of using co-arising. Some
it that cause and effect arise together. It does not necessarily mean that the cause and effec
together. ¡¥Together¡¦ just means the effects arising together in a group, not cause and effe
together. There is cause and there is effect. Effect consists of more than one thing. That is w
¡¥together¡¦ in these definitions.

Student: Doesn¡¦t using the term ¡¥dependent¡¦ make it clear?

Teacher: Dependent Co-Arising.

Student: We often say ¡¥co-origination¡¦. Is that any better?

Teacher: I don¡¦t think so, because you know two meanings are given for the word ¡¥upp?da
we cannot have one word which means these two things. So we have to choose ¡¥arising¡¦ o

Student: Don¡¦t we say clinging arises from craving? That¡¦s not a causal relationship? You a
not a causal relationship?

Teacher: There is a causal relationship between these, but sometimes - There are links - igr formations, formations and consciousness and so on. Some relations are as producer and p relationships are like arising together and helping each other. So ¡¥co-arising¡¦ can mean ca arising together, but not always.

Student: You mean that sometimes they arise separately?

Teacher: That¡¦s right. Yes. Let¡¦s say that we take the relationship between mental formatic consciousness. ¡¥Mental formations¡¦ here means kamma. ¡¥Consciousness¡¦ means result belong to different times. So they do not arise together. They are related as cause and effec and n?ma-r|pa (mentality-materiality) arise together. Consciousness and mentality-materialit Their relationship is not one of producer and the produced. It is a relationship of helping eac is why it is important to understand the Pa?iccasamupp?da with reference to the Pa??h?na. is given in this book. We will come to this later. Only when you understand with reference to really understand Pa?iccasamupp?da. Otherwise there may be something missing in your k understanding of Pa?iccasamupp?da.

We think when we say when there is ignorance, there are formations; when there are format consciousness, we normally think that one is caused by the other, but it is not the case with links are related as cause and effect. Some are not related as cause and effect, but just sup It is like a group of people doing the same work. They help each other. They support each o work. Those relationships are to be understood with reference to Pa??h?na, the 24 causal r this chapter. This is the background understanding. Then we can go to the chapter itself.

In paragraphs #16, #17, #18 and so on if it is difficult to understand, come back here (to the are so many parentheses, brackets, P??i words that it is difficult to read. We will continue ne

Student: The 24 conditions?

Teacher: We may not reach the 24 conditions next week. But you can find them beginning w

S?dhu! S?dhu! S?dhu!

(Tape 36 / Ps: 1-76)

We will start from the beginning of this chapter again. I will go over briefly the topics here. Pa states what is meant by the P??i word ¡¥Pa?iccasamupp?da (Dependent Origination)¡¦. Her ¡¥Pa?iccasamupp?da¡¦ means ignorance and so on, the causes or conditions. Then paragra

P??i word ¡¥pa?iccasamuppanna¡¦ means the conditioned states or the results beginning wi
and then again ignorance and so on. Both just mean ignorance and the others mentioned in
¡¥Dependent Origination¡¦ means the causes and the word ¡¥dependently originated states¡
conditioned states. In paragraph 4 it is re-stated that ¡¥Dependent Origination (Pa?iccasamu
conditions and that ¡¥Pa?iccasamupp?da¡¦ means the conditioned states. And then paragra
scriptural proof for taking Dependent Origination as conditions and dependently originated s
conditioned states.

Towards the end of paragraph 5 the second quotation ¡§So, bhikkhus, that herein which is r
unreality, not otherness, specific conditionality: that is called ¡¥Dependent Origination¡¦.¡¨ In
Dependent Origination Buddha used these words - reality, not unreality, not otherness, spec
conditionality. These words are explained in paragraph 6. ¡§Because particular states are pr
particular conditions, neither less nor more, it is called ¡¥reality¡¦ (suchness)¡¨ and so on, not
not otherness. The last one is specific conditionality. The word ¡¥total¡¦ in this paragraph me
a multitude of conditions.

Paragraph 7 explains the word ¡¥idappaccayat?¡¦. It is very difficult to understand if you don
if you don¡¦t read the original P??i passage. In the word ¡¥idappaccayat?¡¦ there are two wor
¡¥paccay?¡¦. ¡¥Ida¡¦ means this. ¡¥Paccay?¡¦ means condition. ¡¥Ida¡¦ here means of these a
means conditions. So we get conditions of these or conditions for these. That is the literal m
word ¡¥idappaccay?¡¦, condition for those. Actually ¡¥ida¡¦ means these, not those. If you kn
understand. Then there is ¡¥t?¡¦ at the end of the word. That ¡¥t?¡¦ is first explained to have
meaning and second to have the meaning of total or multitude. So idappaccay? and idappac
meaning according to the first explanation. In the second explanation ¡¥idappaccay?¡¦ mean
those and ¡¥idappaccayat?¡¦ means a total of or a multitude of conditions for those. The suff
end of the word has two meanings. One is no specific meaning. The other is a group, or a to
multitude. The first sentence in paragraph 8 ¡§The characteristic must be sought from gramm
the end of paragraph 7. Here ¡¥characteristic¡¦ just means the grammatical rule. The rule sh
from grammar because he was saying the suffix ¡¥t?¡¦ has no meaning or it has the meaning
needs to be explained with reference to grammar. So if you want to understand clearly with
grammar, you go to grammar books and find the characteristic, that is find that grammatical
sentence should be at the end of the seventh paragraph, not at the beginning of the eighth p

Then in paragraph 8 ¡§Some, in fact, say¡¨ and so on - I think we should say ¡¥however¡¦ ins
fact¡¦. ¡§Some, however, say.¡¨ In this paragraph the author refutes the opinion of other teac
word ¡¥Pa?iccasamupp?da¡¦ means just arising, not conditions or conditioned things, but jus
teachers take this word to just mean arising. The author takes it to mean the conditioning thi
difference. That opinion is refuted. The author gives four reasons for refuting that opinion. Th

¡¥Pa?iccasamupp?da¡¦ does not mean just arising, but it also means some states that arise
cause to arise. Actually some states that cause to arise is what is ultimately taken here.

There are four reasons given. ¡§There is no such Sutta.¡¨ That means it has no support in th
no Sutta to support the statement that Pa?iccasamupp?da is just arising. There is no Sutta t
is the first reason. The second is: ¡§It contradicts Suttas.¡¨ Then the details will come later. I
Pa?iccasamupp?da to just mean arising, there is contradiction with some Suttas. The third r
admits of no profound treatment.¡¨ If one says that Pa?iccasamupp?da is just arising, then it
profound. The fourth is: ¡§It is ungrammatical.¡¨ According to P??i grammar you cannot take
arising. These four reasons are given.

Now the detailed explanation follows. ¡§(1) No Sutta describes the Dependent Origination as
(2) Anyone who asserts that Dependent Origination is of that kind involves himself in conflict
Padesavih?ra Sutta.¡¨ Actually in the Suttas we do not find the Padesavih?ra Sutta. ¡§Then
of the night the Blessed One brought to mind the Dependent Origination, in direct and revers
Immediately after his enlightenment the Buddha stayed under the Bodhi Tree. When staying
he reflected upon Dependent Origination in direct order and reverse order. ¡§Now ¡¥Padesa
abiding in one part of that, according as it is said, ¡¥Bhikkhus, I abode in a part of the abidin
abode when I was newly enlightened¡¦ and there he abode in the vision of structure of condi
of conditions¡¦ means Pa?iccasamupp?da.) not in the vision of simple arising, according as i
understood feeling with wrong view as its condition, and feeling with right view as its conditio
with wrong thinking as its condition..¡¦ all of which should be quoted in full.¡¨ It is, called ¡¥pa
¡¥Padesa¡¦ means ¡¥in part¡¦, not ¡¥in full¡¦. ¡¥Vih?ra¡¦ means abiding. So we get abiding in p
called ¡¥abiding in part¡¦ because if you look at the quotation ¡§So I understand feeling with
and so on, Buddha dwelt on feeling only here, not on the whole of Pa?iccasamupp?da. That
¡¥abiding in part¡¦. It is reflection in part, not reflection on the whole of Pa?iccasamupp?da. H
on only one part of Pa?iccasamupp?da. That is why it is called P??i ¡¥padesa-vih?ra¡¦. It is s
Buddha did not reflect upon just arising, but upon the things that arise. That is why it contrad
if we take ¡¥Pa?iccasamupp?da¡¦ to mean just mere arising.

¡§There is likewise contradiction of the Kacc?na Sutta.¡¨ This Sutta is found in Sa?yutta Nik?
sees correctly with right understanding the origin (not origination) of the world, Kacc?na, he
of the world that it is not.¡¨ It is origin of the world, not origination, not arising. The word used
lokasamudaya. ¡¥Samudaya¡¦ can mean origination as well as something that originates. He
something that originates. So it is understanding of the origin of the world. If we take the tran
¡¥origination¡¦ as correct, then it accords with what other teachers say. ¡¥Understanding the
the world¡¦ means understanding the arising of the world. So here it should be understandin
world or that which causes the world to arise. That is lobha. There would be contradiction wi

too, if we take ¡¥Pa?iccasamupp?da¡¦ to just mean arising. ¡§And there it is Dependent Orig
order, not simple arising, that, as the origin (not origination) of the world and as the conditior
world (not from its conditions), is set forth in order to eliminate the annihilation view.¡¨ This S
forth in order to eliminate the view that everything is annihilated at death. ¡§For the annihilat
not eliminated by seeing simple arising.¡¨ You cannot get rid of the annihilation view just by s
arising. ¡§But it is eliminated by seeing the chain of conditions (That means one condition af
arising and then the things that are conditioned. ¡¥Chain of conditions¡¦ really means uninter
conditions) ¡§as a chain of fruits following on a chain of conditions. So anyone who asserts t
Dependent Origination is simple arising involves himself in contradiction of the Kacc?na Sut
contradict the Kacc?na Sutta if you take it that ¡¥Pa?iccasamupp?da¡¦ means just simple ari

The next one is: ¡§ (3) It admits of no profound treatment.¡¨ Just to see arising is not difficult
that there are conditions and that these conditions give rise to conditioned states, that is diffi
to see the arising is not difficult and not profound. Buddha said to ?nanda in the Mah? Parin
¡§This Dependent Origination is profound, ?nanda, and profound it appears.¡¨

¡§And the profundity is fourfold as we shall explain below (That is towards the end of the cha
there is none of that in simple arising. And this Dependent Origination is explained [by the te
adorned with the fourfold method; but there is no [need of] any such tetrad of methods in sim
Dependent Origination is not simple arising since that admits of no profound treatment.¡¨

The fourth reason is: ¡§It is ungrammatical.¡¨ In order to understand this you have to underst
grammar. Pa?icca is a gerund, so it means having depended upon. Then ¡¥samupp?da¡¦ me
which arises, or that which causes to arise. When there is a gerund like pa?icca, having don
because a gerund is a verbal noun, there must be two verbs in such a sentence. Here ¡¥hav
is one verb and there must be another verb, the principal verb. So there are two verbs, the p
the secondary verb. These two verbs must have one and the same subject. That is what the
here. ¡§This word ¡¥pa?icca (literally ¡¥having depended¡¦, freely ¡¥due to¡¦, ¡¥dependent¡¦),
gerund] establishes a meaning [in a formula of establishment by verb] when it is construed a
same subject.¡¨ ¡¥Past¡¦ means it shows the past time. Let us say that you say ¡§Having con
Your coming is past. It happens before your study takes place. The secondary verb signifies
past. The principal verb may signify any time. Sometimes it is past, sometimes it is the prese
¡§When it is construed as past with the same subject [as that of the principal verb], as in the
¡¥Having depended on the eye and visible objects, eye consciousness arises¡¦.¡¨ Having dep
visible objects, eye consciousness arises - here eye is subject of both ¡¥arises¡¦ and ¡¥havin
upon¡¦. ¡§But if it is construed here with the word ¡¥upp?da¡¦ (arising), [which is a noun], in a
establishment by noun, there is a breach of grammar, because there is no shared subject (o
subject) [as there is in the above quoted sentence], and so it does not establish any meanin

take ¡¥upp?da¡¦ to mean just arising, then ¡¥having depended upon there is arising¡¦ or ¡¥ha
arising¡¦ - so there is the subject ¡¥arising¡¦ and the verb ¡¥having depended upon¡¦, but no p
So it is against the rules of P??i grammar or Sanskrit grammar to say just ¡¥Pa?iccasamupp
depended upon arising¡¦ makes no sense. That is why it says that it does not establish any r
¡§So the Dependent Origination is not simple arising because that is ungrammatical.¡¨

Now there are some words in this paragraph to be discussed. In brackets we have ¡§in a for
establishment by verb.¡¨ Do you understand that? ¡¥In a formula of establishment by verb¡¦ j
noun. Samupp?da is a verbal noun. A verbal noun signifies the action rather than the actor o
to the view of the author samupp?da is that which arises or which causes to arise, but the ot
it to mean just arising, the action of arising. That is called in P??i ¡¥bh?vas?dhana¡¦ (in a for
establishment by verb). I think it is just called a verbal noun or gerund. It is words like going,
studying, writing. Let¡¦s call it a verbal noun. The word ¡¥samupp?da¡¦, the other teachers ta
verbal noun. So it means just arising according to them. But the author takes to be not a ver
noun denoting an agent, denoting something that arises or something that causes to arise. T
difference between the two opinions. So it is ungrammatical. So ¡¥Paticcasamupp?da¡¦ as h
arising makes no sense.

Then in paragraph 13 the others said what if we were to add the words ¡¥come to be¡¦ at the
¡¥pa?icca, samupp?do hoti¡¦. ¡¥Hoti¡¦ means ¡¥comes to be¡¦. Hoti is now the principal verb.
as the principal verb. Upp?da is the common subject. ¡§Now it is all right¡¨ they said. The au
will not do. Why not? Because there is no instance in which it has been added.¡¨ That mean
instance where ¡¥come to be (hoti)¡¦ is added. The author will give the quotation below. The
where it is added. So there is no possibility of adding that word. ¡§For in such passages as
¡¥Pa?iccasamupp?da? vo bhikkhave desess?me. Katamo ca bhikkhave pa?iccasamupp?do
pa?iccasamupp?do (I shall teach you the Dependent Origination, bhikkhus. And what is the
Origination? ..This is called the Dependent Origination, bhikkhus¡¦, the words ¡¥come to be (
added in a single instance.¡¨ So you cannot add the expression ¡¥hoti¡¦ there. ¡§And there is
expression as] ¡¥arising comes to be¡¦: if there were, it would be tantamount to saying that a
had an arising too.¡¨ Arising arise. Arising comes to be. Arising arises. So that is rejected.

Then there are other people. ¡§And those are wrong who imagine that specific conditionality
conditions¡¦ [abstract] essence.¡¨ You saw this word ¡¥idappaccayat?¡¦ in paragraph #6 and
paragraph #7. There the author explains that the word ¡¥idappaccayat?¡¦ means conditions
conditions. But here the other teachers say what if we take ¡¥idappaccayat?¡¦ to mean the a
things, not group of conditions, not just conditions, but their particular mode, their particular
causing other states to arise. That is what the other people would say.

¡§And those are wrong who imagine that specific conditionality (idappaccayat?) is the specif
[abstract] essence - what is called ¡¥abstract essence¡¦ being a [particular] mode in ignoranc
acts as cause in the manifestation of formations, etc. (or in making formations, etc. appear)
term ¡¥Dependent Origination¡¦ is used for that particular mode in formations.¡¨ I want to say
¡§That the term ¡¥Dependent Origination¡¦ is used for that particular mode in formations.¡¨ It
mode and not the formations themselves.

Then the author says that they are wrong. ¡§Why are they wrong? Because it is ignorance, e
are called causes. For in the following passage it is ignorance, etc., themselves, not their alt
(¡¥Alteration¡¦ means particular mode.) so their particular mode, that are called the causes [c
states].¡¨ Then he gives a quotation. In this quotation ignorance, etc., are called ¡¥causes¡¦,
particular mode¡¦. So to say that ¡¥idappaccayat?¡¦ means particular mode also is not correc

From paragraph 15 onwards we have the word meaning of Pa?iccasamupp?da. ¡§If any not
a literal interpretation¡¨ - that means just taking the appearance of the word. The word ¡¥sam
to mean just ¡¥arising¡¦. If you take the appearance of that word to be your interpretation, the
¡§If any notion arises in the guise of a literal interpretation of the term ¡¥Dependent Originati
(Pa?iccasamupp?da)¡¦ to the effect that it is only arising that is stated, it should be got rid of.
still have the opinion that ¡¥Pa?iccasamupp?da¡¦ just means arising, depending upon the ap
¡¥samupp?da¡¦ (because words such as samupp?da must mean actions rather than actors
if you cannot still get rid of that opinion that ¡¥Pa?iccasamupp?da¡¦ means arising, then reac
on.

Four meanings of the word ¡¥Pa?iccasamupp?da¡¦ are given in the coming paragraphs. I thi
explained them to you following this sheet. So I will not repeat them now. In paragraph 16 yo
and second meaning of Pa?iccasamupp?da. Directly according to these two meanings the c
meant as Pa?iccasamupp?da, but we are to understand that the conditioning states are mea
the figurative sense. That means something like sugar has diabetes, salt is high blood press
Here although the direct meaning is the conditioned states, we are to understand that they r
conditioning states.

In paragraph 18 we have the third meaning. According to that the states that are conditions
the fourth meaning is given in paragraph 20. According to that too the conditions are meant,
that are conditioned. So there are four meanings of Pa?iccasamupp?da according to Venera

Then he explained that there are two parts - pa?icca and samupp?da (dependent upon and
the word ¡¥pa?icca¡¦ the belief in eternalism and others are destroyed. By the word ¡¥samup
in annihilation and so on is destroyed. By the word ¡¥pa?icca¡¦ belief in eternalism is destroy

word ¡¥samupp?da¡¦ the belief in annihilation is destroyed. By the whole word ¡¥Pa?iccasam
Path is shown. You may remember that in the first sermon the Buddha said: ¡§Not approach
I have discovered the Middle Path.¡¨ Here also Pa?iccasamupp?da is the Middle Path. The
eternalism on the one hand and annihilationism on the other.

In paragraph 25 we find the preamble. Here the author states that Pa?iccasamupp?da is dif
difficult to talk about or to teach. ¡§Its meaning should be commented on by one who keeps
of the Vibhajjav?dins (That means Therav?da Buddhists.), who does not misrepresent the te
advertise his own standpoint.¡¨ I do not think it is correct. ¡¥Who does not overstep his own t
better, it is not ¡¥advertise his own standpoint¡¦. The P??i word here is avokamantena. That
out of one¡¦s own tradition. ¡§Who does not quarrel with the standpoint of others, who does
Suttas, who is in agreement with the Vinaya, who looks to the Principal Authorities (Mah?pa
very famous in the teachings of the Buddha. You find these Mah?padesa in two places. One
Nik?ya. That is the Mah?parinibb?na Sutta. In the English translation the page number is 13
the Buddha, volume 2. There is another set of Mah?padesa in Vinaya. If you are interested
reference, Book of Discipline, part 4, page 347. These two sets are different. They are not th
They are different sets of Principal Authorities. ¡§Who illustrates the law, who takes up the m
repeatedly reverting to that same meaning, describing it in various different ways¡¨ and so o
quotes the ancient saying that there are four things which are difficult to see and that are als
teach. They are the Four Noble Truths, about a being, about rebirth, and about Pa?iccasam
of conditions).

¡§Therefore, considering that to comment on the Dependent Origination is impossible excep
expert in the texts.¡¨ There is something missing here. The P??i word used here is ?gamadh
¡¥?gama¡¦ means learning and ¡¥adhigama¡¦ means enlightenment. So that is those who ha
those who are enlightened. Only those can understand and explain Pa?iccasamupp?da fully
words here. ¡§Therefore, considering that to comment on the Dependent Origination is impo
those who are expert in the Texts and who have gained enlightenment.¡¨

Then the author said he could not find a footing for support in the ocean of Pa?iccasamupp?
gave up actually. He almost gave up commenting on Pa?iccasamupp?da. Then he said:

¡§However, many modes of teaching
Grace the Dispensation here,
And still the former Teachers¡¦ way
I handed down unbrokenly,
Therefore on both of these relying
For my support, I now begin
Its meaning to elucidate.¡¨

So I will comment upon this relying on the former Teachers¡¦ way handed down unbrokenly
the teachings of the Buddha. Then we come to the brief exposition.

There are different ways of teaching. Buddha taught Pa?iccasamupp?da in different ways. I
Sometimes from the beginning. The Buddha would teach ignorance and then go to formatio
on. Sometimes he taught from the middle up to the end. He would start in the middle and go
Sometimes he taught from the end back to the beginning. And sometimes he taught from th
beginning. Let¡¦s say ¡¥up¡¦ to the beginning. Buddha taught in different ways this Pa?iccasa
quotations are given how taught them.

In paragraph 29 ¡§So, bhikkhus, with ignorance as condition there are formations; .. with birt
aging and death.¡¨ That is the normal sequence of teaching. Then the second one ¡§When h
welcomes remains committed to, that feeling, then delight arises in him.¡¨ He picks up feelin
in feelings is clinging. With his clinging as condition there is becoming; with becoming as co
birth.¡¨ He picks up feeling and then goes to the end. In the third ¡§ ¡¥With birth as condition
death¡¦¡¨, so it is said. But is there aging and death with birth as condition, or not, or how is i
There is aging and death with birth, as condition, so we think, venerable sir. ¡¥With becomin
birth¡¦, and so on.¡¨ So he picks up something at the end and then goes back to the beginnir
to pick up something up in the middle and going to the end.

¡§Craving: what is its source? Feeling. What is its source? Contact. What is its source? The
and so on. In different ways the Buddha taught this Doctrine of Pa?iccasamupp?da. If you re
will find these.

¡§Why does he teach it thus? Because the Dependent Origination is wholly beneficial (I thin
something like gracious, not beneficial.) because it is gracious in all aspects and because B
acquired elegance in instruction or teaching.¡¨ These are the two reasons that he taught in t
the Dependent Origination is entirely gracious (not beneficial); starting from any one of the f
points, it leads only to the penetration of the proper way.¡¨ That means it really leads to the p
penetration of the way. ¡§And the Blessed One has acquired elegance in instructing: it is be
so through possession of the four kinds of perfect confidence and the four discriminations a
the fourfold profundity that he teaches the Law by various methods.¡¨ He taught by various m
has elegance in instructing. He was very expert in teaching.

¡§But it should be recognized, in particular, that when he sees that people susceptible of tea
confused about the analysis of the causes of the process [of becoming], he employs his tea
starting from the beginning¡¨ and so on. This is the detailed explanation of the elegance in te

Paragraph 36 ¡§But why is ignorance stated as the beginning here?¡¨ In the formula for Dep
ignorance is the first one, right? So why is ignorance stated at the beginning here? ¡§How th
causeless root-cause of the world like the Primordial Essence of those who assert the existe
Primordial Essence?¡¨ I think the words ¡¥how then¡¦ are not good here. I would say ¡§Is ign
causeless root-cause of the world like the Primordial Essence¡¨ and so on. It is stated at the
the formula. So that means that ignorance is the first cause? The Primordial Essence comes
philosophy of Hinduism.

¡§It is not causeless. For a cause of ignorance is stated thus ¡¥With the arising of cankers th
arising of ignorance¡¦.¡¨ So ignorance also has its cause. It is put at the beginning of Pa?icca
because it is the outstanding cause of kamma. We will find that in paragraph 38. Although ig
the beginning of the formula, it is not a first cause or is not without a cause.

¡§But why does the Blessed One give the exposition of the round with those two things as st
When Buddha taught Pa?iccasamupp?da, he took two things, two dhammas, as the outstan
is ignorance (avijj?) and the other is craving (ta?h?). ¡§Because they are the outstanding ca
that leads to happy and unhappy destinies.¡¨ Because of ignorance you do something wrong
good, and that leads to j?ti or rebirth. Also because of craving we want to be reborn in a bett
thinking that a good destiny is a good place to go to although according to the Buddha it is fu
suffering. Because of the craving for a better life we do something good. As a result of that w
reborn there. After rebirth there, there is aging, death, suffering and so on. These are the tw
outstanding causes of kamma. So the Buddha gave the exposition of the round of rebirth wi
starting points. There are times when he begins with ignorance and sometimes he begins w
the Buddha taught ignorance as the condition for the round of rebirth and sometimes craving

Then in paragraph 43 we have as to meaning. Here comes some strange explanations of th
meaning of the words ¡¥ignorance¡¦ and so on. Bodily misconduct, etc., for example¡¨ - I thin
is not good here. We may say ¡¥namely¡¦. ¡§Bodily misconduct, etc., are called those that ¡¥
found¡¦ (or that ought not be acquired), in the sense of being unfit to be carried out (unfit to p
the meaning is that it should not be permitted (It should not be acquired, it should not be got
see the P??i word ¡¥avindiya¡¦. ¡¥Vindiya¡¦ means to obtain, to acquire, to get. So ¡¥avindiya
get, not to obtain, not to acquire. He is explaining the word ¡¥avijj?¡¦ in P??i. ¡§It finds (vinda
ought not to be found, thus it is ignorance. Conversely, good bodily conduct, etc..are called
to be found (that ought to be acquired). It does not find what ought to be found, thus it is ign
think this is just a play on words. Avijj? is here derived from the root ¡¥vid¡¦. ¡§Conversely, g
conduct, etc., are called those that ¡¥ought to be found¡¦. It does not find what ought to be fo
is ignorance. Also it prevents knowing the meaning of collection in the aggregates, the mean
in the bases, the meaning of voidness in the elements, the meaning of predominance in the

meaning of reality in the truths, thus it is ignorance.¡¨ Here the root is made to mean ¡¥to kn

¡§Also it prevents knowing the meaning of suffering, etc., described in four ways as ¡¥oppre
thus it is ignorance. Through all the kinds of generations, destinies, becoming, stations of co
and abodes of beings in the endless round of rebirths it drives beings on (Anta VIrahite sa?s
This is something like an acronym. The word ¡¥avijj?¡¦ is an acronym. We take the capitol le
AVIJA. Sometimes the Commentators are very fond of explaining words in this way. ¡§Thus
Amongst women, men, etc., which are in the ultimate sense non-existent, it hurries on (para
AVIJjam?nesu itthi-puris?disu JAvati), and amongst the aggregates, etc., which are existent
on (VIjjam?nesu pi khandh?disu nA JAvati). I think ¡¥VI¡¦ should be in capitol letters, and in
letter ¡¥A¡¦ should be a capitol letter, and in ¡¥javati¡¦ ¡¥JA¡¦ should be capitol letters. So here
to transpose. We have VI-A-JA. You put the ¡¥A¡¦ at the beginning and there is AVIJA. ¡§Th
Furthermore, it is ignorance because it conceals the physical bases and objects of eye cons
and the Dependent Origination and dependently originated states.¡¨ The last one is just the
word ¡¥avijj?¡¦, and I think that is quite enough. The others are just showing off.

Now we come to the word ¡¥paccaya¡¦. ¡§That due to which fruit comes is a condition.¡¨ Pac
that. ¡§ ¡¥Due to (pa?icca)¡¦ = ¡¥not without that¡¦; the meaning is, not dispensing with it. ¡¥C
means both ¡¥arises¡¦ and ¡¥occurs¡¦. What do you understand by ¡¥arises¡¦ and ¡¥occurs¡¦?
arises and ¡¥occurs¡¦ means continues to exist, not occurring actually. ¡¥Comes¡¦ means bo
¡¥continues to exist for some time¡¦. That is what is meant by the P??i word ¡¥pavatta¡¦. The
the same thing here in English. It is ¡¥arises¡¦ and ¡¥continues to exist¡¦.

¡§Furthermore the meaning of ¡¥condition¡¦ is the meaning of ¡¥help¡¦.¡¨ ¡¥Paccaya¡¦ means
ignorance and that is a condition, thus it is ¡¥ignorance as condition¡¦.¡¨ This is giving the me
P??i word ¡¥avijj?paccay?¡¦. ¡¥Avijj?paccay?¡¦ means ¡¥with ignorance as condition¡¦, when
ignorance as condition¡¦. This is the explanation of the P??i word ¡¥avijj?¡¦.

Next is the explanation of the word ¡¥sa~kh?ra¡¦. Here sa~kh?ra is said to have divisions. Th
are formations of merit, formations of demerit and formations of the imperturbable. This is on
Another set of three is the bodily formations, the verbal formations and the mental formation
there are six. These six are formations with ignorance as condition. When we see the word
have to understand whether this is sa~kh?ra with ignorance as condition or sa~kh?ra given
formations with the word ¡¥sa~kh?ra¡¦.¡¨ All these are simply mundane profitable and unprof
¡§These, all six, just mean cetan? (volition), mundane kusala or akusala.

¡§But these four, namely, (1) the formation consisting of the formed (sa~khata-sa~kh?ra), (2
consisting of the kamma-formed (abhisa~khata-sa~kh?ra), (3) the formation consisting in the

kamma-forming (¡¥Kamma-forming¡¦ means formed by kamma or caused by kamma - abhis
the formation consisting in momentum (That means ¡¥consisting in engaging¡¦ or ¡¥consistin
payog?bhisa~kh?ra) are the kinds of formations that have come in the Texts with the word ¡
There are different kinds of formations that are explained here. Basically there are two kinds
The first kind of sa~kh?ra you find with the word ¡¥avijj?paccay? sa~kh?r?¡¦. Then the other
is whenever else you find the word ¡¥sa~kh?ra¡¦. So you have to find out which sa~kh?ra is
many kinds of sa~kh?ra - sa~khata-sa~kh?ra, abhisa~khata-sa~kh?ra, abhisa~khara?a-sa~

¡§(1) All states with conditions, given in such passages as ¡¥Formations are impermanent¡¦,
consisting of the formed.¡¨ That means all conditioned things, mental as well as physical. ¡§(
Commentaries material and immaterial states of the three planes generated by kamma are
consisting of the kamma-formed¡¦.¡¨ That means those conditioned by kamma, those caused
material and immaterial states. They are called ¡¥sa~kh?ras¡¦ in the Commentaries. ¡§These
in the passage ¡¥Formations are impermanent¡¦.¡¨ When the Buddha said that formations ar
are also meant. ¡§But there is no instance in the Texts where they are found separately.¡¨ In
the Suttas they are not mentioned separately. That means there is no instance in the Texts
them only. When you find the word ¡¥sa?kh?ra¡¦ it will means these things as well as other c
¡§(3) Profitable and unprofitable volition of the three planes is called ¡¥the formation consisti
of kamma-forming¡¦.¡¨ That just means kamma, profitable and unprofitable cetan?. ¡§It is fou
such passages as ¡¥Bhikkhus, this man in his ignorance forms the ¡¥formation of merit¡¦. (4)
and mental energy that is called ¡¥the formation consisting in momentum. This is given in th
passages as ¡¥The wheel having gone as far as the impetus carried it, stood as though it we
Bodily and mental energy - the P??i word ¡¥viriya¡¦ always means mental energy. Viriya is o
cetasikas. But here bodily and mental energy, bodily viriya and mental viriya - what is bodily
Sub-Commentary explains that ¡¥bodily viriya (bodily energy, bodily effort)¡¦ means the men
causes bodily effort. Sometimes mental effort may not cause bodily effort. So here ¡¥bodily
means mental effort (viriya) which causes bodily actions to arise. So there are different kinds
to be understood.

¡§And not only these, but many other kinds of formations are given in the Texts¡¨ and so on.
the word ¡¥sa~kh?ra¡¦, you have to be very careful. In this quotation the words used are ¡¥v
¡¥bodily formation¡¦, and ¡¥mental formation¡¦. They are not the same as the formations give
They are different. These 6 formations given in paragraph 44 and paragraph 45, the details
find in paragraph 61. So the verbal, bodily and mental formations in paragraph 47 are differe
paragraphs 44 and 45. Here in paragraph 47 ¡¥verbal formation¡¦ means vitakka and vic?ra.
means breathing. ¡¥Mental formation¡¦ means cetasikas.

Then the other words are explained beginning with paragraph 48 - vi????a, n?ma, r|pa and

end of paragraph 48 ¡§Great misery is despair.¡¨ Please note that there are two words in P?
up?y?sa. ¡¥?y?sa¡¦ means misery and ¡¥up?y?sa¡¦ means great misery. ¡¥Upa¡¦ intensifies
misery is despair. Bhuso ?y?so up?y?sa. ¡¥Bhuso¡¦ means great or it intensifies. I tell you th
will find a reference to this later on. ¡§ ¡¥There is¡¦ means ¡¥is generated¡¦.¡¨ Beginning with
the characteristic and others are given for each factor. ¡§Ignorance has the characteristic of
function is to confuse. It is manifested as concealing. Its proximate cause is cankers¡¨ and s
¡§Formations have the characteristic of forming. Their function is to accumulate. They are m
volition. Their proximate cause is ignorance.¡¨ Then there is a footnote. I think the #7 should
¡§Consciousness has the characteristic of cognizing. Its function is to go before. It manifests
rebirth-linking. Its proximate cause is formations; or its proximate cause is the physical-basis
Mentality has the characteristic of bending (towards the object). Its function is to associate. I
manifested as inseparability of its components, (¡¥N?ma¡¦ here means vedan?, sa??? and s
arise together.). Its proximate cause is consciousness. Materiality has the characteristic of b
Its function is to be dispersed. It is manifested as [morally] indeterminate.¡¨ The #7 should be

Now let us look at the footnote. The footnote is the translation of the ??k?. He left out one im
sentence. I don¡¦t know why. He left out the last sentence. Here it is said that it is manifested
indeterminate. Its manifestation is mostly indeterminate (aby?kata). In Abhidhamma there ar
kusala, akusala, and aby?kata. ¡¥Kusala¡¦ means kusala consciousness and cetasikas. ¡¥Ak
consciousness and cetasikas. ¡¥Aby?kata¡¦ means those that remain including r|pa and Nibb
(materiality) is one of the indeterminates. Here its manifestation is ¡¥indeterminateness¡¦. It i
¡¥indeterminate¡¦ to distinguish it from mentality, which is profitable, etc., at different times.¡¨
sometimes kusala (profitable) and sometimes akusala (unprofitable). R|pa is always aby?ka
kusala or akusala. It is always aby?kata.

Then the ??k? explains in a different way the word ¡¥indeterminate¡¦ here. ¡¥Indeterminate¡¦
means ¡¥not cognizing¡¦, ¡¥not taking an object¡¦. ¡¥Not taking an object¡¦ is one kind of inde
of r|pa. I tell you this because when you practice meditation and you concentrate on some r|
you may see that, oh, it does not cognize. R|pa does not cognize. It has no faculty of cogniti
that way, that means you are seeing r|pa with reference to its manifestation. It is very comm
see r|pa as that and not just as indeterminate. That is because if you have no knowledge of
will not know that r|pa is aby?kata. If you practice meditation, you will see that r|pa or matter
ability to cognize. If you see or understand in that way, then you are said to be seeing the m
r|pa or you are seeing r|pa with reference to its manifestation. This is an important sentence

Paragraph 52 second line ¡§It is twofold as ¡¥no theory¡¦ and ¡¥wrong theory¡¦. ¡¥No theory¡
understanding and ¡¥wrong theory¡¦ means wrong understanding. Ignorance or avijj? has tw
understanding or wrongly understanding. If you do not understand at all, that is ignorance. If

something in the wrong way, that is also avijj? (ignorance). If you understand the impermane
that is also avijj? (ignorance). You have understanding but your understanding is clouded wi
also avijj?. There are two kinds of avijj? - not knowing, not understanding and understanding

Let us look at paragraph 57, defining of the factors. How many factors are there in Depende
What about sorrow and so on? They are also mentioned in the formula. They are not taken a
because they are not definite. That means they may or they may not arise in a certain realm
the realm of the Brahm?s there can be no sorrow, lamentation and so on. So it is not an inev
rebirth. When there is rebirth as Brahm?s, there can be no sorrow and so on. That¡¦s why th
separate factors.

Now we come to the detailed exposition paragraph 58. So we have avijj? (ignorance) accord
according to Abhidhamma. According to the Sutta method it is unknowing about the four inst
suffering, that is ignorance of the Four Noble Truths. According to Abhidhamma it is unknow
Noble Truths plus the past aggregates, the future aggregates, both past and future aggregat
Pa?iccasamupp?da.

Paragraph 60 ¡§Formations are the six mentioned in brief above thus ¡¥the three, namely, fo
etc., and the three, namely, the bodily formation, etc.¡¦; but in detail here the [first] three form
29 volitions (You know the 29.) that is to say, the formation of merit consisting of 13 volitions
the 8 sense-sphere profitable volitions that occur in giving, in virtue, etc., and the 5 fine mate
profitable volitions that occur in development [of meditation]: then the formation of demerit co
the 12 unprofitable volitions that occur in killing living things, etc.; then the formation of the
imperturbable consisting in the profitable volitions associated with the immaterial sphere, wh
development [of those meditations].¡¨ You know the kusala and akusala cittas. There are 12
k?m?vacara kusala, 5 r|p?vacara kusala and 4 ar|p?vacara kusala.

¡§As regards the other three, the bodily formation is bodily volition, the verbal formation is ve
volition, and the mental formation is mental volition.¡¨ So this is different. ¡§This triad is ment
order to show that at the moment of the kamma the formations of merit, etc., occur in these
kamma (body, speech and mind). For the 8 sense-sphere profitable and 12 unprofitable voli
the bodily formation when they occur in the body door and produce bodily intimation (kusala
same volitions are called verbal formation when they occur in the speech door (through spee
verbal intimation. But volition connected with direct-knowledge is not included here.¡¨ ¡¥Direc
means abhi???. Abhi??? volition does not give any results, any results in the future. And als
connected with agitation (That means volition connected with uddhacca.), the last of the aku
not give any results. You may remember the fifth chapter of Abhidhamma. There it is said th
volition does not give results at the moment of rebirth. Direct-knowledge also cannot give res

Paragraph 62 ¡§How can it be known that these formations have ignorance as their conditio
think is not so convincing. ¡§By the fact that they exist when ignorance exists.¡¨ Why are the
ignorance? Because when there is ignorance, there are these formations. And then the expl
not difficult to understand.

Ultimately we come to the 24 conditions, the 24 conditions taught in the last book of Abhidha
important because we have to understand the Dependent Origination with reference to these
then will we understand Dependent Origination fully. Otherwise our understanding of Depen
not be complete. So we have to understand Dependent Origination against the background
This book explains these conditions together with the Dependent Origination. So it is very h
Manual of Abhidhamma they are separated. Dependent Origination is not explained with ref
Maybe it is too complicated for beginners. In order to really understand Pa?iccasamupp?da
understand Pa??h?na also. These are the 24 conditions.

The first one is root condition (hetu). There are 6 roots - lobha, dosa, moha, and then alobha
These 6 roots are called ¡¥root-cause condition¡¦. The word ¡¥hetu¡¦ is explained in paragrap
¡¥cause (hetu)¡¦ is a term for a part of a syllogism.¡¨ In an Indian syllogism there are 5 parts.
called ¡¥hetu¡¦. It is like an example I gave earlier. There is fire on the mountain. I am makin
inference. We do not really see the fire on the mountain. I see smoke on the mountain. So I
fire on the mountain. That is called ¡¥proposition¡¦. Then I give you the reason because there
mountain. ¡¥Because there is smoke on the mountain¡¦ is called ¡¥hetu¡¦ in Indian syllogism.
meanings of the word ¡¥hetu¡¦.

The first meaning is a part of syllogism. The second meaning is a reason. The third meaning
¡¥root¡¦ is taken to mean hetu. ¡¥Hetu condition¡¦ means root condition or root-cause conditi
really means the 6 mental factors called ¡¥roots (lobha, dosa, moha, alobha, adosa, amoha)

Then the word ¡¥paccaya¡¦ is explained. In the explanation I want you to pay attention to the
state¡¦s presence or arising¡¦. When a state is indispensable to another state¡¦s presence or
former is a condition for the latter. But as to characteristic, a condition has the characteristic
assisting; for any given state that assists the presence or arising.¡¨ The P??i word ¡¥paccaya
producing cause as well as supporting, so here presence or arising. ¡¥Presence¡¦ means su
¡¥arising¡¦ means producing. So the word ¡¥paccaya¡¦ can mean producing cause or just sup
Sometimes both can be taken for one condition. Sometimes only one can be taken. Paragra
of some teachers. We can skip that.

Then there is object condition. Under object condition everything is included. Everything is th

condition - cittas, cetasikas, r|pa, Nibb?na, all. There is nothing which is not an object of the
everything comes under the heading of object condition.

The next one is predominance condition. In paragraph 72 about a third of the way down ¡§It
called zeal, [purity of] consciousness, energy and inquiry.¡¨ Abhidhamma students will reme
four kinds of predominance) (adhipati). The first is zeal (chanda). The second is consciousn
third is energy (viriya). The fourth is inquiry. ¡¥Inquiry¡¦ really means pa???. I don¡¦t know wh
the words ¡¥purity of¡¦ in the brackets. Do you agree with that? What about akusala cittas? T
predominance of akusala citta. So they must go. It is just consciousness, either pure or impu
lobha can predominate, right?

Paragraph 73 there are two conditions - proximity condition and contiguity condition. They a
the words or letters are different. The meaning is the same. This condition is like giving oppo
others. In order for you to sit on this chair I vacate this chair. It is something like that. In orde
next consciousness to arise the previous consciousness must disappear because there can
consciousness at a time. Suppose there are a series of consciousness - 1, 2, 3, 4, 5. At one
only one consciousness. When #1 disappears #2 arises. When #2 disappears #3 arises. Wh
arises and so on. #1 is said to be the condition for the arising of #2. Actually the disappearan
said to be the condition for the arising of #3 and so on. So this is not producing condition bu
supporting condition. In order for that citta to arise the previous citta must disappear. It is like
your seat to another person. It is something like that.

Some teachers try to find a difference between these two. Paragraph 75 ¡§The opinion of [c
that proximity condition refers to proximity of aim (fruit) and contiguity condition refers to pro
time.¡¨ ¡¥Aim (fruit)¡¦ is the wrong translation. The P??i word is ¡¥attha¡¦ ¡¥Attha¡¦ can mean
a thing. Here it means a phenomenon or in P??i a dhamma. So proximity of phenomenon a
that means no interval of dhammas and no interval of time. When there is no interval of dha
proximity and when there is no interval of time it is contiguity. That is what the other teacher

¡§But that is contradicted by such statements as ¡¥The profitable [consciousness] belonging
consisting of neither perception nor non-perception in one who emerges from cessation is a
contiguity condition, for Fruition attainment [consciousness]¡¦.¡¨ So it contradicts this passag
Pa??h?na. You may not understand it.

An An?g?mi and an Arahant can enter into what is called ¡¥the attainment of cessation¡¦. In
there is the temporary suspension of mental activity. When a person is in that sam?patti (att
is no activity of mind. There is only the physical body. As soon as the person emerges from
Fruition consciousness arises. If the person is a Non-Returner, Non-Returner Fruition cons

If the person is an Arahant, Arahant Fruit consciousness arises. It is said in this passage tha
ar|p?vacara citta that arises before that attainment is a condition for that Fruition consciousn
contiguity. But there may be 7 days interval between these 2 because a person can be in tha
7 days intervening in time. So it contradicts with that opinion. According to them there shoul
intervening of time between the conditioning and the conditioned. In this case there can be a

not understand unless you have the P??i words in mind. ¡§Just as great misery is despair.¡¨
make a note of ?y?sa and up?y?sa, right? Great ?y?sa is up?y?sa. So here also great supp
or decisive support. The P??i word for support is nissaya. The P??i word for decisive suppo
The word ¡¥upa¡¦ is there like in the word ¡¥up?y?sa¡¦. ?y?sa is intensified by the prefix ¡¥up
¡¥nissaya¡¦ is also intensified by the prefix ¡¥upa¡¦. That is what he is saying here. But if you
the P??i words in mind, you may not really understand what he is saying here. ¡§This is a te
reason (a very strong reason). Consequently a state that assists by being a cogent reason s
as a decisive condition.¡¨

Then the varieties of decisive support are given - objective decisive support, proximate deci
natural decisive support. We have run out of time. Please bring these sheets next week or w
Pa?iccasamupp?da keep them handy so you can look at them.

S?dhu! S?dhu! S?dhu!

(Tape 37 / Ps: 101 ¡V 185)

Last week we finished the 24 conditions. So today we begin with paragraph 101, how ignora
for formations. These paragraphs describe in what way ignorance is related to different form
application of the 24 conditions to the Doctrine of Dependent Origination.

I think you remember that there are different kinds of formations - formations of merit, forma
and formations of the imperturbable. At least these three you should remember. If you do no
to paragraph 60. ¡¥Formations of merit¡¦ means cetan? (volition) concomitant with kusala. ¡¥
demerit¡¦ means cetan? concomitant with akusala. ¡¥Formations of the imperturbable¡¦ mea
with the four formless jh?nas (ar|p?vacara).

So ignorance is a condition for formations of merit in how many ways? Formations of demer

Formations of the imperturbable in how many ways? ¡§Herein, for those of merit ignorance i
ways: it is a condition in two ways, namely, as object condition and as decisive support cond
support condition).¡¨ It is #9, not #8. ¡§For ignorance is a condition, as object condition, for f
of merit of the sense-sphere at the time of comprehending [by means of insight] ignorance a
destruction and fall; and it is likewise for those of the fine material sphere (ar|p?vacara) at th
knowing a confused mind by means of direct-knowledge consciousness (abhi???) [through p
minds and so on]. But it is a condition, as decisive support condition, in two cases, that is to
sense-sphere formations] in one who, for the purpose of surmounting ignorance, fulfills the v
of sense-sphere merit making consisting in giving, etc., and [for the fine material sphere form
who arouses the fine material jh?nas [for the same purpose]. Likewise in one who effects the
aspiring to the delight if sense-sphere becoming and fine material becoming because he is d
ignorance.¡¨

Ignorance is unwholesome (akusala). So how is it related to kusala, formations of merit? The
the same time. Ignorance is a condition, as object condition, for the formations of merit. That
kusala cittas arise, they take ignorance as an object. It is also a decisive support condition o
cittas. The decisive support condition is very wide. If you cannot think of any other condition
that they are related by decisive support condition. You will almost always be right. Ignorance
formations of merit by two conditions, as an object and as decisive support.

The next paragraph concerns the condition for demerit (akusala), how ignorance is related to
Ignorance itself is akusala. So there we have what conditions? Let¡¦s see. ¡§As object condit
of the arising of greed, etc., contingent upon ignorance¡¨ - ignorance can be the object of ak
consciousness. ¡§As object predominance and object decisive support respectively at the tim
importance [to ignorance and enjoying it]¡¨ - that means taking ignorance firmly and enjoying
decisive support in one who, being confused by ignorance and unaware of danger, kills livin
And then what? ¡§As proximity, contiguity, proximity decisive support, repetition, absence an
for the second impulsion and those that follow.¡¨ You know that there are seven javana mom
process. Ignorance concomitant with the first javana moment is a condition for the second ja
concomitant with the second javana is a condition for the third and so on as proximity, contig
decisive support (That is a variety of decisive support.), repetition, absence and disappeara
is related to another javana by proximity, contiguity and so on, and also repetition because t
the same genus, akusala here. ¡§As root cause, conascence, mutuality, support, association
non-disappearance, in one doing anything unprofitable¡¨ - that means that they arise at the s
Ignorance is related to the cetan? arising together with it by way of conascence, arising toge
support and so on. Ignorance is a condition for formations of demerit in many ways.

In this chart they are given. The first column is the conditioning. The second column is the c

third column is the conditions. If you look at it, you will understand easily.

Ignorance is a condition for formations of merit by #2 (?ramma?a) and #9 (upanissaya). You
to the other sheet to find out what the numbers refer to. Then ignorance is a condition for for
demerit by #2 (?ramma?a), ?ramma?adhipati (That is a variety of #3, adhipati.), object decis
(?ramma?a|panissaya which is a variety #9 upanissaya), then #9 (upanissaya), #4 (anantara
anantara|panissaya (a variety of upanissaya), #12 (asevana), #22 (natthi), #23 (vigata). Igno
condition for formations of the imperturbable by #9 (upanissaya) only. Ignorance is a conditi
of demerit by #1 (hetu) also. The paragraphs in the Visuddhi Magga are given in brackets or
you can easily go back to The Path of Purification. You read the book. Then you read the ch
forth. So for the imperturbable there is only the decisive support condition. The conditioning
ignorance and the conditioned states are the formless jh?na cittas or formless jh?na cetan?
only be through decisive support that ignorance conditions the formless jh?nas because the
together. There can be no root cause, conascence, mutuality and others. This is how we ap
to Dependent Origination.

Only when we apply the 24 conditions to Dependent Origination do we really understand it.
understanding is not complete. Here we know how the conditioning factors and the condition
related by way of any of these 24 conditions. When we see the conditions, we know whethe
the conditioned factors arise at the same time or at different times. If they arise at the same
can be conascence condition, mutuality condition and so on. In the links of Dependent Origi
relationship between them is not always one of cause and effect, producer and produced. S
relationship of helping one another, supporting one another at the same time. Sometimes th
conditioned factors arise together and sometimes they do not.

Next paragraph 105 there is no single fruit from a single cause. In the formula it is said depe
there are formations; depending on formations there is consciousness. Only ignorance is me
beginning. So the question is: Is ignorance the only condition for the formations or are there
conditions? ¡§If it is only one, there follows the assertion of a single cause.¡¨ This is rejected
Buddhism. Buddhism accepts multiple results from multiple causes. If one asserts that ignor
condition for formations, then one is asserting that there is only one cause, a single cause. T
accepted. ¡§If there are others, the description of it as a single cause..is incorrect.¡¨ If there a
causes, why did the Buddha just say ¡¥avijj?¡¦? The answer it that it is not incorrect. ¡§Why n
reason.¡¨

¡§Here there is no single or multiple fruit of any kind from a single cause, nor a single fruit fr
causes, but only multiple fruit from multiple causes.¡¨ This is the Buddhist standpoint. From n
there are many fruits.

¡§From multiple causes (I think we can leave out ¡¥so¡¦.), in other words, from temperature, moisture, is seen to arise a multiple fruit, in other words, the shoot which has visible form, oc so on.¡¨ This explains the previous sentence. So from multiple causes arise multiple results.

¡§But one representative cause and fruit given in this way ¡¥With ignorance as conditioning formations; with formations as condition consciousness¡¦ have a meaning and a use.¡¨ He al ¡¥attha¡¦ as meaning. I think we should say here that they have a kind of benefit and a purpo there are many causes, the Buddha only mentioned one cause. There is some purpose, son mentioning just one. ¡§For the Blessed One employs one representative cause and fruit whe the sake of elegance in instruction and to suit the idiosyncrasies of those susceptible of bein These are the two reasons we always have recourse to when we cannot give any other reas depending on avijj? there are sa~kh?ras and not depending on avijj? and others there are sa answer is that is because of the elegance of instruction, because the Buddha was Lord of th many ways of teaching. And also it is to suit the likes and dislikes of the listeners. These are reasons. Here the susceptibility of beings to be taught is pointed to. Listeners are familiar wi terms and they have different likes and dislikes. In order to suit them the Buddha sometimes cause or two causes and so on.

What is important is the next sentence. ¡§And he does so in some instances because it is a Sometimes he gave only one cause although there are many causes because it is a basic fa ¡§And in some instances because it is the most obvious (cause), and in some instances bec to all. (It is peculiar to that only.)¡¨

Then the next paragraph explains that in detail, pointing out examples in the Texts, in the Su passage ¡¥with contact as condition feeling¡¦ he mentions a single cause and fruit because t factors. For contact is the basic cause of feeling since the kinds of feeling are defined accord kinds of contact [as ¡¥eye-contact-born feeling¡¦ and so on] and feeling is contact¡¦s basic fru contact is defined according to the kinds of feeling [that it produces].¡¨ That is one point.

¡§He mentions a single cause in the passage ¡¥Disease due to phlegm¡¦ because that is the There are other causes too like kamma. ¡§For here what is obvious is the phlegm, not the ka [mentioned later in the same Sutta].¡¨

¡§He mentioned a single cause in the passage ¡¥Bhikkhus, any states whatever that are unp rooted in unwise attention because it is not common to all.¡¨ Here unwise attention is given a the root of what is unprofitable (akusala). Unwise attention is given here because it is not co is peculiar to akusala only. So the next sentence does not give that meaning. ¡§For unwise a

unprofitable things is not common to all [states] in the way that, say, physical basis and obje
to all.¡¨ Actually what it means is that unwise attention is an uncommon cause for unprofitab
peculiar cause for unprofitable states. When unprofitable states arise, they arise due to unw
They also arise depending upon the objects and depending upon the senses. Objects and th
conditions for akusala to arise. However they are not peculiar to akusala only. You see some
eye consciousness. That is not akusala. Even though you see something, later on at the jav
have kusala. So the objects and the senses are not peculiar causes for the eye consciousne
to arise. They are common, but unwise attention is the peculiar cause for akusala to arise. S
unwise attention, we will have akusala javanas. If we have wise attention, we will have kusa
something and sometimes we have kusala or akusala. That depends upon whether we have
attention. So here ¡§For unwise attention is the uncommon cause for unprofitable states.¡¨ W
that, not ¡¥unwise attention to unprofitable things¡¦. Buddha said here that all unprofitable ar
unwise attention. They are caused by unwise attention although they need other conditions
and object. Physical basis and object are common causes for both kusala and akusala. Unw
cause for akusala only. ¡§Consequently although other causes of formations such as physic
conascent states, etc., are actually existent, still ignorance may be understood as the repres
of formations [firstly] because it is the basic factor.¡¨ This is the application to the present top
ignorance is mentioned alone because ¡§it is the basic factor as the cause of other causes o
as craving, etc., as it is said ¡¥Craving increases in one who dwells seeing enjoyment¡¦ and
arising of ignorance there is the arising of cankers¡¦, and again because it is the most obviou
knowing, bhikkhus, in ignorance, he forms the formation of merit¡¦, and lastly because it is n
all. So the use of one representative cause and fruit should in each instance be understood
explanation of it.¡¨ Ignorance (avijj?) is mentioned alone because it is the representative cau
formations and because it is the most obvious, and because it is uncommon.

You see in the footnote 18 this explanation of it. The P??i word is ¡¥parih?ra¡¦. The translatio
given is explanation. Actually ¡¥parih?ra¡¦ means literally doing away with the question or av
question. It is not running away from it, but doing away with it. When you give answer, you a
the question. Simply it may mean a reply or an answer, not explanation actually. In a debate
something, you have to avoid it or you have to get away from it by giving answer or reply. So
answer or reply.

¡§Here it may be asked: We admit that (what was said above) - But ignorance is reprehensib
undesirable fruit. How then can it rightly be a condition for the formations of merit and of the
imperturbable? Sugar cane does not grow from [bitter] nimba seeds. Why should it not be rig
what ¡¥nimba¡¦ is? It is not an English word. It is a kind of tree. I haven¡¦t seen that tree in th
It grows in tropical countries. It is small with long leaves. Their taste, the leaves as well as th
bitter. Also the branches or wood is bitter. In the East monks use the branches of that tree a

or as a tooth stick. Have you seen the tooth sticks that monks use? Mostly those are made o
it is bitter and a little hard, it may have some medicinal properties. People use it to protect th
from decaying. In Hindi it is called ¡¥neem¡¦. The P??i word is ¡¥nimba¡¦ and the Sanskrit wo
but in Hindi it is ¡¥neem¡¦ which comes from nimba. There is some kind of soap made from t
tree. Whenever something bitter is to be pointed out, the Commentators use nimba. So suga
from nimba seeds.

The answer is that the conditioning and conditioned or cause and result are sometimes oppo
or they may be unopposed, or they may be like or unlike.

¡§Both as opposed and unopposed
A state¡¦s conditions may be found,
And both as like and unlike too:
That does not make it their results.¡¨

Actually it should be ¡§That does not make it their results only.¡¨ That means those that are o
not results only. In order to understand you must understand the P??i word used for results
word is ¡¥vip?ka¡¦. ¡¥Vip?ka (result)¡¦ means the product of kamma in the form of cittas and
r|pas, just cittas and cetasikas. You know the vip?ka cittas (resultant consciousness). There
resultant consciousness in the 89 or 121 types of consciousness. They alone are called ¡¥vi
the verse in paragraph 109 ¡§That does not make it their results only¡¨ or ¡§They are not res
means they are not vip?ka only. Some are vip?ka and some are not vip?ka, but they are con

¡§It is established in the world that when states have a condition, it may be opposed or unop
to presence, individual essence, function, and so on. For a preceding consciousness is a co
to presence, for the succeeding consciousness.¡¨ #1 consciousness is a condition for #2 con
opposed to #2 as to presence. That means when #2 arises, #1 is no longer there. So one is
present. So they are opposed as to presence.

¡§And the preceding training is a condition likewise for the plying of crafts, etc., which take p
subsequently.¡¨ You learn something now and you get the results later. ¡§Kamma is a condit
individual essence, for materiality.¡¨ There are some material properties caused by kamma.
effect or condition and effect, but they are opposed as to individual essence. That is becaus
and materiality is r|pa. Their individual essence is different. ¡§And so are milk, etc., for curds
on.¡¨

¡§Light is a condition, opposed as to function, for eye consciousness.¡¨ Light is one condition
arising of eye consciousness or seeing consciousness. Without light you cannot see. So ligh
but as to function light and eye consciousness are different. Light has the function of dispelli
Eye consciousness has the function of knowing the object. Their functions are different.

¡§But eye-cum-visible-data, etc., are respectively a condition unopposed as to presence, for
and so on. And the first impulsion (the first javana), and those that follow, are a condition, ur
individual essence and function, for the impulsions that follow them.¡¨ There are conditions a
are conditioned which are sometimes opposed and sometimes not opposed and which are s
sometimes unlike. They are not vip?kas always. Some are vip?kas and some are not.

¡§Materiality - for example temperature and nutriment - is a condition for materiality: the like
And so are paddy seeds, etc., for the paddy crops, and so on. The material is a condition for
and so is the immaterial for the material: the unlike for the like.

¡§And so are ox hair and ram¡¦s hair, horns, curd, and sesamum flour, etc., respectively for d
be dubba, not dabba) grass, reeds, bh|ti?aka grass and so on.¡¨ Then we have footnote 19.
footnote Venerable ???amoli said: ¡§Except for the last mentioned, it seems problematical w
rightly interpreted, should be conditions for the things mentioned.¡¨ Maybe they believed tha
don¡¦t really know. Here ox hair and ram¡¦s hair is one unit. Horns are the second unit. Curd
flour is the third unit. They are connected respectively with dubba grass and one grass is mi
should say ¡¥respectively for dubba grass, arrow grass and bh|ti?aka grass¡¦. We don¡¦t nee
¡¥reeds¡¦. We have to strike it out. So we should have ¡¥respectively for dubba grass, arrow
bh|ti?aka¡¦. Maybe where there is ox hair and ram¡¦s hair the dubba grass grows abundantly
arrow grass. I don¡¦t know what ¡¥arrow grass¡¦ means. All these are difficult to understand.
is translated into Burmese as fragrant grass. It is grass with some good smell. Those are co
kinds of grass. When there are horns, the arrow grass grows. When there is sesamum flour,
and so on.

¡§And those states for which these are the opposed and unopposed, like and unlike, conditio
results (not the vip?kas) of these states as well.¡¨ They are not the vip?kas, but they are con
others. ¡§So although this ignorance has entirely undesirable fruit for its result and is repreh
individual essence, yet it should be understood as a condition, opposed or unopposed and li
case may be, as to presence, function, and individual essence, for all these formations of me
Ignorance can be the condition for formations of merit, formations of demerit, and for the for
imperturbable.

Then paragraph 112 ¡§Moreover there is this way of explanation as well.¡¨ The explanation i
ignorant or do not know correctly about death and reappearance (That is pa?isandhi.) or reb
of rebirth and Dependent Origination, then you do these formations. Because of ignorance, b
of death, because of ignorance of reappearance or rebirth, you do at times good formations
some bad formations.

¡§Firstly when he is confused about death, instead of taking death thus, ¡¥Death in every ca
aggregates¡¦, he figures that it is a [lasting] being that dies, that it is a [lasting] being¡¦s
transmigration to another incarnation, and so on. When he is confused about reappearance
of taking rebirth thus, ¡¥Birth in every case is manifestation of aggregates, he figures that it i
being¡¦s manifestation in a new body.¡¨ If you have ignorance about death, reappearance, th
rebirths, the characteristics of formations, dependently arisen states, then you do kusala and
formations.

The verse given in paragraph 115 is often quoted when you want to explain what sa?s?ra is

¡§The endless chain of aggregates,
Of elements, of bases too,
That carries on unbrokenly,
Is what is called the round of births.¡¨

This is the definition of sa?s?ra. Sa?s?ra is just the endless chain of or the endless arising a
disappearing of aggregates, bases, elements and others.

Paragraph 116 ¡§When he is confused about the characteristic of formations, instead of app
specific and general characteristics, he figures that formations are self¡¨ and so on. There ar
characteristics, specific and general. An example of specific characteristic would be that ma
characteristic of being molested or the characteristic of change. That is a specific characteris
has the characteristic of enjoying the object or experiencing the object fully. That is its speci
characteristic. What are their general characteristics? Impermanence, suffering and no soul.
characteristic¡¦ means characteristic common to all phenomena. Specific characteristic is the
essence of each phenomenon. If you are ignorant about the characteristic of formations, you
self, to belong to a self, to be lasting, to be pleasant, to be beautiful. ¡§When he is confused
dependently arisen states (That is Dependent Origination.), instead of taking the occurrence
be due to ignorance, etc., he figures that it is a self that knows or does not know, that acts a
action¡¨ and so on. Blinded by ignorance we do different sorts of things, good formations and

Due to formations there is consciousness. There are 32 kinds of mundane resultant conscio

type of consciousness is meant by these words. For example something like the profitable re
element may seem difficult. The numbers are given so you may go easily to the chart and fin

Paragraph 129 ¡§Then next to the profitable resultant mind element, the root-cause-less min
element accompanied by joy¡¨ - here root-cause-less is ahetuka, mind consciousness is ma
is dh?tu. What does that mean? That means sant?ra?a (investigation). In the middle of the p
saying. I think that I have not told you about this even in my Abhidhamma classes. Registrat
arises how many times? Two or never. They arise two times or they do not arise at all. Wha
¡§By occurring either once or twice as registration.¡¨ So according to some teachers registra
once. The common opinion is that registration does not arise once. When it arises, it arises t
¡¥Majjhima Commentary¡¦ does not mean the Commentary we now have. It is an old Sinhale

¡§But in the Abhidhamma Commentary two turns of consciousness have been handed down
registration.¡¨ In the Abhidhamma Commentary it is said that registration occurs or arises tw
consciousness has two names, ¡¥registration¡¦ (tad?ramma?a - literally having that object th
impulsions had) and ¡¥aftermath life-continuum¡¦ (pi??hi bhava~ga).¡¨ ¡¥Pi??hi¡¦ means bac
The other paragraphs are like that explaining the consciousness with reference to the functi
the course of an existence (pavatti).

Now we have at rebirth-linking. ¡§But what was said above, namely, ¡¥as to the remaining 1
that does not occur as a rebirth-linking appropriate to it¡¦.¡¨ There are 19 types of consciousn
the function of rebirth. ¡§It is hard to understand since it is too brief. Hence in order to show
it may be asked¡¨ - there are given details of so many things here.

Let me tell you one thing about this chart. The second link, formations of merit, cetan? in k?
8 are the conditioning. The conditioned is in k?masugati, the mah?vip?ka 8, the upekkh? sa
are the letters ¡¥pt¡¦. I did not explain this on the sheet. ¡¥Pt¡¦ means at rebirth, at relinking.
letters ¡¥pv¡¦ on the sheet mean during the course of a life. that means after rebirth.

Just above paragraph 135 ¡§(4) Briefly rebirth-linking [consciousness] has three kinds of obj
¡¥past¡¦, ¡¥present¡¦, and ¡¥not-so-classifiable¡¦.¡¨ What is that? That means concepts (pa??
are said to be without time, out of time. So they cannot be classified as past, or present, or f
¡¥Not-so-classifiable¡¦ means pa??atti. ¡§Non-percipient rebirth-linking has no object.¡¨ ¡¥No
rebirth-linking¡¦ what does that mean? Sa??in, those reborn without mind. You know there a
only physical bodies, no mind. They are brahm?s. They practiced jh?nas. They are those wh
they think that because there is mind, we suffer. We know that this is suffering, this is pain.
no mind, we would be very happy or very blissful. They practice jh?na and as a result of thei
reborn as brahm?s without mind or mental activity. They are like statues. They stay like stat
500 eons and then they come back. For their relinking there is no object since there is no re
consciousness. At the moment of their arising there are only material properties. Whenever
¡¥not-so-classifiable¡¦, take it to mean pa??atti.

In paragraph 136 it says ¡¥for example¡¦. I think ¡¥for example¡¦ is not correct. ¡¥For exampl
only state a part, like part of a list or something, not all. But here the P??i word is ¡¥seyyath?
what are they or something like that. That means I am going to give you all the details. So it
something like ¡¥namely¡¦ or ¡¥that is¡¦. These paragraphs are to be read slowly, not going f
because they are a very important part of Abhidhamma showing the process of death and re

From happy to unhappy destiny - that means how a person is reborn from a happy realm an
means how a person dies as a human being for example and is reborn in hell or is reborn as

on. They are described here from happy to unhappy destiny. Next unhappy to happy destiny then from happy destiny to happy destiny is described.

In paragraph 140 next to the 550 in brackets ¡§But in the case of one who has stored up kar spheres.¡¨ ¡¥Exalted spheres¡¦ means mahaggata. ¡¥mahaggata¡¦ means r|p?vacara and ar| kamma comes into focus¡¨ and so on.

Here the three kinds of objects for relinking (pa?isandhi), bhava~ga and cuti are given. A sig destiny, in other words, the appearance of the mother¡¦s womb in the human world¡¨ - so sor appears to the mind of the person that is about to die. Sometimes the sign of kamma appea sign of destiny appears. The sign of destiny is always taken as to be present. The sign of ka present or past. Kamma is always past.

¡§His rebirth-linking consciousness arises next to the death consciousness in the order show an unhappy destiny.¡¨ That refers to paragraph 137.

¡§In another¡¦s case, relatives present [objects to him] at the five sense doors, such as a vis object, perhaps flowers, garlands, flags, banners, etc., saying ¡¥This is being offered to the l your sake, dear, set your mind at rest¡¦.¡¨

¡§How kamma is a condition. Up to this point there has been shown the occurrence of the ni consciousness as rebirth-linking. Also all this [is further classified; for]

While it occurs in linking thus,
It has a double class beside
Through kamma, and as mixed and not,
And is still further classified.¡¨

Paragraph 146 and 147 show how kamma is a condition. Then paragraph 148 and the follov classification of kamma. That is double class, mixed and unmixed and other classifications. understood that when it occurs thus, its double class, etc., is mixed and not, and it is still furt classified.¡¨

¡§For example: though this [type of consciousness] occurs in one way only as rebirth-linking twofold as divided into mixed and unmixed with materiality.¡¨ Rebirth-linking consciousness a with materiality when it is an ar|p?vacara pa?isandhi. ¡§It is threefold as divided according to fine material, and immaterial becoming; it is fourfold as egg-born, womb-born, putrescence-(and of apparitional generation.¡¨ You have to remember this because it will be mentioned ag There are four kinds pa?isandhi - egg-born, womb-born, moisture-born, and apparitional ger ¡¥generation¡¦ is used here. ¡¥Generation¡¦ here means birth. It is not like this generation, ne

¡§It is fivefold according to destiny.¡¨ There are five kinds of destiny. They are to be found in
Nik?ya. ¡§It is sevenfold according to the stations of consciousness, and it is eightfold accor
abodes of beings.¡¨ This is not concerning kamma, but it is about pa?isandhi (relinking). Rel
only one. It can be two, three, four, five, seven or eight. At least the fivefold destiny you shou
understand.

¡§The mixed is double sexed and not.¡¨ ¡¥Double¡¦ means sexed and not sexed. Some are b
femininity, but there are other beings are born without masculinity or femininity. They are wit
something like a eunuch.

Student: There are also things like amoebas that don¡¦t have sex.

Teacher: Yes. ¡§The least decads the first has got, respectively three or two¡¨ - here the mat
arising with the rebirth-linking are mentioned as to decads. You have to understand the sixth
Manual of Abhidhamma.

Paragraph 153 ¡§Herein, how the different kinds of generation come about may be understo
kind of destiny. For as regards these,

No first three generations are
In hell, or with the deities, also (We should insert ¡¥also¡¦)
Save those of earth; all four are found
In the three other destinies.¡¨

Once again we will need to insert ¡¥also¡¦. ¡§Herein, by the words also, with deities also it sh
understood.¡¨ The P??i particle ¡¥cha¡¦ is used. Sometimes it means ¡¥something more¡¦. It
¡¥also¡¦ in English. ¡¥Deities also¡¦ means deities and others. By the word ¡¥also¡¦ we should
something else other than deities. ¡§Herein, by the words also with deities also it should be
as in hell and among deities - excepting earth deities -, so also among the ghosts consumed
should take it that ghosts consumed with thirst are represented by the word ¡¥also¡¦. ¡§The f
of generation are not found; for they are apparitional only. But in the remaining three kinds o
other words, among animals, ghosts and human beings, and among the earth deities excep
four kinds of generation.¡¨ There are five kinds of destiny. How many do we find here? Hell i
Deities is another destiny. Ghosts consumed with thirst is another destiny. What else? Huma
destiny. We have to differentiate two kinds of deities, earth deities and other deities. For hel
only one generation, I mean birth. That is apparitional birth. The first three kinds of generatio
found in hell, for deities except earth deities, and for ghosts consumed with thirst. But in the
three kinds of destiny, that is with regard to other kinds of hungry ghosts, human beings, ani
deities excepted above, there are all four kinds of generation. There can be egg-born, womb
moisture-born and apparitional birth. There can be all four kinds of generation.

Next there is the explanation of how many kinds of material properties arise in the fine mate
on. ¡§Firstly, among the fine material brahm?s of apparitional generation there arise togethe
rebirth-linking consciousness 30 and also 9 material instances with the 4 groups, namely, th
eye, ear, and physical basis (That is the heart base.), and the ennead of life.¡¨ ¡¥Ennead¡¦ is
nine - the eight inseparables and j?vita. Further down ¡§Now the group of material states co
material instances, namely, color, odor, flavor, nutritive essence, and the four primary eleme
sensitivity and life is (not ¡¥are¡¦) called the ¡¥eye decad¡¦¡¨, ear decad and so on. A group o
states is called the ¡¥eye decad¡¦. The components of that decad are color, odor, flavor, nutr
the four primaries, eye sensitivity and life. These ten are the eye decad. ¡§The remaining [gr
states] should be understood in the same way.¡¨ That is the ear decad, nose decad and so o

Paragraph 158 the second line of the verse ¡§Under aggregates, object, cause¡¨ - we should
¡¥root¡¦. It is not ¡¥cause¡¦. You may say ¡¥root-cause¡¦, not just ¡¥cause¡¦.

Paragraph 161 - this is very good.

¡§A mere state that has got its conditions
Ushers in the ensuing existence;
While it does not migrate from the past,
With no cause in the past it is not.¡¨

Nothing from this life migrates to the other life, but it is reborn there not without the cause he
how we understand rebirth. Buddhists accept anatta. There is no att?. There is no permaner
accept rebirth. Sometimes it seems incompatible. You do not believe in anything which is pe
soul or whatever. Then you are saying there is rebirth in another state. The answer is: ¡§A m
has got its conditions ushers in the ensuing existence.¡¨ It arises there conditioned by somet
something in the past. ¡§While it does not migrate from the past¡¨ - it does not go from the pa
present or from the present to the future. ¡§With no cause in the past it is not.¡¨ That is the c
¡§So it is a mere material and immaterial state arising when it has obtained its conditions, th
of, saying that it comes into the next becoming; it is not a lasting being, not a soul. And it has
transmigrated from the past becoming nor yet is it manifested here without cause from that.¡

¡§We shall explain this by the normal process of human death and rebirth-linking.¡¨ That me
process of human death, relinking and so on. On the next page illustrations are given such a
light and so on. An echo, a light, a seal impression, a looking-glass image are given to expla
¡§And here let the illustration of this consciousness be such things as an echo, a light, a sea
looking-glass image, for the fact of its not coming here from the previous becoming and for t
arises owing to causes that are included in past becomings. For just as an echo, a light, a se
and a shadow, have respectively sound etc., as their cause and come into being without goi

also this consciousness.¡¨

¡§And with a stream of continuity there is neither identity nor otherness. For if there were ab
in a stream of continuity, there would be no forming of curd from milk. And yet if there were a
otherness, the curd would not be derived from the milk. And so too with all causally arisen th
that were so there would be an end to all wordly usage, which is hardly desirable. So neither
identity nor absolute otherness should be assumed here.¡¨

¡§If no transmigration is manifested, then after the cessation of the aggregates in this human
fruit could be another person¡¦s or due to other [kamma], since the kamma that is the conditi
does not pass on there [to where the fruit is]? And whose is the fruit since there is no experie
Therefore this formulation seems to be unsatisfactory.¡¨ So it is like one person does the kar
person gets the result. The answer is that it is through continuity, like seeds and so on. Wha
¡¥experiencer¡¦ is just the arising of results. Actually there is no experiencer.

In paragraph 174 about the middle ¡§For just as in the world when someone becomes an ag
completing some business or other, and he buys goods, say, or obtains a loan, it is simply th
performing the transaction that is the condition for completing that business,¡¨ and so on. No
simply an agent. It is someone who promises to pay debt, something like a guarantor. You g
And also ¡¥completing some business¡¦ is very vague. The P??i word used here is ¡¥niyy?ta
language is a religious language, some words are taken from Sanskrit which have to do with
niyy?tana is a business P??i word. ¡¥Niyy?tana¡¦ means ¡¥paying back¡¦, not transacting bus
¡¥the aim of paying back what has been promised¡¦ or ¡¥the aim of discharging the obligatio

Paragraph 175 and so on explain the relationship according to Pa??h?na. You have to read
to the chart. With the chart you understand easily. There is one thing worthy of note at the b
paragraph 180. ¡§Then it is a condition for [brahm?s] seeing undesirable visible data and he
sounds that are in the sense-sphere: there are no undesirable visible data, etc., in the Brahm
itself.¡¨ In the Brahm? Worlds there are no undesirable sights or sounds. But they can see u
and hear undesirable sounds from the sense-sphere. When they look down to the sense-sph
undesirable objects. In the Brahm? World itself there are no undesirable visible sights nor un
sounds. ¡§And likewise in the divine world of the sense-sphere¡¨ - in the Devaloka also there
undesirable objects (no ani??j?ramma?a) because everything there is beautiful. But when th
human world, they may see a lot of undesirable objects. OK.

I think this is the end of the second link, the second link between formations and consciousn
longest explanation of links given in the Visuddhi Magga. There is a lot of information about
death and rebirth, and also kamma and its results. So read it slowly. And maybe reading The

Abhidhamma can help you here. It goes both ways. Those who have studied Abhidhamma r
explanations for The Manual of Abhidhamma.

Student: What chapter should we read?

Teacher: For kamma and results you need to read the fifth chapter. Also death and rebirth a
chapter.

S?dhu! S?dhu! S?dhu!

(Tape 38 / Ps: 186 ¡V 314)

It is almost a month sine we had our last class. I think that we are on paragraph 186. The wo
generally means cittas, cetasikas and sometimes also Nibb?na. But here in this formula dep
consciousness, n?ma-r|pa arises. ¡¥N?ma¡¦ means what? The three aggregates, that is feel
formations aggregate. Here ¡¥n?ma¡¦ means only the cetasikas. Feeling is one cetasika. Pe
cetasika. Formations are the remaining 50 cetasikas. So all 52 cetasikas are covered by n?m
called ¡¥n?ma¡¦ because of their bending on to the object. The root is ¡¥nam¡¦. ¡¥Nam¡¦ mea
towards or to bend towards. So that which inclines towards the object is called ¡¥n?ma¡¦. Th
called ¡¥n?ma¡¦ here. In other places, mostly in the Suttas, when the Buddha said n?ma and
citta and cetasikas together. So here consciousness or citta is the conditioning factor and n?
the conditioned factors. Here ¡¥n?ma¡¦ means only the three aggregates, the three immateri
aggregates (feeling, perception and formations).

¡§Matter is the four great elements and the materiality derived [by clinging] from the four gre
It is not by clinging. There is no occasion for clinging here. The P??i word used is up?dayar|
¡¥depending upon¡¦. So it should be ¡§the materiality dependent upon the four great primarie
material properties. Four are called the ¡¥great primaries¡¦ and 24 are called the ¡¥depender
because these 24 depend upon the four great primaries for their arising. The four great prim
elements of earth, water, fire and air. Their analysis is given in the Description of Aggregates
14.

¡§By occurrence in becoming etc.: excepting one abode of beings, [that is, the non-percipien
occurs in all the kinds of becoming, generation, destiny and station of consciousness, and in
abodes of beings.¡¨ You can find mind everywhere, except in the realm of mindless beings.
means the realm of mindless beings. There is one realm among the 31 planes of existence w
without minds. They are just like statues. Mind can be found in all realms except the realm o
beings.

¡§Materiality occurs in two kinds of becoming, four kinds of generation, five destinies, the firs
stations of consciousness, and the first five abodes of beings.¡¨ So materiality can be found
everywhere except for the four ar|p?vacara realms.

¡§Now when this mentality-materiality occurs thus, then in the case of sexless embryos and
the moment of their rebirth-linking there are manifested as materiality two organic continuitie
two decads of physical basis and body, and also the three immaterial aggregates.¡¨ At the m
rebirth-linking if a person is a sexless person, then there arise at the moment of relinking two
decad of physical basis and the decad of body and the three immaterial aggregates. That m
of feeling, perception, and mental formations. Actually four immaterial aggregates arise there
consciousness is taken as the cause here. So only three mental aggregates are taken here.

¡§So in their case there are in detail these 23 states, namely, 20 states as concrete matter a
immaterial aggregates, which should be understood as ¡¥mentality-materiality with consciou
condition¡¦. But omitting repetitions, and so canceling nine material instances from one of the
continuities, 14 states remain.¡¨ Do you know what these are? I will explain only this passa
others I will refer you to The Manual of Abhidhamma. The material properties are treated in
different groups. Sometimes a group of eight material properties, sometimes nine, sometime
There are eight material properties which are inseparable. Wherever there is matter we find
are four great primaries, color, smell, taste and nutrition. These eight are called ¡¥inseparab
the basis for the groups. If we add life faculty to it, we get nine material properties. If we add
sensitivity, we get the eye decad. If instead of eye sensitivity we add ear sensitivity, we get t
and so on. Here two decads are mentioned. The ¡¥heart base decad¡¦ means the eight insep
principle and heart base. There are ten. I think if you write them down, you can see more cle
the eight inseparables, life faculty, and heart base. And then there is the body decad. It is th
eight inseparables, life faculty and body sensitivity. And then we have three mental aggregat
you get all together? Ten plus ten plus three, so 23. Therefore it says ¡§There are in detail th
namely 20 states as concrete matter (That means the two decads.) and three immaterial agg
be understood as ¡¥mentality-materiality with consciousness as condition¡¦. But omitting rep
means taking only what has not been taken before. Then we get how many? 14. That mean
we have to omit the eight inseparables and life faculty because they are repeated. So we ge
repetitions and so canceling nine material instances from one of the organic continuities, 14

The others are to be understood according to the forming of decads. To understand the othe
you must read The Manual of Abhidhamma on the groups of matter. At relinking if the being
there are these two decads. But if the being is with sex, we have to add one more decad. So

omitting repetitions there are 15. Although one decad is added, we add only one more, mas
feminine sex.

¡§At the moment of rebirth-linking of those Brahma¡¦s Retinue among apparitionally born bei
those who don¡¦t have to stay in the womb of the mother.), four organic continuities are man
materiality, that is, the decads of eye (10), ear (10), physical basis (10), and the ennead of t
faculty (9 - 8 inseparables and life principle or life faculty), and three immateriality aggregate
their case in detail these 42 states, namely, 39 as concrete materiality and 3 immaterial agg
be understood as ¡¥mentality-materiality with consciousness as condition¡¦. But omitting rep
canceling 27 instances of materiality, [9 each], from 3 of the organic continuities, 15 states r
is how they arise in a certain realm or in a certain life. That is at relinking. And also in the co
existence (That means life after relinking.) also mentality and materiality are manifested.

One thing to note is that rebirth-linking consciousness does not originate materiality. There a
matter - kamma, consciousness, temperature and food. Generally speaking mind produces
every type of consciousness however can originate materiality. Here in paragraph 193 ¡§Re
consciousness does not originate materiality. For, just as a man who is falling into a chasm
another, so it, too, is unable to originate materiality because of its weakness, which is due to
of the physical basis.¡¨ It has just arisen in a new existence, so it is still weak. At that time th
only the physical heart base and that heart base is also very weak at that very moment. So t
consciousness which depends on that weak physical basis cannot produce matter. Rebirth-l
does not originate materiality.

Paragraph 197 ¡§By inclusion: now there is the simple mentality with consciousness as cond
course of an existence and rebirth-linking in the immaterial sphere, and in the course of an e
five-constituent becoming.¡¨ There are five-constituent becoming, four-constituent becoming
one-constituent becoming. They will be explained in this chapter in paragraph 254. Actually
becoming¡¦ means a realm where there are 5 khandhas. There are 5 aggregate beings, 4 a
aggregate beings. Human beings are 5 aggregate beings. Mindless beings are 1 aggregate
beings are 4 aggregate beings because they have only 4 immaterial aggregates (feeling, pe
and consciousness).

¡§The simple materiality with consciousness as condition in both cases among the non-perc
mindless beings.), and in the course of an existence in the five-constituent becoming, and th
mentality-materiality with consciousness as condition in both cases in the five-constituent be
mentality and materiality and mentality-materiality should be understood as ¡¥mentality-mate
consciousness as condition¡¦ including them under mentality-materiality according to the me
any one part to represent any remaining one of its kind.¡¨ This is explaining the word ¡¥n?ma

more than it apparently stands for. ¡¥N?ma-r|pa¡¦ can mean just mentality-materiality. But so
only n?ma or sometimes there is only r|pa. And sometimes there is both n?ma and r|pa. So
depending on consciousness n?ma arises, r|pa arises, n?ma-r|pa arises. The Buddha just s
arises, but we must understand that the word ¡¥n?ma-r|pa¡¦ stands for n?ma, r|pa and n?ma

Some of the words are elided or are not mentioned. It is just like we say ¡¥fathers¡¦ in P??i. V
¡¥fathers¡¦, we mean parents, not fathers only, but both fathers and mothers. In P??i it is cal
¡¥ekasesa¡¦. ¡¥Eka¡¦ means one. ¡¥Sesa¡¦ means remaining. That means remaining one wo
remaining word and other elided ones. Let us say instead of saying fathers and mothers, we
¡¥fathers¡¦. That means we elide the word ¡¥mothers¡¦. The word ¡¥fathers¡¦ represents both
mothers. That is called ¡¥ekasesa¡¦ in P??i. Footnote 38 the expression ¡¥ekadesasar|pekas
grammatical term. ¡¥Ekadesa¡¦ means part, not whole, part. ¡¥Sar|pa¡¦ means some form. ¡¥
remaining. So n?ma-r|pa has the same form. The remaining is just a part remaining, not a w
resemblance is just in part, not in whole. One word is n?ma, the other word is r|pa, and the
n?ma-r|pa.

In the realms of ar|p?vacara there are only n?ma aggregates. So in that case depending on
arises, no r|pa. At the relinking moment of mindless beings, only r|pa arises, no n?ma. So in
depending on consciousness, r|pa arises. For 5 aggregate beings both n?ma and r|pa arise
relinking. For them we say depending on consciousness, n?ma and r|pa arise. We have to t
That is what the Commentator is explaining here. In the formula depending on consciousnes
there is n?ma-r|pa. That means there is n?ma, there is r|pa, there is n?ma-r|pa. If you look a
page 2 in small print you will see vi????a paccaya n?ma-r|pa. Conditioned by consciousnes
n?ma-r|pa arise. The P??i word is only n?ma-r|pa, but we have to take it to mean sometime
r|pa and sometimes both n?ma and r|pa. So as I said with regard to relinking in formless bei
n?ma. So depending on consciousness, n?ma arises. For mindless beings only r|pa arises.
both n?ma and r|pa arise.

Then paragraph 200 by manner of condition - that means how they are related. Paragraph 2
or some other kind of resultant consciousness is a condition in 9 ways, as conascence, mutu
association, kamma-result, nutriment, faculty, presence and non-disappearance conditions,
rebirth-linking or in the course of an existence, for that mentality called resultant, whether mi
materiality or not.¡¨ Now the notes I think I have explained before. I followed the explanation
them in diagram form. The conditioning ones are vip?ka consciousness. That means resulta
conditioned are vip?ka n?ma, resultant n?ma. That means the resultant mental aggregates.
relinking and ¡¥pv¡¦ means during the course of life. That means after relinking. The numbe
on refer to this list of the 24 conditions. What is #6? Conascence. What is #7? Mutuality. #8
is kamma-result. #15 is nutriment. #16 is faculty. #19 is association. #21 is presence. #24 is

non-disappearance. They are related in this way. Vip?ka consciousness, this is citta and vip
cetasikas. Vip?ka consciousness and vip?ka n?ma arise together or at the same time. They
same time and they support each other actually. That is why we have #6, #7, #8 and so on.
understand that not all the links are to be interpreted as cause and result. They are just cond
conditioned. They arise together and they support each other. Sometimes they belong to dif
Sometimes they arise at the same time. We have to understand this according to the explan
Commentary. Here vip?ka consciousness (That means some kind of relinking consciousnes
n?ma (That means cetasikas arising together with it.). They are related by way of conascenc
arise together, they disappear together and so on. Then there is relation of vip?ka conscious
base. At the moment of relinking the heart base and vip?ka consciousness arise together. T
by way of conascence, mutuality and so on. The numbers of the conditions are given and th
in the Visuddhi Magga are given in the square brackets. This is how Pa??h?na is applied to
This is how we should understand Dependent Origination with reference to the 24 modes of
relationships. Only then do we really understand the relationship between the different links.
people may think these are very simple links, one causing the other. Actually it is not that wa
very easy, but it is not that way. We have to understand with reference to Pa??h?na so that
clearly and correctly.

Then sometimes the Commentary explains also why it is said that conditioned by conscious
n?ma-r|pa arises. Some of them may not be very convincing. Still this is the reason given by
How do we know that n?ma, r|pa, and n?ma-r|pa are conditioned by consciousness. Then th
according to the Sutta passages and also according to logic.

Student: What conditions consciousness?

Teacher: Sa~kh?ra. There the relationship between formations and consciousness is cause
links are not real cause and effect. Supporting each other is also called condition, like here c
and mental factors. They arise at the same time. So we cannot say that consciousness caus
factors. They arise at the same time and they support each other. One is called conditioning
are called conditioned.

The next link is n?ma-r|pa to the six sense bases. Here ¡¥n?ma¡¦ means what? Cetasikas. ¡¥
four great primaries (here in paragraph 204) six physical bases (That means eye sensitivity,
and so on.) and mentality (That means the three aggregates beginning with feeling.). Here ¡
three mental aggregates and ¡¥r|pa¡¦ means the four primaries, six bases and one more j?vi
Here we also must understand n?ma-r|pa as meaning n?ma, r|pa, and n?ma-r|pa. The same

The word ¡¥sal?yatana¡¦ means six bases. Here we must understand that sometimes it mea

sometimes six bases. We have only the word ¡¥sal?yatana¡¦, but we must understand that s
sixth base, sometimes six bases or one of the six bases.

In the notes n?ma is given as the 52 cetasikas. R|pa is given as four primaries, six base ma
eye sensitivity and so on.), j?vita and ?h?ra. The six bases are eye base, ear base, nose ba
body base, and mind base. That means eye sensitivity, ear sensitivity and so on.

Paragraph 207 how they are conditioned at relinking and later during the course of life is giv
rebirth-linking mentality is a condition in seven ways at the minimum, as conascence, mutua
association, kamma-result, presence and non-disappearance, conditions, for the sixth base.
is the sixth base? It is mind base. Here ¡¥mentality¡¦ means the three mental aggregates (Th
cetasikas.). So cetasikas concomitant with first ar|p?vacara are a condition for the sixth base
by #6, #7, #8 and so on. Here also they arise together. The relationship is cetasikas to citta
third link above it is citta to cetasikas. Here it is cetasikas to citta. ¡¥N?ma¡¦ here means ceta
the six bases the sixth base is mind. You know there are six internal bases and six external
together there are 12 bases - visible object, audible object, odorous object, sapid object, tan
and the other objects (dhamma objects). Those are the external objects. They are called ¡¥e
The internal bases are eye, ear, nose, tongue, body and mind. Here ¡¥n?ma¡¦ means cetasi
ar|p?vacara realms n?ma relates to sixth base only because there is no other base in the im
formless beings. They have only mind and no physical body. For them the cetasikas concom
relinking is the condition for the relinking consciousness itself, man?yatana, the sixth base b
conascence, mutuality, and so on. Here also we have to take n?ma-r|pa to mean n?ma, r|pa
the six bases may mean the sixth base only and sometimes six bases. Their relationship is g
the Visuddhi Magga.

There are three kinds of conditions - mentality as condition, materiality as condition, and
mentality-materiality as condition and then how they are related to the bases. You have to re
with the help of these notes. The first relationship is easy, cetasikas to citta. The second one
is the same relationship to man?yatana during the life. ¡¥Pv¡¦ means during the course of life
I said ¡¥same as above all¡¦ because they arise at the same time and support each other. Th
between n?ma-r|pa and the six bases is not as cause and result, or cause and fruit, but just
each other. We have to go quickly now.

Then contact - depending on six bases, there is contact. There are six kinds of contacts give
ear contact and so on. When you see something, there is seeing consciousness. With seein
is contact. That contact is called ¡¥eye contact¡¦.

Student: Does that consciousness have mental factors with it?

Teacher: Yes. When you see something, there is seeing consciousness. With seeing consci
factors there is what is called ¡¥contact¡¦. That contact when it is associated with seeing is c
contact¡¦. If it is associated with hearing, it is called ¡¥ear contact¡¦ and so on.

Contact is not just the coming together of the object and eye sensitivity. It is something whic
the three conditions come together. The three conditions are the visible object, the eye and
consciousness. That P??i word is very much misunderstood because as it stands in the Sut
interpreted as the coming together of the three is contact. In the Commentaries it is explaine
not to take it in that sense. We are to take it that because of the coming together of the thre
Sometimes language is very misleading. With the fluidity of language you can interpret this
In that passage it means because of the coming together of the three there is contact. Conta
meeting together of the three, but because of the coming together of the three there arises s
is contact. It is something like when you strike a match. Because of the stick and the match
there is fire. It is something like that. There are six kinds of contact - eye, ear, nose, tongue,
mind contact. In detail there are said to be 32. That means the 32 types of resultant conscio
concomitant with these 32 is taken as 32 types of contact. In brief there are six kinds of cont
detail there are 32. Those 32 are those concomitant with resultant consciousness. How mar
consciousness are there excluding the supramundane? 32.

Let us see how they are related. Eye base, etc. (5) are related to eye contact, etc. (5) by wa
so on. ¡¥Eye base¡¦ means eye sensitivity. ¡¥Eye contact¡¦ means contact concomitant with
consciousness. They are related by way of #8, #10 and so on. What is 38? Support. We do
here because they do not arise together although they may arise at the same time. What we
arisen when we see it actually. They are present at the moment, but they do not arise at the
do not arise together, but they exist at the same time.

Let us suppose that we see something. Before coming to the moment of seeing, there are s
Matter is said to have a life of 17 thought moments. When some visible object strikes at our
life continuum (bhava~ga) is disturbed and it vibrates. One moment is past. Then the bhava
moments. So there are three moments before we are aware of seeing the visible object. The
just the mind turning to that object. The fifth moment is the moment that we see. So there a
past. So with regard to seeing consciousness and visible object we cannot say that they aris
time. So there are four moments past. So with regard to seeing consciousness and visible
that they arise at the same time. We cannot say they arise together. The visible object may
ourselves. It may be our hands, our feet or anything. So they do not arise at the same time a
arise together. They are present at the moment that they are related to each other. This is w
conascence, and when there is no conascence, there can be no mutuality. There is support.

Prenascence. ¡¥Prenascence¡¦ means the visible object arises just before the seeing consci
seeing consciousness arises, the object has already existed. Vip?ka man?yatana (That mea
consciousness.) relates to vip?ka mind contact (That means contact.). They arise together.
be conascence, mutuality and so on. It is like that.

Let¡¦s go to the next one. That is feeling, right? There are six kind of feeling. What are they?
of eye contact. That really means feeling concomitant with eye contact. You see something
consciousness. Along with seeing consciousness there is feeling. That feeling is called ¡¥fee
contact¡¦. Then there is feeling born of ear contact, born of nose contact and so on. There ar
feeling here.

Paragraph 230 in the verse it is said:

¡§But from the nine and eighty feelings
Thirty-two, no more, appear
Associated with result.
And only those are mentioned here.¡¨

By feeling is meant here the mental factor feeling which is concomitant with 32 types of resu
consciousness only. Feeling accompanies every type of consciousness. There are 89 types
we can say there are 89 feelings, but only those feelings concomitant with the 32 resultant c
meant here. We have to take only those 32.

Please look at the handout. Conditioned by contact, feeling arises. So feeling is feeling born
etc. Feeling here is feeling concomitant with 32 resultant consciousness. That is to be taken
related to feeling (vedan?) dependent on eye base by way of #6, #7, #8 and so on. When yo
there is seeing consciousness. With seeing consciousness there is contact and there is feeli
the same time. Therefore contact conditions feeling by way of conascence, mutuality and so
they arise at the same time and they support each other. This we have to understand.

Mind contact relates to feeling concomitant with tad?ramma?a k?m?vacara vip?ka. It is tech
look at the list of conditions, you see #6, #7 and so on. When you see #6, #7, you can safely
arise at the same time. They are not real cause and effect.

The next one is craving. How many kinds of craving are there? First there are six kinds of cr
for visible objects, for sound, for smell and so on. There are six kinds of craving. That is by v
objects. The cravings are for visible data, for sound, for odor, for flavor, for tangible data and
data.

In paragraph 235 we have the explanation of three kinds of craving - sense-desire craving, a

commonly translated as craving for existence and craving for annihilation. We must understa
this explanation. It is very important because these three words appear in the first sermon al
defines the Second Noble Truth he said: It is just this craving which causes rebirth and whic
in this life, in that life and so on. The first one is in P??i k?m?ta?h?. It is craving for sense de
second one is called ¡¥vibhavata?h?¡¦. It is craving for becoming. In fact ¡¥craving for becom
craving that is concomitant with the wrong view that things are eternal. That is craving for be
not simply craving for becoming in reality. It is craving for becoming that is accompanied by
things are eternal. The next one is craving for annihilation. That means craving accompanies
everything is annihilated at death. There is no other being. There is no arising as rebirth. Thi
division of craving. The first is craving for six objects. Then each of these six can be divided
craving for sense desire, craving concomitant with eternalist view, craving concomitant with
view. These are the three kinds of craving and these are mentioned in the first sermon. Six
three is 18. Then these 18 can be multiplied by two, internal and external. So we get 36. The
belong to the past, to the future, to the present. So 36 plus 36 plus 36, we get 108 kinds of c
should be familiar with this because in some Suttas the 108 kinds of craving are mentioned.

How are feeling and craving related? ¡§In one way: it is a condition as decisive support cond
They are related by condition as decisive support only. Decisive support condition is the wid
conditions. If you cannot explain by way of any other condition, you can say they are related
decisive support condition. Feeling is a condition for craving by way of decisive support. Dec
means that they do not arise at the same time.

Then there is another way of explaining. ¡§Or alternatively,

A man in pain for pleasure longs,
And finding pleasure, longs for more;
The peace of equanimity
Is counted pleasure too; therefore
The Greatest Sage announced the law
¡¥With feeling as condition, craving¡¦
Since all three feelings thus can be
Conditions for all kinds of craving.
Though feeling is condition, still
Without Inherent-tendency
No craving can arise, and so
From this the perfect saint is free.¡¨

Another way of explaining is that when you are in pain, you long for pleasure. You long for p
So feeling can be a condition for craving. You have pain here, and you are attached to pleas
pain can cause craving for pleasant feeling. A man finding pleasure, longs for more. If you h

feeling, you want to keep it. You don¡¦t want it to disappear. There also craving is conditione
Then what about neutral feeling? ¡§The peace of equanimity is counted pleasure too.¡¨ So it
pleasurable feeling if we divide feeling into pleasurable and displeasurable. Since equanimit
pleasurable feeling, you may be attached to it. So again feeling is a condition for craving. All
of feelings may be a condition for craving. This is another way of explaining.

Here feeling is a condition for craving means when there is inherent tendency. That means i
inherent tendencies in your mind, even though you have feeling, you do not have craving. F
minds of Buddhas and Arahants there is feeling, but they do not have craving. There are no
tendencies). They have eradicated the liability to get craving.

Here we have to understand the meaning of this link, this phrase. Depending on feeling, the
does not mean that there is always craving when there is feeling. When there is feeling, ther
may not be craving. In footnote 40 ¡§Or alternatively, it may be recognized that this conditio
by inherent tendency because it follows upon the words ¡¥With ignorance as condition¡¦. An
feeling as condition, craving¡¦, and not ¡¥with feeling as condition there is always (not ¡¥only
craving¡¦.¡¨ We are not to understand that with feeling as condition, there is always craving.
be craving.

What about us? We are not Arahants. With mindfulness meditation we can avoid having cra
though we have painful feeling or pleasant feeling, we are mindful of it, and so we do not ha
is the only place where we can cut the round of Dependent Origination. The other links we c
about them. When there is ignorance, there will always be kamma formations. Where there
there will always be consciousness and so on. Here although there is feeling, we can avoid
When this is broken, the other links are also broken. When we practice meditation, we are c
of existence at this place.

Student: So craving does not arise?

Teacher: Right. We are mindful. We are saying ¡§pain, pain, pain¡¨ or ¡§pleasant, pleasant,
need strong mindfulness, not just superficial awareness.

Next is clinging. There are four kinds of clinging - sense desire clinging, false view clinging,
ritual clinging, and self doctrine clinging. The first one is just sense desire. It is called clingin
second one is wrong view. The third one is also wrong view, taking rites and rituals as leadi
of enlightenment. The self doctrine is the view that there is a self that there is something wh
forever.

With regard to rite and ritual clinging what is mentioned in our books is in paragraph 241 ¡§fo
asceticism, ox vows, etc., are themselves kinds of clinging, too.¡¨ The P??i word here is s?la
translated as rites and rituals. The real meaning in the Suttas and in the explanations given
Commentaries is not just rites and rituals, but it is called here ¡¥ox asceticism¡¦. That means
an ox or it may be behaving like a dog. By behaving like an ox, these people believed that th
of craving; they could get rid of attachment and so on. Or behaving like a dog they could get
and wants. So they adopted such behavior. There were two persons during the time of the B
like this. One was a follower of ox asceticism. The other followed dog asceticism. They went
asked whether their practice was right or wrong. Buddha said ¡§Don¡¦t ask me.¡¨ They persis
Buddha said that now that you have asked me, so I have to answer. Those who follow dog a
reborn as dogs. Taking just those as a means to emancipation is what is called ¡¥rite and rit
We can extend that to mean other things. We do chanting, right? All Buddhists do chanting.
to be the real way to emancipation, it may be a rite and ritual wrong view. We do chanting. T
calmness of mind. But we do not take it to be the only way for emancipation. We bow down
chant. We even keep precepts. These are something like basic practices for emancipation. I
directly lead us to enlightenment. For enlightenment we have to practice meditation. Satipa?
is said by the Buddha to be the only way to enlightenment. If we take bowing down before th
to enlightenment without practicing meditation, then we may be having this kind of clinging to
Doing these rites and rituals if they are not carried too far is all right because they make us c
minds can be tranquil so that we can practice meditation. But if we do not practice meditatio
chanting, and just keep s?la and so on, then it may be a wrong view. There are these four ki

Student: Would you say this is some sort of critique of Confucianism?

Teacher: I don¡¦t know what they practice. The correct view according to the Buddha or the i
the Commentators is that the only way to Nibb?na is satipa??h?na. It is expressly said at the
Sutta that this is the only way for the purification of beings and so on. This is the real, correc
attainment of enlightenment. If we take others to be the way to the attainment of enlightenm
that wrong view. That is the view that they alone can lead us to enlightenment. For example
alone can lead us to enlightenment and we do not have to do any meditation, that is a wrong
this interpretation.

Let¡¦s go to becoming. There are two kinds of becoming to understand here. In P??i they are
kamma-becoming and bhava-becoming. Paragraph 250 ¡§It becomes, thus it is becoming. T
kamma-process becoming and rebirth-process becoming.¡¨ In this phrase ¡¥depending upon
arises¡¦, here we must understand that becoming means two things. One is kamma-process
is rebirth-process becoming. ¡¥Kamma-process becoming¡¦ simply means kamma. So it is th
(mental formations). ¡¥Rebirth-process becoming¡¦ means rebirth. Because of clinging both

explained in detail in this book. Because of clinging sometimes we do good kamma, sometir
We want to be reborn in a better world. We think that it is good to be reborn in a better worlc
meritorious deeds. Or sometimes we may be misdirected. We may kill an animal as a t sacri
that we will be reborn in a better existence. Clinging can be a condition for our good or bad a
good or bad deeds. That is kamma. As a result of clinging and also as a result of kamma we
better existence or in a worse existence. That is in another becoming. In this link between cl
becoming we can take it that both kinds of becoming are meant here. Because of clinging th
kamma-becoming and there is also rebirth-becoming. Mental formations and kamma-becom
mental volition (cetan?). But the mental formations (sa~kh?ra) belong to the past time and h
kamma-process or kamma-becoming belongs to the present time. The time is different. The
difference mentioned in the Visuddhi Magga too.

There are nine kamma becomings given in paragraph #253, #254. In paragraph #261 there
ordinary man is like a madman.¡¨ That is a very famous phrase used in our country. ¡¥Ordina
puthujjana. A puthujjana is like a madman. This phrase is quoted by people very often. If you
something about people doing some crazy things, you say ¡§Oh, a puthujjana is like a madn

Next is the link between becoming and rebirth. There becoming means just what? Kamma-p
cannot take becoming to mean rebirth there because it is a condition for rebirth. In the link b
and becoming we must take becoming to mean both, kamma-becoming and rebirth-becomin
becoming and rebirth, becoming is the same as rebirth. That is the difference.

Depending upon rebirth, sorrow, lamentation and so on also arise. They are not explained h
have been explained in the chapter on the Noble Truths. Next comes the wheel of becoming
as a wheel. Ignorance is put at the beginning of this teaching. It is not the beginning of the ro
rebirth. It is just the beginning of the teaching. Old age and death are put at the end of this te
does not mean that it is the end of the round of rebirth. That is because when there is old ag
also sorrow and lamentation and so on, there is also ignorance. If there is no ignorance, the
sorrow, lamentation and so on. When we are sorry and we lament for something and are ex
anguish, there is also ignorance. And when there is ignorance, there are mental formations a
wheel of rebirth goes on and on like this. That is why this teaching is called the wheel of rebi
of becoming.

There are some things to be understood with regard to this teaching. They are given on ano
know whether you brought those sheets with you. With regard to these twelve links we have
three times or periods, the 12 factors, 20 modes, 3 connections, 4 divisions, 3 rounds, 2 roo
English words may be different from The Path of Purification. Please write down the paragra
it is paragraph #287, for 20 modes it is #293, for 3 connections it is #289, for 4 divisions it is

rounds #298, and for 2 roots it is #285. And then there are four kinds of profundity and four r
regard to which Dependent Origination is to be understood. These four methods are more in
profundities. The Dependent Origination is profound in its meaning, in its teaching and so on
profundity in paragraph #304 profundity of meaning is profundity as to fruit. ¡¥Meaning¡¦ does
meaning of words, but here the fruit or the results. ¡¥Profundity of law¡¦ means profundity of
Profundity of teaching and profundity of penetration are the same. Pa?icca Samupp?da is pr
as to causes, as to teaching, and also as to penetration. It is very important to penetrate into
of each factor in this teaching.

There are four methods of treating the meaning here. That is very good. We have to understa
to these four methods. The first is the method of identity. The second is the method of divers
is the method of uninterest. The fourth is the method of ineluctable regularity. These are the
which we must understand the Dependent Origination. The method of identity means there i
continuity going on. It is not just disconnected bits. They are connected bits. There is some k
continuity. Then there is the method of diversity. Although they are a continuity, each one is
the other. They are actually diverse from one another. The ¡¥method of uninterest¡¦ means u
has no concern that it must condition mental formations. And mental formations have no con
produce consciousness and so on. That is called the method of uninterest. The method of in
means that mental formations are only conditioned by ignorance, not by other factors, not by
have had difficulty with this word ¡¥ineluctable regularity¡¦. I gave talks on Pa?icca Samupp?
retreats and there was not a single dictionary at that place. There were a lot of books, religio
no dictionary. So I asked the yogis to tell me the meaning of this. Three people offered me m
thought were correct, but they did not have dictionaries either. All of them gave me the wron
thought ¡¥ineleuctable¡¦ was unknowable or something like that. In the dictionary it is said ¡¥
avoided or overcome or inevitable¡¦, so inevitable regularity. That means mental formations
by avijj? only and so on. These are the four methods.

Actually the first two methods are the most important because we must understand how to e
Although we say a being is reborn there, we do not mean that it is identical or that something
goes to another life. We have to understand Dependent Origination with at least reference to
methods, the methods of identity and diversity. So we have to combine these two and under
take only one, we will fall into one kind of wrong view. These four methods are very importan
come to the end of Dependent Origination.

Chapter 18
(Tape 39 / Ps: 1-37)

This book, The Visuddhi Magga, is a handbook for meditating monks written by a monk for t
the practice of meditation. This book was written with a scheme of three steps of spiritual de
first step is morality. The second step is concentration. The third step is wisdom. We have g
chapters on morality, concentration and some chapters on wisdom as well. The first and sec
with morality. The other chapters through the thirteenth chapter deal with what is called conc
these chapters the forty subjects of samatha or tranquillity meditation are treated. With the fo
chapter we come to the realm of understanding or wisdom. These chapters 14-17 are in pre
vipassana? meditation. Before we practice vipassana? meditation according to this book, we
something about the aggregates, sense bases, faculties, Noble Truths, and Dependent Orig
go further we will have to be familiar with chapters 14-17. The subjects treated in those chap
brought to bear upon what will be said in these chapters.

With the eighteenth chapter begins the real vipassan? meditation. The preceding chapters a
preparation like giving you information on the aggregates and so on which you will contempl
will see through the practice of vipassan? meditation. Vipassan? meditation is described wit
what is called ¡¥purities¡¦, different stages of purity. There are seven stages of purity describ
you look at paragraph 1, you see references to earlier chapters. There are two purities, purit
purity of mind. ¡¥Purification of virtue¡¦ means keeping precepts, not breaking them. ¡¥Purific
consciousness¡¦ means the practice of samatha meditation until one gets neighborhood con
absorption concentration. That is called ¡¥purification of consciousness¡¦. Here ¡¥consciousn
means sam?dhi (concentration). These two purifications are called the ¡¥root purifications¡¦
like roots. On these two roots the other purifications will be built.

The other purifications are what? Paragraph 2 ¡§Purification of View, Purification by Overcom
Purification by Knowledge and Vision of What is the Path and What is not the Path, Purificat
and Vision of the Way, Purification by Knowledge and Vision.¡¨ These are called the ¡¥trunk
All together there are seven purifications. The first two purifications are dealt with in chapters
Chapters 14-17 are for preparation for vipassan? meditation. Now this chapter deals with Pu
This chapter is a description of Purification of View. ¡¥Purification of View¡¦ really means hav
with regard to aggregates, bases and so on.

Let us say a person practices vipassan? meditation. If you follow the order in this book, first
practice samatha meditation and get jh?na. Or you may not practice samatha meditation at a
vipassan?. Here first we have defining of mentality and materiality. The defining of mentality
is explained in this chapter. ¡¥Defining of mentality and materiality¡¦ really means seeing dur

mind and matter clearly. That is seeing mind not mixed with matter and matter not mixed wit
and matter clearly. That is called here ¡¥defining of mentality and materiality¡¦. In order to un
in order to define mentality and materiality, we need to understand what mind and matter is
Buddha¡¦s teachings. That has been described in the preceding chapters.

What is our mind? Consciousness and mental states or mental factors. Matter is as you kno
properties in our bodies as well as in outside things like in tables, chairs, trees, and so on. F
and the following describe how a person whose vehicle is serenity or who practices samatha
defines mentality and materiality or mind and matter. ¡§One who wants to accomplish this, if
vehicle is serenity (That means he practices samatha meditation first and gets jh?nas,), sho
any fine material or immaterial jh?na (You know there are eight jh?nas, four material and fou
jh?nas.) except the base consisting of neither perception nor non-perception.¡¨ That is the hi
immaterial jh?nas. It is so subtle that it is very difficult for one who defines mind and matter t
them clearly. So it is excepted. Therefore we have here all together seven jh?nas. ¡§And he
according to characteristic, function, etc., the jh?na factors consisting of applied thought¡¨ an
First he enters into the jh?nas that he has attained. Then he emerges from the jh?na. He tak
jh?na like initial application, sustained application and so on as the object of vipassan? med
may take the other mental factors that accompany the jh?nas as the object of vipassan? me
see their characteristic, function, manifestation and so on.

Whenever we study things in Abhidhamma, we are to understand them with reference to fou
first is the characteristic. The second is function. The third is manifestation or the mode of m
The fourth is the proximate cause. So the meditator should contemplate on the factors of jh?
mental factors accompanying the factors of jh?na with reference to their characteristic, funct
manifestation.

¡§When he has done so, all that should be defined as mentality in the sense of bending beca
onto the object.¡¨ He contemplates on or he makes himself aware of the jh?na factors and th
states. He takes them maybe one by one trying to understand the characteristic and so on o
states. Then he finds that this is mentality. This belongs to mind. Then later on he will go to
first he defines them as mental or as n?ma in P??i. The P??i word ¡¥n?ma¡¦ means literally
toward. N?ma is that which bends towards the object. When you pay close attention to the o
meditation, you may come to be aware that the mind is like hitting the object or going toward
us say there is a noise outside. You take the noise as an object. Then you have some other
mind is going to that object, and then another object and to another object and so on. So mi
bends towards the object. That is why it is called ¡¥n?ma¡¦ in P??i.

After defining mentality the meditator defines materiality or matter. The fourth paragraph des

¡§Just as a man, by following a snake that he has seen in his house, finds its abode, so too scrutinizes that mentality, he seeks to find out what its occurrence is supported by and he se supported by the matter of the heart.¡¨ According to the teachings of Abhidhamma almost ev consciousness must have a physical basis. Seeing consciousness has the eye as a physica consciousness has the ear as a physical basis. First the meditator dwells on the mind. Then he discovers or seeks to find out by what the mind is supported. Then he comes to realize th the support of the factors of jh?na and those factors concomitant with the factors of jh?na.

¡§After that, he discerns as materiality the primary elements, which are the heart¡¦s support, remaining, derived, kinds of materiality that have the elements as their support.¡¨ There is he base is a dependent kind of matter. Heart base depends upon the other great primaries. The primaries or four great elements - earth element, water element, fire element and air elemen a very small particle of matter, depends upon the great elements. So he discovers these fou also. He defines all of that as materiality because it is molested by cold, etc. That means it is heat, by cold, by hunger, by thirst, by bites of insects and so on. You see r|pa in paragraph 4 called because it is molested or it changes with climate. It changes with hunger. It changes so on. So the meditator defines the base of that consciousness as r|pa, as matter. A person samatha or serenity or tranquillity meditation defines first the mental things, the factors of jh concomitants. Then he tries to find the base of these mental states. Then he defines the ma base of these mental states. He defines it as r|pa. During meditation he first dwells on menta from those mental things he goes to the material things. He defines n?ma and then he defin the person who has serenity meditation as a vehicle. That is for the person who practices se and gets jh?na.

There are people who do not practice samatha meditation but just practice vipassan? medita have no jh?nas to dwell upon, there is another method. Paragraph 5 and the following descr contemplating or defining mentality and materiality. Also a person whose vehicle is serenity method too. It is up to him whether he takes up mentality first and then materiality or materia then mentality. For the person whose vehicle is vipassana?, he must begin with materiality f to mentality. That is because materiality is easier for him to see than the mental states or typ consciousness. ¡§But one whose vehicle is pure insight, or that same aforesaid one whose discerns the four elements in brief or in detail in one of the various ways given in the chapter Definition of the Four Elements.¡¨ You have to go back to chapter 11.

The method of defining mentality and materiality is described by way of four elements, by wa by way of 12 bases, by way of aggregates and then by way of very brief defining. Different w here. The first way is by way of the four great elements. Actually the heading that we have a ¡¥Definition Based on the Four Primaries¡¦ should be here below paragraph 4. Only there do

the four primaries begin.

Here he dwells on materiality and not on mind first. ¡§When the elements have become clea essential characteristics, firstly, in the case of head hair originated by kamma there become instances of materiality with the body decad thus: the four elements, color, odor, flavor, nutri and life, and body sensitivity.¡¨ You need to be acquainted with the preceding chapters to ful this. The material properties are described as being caused by kamma, caused by consciou temperature, caused by nutrition. These material properties are treated in groups - a group o of nine, a group of ten and so on. These groups are not actually found in the Texts, but in th we find these and also in The Manual of Abhidhamma we find the material properties treated author is here explaining these groups. If you are not familiar with those groups, these passa difficult to understand or may be confusing.

Although it is said that it is according to the four great elements, we must understand that wh is describing the defining of the four great elements, the author¡¦s description is with referen parts of the body. So we have to go back to the 32 parts of the body and remember which p which. There are 32 parts of the body - head hairs, body hairs, nails, teeth, skin and so on u is water element. In the book it says head hair originated by kamma. Now head hair is origin and also originated by consciousness, originated by temperature, and originated by nutrition all four causes.

¡§Firstly, in the case of head hair originated by kamma there become plain ten instances of the body decad thus: the four elements, color, odor, flavor, nutritive essence, and life, and b sensitivity. And because the sex decad is present there too, there are another ten, [that is th with sex instead of body sensitivity]. And since the octad with nutritive essence as eighth, [th elements, and color, odor, flavor, and nutritive essence], originated by nutriment, and that or temperature, and that originated by consciousness are present there too, there are another total of 44 instances of materiality in the case of each of the 24 bodily parts of the fourfold or

If you look at the causes at the bottom of the paragraph (gorge, pus, dung, urine), they are temperature. Sweat, tears, spittle and snot are caused by temperature and consciousness. for them. There are four kinds of fire element. The last one is the fire that digests what we ea so on. That fire is kamma-originated. If you have a good stomach, that means you have goo and out-breaths are consciousness-originated. Breathing only occurs in those beings that ha The remaining are of fourfold origination. They are caused by four causes.

Then we take head hair. Since head hair is not in the above four groups, it is caused by four hair caused by kamma there are a number of material properties. And for head hair caused

temperature there are a number of material properties. All together there are how many? Wl
the book? ¡§So there is a total of 44 instances of materiality in the case of each of the 24 bo
fourfold origination.¡¨ So there are all together 44.

¡§But in the case of the four, namely, sweat, tears, spittle, and snot, which are originated by
and by consciousness, there are 16 instances of materiality with the two octads with nutritive
eight in each.¡¨ There are what is called ¡¥inseparables¡¦. You may remember that word ¡¥in
are those material properties which cannot be physically separated. There are always these
smallest particle of an atom according to Abhidhamma, there are these eight material prope
element, water element, fire element, air element (the four great primaries), and then color,
and nutritive essence. These eight are called ¡¥octad with nutritive essence as eighth¡¦. It is
P??i, but if you translate it into English, it becomes a long name, ¡¥octad with nutritive esser
eighth¡¦. In P??i it is suddha??haka.

¡§In the case of the four, namely, gorge, dung, pus, and urine, which are originated by temp
instances of materiality (Since they are caused by temperature there are only eight.) become
with the octad with nutritive essence as eighth (the same eight inseparables). This in the firs
method in the case of the 32 bodily aspects.¡¨

¡§But there are ten more aspects that become clear when these 32 aspects have become cl
these, firstly, nine instances of materiality, that is, the octad with nutritive essence as eighth
become plain in the case of the kamma-born part of heat that digests what is eaten, etc.¡¨ Th
of the four fire elements. There are the eight inseparables and the life principle. There are ni

¡§And likewise nine [instances of materiality], that is, the octad with nutritive essence as eigh
sound, in the case of the consciousness-born part [of air consisting] of in-breaths and out-br
in-breaths and out-breaths there are nine material properties, the eight inseparables plus so
instances of materiality, that is, the [kamma-born] life ennead and the three octads with nutri
eighth, in the case of each of the remaining eight [parts] that are of fourfold origination.¡¨ The
eight inseparables plus life principle. That is called ¡¥life ennead¡¦. And the three octads with
essence, that is the eight inseparables. So one life ennead and three groups of eight insepa
24 becomes 33. If you cannot count them don¡¦t worry.

In actual practice you need not see them like they are mentioned here. It is very difficult eve
have studied Abhidhamma. It is not so easy to see them clearly when we practice meditation
few of them, not all of them. Here everything is mentioned in detail, but it does not mean tha
practice vipassan? meditation that you must see all that is mentioned here. What is importar
is to be able to see in your mind clearly what you observe. Let us say you are making notes

observing sometimes mental things and sometimes material things. For example when you
breath, then you are concentrating on matter. Breath is air and air is matter. When you are c
your thoughts, then you are dwelling on the mind. You pay attention to them and you try to s
the breath as breath and your thoughts or mental states as mental states. When you can se
without being mixed with other things, you are said to have got the knowledge of discerning
So you need not go through all of these like taking head hair and trying to find out how many
properties there are in connection with the head hair and so on. If you can, it will be good for
on these and see them clearly. As I said the most important thing is to see them clearly and
is the one that goes to the object and that matter (r|pa) is the one that does not cognize. If y
that, you are said to have got the knowledge of discerning or knowledge of discriminating mi

This knowledge of discerning mind and matter does not come at the beginning of your pract
to that stage, you have to get enough concentration. At the beginning what you are doing is
concentration. After you get concentration, after your mind can be on the object without bein
mental hindrances, then you begin to see things clearly. Sometimes meditators think that the
They think that the moment they sit and watch they can see clearly. But later when they real
clearly they say ¡§What I said I saw clearly was nothing. In reality it is only now that I see cle
if you cannot follow all of these don¡¦t worry.

First the meditator dwells on material things in different ways. After defining r|pa (matter), he
define mind or mentality. Paragraph 8 describes that. ¡§Taking all these together under the
¡¥being molested¡¦, he sees them as ¡¥materiality¡¦. When he has discerned materiality thus
states become plain to him in accordance with the sense doors, that is to say, the 81 kinds o
consciousness¡¨ and so on. Here the different types of consciousness are mentioned. If you
chapters on consciousness, you will easily understand this. If you don¡¦t remember, then do

In practice sometimes you see something and you are aware of that seeing consciousness.
something and you are aware of that hearing consciousness. When you are mindful of seein
hearing consciousness, you are seeing mentality. Also you will not fail to see that conscious
which bends toward the object. That is what is called ¡¥n?ma¡¦ in P??i.

When watching or dwelling upon types of consciousness, you do not dwell upon the supram
consciousness. Supramundane consciousness and the mental factors that accompany such
are not the domain of vipassan?. In vipassan? you take only the mundane things as object.
because you have not yourself experienced the supramundane states. If you have not exper
clearly. In vipassan? meditation we are concerned only with what is mundane and not the su
supramundane types of consciousness are excluded from the types of consciousness which
vipassan? meditation.

All these types of consciousness and mental states are defined as mentality. You define ma
then you define mentality. You define materiality by way of the four great elements, actually
to the 42 kinds of elements.

Next we have in paragraph 9 the definition based on the 18 elements. First you have to und
elements from the previous chapters. They are element of the eye, element of the ear and s
the eye element, we do not mean the eyeball. What we mean is the sensitive part in the eye
eye where the image strikes. That sensitive area or sensitive part of the eye is what is called
here. The eyeball is not the eye element here. ¡§Instead of taking the piece of flesh variegat
and black circles, having length and breath, and fastened in the eye socket with a string of s
world terms ¡¥an eye¡¦, he defines as ¡¥eye element¡¦ the eye sensitivity of the kind describe
kinds of derived materiality in the Description of Aggregates (chapter 14, paragraph 47).¡¨ H
eye element, not the whole eyeball, but something in the eye, perhaps the retina, where the
through which we see things. ¡§He does not define as ¡¥eye element¡¦ the remaining instanc
which total 53¡¨ and so on. I will not burden with finding out the 53, or 43, or 45.

Next is the definition based on the twelve bases. There are twelve sense bases. If you unde
elements, the twelve bases you will also understand. It is another way of describing the reali
the Buddha taught, he taught in different ways. Sometimes he taught n?ma and r|pa in the 1
sometimes in twelve bases, and sometimes in five aggregates and so on. Following these d
treating what we call ¡¥the ultimate realities, we have different methods here. We can use a
methods to contemplate on mind and matter. Paragraph 12 is a definition based on the twel
there are eye base, ear base and so on. Eye base is the same as eye element. The eye ser
eye base and not the eyeball and others. ¡§He defines as ¡¥eye base¡¦ the sensitivity only, l
remaining instances of materiality¡¨ and so on.

The next paragraph is the definition based on the aggregates. It is a little brief. We only have
five aggregates instead of twelve bases or 18 elements described earlier. ¡§Another defines
than that by means of the aggregates.¡¨ You know the five aggregates. What is the first of th
aggregates? R|pa (corporeality). That r|pa is divided into 27 or 28 material properties, the fo
elements and the 24 depending upon them. The dependent ones are color, odor and so on.

There are 28 material properties. Among them only the first 18 or here 17 are suitable for co
is suitable for meditating on. Among the 28 material properties the last ten are not suitable f
comprehension, not suitable for meditation simply because they are just the modes or some
18. The first 18 are the real material properties. That is why they are called ¡¥r|pa-r|pa¡¦, the
In this book only 17 are mentioned. That is because it leaves out the heart base. The others

for contemplation. They are bodily intimation, verbal intimation, space element, lightness, ma
wieldiness, growth, continuity, aging, and impermanence of materiality. They are mentioned
aggregates. So if we take material properties as 27, then the first 17 and if 28 then the first 1
suitable for comprehension and the last ten are not.

In paragraph 14 r|pa is defined on the basis of the four primaries. Here a meditator does not
a time, but by taking them all as one. ¡§Any kind of materiality whatever all consists of the fo
elements and the materiality derived from the four primary elements, and he likewise discern
and a part of the mental data base as ¡¥mental¡¦. Then he defines mentality-materiality in bri
is mentality and this is materiality are called ¡§mentality-materiality¡¨¡¦.¡¨ In this method all ma
properties are matter and then mind base and dhamma base are called ¡¥n?ma¡¦. So the me
n?ma, this is r|pa.

Next is if the immaterial fails to become evident. This is important. Sometimes when you pra
you see the material things clearly. I mean in your mind, not with your eyes. You see the ma
clearly, but you don¡¦t see yet mentality or the mental states clearly. If you do not see the me
clearly, don¡¦t try to see them clearly. Try to see the material states more clearly. As your se
gets better and better, then your seeing of mental states will become clearer and clearer. Th
in paragraph 15. In this paragraph is one passage which was quoted by Mah?s? Say?daw in
of Insight. ¡§For in proportion as materiality becomes quite definite, disentangled and quite c
the immaterial states that have that [materiality] as their object become plain of themselves t
cannot see the mental factors clearly, don¡¦t try to see them clearly. Go back to matter and t
clearly. If you see matter clearly, then the mental states will become clear to you.

There is a simile given here. ¡§Just as, when a man with eyes looks for the reflection of his f
looking-glass and sees no reflection he does not throw the looking-glass away because the
appear; on the contrary he polishes it again and again, and then the reflection becomes plai
the looking-glass is clean.¡¨ So you try to see matter clearly, more and more clearly.

¡§And just as, when a man needing oil puts sesamum flour in a basin and wets it with water
out with only one or two pressings he does not throw sesamum flour away¡¨ and so on. Now
the Visuddhi Magga it also says it is sesamum flour or sesamum powder. Actually when you
do not crush sesamum seeds into flour and get oil from that. You just put the sesamum seed
press them with something. You put some hot water and grind with a pestle and squeeze ou
strange that sesamum flour is mentioned.

¡§But on the contrary he wets it again and again with hot water and squeezes and presses it
clear sesamum oil comes out - or just as, when a man wanting to clarify water has taken a k

kataka, not katuka.) nut and puts his hand inside the pot and rubbed it once or twice the wat
clear, he does not throw the kataka nut away; on the contrary he rubs it again and again, an
the fine mud subsides and the water becomes transparent and clear.¡¨ Kataka cannot be tra
It is explained in one P??i dictionary, not PTS, as a nut plant, the seed of which is used to cl
It is a kind of nut. We use it to clarify water. Its botanical name is given in that book. It is stry
potatorum. In a Sanskrit-English dictionary also the same Latin name is given, the clearing r
seeds wrapped around the insides of water jars precipitate the earthy particles in the water.
nut.

¡§For in proportion as materiality becomes quite definite, disentangled, and quite clear to hir
defilements that are opposing him subside, his consciousness becomes clear like the water
[precipitated] mud, and the immaterial states that have that [materiality] as their object becor
themselves too.¡¨ You deal with matter again and again until you see matter very clearly. As
clearer and clearer, your seeing of mental states will also become clearer and clearer.

When these mental states become clear to you, they become evident to you in three ways, t
contact, through feeling, and through consciousness. In fact it is difficult to see these during
Let us look at seeing the object through contact. Let us say you dwell upon the earth elemer
concentrate on the earth element, it is the object and there is consciousness. When you tak
object, your mind comes into contact with that earth element. That contact becomes evident
conjunction, with the first meeting with the object. Sometimes you may see that during medit
striking the object, something going together with the object. ¡§Then feeling associated with
feeling aggregate¡¨ - there is feeling with whatever object that you take. There is the awaren
object and there is always feeling as well, sometimes pleasurable, sometimes painful, some
also you will see. ¡§The associated perception as the perception aggregate¡¨ - sometimes yo
perception. ¡§The associated volition together with the aforesaid contact as the formations a
associated consciousness as the consciousness aggregate¡¨ - sometimes consciousness or
is more evident to you. Sometimes perception is evident to you. Sometimes feeling, sometin
object becomes evident to you. That you see through meditation. In this way through contac
through consciousness the mental states become evident to the meditator.

Paragraph 23 is important. ¡§Now it is only when he has become quite sure about discernin
way that immaterial states become quite evident to him in the three aspects. Therefore he sl
undertake the task of discerning the immaterial states after he has completed that , not othe
leaves off discerning materiality when, say one or two material states have become evident
discerning the immaterial, then he falls from his meditation subject like the mountain cow alr
under the Development of the Earth Kasi?a. But if he undertakes the task of discerning mate
his meditation subject comes to growth, increase and perfection.¡¨ For those who practice vi

alone it is imperative that they discern matter clearly first and then later on mentality. Otherw
said here he will fall from his meditation.

After seeing mind and matter clearly or after defining mentality and materiality clearly, then c
see there are only mentality and materiality at any given moment. There is nothing over and
mind and matter. This is the correct view of things. This correct view is described in the follo
paragraphs. There is no being apart from mere mentality-materiality. There is only mentality
any moment. When you take the breath as an object and you see the breath clearly, you als
of the breath clearly. You see that there are only these two things going on at that moment,
is the breath and the mind which is aware of this object. There are only these two going on.
which we can call ¡¥a person¡¦, ¡¥a being¡¦, ¡¥a self¡¦, or whatever. This view or this understa
only after you see mind and matter clearly or after you have defined mentality-materiality thr
practice.

The rest of this chapter is not difficult to understand actually. The similes are very easy to un

¡§As with the assembly of parts
The word ¡¥chariot¡¦ is countenanced,
So, when the aggregates are present,
¡¥A being¡¦ is said in common usage.¡¨

What we call ¡¥a being, ¡¥a person¡¦, ¡¥a man¡¦ or ¡¥a woman¡¦ is just a common usage, just
the usage in communication. If we analyze it, all we will find is mind and matter. Mind and m
together we call ¡¥a man¡¦ or ¡¥a woman¡¦ and so on. It is just like when we put together vari
may call something a chariot, or a house, or a fist, a lute, an army, a city, a tree. These are c
paragraphs 25-28.

A chariot is nothing but a combination of parts. I always use the example of a car instead of
you take the car apart, you lose the designation of car. There is no car at all apart from the p
put these parts back again in their correct places, then it becomes a car. So in the ultimate a
is no car at all. There are just the different parts that are put together. In the same way there
There are only walls, floors, roof and so on. If these are taken away one by one, we lose the
house. Also the fist, when you bend your fingers a certain way, there is a fist. Actually they a
fingers and not a fist. Then there is a lute with body and strings. Let us say a lute or a harp.
strings and the body. If we take the strings and body, there is no lute, no guitar, no harp or w
we have an army. In the olden days an army was said to consist of four parts. Those parts w
the horses, the infantry and the chariots. These are called the four component parts of an ar
army there must be these four things. These four things are called ¡¥an army¡¦. There is no a
elephants, horses and so on. Also we have a city. A city is surrounding walls, houses, street
city. There is no city apart from these houses, streets and so on. Then there is a tree. A tree

roots, branches, trunk, leaves. All of these put together we call ¡¥a tree¡¦. If they are taken a
one, we lose the designation tree. Also what we think to be a person, a human being, or an
or a woman is just the combination of mind and matter. Mind depends upon matter and matt
That will be described later. They depend upon each other and then function as a being, as
and so on. This is the correct vision.

¡§But when a man rejects this correct vision and assumes that a [permanent] being exists, h
either that it comes to be annihilated or that it does not.¡¨ When we take there to be a being,
entity, or a self, or a soul, then we have to conclude that it is permanent or that it is annihilat
death. There are these two conclusions and we cannot avoid one of these two conclusions i
correct vision. ¡§If he concludes that it does not come to be annihilated, he falls into the eter
(because according to him it continues to exist). If he concludes that it does come to be ann
falls into the annihilation [view]. Why? Because [the assumption] precludes any gradual cha
milk into curd.¡¨ He is paraphrasing the P??i sentence. The direct translation of the P??i sen
something like this: ¡§Because of the non-existence of some other thing which follows it or w
result unlike curd which exists following the milk.¡¨ Curd is made from milk. When it become
no milk. The milk disappears and the result of milk exists as curd. If you take the being to be
death, then it is not correct. A being is a combination of mind and matter. In the mind there a
factors, especially kamma. So long as there is kamma, the results of kamma will appear in t
will always be rebirth unless or until the mental defilements are eradicated. If we take the be
annihilated at death, then it is not in accordance with this. It is difficult to explain the gradual
like that of milk into curd. It can be explained against the view of permanency too. If you take
permanent, then milk will not become curd. It will remain milk all the time because you take t
permanent. Then if you take things to be annihilated at death or whatever, with the disappea
there will be nothing, no curd coming out of milk, as a result of milk. You may fall into either
extremes. ¡§So he either holds back, concluding that the assumed being is eternal, or he ov
concluding that it comes to be annihilated.¡¨ ¡¥Holding back¡¦ and ¡¥overreaching¡¦ are the w
Sutta. If you take things to be permanent, it is like holding back. If you take things to be anni
is overreaching. That means going beyond the view that so long as there are mental defilem
will always be results in the future or there will always be rebirths in the future. If you don¡¦t a
that, then you are going beyond that view, and so it is stated here as overreaching. Then the
quotes the Sutta. It is from the Itivuttaka. There is holding back and overreaching and there
holding back nor overreaching. Then the end of the Sutta is quoted. ¡§And how do those wit
bhikkhu sees what is become as become.¡¨ ¡¥Become¡¦ here means those that have becom
aggregates. The monk sees the five aggregates as the five aggregates. That means he sees
essence and their common essence. ¡¥Individual essence¡¦ means taking things one by one
their characteristics. The common characteristics are common to all phenomena.

For example we are all assembled here. Each one of us is different. I am Burmese. You are may be Vietnamese. We are different individually, but as human beings, we are the same. A beings. So being human beings is the common characteristic of all of us here. I being Burme American is the individual essence. ¡¥A bhikkhu sees what is become as become¡¦ means a aggregates according to reality, their characteristic or nature and their common characteristi actually impermanency, suffering, and soullessness. When he sees this, he sees that with th with the eradication of mental defilements there will be no more rebirth. But so long as there defilements and there is kamma, there is rebirth. This is the correct view.

Paragraph 32 and so on deal with the interdependence of mentality and materiality. Mind de matter depends on mind. They are not independent of each other. One depends upon the o This is described in different ways with different similes. These are very good observations c matter being dependent upon each other.

One is the simile of a blind man and a cripple. That is in paragraph 35. ¡§But for the purpose this meaning they gave this simile as an example: a man born blind and a stool-crawling crip somewhere.¡¨ ¡¥Stool-crawling¡¦ is the direct translation of the P??i word. In P??i a cripple is stool-crawling man or woman¡¦. Since the person is a cripple, he has to walk with the aid of a bench or whatever. ¡§The blind man said to the cripple ¡¥Look, I can do what should be don have no eyes with which to see what is rough and smooth¡¦. The cripple said ¡¥Look, I can c done by eyes, but I have no legs with which to go and come¡¦. The blind man was delighted, cripple climb up on his shoulder. Sitting on the blind man¡¦s shoulder the cripple spoke thus left, take the right; leave the right, take the left¡¦.¡¨ This is the balance of mind and matter. Mi cannot exist in human beings and in lower celestial beings. Mind needs a material basis for Material base alone cannot function. It has no cognition. It has no desires and so on. When together, then they can function together as a whole. There are other similes like a marionet sheaves of reeds put together and so on.

¡§And just as men depend upon
A boat for traversing the sea,
So does the mental body need
The matter-body for occurrence
And as the boat depends upon
The men for traversing the sea,
So does the matter-body need
The mental body for occurrence.
Depending each upon the other
The boat and men go on the sea
And so do mind and matter both

Depend the one upon the other.¡¨
First we see mind and matter clearly. Then we see that there are only mind and matter and
mind and matter depend upon each other to function and to support each other. When we s
have gained the defining of mentality-materiality or the delimitation of formations, or just the
of the right or correct view.

Student: For the Arahant somebody described it as like blowing out a candle. Is that what it
he no longer needs matter?

Teacher: No. That is different. Here it is just a meditator seeing mind and matter as they rea
the practice of vipassan? meditation. You can read a book and you can sit and think about t
other people that there is only mind and matter. Mind has the characteristic of bending towa
Matter is that which does not cognize and so on. Here what is meant is not knowledge gaine
listening to others, but knowledge gained from your own experience, your own practice of vi
We try to get stillness of mind. We try to clear our minds of hindrances. As the hindrances s
become still or tranquil and concentrated. When mind becomes concentrated, we will not fai
going on at the present moment. When we see that there is only mind and matter and we ca
thing through experience, then we are said to have defined mind and matter clearly. We see
nothing over and above mind and matter, no being, no man or woman, no self and so on. W
matter depend upon each other. Mind cannot exist by itself and be functional. Matter also ca
itself and function. Mind depends upon matter and matter depends upon mind. When we ha
said to have the purification of view or we are said to have reached this stage of this purifica

Chapter 19

The next chapter is on overcoming doubt. Overcoming doubt comes after the meditator see
cause-effect relationship between things. ¡§Knowledge established by overcoming doubt ab
divisions of time (That is past, present and future.) by means of discerning the conditions of
mentality-materiality is called ¡¥Purification by Overcoming Doubt¡¦.¡¨ In order to get to this s
first see mentalit?-materiality clearly. Then we will see or we must find out the conditions for
matter. When we can see the conditions or the causes for mind and matter, then we will be
doubts about whether we have been in the past, or what we have been in the past, things lik
come to that later.

This chapter deals with the Purification by Overcoming Doubt. That means trying to find the
conditions for mind and matter. I think you will need a little knowledge of Abhidhamma to un
¡§To begin wit, he considers thus: ¡¥Firstly, this mentality-materiality is not causeless, becau
were so, it would follow that, [having no causes to differentiate it], it would be identical every

and for all.¡¨ If mentality and materiality have no cause, it would be identical everywhere. Th
be the same. For all beings would be the same.

¡§It has no Overlord, etc., because of the non-existence of any Overlord, etc., over and abov
mentality-materiality. And because, if people then argue that mentality-materiality itself is its
etc., then it follows that their mentality-materiality, which they call the Overlord, etc., would it
causeless.¡¨ If they say that mentality-materiality itself is Overlord, then mentality-materiality
without cause, but mentality-materiality are found to be with causes. So it is not correct to ta
mentality-materiality itself is Overlord. ¡§Consequently, there must be a cause and a conditio
are they?¡¨

¡§Having thus directed his attention to mentality-materiality¡¦s cause and condition, he first d
cause and condition for the material body in this way: ¡¥When this body is born, it is not born
red or white lotus or water-lily, etc., or inside a store of jewels or pearls, etc.; on the contrary
worm in a rotting fish, in a rotting corpse, in rotting dough, in a drain, in a cesspool, etc., it is
between the receptacle for undigested food and the receptacle for the digested food (This is
beings.), behind the belly lining, in front of the backbone.¡¨ Do you know what that means?
is that the fetus lies in the womb with its back to the belly lining of the mother and facing the
That is what is described here. I don¡¦t know if that is really true. Does the fetus in the mothe
back of the mother? We need a doctor. I think instead of saying ¡¥behind the belly lining¡¦, w
¡¥with its back to the belly lining¡¦. Instead of saying ¡¥in front¡¦, we should say ¡¥keeping the
front of itself¡¦.

¡§(The fetus is) surrounded by the bowel and the entrails, in a place that is stinking, disgust
repulsive, and extremely cramped, being itself stinking, disgusting and repulsive. When it is
causes (root-causes) are the four things, namely, ignorance, craving, clinging and kamma.¡¨
confuse ¡¥root-causes¡¦ with the causes in Pa??h?na. You may remember the causal relatio
chapter on Dependent Origination. Among the 24 conditions the first one of them is root-cau
root-cause is the six roots (lobha, dosa, moha, alobha, adosa, and amoha). Here the P??i w
used, but it is not the hetu of Pa??h?na. We can dispense with root-causes¡¦ here. ¡§Its cau
things, namely, ignorance, craving, clinging, and kamma.¡¨ Ignorance is one of the roots. Cra
the roots. Clinging because it is craving is one of the roots. But kamma is different. These fo
the causes of the arising of the material body. ¡§Since it is they that bring about its birth; and
is its condition, since it is that that consolidates it.¡¨ So all together we get how many causes
(ignorance, craving, clinging, kamma) and one condition (nutriment). There are four causes
¡§So five things constitute its cause and condition. And of these, the three beginning with ign
decisive support for this body, as the mother is for her infant, and kamma begets it, as the fa
child; and nutriment sustains it as the wet-nurse does the infant.¡¨ So kamma produces the p

produces it with the help of, with the support of ignorance and clinging. After producing it, nu
sustains it.

¡§After discerning the material body¡¦s conditions in this way, he again discerns the mental b
beginning: ¡¥Due to eye and to visible object eye consciousness arises¡¦.¡¨ When seeing co
it is not without cause or condition. Due to the eye and to visible object eye consciousness
see something, there is seeing consciousness in us. But if we do not have the eye, we will n
there is nothing to be seen, there will be no seeing consciousness. Seeing consciousness d
and the visible object for its arising. Actually there are not only these two but some more. W
Light. If it is dark, we do not see anything. And then there must be attention. Even though so
something passes in front of us, still we don¡¦t see. We don¡¦t pay attention. Attention is also
for the arising of seeing consciousness, hearing consciousness and so on.

¡§When he has thus seen that the occurrence of mentality-materiality is due to conditions, th
as now, so in the past too its occurrence was due to conditions, and in the future too its occu
due to conditions.¡¨ The conditions of the present, he sees directly, but the conditions of the
the future, he uses inference. He does not see directly, but by inference he concludes that th
future must have conditions also.

¡§When he sees in this way, all his uncertainty is abandoned.¡¨ There are 16 kinds of doubt
described in the Discourses in many places. They are given here - five with regard to the pa
regard to the future and six with regard to the present. They are the following: ¡§1. Was I in t
Was I not in the past? 3. What was I in the past? 4. How was I in the past?¡¨ ¡¥How was I in
was I a king, or a brahmin, or an ordinary person or something like that. ¡¥What was I in the
I tall, was I short, was I black, was I fair or something like that. ¡§ 5. Having been what, what
past?¡¨ These are the five doubts with regard to past lives or past aggregates. He is just dou
not come to any conclusion. If he says ¡¥I was I was in the past¡¦, there is no doubt. But here
- was he in the past or was he not in the past and so on. It is similar for the future. ¡§ 1. Shal
the future? 2. Shall I not be in the future? 3. What shall I be in the future? 4. How shall I be i
future? 5. Having been what shall I be in the future?¡¨ And also the six kinds of uncertainty a
present are stated thus: ¡§ 1. Am I? 2. Am I not? 3. What am I? 4. How am I?¡¨ How am I is
black/ Am I white? Am I tall? Am I short? Do you have any thoughts about your height or you
Sub-Commentary explains that it is with reference to att? that he doubts. Do I identify att? w
is that att?? Is that att? tall or short, or black or white? It is not about one¡¦s own height, or c
whatever, but about one¡¦s att?. ¡§ 5. Whence will this being have come? 6. Whither will it be
where did I come? Where will I be born and where am I going? These are doubts about the
kinds of doubt. These are mentioned again and again in the Suttas.

When the meditator sees there is mind and matter only and that mind and matter have their
their arising, then doubts are abandoned or given up. ¡§Another sees the condition for menta
according to what is common to all and to what is not common to all, and that for materiality
according to kamma and so on.¡¨

¡§The condition for mentality is twofold, as that which is common to all and that which is not
Herein, the six doors beginning with the eye and the six objects beginning with visible data a
common to all.¡¨ That mean they are common to all wholesome and unwholesome consciou
wholesome or an unwholesome consciousness, they are always there. So they are commor

¡§But attention, etc., are not common to all; for wise attention, hearing the Good Dhamma, e
condition only for the profitable (That is wholesome.), while the opposite kinds are a conditio
unprofitable.¡¨ Now you find wise attention and unwise attention as a condition for wholesom
cittas. ¡§Kamma, etc., are a condition for the resultant mentality; and the life-continuum, etc.
condition for the functional.¡¨ In order to understand this you must understand-TAPE ENDS

study and practice of meditation and Buddhism.

Chapter 19

(Tape 40 / Ps: 1-8)

The next chapter is on overcoming doubt. Overcoming doubt comes after the meditator sees cause-effect relationship between things. ¡§Knowledge established by overcoming doubt ab divisions of time (That is past, present and future.) by means of discerning the conditions of mentality-materiality is called ¡¥Purification by Overcoming Doubt¡¦.¡¨ In order to get to this s first see mentalit?-materiality clearly. Then we will see or we must find out the conditions for matter. When we can see the conditions or the causes for mind and matter, then we will be doubts about whether we have been in the past, or what we have been in the past, things lik come to that later.

This chapter deals with the Purification by Overcoming Doubt. That means trying to find the conditions for mind and matter. I think you will need a little knowledge of Abhidhamma to un ¡§To begin wit, he considers thus: ¡¥Firstly, this mentality-materiality is not causeless, becau were so, it would follow that, [having no causes to differentiate it], it would be identical every and for all.¡¨ If mentality and materiality have no cause, it would be identical everywhere. Th be the same. For all beings would be the same.

¡§It has no Overlord, etc., because of the non-existence of any Overlord, etc., over and abov mentality-materiality. And because, if people then argue that mentality-materiality itself is its etc., then it follows that their mentality-materiality, which they call the Overlord, etc., would it causeless.¡¨ If they say that mentality-materiality itself is Overlord, then mentality-materiality without cause, but mentality-materiality are found to be with causes. So it is not correct to ta mentality-materiality itself is Overlord. ¡§Consequently, there must be a cause and a conditio are they?¡¨

¡§Having thus directed his attention to mentality-materiality¡¦s cause and condition, he first d cause and condition for the material body in this way: ¡¥When this body is born, it is not born red or white lotus or water-lily, etc., or inside a store of jewels or pearls, etc.; on the contrary worm in a rotting fish, in a rotting corpse, in rotting dough, in a drain, in a cesspool, etc., it is between the receptacle for undigested food and the receptacle for the digested food (This is beings.), behind the belly lining, in front of the backbone.¡¨ Do you know what that means? is that the fetus lies in the womb with its back to the belly lining of the mother and facing the That is what is described here. I don¡¦t know if that is really true. Does the fetus in the mothe back of the mother? We need a doctor. I think instead of saying ¡¥behind the belly lining¡¦, w ¡¥with its back to the belly lining¡¦. Instead of saying ¡¥in front¡¦, we should say ¡¥keeping the front of itself¡¦.

¡§(The fetus is) surrounded by the bowel and the entrails, in a place that is stinking, disgust
repulsive, and extremely cramped, being itself stinking, disgusting and repulsive. When it is
causes (root-causes) are the four things, namely, ignorance, craving, clinging and kamma.¡¨
confuse ¡¥root-causes¡¦ with the causes in Pa??h?na. You may remember the causal relatio
chapter on Dependent Origination. Among the 24 conditions the first one of them is root-cau
root-cause is the six roots (lobha, dosa, moha, alobha, adosa, and amoha). Here the P??i w
used, but it is not the hetu of Pa??h?na. We can dispense with root-causes¡¦ here. ¡§Its cau
things, namely, ignorance, craving, clinging, and kamma.¡¨ Ignorance is one of the roots. Cr
the roots. Clinging because it is craving is one of the roots. But kamma is different. These fo
the causes of the arising of the material body. ¡§Since it is they that bring about its birth; and
is its condition, since it is that that consolidates it.¡¨ So all together we get how many causes
(ignorance, craving, clinging, kamma) and one condition (nutriment). There are four causes
¡§So five things constitute its cause and condition. And of these, the three beginning with ign
decisive support for this body, as the mother is for her infant, and kamma begets it, as the fa
child; and nutriment sustains it as the wet-nurse does the infant.¡¨ So kamma produces the p
produces it with the help of, with the support of ignorance and clinging. After producing it, nu
sustains it.

¡§After discerning the material body¡¦s conditions in this way, he again discerns the mental b
beginning: ¡¥Due to eye and to visible object eye consciousness arises¡¦.¡¨ When seeing co
it is not without cause or condition. Due to the eye and to visible object eye consciousness a
see something, there is seeing consciousness in us. But if we do not have the eye, we will n
there is nothing to be seen, there will be no seeing consciousness. Seeing consciousness d
and the visible object for its arising. Actually there are not only these two but some more. W
Light. If it is dark, we do not see anything. And then there must be attention. Even though so
something passes in front of us, still we don¡¦t see. We don¡¦t pay attention. Attention is also
for the arising of seeing consciousness, hearing consciousness and so on.

¡§When he has thus seen that the occurrence of mentality-materiality is due to conditions, th
as now, so in the past too its occurrence was due to conditions, and in the future too its occu
due to conditions.¡¨ The conditions of the present, he sees directly, but the conditions of the
the future, he uses inference. He does not see directly, but by inference he concludes that th
future must have conditions also.

¡§When he sees in this way, all his uncertainty is abandoned.¡¨ There are 16 kinds of doubt
described in the Discourses in many places. They are given here - five with regard to the pa
regard to the future and six with regard to the present. They are the following: ¡§1. Was I in t

Was I not in the past? 3. What was I in the past? 4. How was I in the past?¡¨ ¡¥How was I in
was I a king, or a brahmin, or an ordinary person or something like that. ¡¥What was I in the
I tall, was I short, was I black, was I fair or something like that. ¡§ 5. Having been what, what
past?¡¨ These are the five doubts with regard to past lives or past aggregates. He is just dou
not come to any conclusion. If he says ¡¥I was I was in the past¡¦, there is no doubt. But here
- was he in the past or was he not in the past and so on. It is similar for the future. ¡§ 1. Shal
the future? 2. Shall I not be in the future? 3. What shall I be in the future? 4. How shall I be i
future? 5. Having been what shall I be in the future?¡¨ And also the six kinds of uncertainty a
present are stated thus: ¡§ 1. Am I? 2. Am I not? 3. What am I? 4. How am I?¡¨ How am I is
black/ Am I white? Am I tall? Am I short? Do you have any thoughts about your height or you
Sub-Commentary explains that it is with reference to att? that he doubts. Do I identify att? w
is that att?? Is that att? tall or short, or black or white? It is not about one¡¦s own height, or c
whatever, but about one¡¦s att?. ¡§ 5. Whence will this being have come? 6. Whither will it be
where did I come? Where will I be born and where am I going? These are doubts about the
kinds of doubt. These are mentioned again and again in the Suttas.

When the meditator sees there is mind and matter only and that mind and matter have their
their arising, then doubts are abandoned or given up. ¡§Another sees the condition for menta
according to what is common to all and to what is not common to all, and that for materiality
according to kamma and so on.¡¨

¡§The condition for mentality is twofold, as that which is common to all and that which is not
Herein, the six doors beginning with the eye and the six objects beginning with visible data a
common to all.¡¨ That mean they are common to all wholesome and unwholesome consciou
wholesome or an unwholesome consciousness, they are always there. So they are commor

¡§But attention, etc., are not common to all; for wise attention, hearing the Good Dhamma, e

study and practice of meditation and Buddhism.

Chapter 20
(Tape 40 / Ps: 1-19)

Next is the chapter on what is the path and what is not the path. ¡§The knowledge establishe know the path and the not-path thus ¡¥This is the path, this is not the path¡¦ is called ¡¥Purifi knowledge and vision of what is the path and what is not the path¡¦.¡¨

When a person practices meditation and he advances, there are different stages of develop certain stage where there arises a certain kind of illumination, or he feels elation. His practic meditation is very good. This will be explained later. When these states arise, the meditator enlightenment. If he takes them to be enlightenment, he will not practice anymore. And so h enlightenment at all. These are called ¡¥impediments¡¦.

These impediments are a block to the meditator¡¦s progress or to his enlightenment. If he ta way, to be the path to enlightenment, then he is wrong. He will not get enlightenment at all. understand these are not the path to enlightenment. The path to enlightenment is to go furth impermanency, suffering and soulless nature of things. A yogi must be able to see ¡¥This is is incorrect¡¦ or ¡¥This is the path to enlightenment and this is not the path to enlightenment¡ chapter deals with this.

Before coming to these impediments he must do some contemplation. Different kinds of con mentioned in this chapter. ¡§One who desires to accomplish this should first of all apply hims inductive insight called ¡¥comprehension by groups¡¦.¡¨ That means comprehending not in d taking as a group, for example taking materiality as a group and contemplating on it. It is cal insight¡¦ or ¡¥comprehension by groups¡¦. These two names are used in India and in Sri Lan

That is what is said in the Commentary. You have the footnote down there. ¡§This, it seems the inhabitants of Jambud?pa (India).¡¨ Comprehension by groups seems to be the term use ¡§However, insight into states by means of the method beginning ¡¥Any materiality whateve Insight¡¦. This, it seems, is the term used by the inhabitants of Tambapa??id?pa (Sri Lanka). insight and comprehension by groups mean the same thing. Different teachers have differen thing.

Why does he have to do comprehension by groups or inductive insight? ¡§Because knowled and what is not the path appears in connection with the appearance of illumination, etc. (Tha explained later.), in one who has begun insight. For it is after illumination, etc., have appeare has already begun insight that there comes to be knowledge of what is the path and what is must be able to decide that these are not the path and these will not lead to enlightenment.

¡§Comprehension of groups is the beginning of insight.¡¨ This is the first knowledge in the lis
vipassan? knowledges. Before that we are not in vipassan? proper. At first we try to be mind
at the present moment. Later on we will come to see mind and matter clearly. Then we see t
conditions of mind and matter. While we are doing this we are not in the domain of vipassan
not yet gone into vipassan? proper. Only when we come to the comprehension by groups do
vipassan?.

¡§Comprehension by groups is the beginning of insight. That is why it is set forth next to the
Doubt. Besides, knowledge of what is the path, and what is not the path arises when Full Un
Investigation is occurring, and Full Understanding as Investigation comes next to Full Under
Known. So this is also a reason why one who desires to accomplish this purification by know
what is the path and what is not the path should first of all apply himself to comprehension b
is explaining why a yogi has to do this inductive insight or comprehension by groups.

There are three kinds of full understanding. In paragraph 3 they are full understanding as the
understanding as investigating, and full understanding as abandoning. These are the three k
understanding.

¡§Herein, the understanding that occurs by observing the specific characteristic of such and
¡¥materiality (r|pa) has the characteristic of being molested¡¦, ¡¥feeling has the characteristic
felt¡¦, is called ¡¥full understanding as the known¡¦.¡¨ Full understanding as the known is und
specific characteristics of things we observe. There are two kinds of characteristics, the com
characteristics and the specific characteristics of everything we observe. When we see the s
characteristics of the things we observe, then we are said to have this understanding of the
the characteristic of bending toward the object. R|pa has the characteristic of being molested
is their specific characteristic. They do not share this characteristic with others. Since r|pa do
the characteristic of being molested with n?ma and n?ma does not share the characteristic o
the object with r|pa, these are considered their specific characteristics. However all condition
the world do have common characteristics. They are impermanency, suffering and soullessn
specific characteristic of things, then we have the full understanding of the known.

¡§The understanding consisting in insight with the general characteristics as its object that o
attributing a general characteristic to those same states in the way beginning ¡¥Materiality is
feeling is impermanent¡¦ is called ¡¥full understanding as investigating¡¦.¡¨ When we see the
characteristics of things, when we see impermanency, suffering and soulless nature of thing
have ¡¥full understanding as investigating¡¦.

The next one is: ¡§The understanding consisting in insight with the characteristics as its obje
as the abandoning of the perception of permanence, etc., in those same states is called ¡¥fu
as abandoning¡¦.¡¨ When we see, when we understand that something is impermanent, we a
permanence. When we see something as dukkha (suffering), then we abandon the notion o
is full understanding as abandoning. They have different aspects.

¡§Herein, the plane of full understanding as the known extends from the Delimitation of Form
discriminating mind and matter or seeing mind and matter clearly.) up to the Discernment of
(Chapter 19); for in this interval the penetration of the specific characteristics of states predo
¡¥Plane¡¦ here means domain, so it should be ¡¥the domain of full understanding as known¡¦

¡§The domain of full understanding as investigation extends from Comprehension by Groups
of Rise and Fall (Chapter 21); for in this interval the penetration of the general characteristic
predominates.¡¨ During these stages a yogi sees the general characteristics of things, that th
impermanent and so on.

¡§The domain of full understanding as abandoning extends from Contemplation of Dissolutio
seeing rising and falling the yogi will see the dissolution. ¡§For from there onwards the Seve
that effect the abandoning of the perception of permanence, etc., predominate thus.¡¨ These
kinds of contemplation: 1. Contemplating [formations] as impermanent, a man abandons the
permanence and so on. These three kinds of full understanding we should know. Up to the l
has achieved the full understanding as the known. After the full understanding as known the
understanding as investigating. For that purpose the yogi has to do inductive insight or the c
groups.

Now we have comprehension by groups paragraph 6. ¡§How is it that understanding of defin
present states by summarization is knowledge of comprehension?¡¨ This is a quotation take
Pa?isambhid?magga.

Whenever matter and the mental things are described the Buddha described them as belon
future, as being internal and external, as being subtle and gross, as being far and near and s
all materiality whether past, present or future and so on and then contemplating on that mate
impermanent, this is one kind of comprehension. ¡§He defines it as painful.¡¨ That is another
comprehension. ¡§He defines it as not self.¡¨ That is another kind of comprehension.

Paragraph 9 ¡§Herein, the abbreviation ¡¥the eye..(etc.).. is aging and death¡¦ should be unc
represent the following sets of things elided¡¨ and so on. In the previous quotation we see
mentality-materiality, feelings, perceptions and so on. What is not directly included in this qu

given in paragraph 9. Herein, the abbreviation should be understood to represent the followi
elided. They are not mentioned in the quotation, but they should be understood as being inc
the states that occur in the doors and so on.

One thing important is in paragraph 12, the second part. ¡§And as regards those that are am
comprehension a beginning should be made by comprehending those among them that are
discernible by the individual [meditator].¡¨ That is very important. When we meditate, we mus
we must be mindful of what is obvious, what is prominent and what is easy to see. We don¡¦
what is difficult to see. Simply we cannot do that. This statement is very important. When we
vipassan? meditation, we take the object that is easy to see at that moment, what is obvious
prominent at that moment. That is why although we are concentrating on the breath, if there
loud enough, we pay attention to that too. That is because at that moment it is more obvious
So we have to be mindful of that. It is following the advice given in the Visuddhi Magga.

Then we have comprehension by groups. I hope you have read all this. Even one materiality
in different ways. It is impermanent in the sense of destruction. It is painful in the sense of te
not self in the sense of having no core. This is how we contemplate the impermanent nature
and soulless nature of things. You may take any materiality - past, present, future, internal, e
on. Then you define or try to see that this is impermanent in the sense of destruction. That m
destroyed, it is dissolved after coming into existence and so it is impermanent and so on. It
in the sense of destruction. It is painful (dukkha) in the sense of terror because it is fearful. W
painful, it is fearful. And it is not self in the sense of having no core, having no inner core. Wh
contemplate that r|pa is impermanent in the sense of destruction, this is one kind of comprel
take r|pa in different aspects, such as r|pa in the past was impermanent in the sense of dest
the present is impermanent in the sense of destruction, r|pa in the future is impermanent in t
destruction and so on, in that way you can contemplate in eleven ways on one r|pa. You ma
present, future, internal, external, subtle, gross, inferior, superior, far, near. In this way you m
contemplate in one way or in eleven ways. You may contemplate in the same way painful in
and not self in the sense of having no core in the same way.

In paragraph 16 we have to make some changes in about the middle of the paragraph. ¡§Fo
is painful, and it is impossible to escape the impermanence or the rise and fall and oppressio
how could it have the state of a doer and so on?¡¨ Here he misunderstood two words. The c
should be ¡§For that which is impermanent and painful is incapable of preventing even its ow
oppression by rise and fall.¡¨ So when you contemplate on the no self nature of things, then
there is no self, no doer, no experiencer and so on. Also you contemplate like this: What is i
painful. Right? Whatever is impermanent is painful. And whatever is impermanent and painf
incapable of preventing its own impermanence and being oppressed by rising and falling. Th

here.

He misunderstood the P??i word ¡¥udayabbhayap??ana¡¦. He takes udaya to mean one thi
thing and p??ana to mean one thing. But here the meaning is that first you see the arising a
things. Something arises and disappears. When you see the arising and disappearing of thi
impermanence of things. When it is impermanent, it is oppressed by rising and falling. So yo
suffering or that it is unsatisfactory. That is the explanation of it being dukkha. It is dukkha b
oppressed. Oppressed by what? Oppressed by rising and falling. When you practice medita
things coming and going, coming and going, you clearly see the dukkha nature of things. So
¡¥fall¡¦ and ¡¥oppression¡¦, but oppression by rise and fall. That means being oppressed by r
falling. When you see things arising and disappearing, arising and disappearing, you see thi
suffering or being painful. ¡§For that which is impermanent and painful is incapable of preve
own impermanence or oppression by rise and fall.¡¨ And so it is no self.

The word ¡¥anatta¡¦ has different meanings. The direct meaning is no self. Right? It implies t
exercise any authority over things. Insusceptibility to the exercise of authority over things is a
in the meaning of the word ¡¥anatta¡¦. When you want to see the anatta nature of things, you
is impermanent. This is painful. That which is painful and impermanent is no self. That mear
prevent itself from being impermanent. There is no way of exercising authority. Don¡¦t becom
don¡¦t become painful - there is incapability of exercising authority over these things. It is inc
preventing its own impermanence and its own oppression. That is contemplation of not self.

The same contemplation used for r|pa is applied to feeling and so on. Then there is the expl
strengthening of comprehension of impermanence etc. In forty ways you try to see the ment
phenomena as impermanent, painful, as a boil, a dart, a calamity and so on. In paragraph 18
and in paragraph 19 the meaning of the word is given, one by one.

In paragraph 19 about a third of the way down ¡§As a disaster because of bringing unforese
adversity, and because of¡¨ - instead of ¡¥and¡¦ there should be ¡¥as terror¡¦. It should be ¡§A
because of being the basis for all kinds of terror.¡¨ Otherwise you do not get forty.

S?dhu! S?dhu! S?dhu!

(Tape 41 / Ps: 20 ¡V 75)

When we practice vipassan? meditation, we try to be mindful of whatever is at the present m
¡¥whatever¡¦ is sometimes matter or r|pa ad sometimes mind or n?ma. Sometimes we are m
the movements. At that time we are taking matter as an object and when we are mindful of c

emotions, then we are mindful of the mind or the mental properties. In the beginning we just
of mind or matter, whatever is at the present moment. After some time as the concentration
able to see the individual characteristics of what we observe.

So there are two kinds of characteristics we have to understand with regard to vipassan? me
thing we will see is the individual characteristics of things. So when we concentrate on the m
come to see that mind is that which inclines towards the object. So when we watch our minc
consciousness, it seems to go to the object. It seems to incline towards the object. That incli
the object is the characteristic of mind. When we concentrate on matter, then we will come t
has no cognizing power. It doesn¡¦t cognize. That also we will come to see and that is a kinc
characteristic of matter.

During the stages that we have just studied, during the stages of discerning mind and matte
stage of discerning the causes of mind and matter, a yogi sees the specific or the individual
of things. From that stage in order to go to the next stage, a yogi needs to see the general c
or common characteristics of things. ¡¥Common characteristic¡¦ means the impermanence, s
nature of things. Impermanence and the others are common to all phenomena that is all min
formations. Actually during the stage of seeing the causes, a yogi comes to see the arising a
of what he observes. When he observes let us say anger, then he knows that it has arisen a
disappeared, he knows that it has disappeared. So he sees arising and falling.

That is direct seeing. From that direct seeing he infers the impermanence and so on of those
observe. That is those of the past and those of the future. Chapter 20 deals with that kind of
kind of meditation. In the beginning of that chapter it says ¡§One who desires to accomplish
of all apply himself to the inductive insight.¡¨ So it is called ¡¥inductive insight¡¦. Actually it is
inferential. It is not direct insight. Inferential insight can come only after direct insight. So if w
have direct insight, there can be no inferential insight. First we must see the present thing as
Then we infer that just as this present matter is impermanent, so the past matter must be im
the future matter will be impermanent. From what we have seen directly, we infer what we d
impermanent, suffering and so on. In order to develop that insight here, it is said that we mu
inductive insight, what is called ¡¥comprehension by group¡¦. The beginning part of this chap
this insight, ¡¥comprehension by group¡¦ or ¡¥inductive insight¡¦. With regard to this insight th
mentions the three kinds of full understanding - full understanding as the known, full underst
investigating, and full understanding as abandoning. Actually we have gone through these p
understanding as the known is when we see the individual characteristics of things. Now a y
second stage which is full understanding as investigating.

How does a yogi practice insight comprehension by group? Whenever matter or something

mentioned or described it as past, future, present, internal, external, gross and so on. There these things. The aspects of whatever kind of materiality may be seen as past, future, prese external (5), gross, subtle (7), inferior, superior (9), far, near(11). With regard to these eleve the different kinds of materiality are described.

When a yogi does comprehension by group, he does not take each one of the material prop just the materiality as a group as one. Then he sees materiality which belongs to the past as materiality which belongs to the future as impermanent and so on. When he takes matter as earth element, water element and so on separately, then he is said to be doing comprehens Actually ¡¥a group¡¦ means just taking r|pa, I mean if it is r|pa, taking r|pa as a whole. So a p practice meditation on r|pa as all r|pa is impermanent. That is one comprehension.

Or he can take r|pa with reference to the eleven aspects. So r|pa in the past is impermanent present is impermanent, and r|pa in the future is impermanent, and then internal r|pa is impe r|pa is impermanent and so on. If he does that way, then he said to be doing in eleven differ there can be one comprehension or there can be eleven comprehensions. They are describ paragraphs.

If you look at paragraph 13, it says there: ¡§Here is the application of the directions dealing w aggregates: ¡¥Any materiality whatever, whether past, future or present, internal or external, subtle, inferior or superior, far or near - he defines all materiality as impermanent: this is one comprehension.¡¨

One word is missing there or it is stated in brief or in an elliptical way. You see only two ther Impermanent and not-self. What is missing? Dukkha or suffering is missing. So there must b painful. He defines as painful and then dots, and he defines as not-self. This is one kind of c So this is taking r|pa as a whole.

Then taking r|pa as a whole but with reference to past and so on, we get eleven kinds of con Towards the end of paragraph 14 it says: ¡§And all this is impermanent in the sense of destr Accordingly there is one kind of comprehension in this way; but it is effected in eleven ways. one kind of contemplation or eleven kinds of contemplation. If we take r|pa as a whole, then contemplation. If we take r|pa with reference to past, future, present and so on, then we get contemplating on matter or materiality.

Just as there is one or eleven contemplations with regard to impermanence, there is one or to suffering or painfulness in paragraph 15. The same is true with anatta (no self) in paragra is one contemplation or eleven contemplations. We have one meaning of the word ¡¥anatta¡

That is what? ¡§In the sense of having no core.¡¨ This is one meaning of anatta. The word ¡¥
different meanings. So one meaning is that there is no core. That is why it is called ¡¥anatta
r|pa is anatta, we mean r|pa has no inner core, or substance, or whatever. This is one mean
interpretation of the word ¡¥anatta¡¦. We will meet another interpretation later.

After doing this also with regard to the other aggregates such as feeling and so on, the yogi
view mind and matter in forty different ways. That is discussed in paragraph 18 and so on, ¡¥
Comprehension of Impermanence, etc., in Forty Ways.¡¦ They are given in brief and also ea
later in paragraph 19.

These end with the sound ¡¥to¡¦ in P??i and so we have aniccato, dukkhato, rogato, gandat
Myanmar these are called ¡¥forty tos¡¦. You know the word ¡¥to¡¦ means ¡¥forest¡¦ in Burme
like a play on words. The word ¡¥to¡¦ really is the P??i particle and it is a suffix which means
¡¥from¡¦, or ¡¥because of¡¦. Here it means ¡¥as¡¦. The P??i word ¡¥to¡¦ is taken to mean som
forest here. So we have forty ¡¥tos¡¦. There are forty ways of looking at mind and matter. Th
later divided into meaning ¡¥impermanent¡¦, ¡¥painful¡¦ and ¡¥no self¡¦.

As I said last week, we have to add or we have to make changes somewhere in paragraph 1
paragraph 19 if you come up two or three lines, you will see ¡¥adversity and because of bei
¡¥and¡¦ should be rubbed out and then ¡¥as terror¡¦ should be put there. So it is ¡¥as terror b
the basis for all kinds of terror¡¦. And on page 712, about 15 lines down (in the fourth edition
¡¥vain¡¦ should be in italics. That is not so important, but it should be in italics. So we get all
forty different ways of contemplating on n?ma and r|pa actually.

Paragraph 20: these are grouped with regard to impermanence, suffering and not self.
¡§Now there are fifty kinds of Contemplation of Impermanence here by taking the following t
each aggregate: as impermanent, as disintegrating, as fickle¡¨ and so on. There are twenty-
Contemplation of Not-Self, and there are one hundred twenty-five kinds of Contemplation of
rest beginning with ¡¥as painful, as a disease¡¦ and so on.

These forty are divided into three groups - impermanence, pain and not-self. After viewing m
this way, the yogi is instructed to sharpen his faculties. That is if he cannot bring this contem
success. If he does not succeed in contemplating in this way, then he should sharpen his fa
stated in paragraph 21. That is: ¡§(1) He sees the destruction of arisen formations; (2) and i
[occupation] he makes sure of working carefully¡¨ and so on. So he has to sharpen his facul
methods.

And then #8 says ¡§wherein he overcomes pain by renunciation.¡¨ What does ¡¥overcome p

mean? Here ¡¥renunciation¡¦ simply means ¡¥effort¡¦. The P??i word ¡¥nekkhamma¡¦ is som
¡¥Nekkhamma¡¦ means ¡¥to get out of¡¦. So here it means ¡¥to get out of laziness¡¦, which m
effort. So ¡¥to overcome pain by renunciation¡¦ really means ¡¥to overcome pain by effort, by

¡§He should avoid the seven unsuitable things in the way stated in the Description of the Ea
are explained before.), and cultivate the seven suitable things and he should comprehend th
time and the immaterial at another.¡¨ At one time he should contemplate on r|pa (matter) and
on n?ma or immaterial things.

Now we have ¡¥Contemplation of the Material¡¦. ¡§While comprehending materiality he shou
is generated.¡¨ So he should see how it arises or its arising, its generation. That should be th
his meditation at that time, ¡§that is to say how this materiality is generated by four causes b
kamma.¡¨ There are four causes of matter. I think you have met them before in chapter 19,
are what? Kamma, consciousness, temperature, and nutriment.

¡§When materiality is being generated in any being, it is first generated from kamma.¡¨ So th
that arises at the beginning of a given life is generated by kamma or is the result of kamma.
actual moment of rebirth-linking of a child in the womb, the first thirty instances of materiality
thirty material properties.) are generated in the triple continuity, in other words the decad of
[heart] basis, body and sex.¡¨ So there are the decads of physical heart basis, the decad of b
decad of sex. ¡§Those are generated at the actual instance of rebirth-linking consciousness¡
at the instant of its arising, so too at the instant of its presence and at the instant of its dissol

There are material properties generated by kamma and these material properties generated
very first moment in one¡¦s life. And each moment has three sub-moments. At every sub-mo
generated by kamma arises. So at every moment the kamma-born-matter arises all through
very close to the moment of death. At all three sub-moments the kamma-born-matter is gene
first moment, at the arising moment, there are thirty. These thirty will exist for seventeen tho
At the sub-moment of presence, static moment, another thirty are produced. So at that mom
the first thirty and the new thirty, so there are sixty.

At the dissolution moment of relinking consciousness another thirty are produced. So at that
ninety. And then at the next moment there are one hundred-twenty and so on through sever
After seventeen thought moments the number will be constant because thirty are produced a

¡§Herein the cessation of materiality is slow and its transformation ponderous.¡¨ We should r
means that materiality or matter is slow in dissolution. That means the life of matter is longer
of consciousness. Matter exists seventeen times longer than a thought moment exists. Whe

will exist for, it will last for, seventeen thought moments before it disappears. So cessation o
is slow. That means materiality has a longer life than a thought moment. ¡§And its transform
while the cessation of consciousness is swift and its transformation quick.¡¨ The arising and
thought moments are quick, just one moment or say just one big moment or three small mor

It is said: ¡§Bhikkhus, I see no other thing that is so quickly transformed as the mind. (That is
the Buddha.) For the life-continuum consciousness arises and ceases sixteen times while o
endures.¡¨ Those that are produced at the first moment of relinking will last until the sevente
moments. While sixteen thought moments come and go, they exist.

¡§With consciousness the instant of arising, instant of presence (That means static stage.) a
dissolution are equal (They are the same.).¡¨ I said that the life of a material property is seve
moments. Right? So how many small moments are there? Fifty-one small moments. Right?
there are fifty-one small moments. There is the instant of arising, the instant of presence and
dissolution. With regard to consciousness these three instances are of equal duration. They
are the same. But with regard to a material property the instant of arising is one small mome
sub-moment. The instant of dissolution is one sub-moment. The forty-nine sub-moments bet
dissolution) are one instant of presence for a material property.

Do you follow me? Matter lasts for fifty-one small moments of consciousness. So the arising
the dissolution of matter is different from the arising, the presence and the dissolution of con
Right? The arising and the dissolution (moments) of both mind and matter are equal, just on
presence of consciousness is only one sub-moment, but the presence of matter is forty-nine
consciousness the instant of arising, instant of presence, and instant of dissolution are equa
materiality only the instants of arising and dissolution are quick like those [of consciousness]
instant of its presence is long and lasts while sixteen consciousnesses arise and cease.¡¨ Th
its arising there are sixteen consciousnesses.

Now paragraph 25, that is important. It says ¡¥the second life-continuum¡¦, but the author ha
the first life-continuum. Right? If you read it before you came to the class, I was wondering w
understand by that. The actual meaning here is the life-continuum as a second consciousne
consciousness is the first consciousness and then life-continuum is the second consciousne
translation should not be ¡¥second life-continuum¡¦, but ¡¥life-continuum as a second consci
The P??i words that you are familiar with are ¡¥dutiyampi¡¦, ¡¥tatiyampi¡¦. Right? When you t
say ¡§Dutiyampi Buddha? sarana? gacch?mi¡¨ and so on. From the word ¡¥dutiyampi¡¦ if you
get ¡¥dutiyam¡¦. That word can be an adjective or an adverb. Here it is an adverb, not an adj
P??i it is ¡¥dutiya? bhava~ga?¡¦. ¡¥Bhava~ga¡¦ means life-continuum. ¡¥Dutiya? bhava~ga?
second bhava~ga¡¦, but it means ¡¥as a second consciousness, bhava~ga arises¡¦.

¡§The life-continuum as second consciousness arises with the prenascent physical [heart] b
which has already reached presence and arose at the rebirth-linking consciousness¡¦ instan
is also not accurate. What is to be at the end he put in front. Here the translation should run
¡§The life-continuum as a second consciousness arises with the prenascent physical [heart]
support, which arose at the rebirth-linking consciousness¡¦ instant of arising and has already
presence.¡¨ The sequence should be like that. We cannot change that sequence here becau
and then it must reach the instant of presence. That means when life-continuum arises, the
arose at the moment of relinking has reached the instance of presence. Now here relinking
first citta in the thought process and the second citta in the thought process is the life-contin
consciousness. The heart basis arose with relinking consciousness. At the moment of the fi
arising. But later on it has reached presence or the static stage. When it is in the static stage
consciousness or bhava~ga arises. That bhava~ga arises depending upon the heart basis.
is talking about here. The life-continuum arises with the prenascent physical heart basis as i
heart basis has already arisen and now it has reached the stage of presence and at that mo
life-continuum arises. So it arises taking the heart basis as its support. The life-continuum ha
prenascent physical heart basis as its support which arose at the rebirth-linking consciousn
arising and has already reached presence.

Now the third life-continuum is the same. The life-continuum as a third consciousness arises
information, after relinking consciousness there are how many arisings of life-continuum? Si
are sixteen life-continuum consciousnesses arising after relinking consciousness. Here ¡¥the
the third life-continuum because it is really the second life-continuum. So the life-continuum
consciousness arises with prenascent physical heart basis as its support and so on. So it go
the arising moment of first life-continuum, there arises heart basis. When the second life-con
that heart has reached its present stage. And then it forms the basis for the second life-conti
like this. The later consciousness takes support from the heart basis which arose at least on
before its arising. If you put #1, #2, #3, #4, let us say #2 consciousness arises taking heart b
arose with #1 consciousness as its support. And then #3 consciousness arises taking heart
with #2 consciousness as its support and so on. It can go all through our life. It happens in th
throughout life.

¡§But in one who is facing death sixteen consciousnesses arise with a single prenascent phy
as their support, which has already reached presence.¡¨ When a person is about to die, all
ceases to arise with the seventeenth consciousness reckoned backward from the death con
there is death consciousness. We reckon backward taking death consciousness as #1, then
#17. With the dissolution of death consciousness, no more kamma-born matter is produced
is produced at that moment will last until the moment of death. So there is only one heart ba

for these sixteen thought moments. ¡§But in one who is facing death sixteen consciousness
single prenascent physical heart basis as their support, which has already reached presence
Abhidhamma.

¡§The materiality that arose at the instant of arising of the rebirth-linking consciousness ceas
the sixteenth consciousness after the rebirth-linking consciousness¡¨ and so on. If you under
materials last for seventeen thought moments, then you can understand this.

The next is kamma-born materiality. This is all Abhidhamma. With regard to kamma-born ma
understand how many? Six - ¡§(1) kamma, (2) what is originated by kamma, (3) what has ka
(4) what is originated by consciousness that has kamma as its condition, (5) what is originat
that has kamma as its condition, (6) what is originated by temperature that has kamma as its
There are six kinds to be understood with regard to kamma-born matter.

Here kamma is profitable and unprofitable volition. That is very important. If we talk about ka
say kamma is deeds or actions. Actions are called ¡¥kamma¡¦. But technically speaking ¡¥ka
volitions, profitable and unprofitable, or wholesome and unwholesome volitions, kusala and
P??¡.

¡§What is originated by kamma is the kamma-resultant aggregates and the seventy instance
beginning with the eye decad¡¨ and so on. You have to take it from Abhidhamma. ¡§What ha
condition is the same [as the last] since kamma is the condition that upholds what is origina

¡§ What is originated by consciousness that has kamma as its condition is materiality origina
kamma-resultant consciousness.¡¨ Consciousness produces matter. Right? So the matter pr
consciousness is called ¡¥what is originated by consciousness that has kamma as its condit
originated by nutriment that has kamma as its condition is so called since the nutritive-esser
reached presence in the instances of materiality originated by kamma originates a further
octad-with-nutritive-essence-as-eighth (That means the inseparable eight.), and the nutritive
that has reached presence also originates a further one, and so it links up four or five occurr
octads. What is originated by temperature that has kamma as its condition is so called since
fire element that has reached presence originates an octad-with-nutritive-essence-as-eighth
regard to kamma-born materiality we have to understand six things.

And with regard to consciousness-born materiality how many? Five - ¡§(1) consciousness, (
by consciousness, (3) what has consciousness as its condition, (4) what is originated by nut
consciousness as its condition, (5) what is originated by temperature that has consciousnes
condition.¡¨

¡§Herein, Consciousness is the 89 kinds of consciousness.¡¨ You take them from the chart a
book or from The Manual of Abhidhamma.

¡§Consciousnesses thirty two,
And twenty six, and nineteen too,¡¨ and so on.

Among them there are some consciousnesses which produce not only matter but postures a
postures and so on. Some types of consciousness can help us maintain a posture for a long
when you have good concentration, you can sit for two, three hours without feeling any disc
feeling any weakness, or without feeling sleepy, or whatever. That happens to yogis when th
higher stages of vipassan? meditation. Their meditation is very good and their concentration
they can sit for a long time. Sometimes they don¡¦t sleep at all for one or two days, but they
ill effects from lack of sleep. That is because some types of consciousness have the ability t
postures or to keep our body in one posture for a long time. That is why when a person is in
it ¡¥sam?patti¡¦ or ¡¥jh?na¡¦, he can sit for seven days without changing his posture. So there
of consciousness which help to maintain postures. I think there are two groups. ¡§Thirty two
namely, the eight profitable consciousnesses, the twelve unprofitable, the ten functional, exc
element and the two direct knowledge consciousnesses as profitable and functional, give ris
to postures and to intimation (three kinds).¡¨ The next twenty six are javana moments of r|p?
ar|p?vacara, and lokuttara. They give rise to materiality, to postures but not to intimation and

Paragraph 32 ¡§What is originated by consciousness is the three other immaterial aggregate
perception, and mental formations.) and the seventeenfold materiality, namely, the sound en
intimation, verbal intimation¡¨ and so on. Now students of Abhidhamma do you find any disc
The Manual of Abhidhamma? In the Manual of Abhidhamma only fifteen are said to be born
Right? Here they are given as seventeen. So growth and continuity are not included in those
consciousness in The Manual of Abhidhamma. But here they are also taken to be originated
These two will be added to other groups too.

¡§What has consciousness as its condition is the materiality of fourfold origination stated thu
¡¥Postnascent states of consciousness and consciousness-concomitants are a condition, as
condition, for this prenascent body¡¦ (Ptn 1.5).¡¨ This is from Pa??h?na.

¡§What is originated by nutriment that has consciousness as its condition: the nutritive essen
reached presence in consciousness-originated material instances originates a further
octad-with-nutritive-essence-as-eighth, and thus links up two or three occurrences of octads
Abhidhamma. If you want to understand them, please read chapter 6 of The Manual of Abhi
chapter 6 when you come back here, then you will understand.

Nutriment-born materiality is the same - (1) nutriment, (2) what is originated by nutriment an
also in paragraph 36 what is originated by nutriment is stated as there are fourteen nutrimen
materiality, but in The Manual of Abhidhamma only twelve are mentioned. Growth and conti

And then in paragraph 37 one thing is worthy of notice. That is nutriment smeared on the bo
materiality. Normally we think that only food eaten through the mouth can originate materiali
is said that also nutriment smeared on the body originates materiality. So sometimes it may
smear some food on our body and the it will cause the nutriment-born-matter to arise.

Temperature-born-materiality is the same. In paragraph 40 what is originated by temperatur
materiality is fifteenfold. In The Manual of Abhidhamma only thirteen are mentioned as grow
are omitted.

And then ¡§What is originated by nutriment that has temperature as its condition: the temper
nutritive essence that has reached presence originates future octad-with-nutritive-essence-a
on. Did you wonder why that the words ¡¥that has reached presence¡¦ are mentioned again
consciousness or mind produces matter, it produces at the arising moment because it is sai
the arising moment. But matter is strong only at the presence moment. That is why it is repe
¡¥that has reached presence, that has reached presence¡¦. So matter can produce matter o
the stage of presence, not at the arising moment, nor at the dissolution moment, but only wh

Now we have Comprehension of the Immaterial. So after comprehending or contemplating c
contemplate on n?ma or what is immaterial. ¡§Just as one who is comprehending the materi
generation of the material (or the arising of the material) so too one who is comprehending t
should see the generation of the immaterial and that is through the eighty one mundane aris
consciousness, that is to say, it is kamma accumulated in a previous becoming that this imm
is generated¡¨ and so on. When the arising of mentality is observed, then it should be obser
eighty one mundane types of consciousness. There are eighty nine types of consciousness
supramundane. And supramundane consciousnesses are not the object of vipassan? medit
consciousnesses are given here.

¡§The modes in which it is generated should be understood according to the method given i
the Dependent Origination.¡¨ So in that chapter how the mind arises is given. ¡§That same [
arising of consciousness is generated] as life-continuum as well¡¨ and so on. Among the eig
consciousness there are nineteen types of consciousness which arise as relinking, life-conti
consciousness. So these nineteen are mentioned here.

¡§In the course of existence, eye consciousness, together with its associated states, suppor
caused by attention is generated because the eye is intact and because visible data have co
paragraph 44 we get the four conditions for the seeing consciousness to arise. ¡§In the cour
(That is after relinking), eye consciousness together with its associated states (That means t
mental factors.) supported by light (So there must be light.) and caused by attention (There
attention.) is generated because the eye is intact (There must be the eye.) and because visi
into focus (There must be visible data.).¡¨ Only when these four conditions are fulfilled, can s
consciousness arise. So we must have the eye, there must be something to see, there must
must be attention.

And there is an explanation of something like a thought process. ¡§Next to arise is the functi
element with that same object accomplishing the function of adverting.¡¨ This is the explanat
process.

At the bottom of the page we have some corrections to make. ¡§Kinds of consciousness bel
sphere, either as consciousness accompanied by equanimity and without root-cause or as fi
impulsions¡¨ - even the text in the Visuddhi Magga is misleading, a little misleading, difficult t
understand. What is meant is : ¡§Next it is generated either as one from among the profitabl
or functional kinds of consciousness belonging to the sense sphere as five or seven impulsio
put ¡¥five or seven impulsions¡¦ there. After the word ¡¥sphere¡¦ we should say ¡¥as five or s
impulsions¡¦. And then the word ¡¥either should be deleted. Instead of it we should say ¡¥or¡
consciousness accompanied by equanimity and without root-cause¡¨, just that. The other wo
¡¥or as five or seven impulsions¡¦.

You know five or seven impulsions. Normally seven javanas arise. But in some cases when
or something, there are five moments of javana. So there are sometimes five javanas, but m
there are seven javana (seven impulsions). Sometimes the object is so weak that it cannot b
javanas to arise. That is also called a thought process. So there are thought processes witho
javanas. When it says ¡¥consciousness accompanied by equanimity and without root-cause
that. That is why in the footnote it is said that ¡¥This refers to determining¡¦. In a thought proc
is accepting, receiving, investigating, determining, and javanas. Right? The author is referrin
he says ¡¥consciousness accompanied by equanimity and without root-cause¡¦. That means
votthapana (determining). So not all, not every thought process contains javanas. There can
processes without javanas.

Paragraph 45 ¡§This is how one meditator accomplishes the development of understanding,
by comprehending at one time the material and at another time the immaterial, by attributing
characteristics to them.¡¨ So he should always attribute the three characteristics (impermane

and not self) to what he observes.

¡§Another comprehends formations by attributing the three characteristics to them through t
Material Septad and the Immaterial Septad.¡¨ That is viewing matter in seven different ways
in seven different ways.

Viewing matter in seven ways is given in paragraph 46: ¡§(1) Taking up and putting down, (2
of what grows old in each stage, (3) as arising from nutriment, (4) as arising from temperatu
kamma-born, (6) as consciousness-originated, and (7) as natural materiality. Hence the Anc
¡¥Taking up is rebirth-linking. Putting down is death¡¦.¡¨ So ¡¥as taking up and putting down¡
beginning and the end of one¡¦s life, taking one life as a unit. When he comprehends accord
he comprehends all formations in a life, all n?ma and r|pa between relinking and death. So h
n?ma and r|pa from the moment of relinking to death as impermanent. Why? ¡§Because of c
fall, because of change, because of temporariness, and because of preclusion of permanen
these explanations. These are the reasons for taking something as impermanent. These r|pa
because of the occurrence of rise and fall, because they have arising and disappearing, bec
because they change, because of temporariness, so they are just temporary, they don¡¦t las
of preclusion of permanence, that means rejection of permanence, they are not permanent.

¡§But since arisen formations have arrived at presence and when present are afflicted by ag
arriving at aging are bound to dissolve, they therefore are painful because of continual oppre
of being hard to bear, because of being the basis of suffering, and because of precluding ple
are the four reasons why something is called ¡¥suffering¡¦, or ¡¥pain¡¦, or ¡¥dukkha¡¦. So wha
one? Because of continual oppression, oppression by arising and disappearing. And then be
to bear (Something painful is hard to bear.), because of being the basis of suffering (Someti
basis for another suffering.), and because of precluding pleasure (That means rejection of su
that it is not sukha, it is dukkha).

¡§Since no one has any power over arisen formations in the three instances, ¡¥Let them not
¡¥Let those that have reached presence not age¡¦, and ¡¥Let those that have reached aging
they are void of the possibility of any power being exercised over them, they are therefore n
void, because ownerless, because unsusceptible to the wielding of power, and because of p
These are the four reasons for being anatta. Now the first one is what? Void, because it is v
it is ownerless (¡¥Ownerless¡¦ really means lordless, no overlord). The P??i word ¡¥samika¡¦
the owner of property or a lord. I think it is better to say ¡¥lord¡¦ here than ¡¥owner¡¦. So there
overlord. Because of being unsusceptible to the wielding of power, this also is one of the exp
with regard to the word ¡¥anatta¡¦. We met one explanation before. What? No core. That is c
another explanation is that we cannot exercise any power over it. So that is another explana

Things happen as they like and we have no power over them. That is the meaning. ¡¥Becau
self¡¦ means rejecting a self.

Oh! Let me see on the previous page 720, in the last line there is something. ¡§And since no
over arisen formations (not arisen, just formations) in the three instances, ¡¥Let them not rea
Actually it is: ¡§Let the formations that have arisen not reach presence¡¨, something like that
that have reached presence not age¡¨, and ¡§Let those that have reached aging not dissolve
example I want to be young; I want to be always young. I don¡¦t want to be sixty years of age
of age. But I have no power over myself. I will go on aging day by day. There is no possibility
power over it.

So in footnote 20 ¡§No one, not even the Blessed One, has such mastery; for it is impossible
alter the three characteristics.¡¨ Please rub out ¡¥three¡¦. It is just ¡¥the characteristics¡¦, not
¡¥three¡¦. ¡§the province of supernormal power is simply the alteration of a state.¡¨ What it m
even the Buddha cannot change the characteristic of something. Mind has the characteristic
an object. Right? Even the Buddha cannot change that characteristic of mind. If it is mind, it
have this characteristic. Then what about when somebody performs supernormal powers an
is not usual or real? It is the alteration of a state and not the alteration of a characteristic. Th
he may make himself many persons or he may create likenesses of himself. The alteration o
by supernormal power, but the change of characteristic cannot be done by any power or any
even the Blessed One has such mastery. That means if something has the characteristic of
cannot make it not age, not get old.

¡§ ¡¥Because of precluding a self¡¦ means because of precluding the self conceived by those
Dispensation (That means those other than the Buddhists.); for the non-existence in dhamm
conceived by outsiders is stated by the words ¡¥because void, etc.¡¦¡¨ Please add etc. There
ownerless, not susceptible to the wielding of power. ¡§But by this expression (That means th
¡¥precluding self¡¦.) [it is stated] that they (not ¡¥there¡¦) are not self because they have no su
nature.¡¨ The word ¡¥anatta¡¦ here has two meanings: There is no att? in them. When we sa
that means there is no att? in r|pa. That is one meaning. The other meaning is r|pa is not att
meaning is there is no att? in it. The second meaning is that it is not att?. So the translation s
¡§But by this expression [it is stated] that they are not self because they have no such nature

Paragraph 48 ¡§Having attributed the three characteristics to materiality allotted one hundre
¡¥taking up¡¦ and ¡¥putting down¡¦ thus, he next attributed them according to disappearance
in each stage. Herein, ¡¥disappearance of what grows old in each stage¡¦ is a name for the d
the materiality that has grown old during a stage [of life]. The meaning is that he attributes th
characteristics by means of that.¡¨ He tries to see all of them as impermanent, painful, and a

The first one is dividing a life of 100 years into three stages, the first 33 years, the second 34
third 33 years. Then the yogi tries to see the impermanence and others of materiality in thes
¡§The materiality occurring in the first stage ceased there without reaching the middle stage
impermanent; what is impermanent is painful; what is painful is not self. Also the materiality
the middle stage ceased there without reaching the last stage: therefore it too is impermane
should be added after ¡¥it¡¦.), and painful, and not self. Also there is no materiality occurring
years of the last stage that is capable of outlasting death: therefore that too is impermanent,
not self.¡¨ The meditator comprehends in that way, dividing the life into thirds. The life span i
100 years. That is why it is divided into these groups this way.

In a little more subtle way the life span is divided into ten stages. In paragraph 50 the ten sta
¡§The tender decade, the sport decade, the beauty decade, the strength decade, the unders
decline decade, the stooping decade, the bent decade, the dotage decade, and the prone d
out which decade you are in. What is the meaning of the word ¡¥prone¡¦?

Student: Lying down.

Teacher: Lying with face downward, or face up, or just lying down?

Student: Just lying down.

Teacher: When you are more than 90 years old, you want to be in bed all the time. So it is c
decade¡¦. The materiality of one decade does not go on to another decade. That is how the

What is ¡¥dotage¡¦? Becoming like a child? It may include that here. The P??i word is ¡¥mor
deluded state. He forgets what he has done and so on.

In paragraph 53 the same 100 years is divided into 20 parts of 5 years each. Materiality in th
ceases there and does not reach to the second 5 years and so on. This is groups of 5 years

Next is groups of what? 4 years. There are 25 parts. 100 is divided into 20 parts, 25 parts ar
of 3 years each, 50 parts of 2 years each, 100 parts taking 1 year each. It becomes smaller.

Then he reviews according to the three seasons. ¡§The materiality occurring in the four mon
ceases there without reaching the winter.¡¨ Now in India there are said to be three seasons a
true in other Asian countries. There are the rainy season, winter and summer. We have thre
like in the West. Or there are six seasons. Paragraph 57 describes these as rains, autumn,

spring and summer. That means two months of each. Materiality at one season ceases ther
the next season and so on.

Next is dividing the month into two parts, bright half and dark half in paragraph 58. In paragr
dividing the 24 hours into night and day. In paragraph 60 we have dividing a day into six par
they? Morning, noon, evening, first watch of the night, middle watch of the night, and last wa
night.

And then in paragraph 61 we have attributing ¡§the three characteristics to that same materi
moving forward and moving backward, looking toward and looking away, bending and stretc
words are mentioned in the Mah? Satipa??h?na Sutta in the section on clear comprehensio
occurring in the moving forward ceases there without reaching the moving backward¡¨ and s

Paragraph 62 deals with six stages in one step. I didn¡¦t ask you to be mindful of six steps in
because it is too many. But here six stages are mentioned. They are ¡¥lifting up¡¦, ¡¥shifting
¡¥shifting sideways¡¦, ¡¥lowering down¡¦, ¡¥placing down¡¦, and ¡¥fixing down¡¦. ¡§ ¡¥Lifting u
the foot from the ground. ¡¥Shifting forward¡¦ is shifting it to the front. (That means moving it
front.) ¡¥Shifting sideways¡¦ is moving the foot to one side or the other on seeing a thorn, stu
so on. (It may not happen in every step.) ¡¥Lowering down¡¦ is letting the foot down. ¡¥Placin
putting the foot on the ground. ¡¥Fixing down¡¦ is pressing the foot on the ground while the o
being lifted up.¡¨ When you want to lift up the other foot, you press the remaining foot more f
ground. That is called ¡¥fixing down¡¦. There are six stages.

¡§Herein, in the ¡¥lifting up¡¦ two elements, the earth element and the water element are sub
sluggish while the other two are predominate and strong.¡¨ Among the elements the water e
element are said to be heavy. Fire element and wind element are said to be light. When you
earth element is sluggish, not predominate at that time. The wind element and fire element a
When you ¡¥put down¡¦, then the earth element is predominant, but not the fire element. It is
¡§Likewise in the ¡¥shifting forward¡¦ and ¡¥shifting sideways¡¦. In the ¡¥lowering down¡¦ two
fire element and the air element, are subordinate and sluggish while the other two are predo
Likewise in the ¡¥placing down¡¦ and ¡¥fixing down¡¦.¡¨

¡§He attributes the three characteristics to materiality according to ¡¥disappearance of what
each stage¡¦ by means of these six parts into which he has thus divided it.¡¨ Materiality in on
and does not reach to the second stage and so on. He tries to see or here attribute the three
to all material properties.

¡§When he sees formations stage by stage with insight, his comprehension of materiality ha

Here is a simile for its subtlety.¡¨ A simile is given. The application of the simile in actual exp
explained in paragraph 67.

Then materiality arising from nutriment, arising from temperature, kamma-born, consciousne
explained. In whatever a yogi contemplates, he contemplates on the impermanent nature, th
and the no self nature of these things. He tries to see them as impermanent, as suffering, ar
in many ways a yogi may see these during the practice of meditation. These are not direct s
all inferential vipassan?.

There may be a little thinking or something like that here. That is why Venerable Mah?si Say
encourage this kind of practice. Just do it for awhile. Don¡¦t spend much time with this type o
viewing of different physical or mental phenomena, attributing the three characteristics to the
something like a distraction. That is because when you are trying to see the impermanent na
are not really practicing mindfulness. It is something like speculating or thinking. It will take a
from the real object of meditation. Therefore it is not encouraged. Also a yogi cannot go thro
methods mentioned in this book. A yogi must have a good knowledge of Abhidhamma to go
though he may have a good knowledge of Abhidhamma, he will not see all of them in his pra
That is because some can only be seen by the Buddha and persons of high intellectual natu
practice of vipassan? you do not experience all of these, don¡¦t bother. It is a book, so it has
everything during the practice in detail. In brief it is just applying the three characteristics to e
we observe, everything that we take as an object of meditation.

¡§When he discerns consciousness-originated materiality and attributes the three characteri
way, this meaning becomes evident to him.¡¨ Then we have verses.

¡§Life, person, pleasure, pain - just these alone
Join in one conscious moment that flicks by.¡¨

The P??i here really means that they are associated with one consciousness. ¡¥Join in one
means they are associated with only one moment of consciousness and that moment is very

¡§Gods, though they live for four-and-eighty thousand
Eons, are not the same for two such moments.¡¨

Here the original P??i means: ¡§These gods do not exist there associated with two consciou
That means however long they live, they live for one moment at a time. They cannot live for
time. That is what is meant here. It is not that they are ¡¥not the same for two such moments
not exist with two moments of consciousness. There is only one moment.

¡§Ceased aggregates of those dead or alive
Are all alike, gone never to return;
And those that break up meanwhile, and in future,
Have traits no different from those ceased before.¡¨

They have the same characteristics, the same nature of impermanence and so on.

¡§No [world is] born if [consciousness is] not

Produced¡¨ - actually ¡§No world is born with consciousness which is not produced.¡¨ W
consciousness, there is no world living.

¡§When that is present, then it lives.¡¨ So the world lives with the presence of consciousn

¡§When consciousness dissolves, the world is dead:

The highest sense this concept will allow.¡¨

¡¥When consciousness dissolves the world is dead¡¦ means that we are dying at every mom
every moment because the moments of consciousness are very brief. So at every dissolutio
consciousness we die. So we are always dying although we say that we are living. A man liv
you live, I live. In fact we are always dying with the dissolution of each brief moment of cons

¡§When consciousness dissolves, the world is dead:

The highest sense this concept will allow.¡¨

Do you know the meaning of that? It is stated in footnote 23. ¡¥Pm¡¦ means the Sub-Comme
the Sinhalese translation have been taken as guides in rendering this rather difficult verse.¡¨
difficult. Now here ¡¥the highest concept this concept will allow¡¦ means that when we say th
live and so on, it is just for convenience in speaking that he lives, you live, I live and so on. T
ultimate truth is that we are dying at every moment. When we say that I live, he lives, we are
though it were the ultimate truth, but actually it is not. So although it is not ultimate truth, it is
ultimate truth. ¡¥The highest sense¡¦ means ¡¥ultimate truth¡¦. When we use the expression
lives¡¦, we are talking on the conventional level. We take that conventional level to be a real
Actually it is not.

¡§No store of broken states, no future stock.¡¨

There are no states stored in the past and no future stock.

¡§Those born balance like seeds on needle points.¡¨

Seeds put on needle points immediately fall.

¡§Break-up of states is foredoomed at their birth;

Those present decay, unmingled with those past.

They come from nowhere, break up, nowhere go.

Flash in and out, as lightning in the sky.¡¨

Everything just arises and disappears. It does not last long.

¡§Having attributed the three characteristics to that arising from nutriment, etc., he again attr
three characteristics to natural materiality.¡¨ ¡¥Natural materiality¡¦ is what? ¡§ ¡¥Natural mat
a name for external materiality that is not bound up with faculties.¡¨ ¡¥That is not bound up w
means that it does not belong to living beings. ¡§And arises with the eon of world expansion
that? Do you remember the beginning of the world cycle and the dissolution of the world cyc
periods in the world. ¡¥World expansion¡¦ means the formation stage of the world. The world

then stays in that stage for another period. Then there is the arising period. That period here
the eon of world expansion¡¦. That means from the beginning of the world. You can go back
chapter, paragraph 38. They are outside things like iron, copper, tin, lead, gold, silver, pearl,

¡§That becomes evident to him by means of an asoka shoot. For that to begin with is pale p
three days it becomes dense red¡¨ and so on. From one stage to another nothing is carried
another stage. After the stage of becoming, it dissolves. ¡§After it has become the color of d
leaves, as it follows out the successive stages of such material continuity, it eventually beco
foliage, and at the end of the year it breaks loose from its stem and falls off.¡¨

¡§Discerning that, he attributes the three characteristics to it thus: The materiality occurring
pale pink ceases there without reaching the time when it is dense red¡¨ and so on. This is ho
¡§comprehends the formations by attributing the three characteristics to them by means of t
Septad.¡¨ In seven different ways he views matter or the material property as impermanent a

In P??i the word used for attributing is ¡¥putting on¡¦. To see the individual characteristics is
thing. To see the impermanent and so on is something we ¡¥put on¡¦ the dhammas. That is
said in the books.

On page 719 in footnote 18 it says ¡§When the generation of materiality is seen its dissoluti
and so he said ¡¥One who sees the generation of materiality thus is said to comprehend the
time¡¦ because of the brevity of states¡¦ occurrence.¡¨ That phrase should go after ¡¥seen¡¦ a
first line - ¡§When the generation of materiality is seen its dissolution also is seen because
of states¡¦ occurrence.¡¨ They arise and disappear so rapidly that when you see the arising,
to see the dissolution also. They are so brief. ¡§For it is not the seeing of mere generation th
¡¥comprehension¡¦ but there must be seeing of rise and fall besides. So too the apprehendi
the other instances.¡¨ Seeing of mere generation, mere arising is not called ¡¥comprehensio
to be called ¡¥comprehension¡¦ there must be seeing of arising and disappearing or rise and

S?dhu! S?dhu! S?dhu!

(Tape 42 / Ps: 76 ¡V 130)

In the practice of vipassan? a meditator goes from one stage of knowledge to another. The
knowledge is discerning mind and matter or defining mind and matter. That we have already
what is called ¡¥momentary concentration¡¦, a meditator comes to see mind and matter clea
be the beginning of vipassan? knowledge. After seeing mind and matter clearly, he sees the

matter or cause-effect relationship between mind and matter, between mind and mind. Whe
causes and the conditions of mind and matter, he is said to have reached the ¡¥Purity of Vie

After discerning the causes and conditions of mind and matter, he goes further in the series
knowledges. That is he tries to comprehend mind and matter clearly. At the beginning of cha
that ¡§The knowledge established by getting to know the path and the not-path thus¡¨, and t
desires to accomplish this should first of all apply himself to the inductive insight called ¡¥Co
by Groups¡¦¡¨ and so on. So he applies the comprehension by groups or just the knowledge
mind and matter. We are just in the middle of this knowledge. In order to comprehend mind
and in order to practice comprehension by groups, we are made to understand the three kin
understanding, then how mind and matter are to be comprehended according to groups, an
comprehend matter in different ways, and then how to comprehend mind or mentality also i
So first r|pa (matter) should be comprehended in seven different ways. That is described in
so on. That is called ¡¥Material Septad¡¦, Seven Kinds of Comprehension of Mind and Matte

Today we come to the Immaterial Septad. ¡§He comprehends all natural materiality in this w
firstly, he comprehends formations by attributing the three characteristics to them by means
Septad.¡¨ So he comprehends all formations (That means all mind and matter.) by attributin
characteristics to them. That means seeing them as impermanent, as suffering, and as no-s

Now the author gives the other seven methods. They are called ¡¥The Immaterial Septad¡¦.
what was called above ¡¥The Immaterial Septad¡¦ are these: (1) by groups, (2) by pairs, (3)
series, (5) by removal of false view, (6) by abolition of conceit, (7) by ending of attachment.¡

There are the seven ways to apply. So (1) ¡¥by group¡¦ means the states belonging to the C
don¡¦t know what ¡¥Contact Pentad¡¦ is, but please read footnote 24. ¡¥Contact Pentad¡¦ me
feeling, perception, volition, and consciousness. In this order they are mentioned in the first
Abhidhamma, Dhammasa~ga??. That is why they are called ¡¥Contact Pentad¡¦. So five thi
contact, they are contact, feeling, perception, volition and consciousness. ¡§Here, ¡¥he com
groups¡¦ [means that] a bhikkhu considers thus: The states belonging to the contact pentad
comprehending of head hairs as ¡¥impermanent, painful, not self¡¦; the states belonging to t
arising in the comprehending of body hairs as in the contemplation of brain¡¨ and so on.

Now you see ¡¥brain¡¦ here. In the so called ¡¦32 parts of the body¡¦ the brain is in the middl
end of the list. Actually only 31 parts are mentioned in the Suttas, mentioned in the Mah? Sa
and other Suttas. But in a book called ¡¥Pa?isambhid?magga¡¦, which is ascribed to the Ve
the brain is added. It is added at the end, not in the middle as we do, now as we practice me
¡¥in the contemplation of brain¡¦ means he has come to the end of the list. ¡§ ¡¥Impermanen

self¡¦; - all these states disintegrate section by section, term by term, like crackling sesame s
a hot pan, each without reaching the next: therefore they are impermanent, painful, not self.
is the method according to the Discourse on Purification.¡¨ This one way of doing contempla

There is another way. ¡§According to the Discourse on the Noble Ones¡¦ Heritages, howeve
comprehend by groups¡¦ when by means of a subsequent consciousness he comprehends a
not self¡¦ that consciousness which occurred [comprehending] materiality as ¡¥impermanen
self¡¦ in the seven instances of the Material Septad given above. As this method is more suit
therefore confine ourselves to it explaining the rest.¡¨

Now in the first method a yogi takes head hairs as an object of meditation, then body hairs, t
and so on. But in this method he comprehends the consciousness itself which comprehends
impermanent and so on. Here a yogi does not go to other objects. So he is not distracted. Th
said that it is more suitable. If you have to take the head hair, body hair and so on, then at e
there is new subject of meditation. But here you just take the consciousness which takes the
and so on. So a yogi is not described. That is why this method is said to be more suitable th
Here 'comprehending by groups¡¦ means actually comprehending the consciousness which
and so on as impermanent and so on. So it is comprehending the comprehending conscious

¡§(2) By pairs: after the bhikkhu has comprehended as ¡¥impermanent, painful, not self¡¦ the
the ¡¥taking up and putting down¡¦ (That really means from birth to death.), he comprehends
consciousness [with which he was comprehending the materiality] too as ¡¥impermanent, pa
means of a subsequent consciousness. (Here also by one consciousness he takes another
of vipassan? meditation. And he takes that consciousness also to be ¡¥impermanent¡¦ and s
comprehended as impermanent, painful, not self the materiality of the ¡¥disappearance of w
each stage¡¦ (That means mind and matter in one stage does not reach to the next stage, an
that stage also does not reach to succeeding stages and so on. They are mentioned previou
and that arising from ¡¥nutriment¡¦, ¡¥arising from temperature¡¦, ¡¥kamma-born¡¦,
¡¥consciousness-originated¡¦ and ¡¥natural¡¦, he comprehends that consciousness too as ¡¥
not self¡¦ by means of a subsequent consciousness. In this way he is said to comprehend by

First he comprehends matter as ¡¥impermanent¡¦ and so on. Next he takes the consciousne
impermanent and so on. So it is called ¡¥pairs¡¦. In the first method, ¡¥by groups¡¦, he does n
in pairs; he just comprehends the consciousness which takes head hairs, body hairs and so
¡¥impermanent¡¦. Here he takes let us say materiality as impermanent, and then he takes th
which takes materiality as impermanent, as impermanent by another consciousness. It goes
the second method is called ¡¥by pairs¡¦.

The third method is ¡¥by moments¡¦. ¡§After the bhikkhu has comprehended as ¡¥imperman
the materiality of the ¡¥taking up and putting down (from birth to death)¡¦, he comprehends th
consciousness [with which he was comprehending the materiality] as ¡¥impermanent, painfu
of a second consciousness, and that second consciousness by means of a third, and the thi
fourth, and the fourth by means of a fifth.¡¨ So it is going in a series. We have to make corre
should read ¡§and the fourth by means of a fifth as that too is impermanent.¡¨ So we will rub
too he comprehends¡¦. We don¡¦t need these five words. It should be ¡§and the fourth by me
that too is impermanent¡¨. So by the fifth consciousness he comprehends the fourth conscio
consciousness too is ¡¥impermanent, painful and not self¡¦. Here he does not comprehend th
consciousness. He only comprehends the fourth consciousness by the fifth consciousness.
the fourth by means of a fifth as that too is impermanent, painful, not self.¡¨

¡§After he has comprehended as ¡¥impermanent, painful, not self¡¦ the materiality of disappe
grows old in each stage¡¦ and that ¡¥arising from nutriment¡¦, ¡¥arising from temperature¡¦, ¡¥
¡¥consciousness-originated¡¦ and ¡¥natural¡¦, he comprehends that first consciousness as ¡¥
painful, not self¡¦ by means of a second consciousness and that second consciousness by m
the third by means of a fourth, and the fourth by means of a fifth. Here also we should have
impermanent, painful, not self¡¦. ¡§Comprehending thus four [consciousnesses] from each d
materiality he said to comprehend by moments.¡¨ So this is said to be ¡¥comprehending by m
five consciousnesses. The first consciousness takes materiality as object. The second conso
first consciousness as object. The third consciousness takes the second consciousness as o
takes the third, and the fifth takes the forth. Then he stops there. That is ¡¥by moments¡¦.

¡§(4) By series: after he has comprehended as ¡¥impermanent, painful, not self¡¦, the materi
¡¥taking up and putting down¡¦, he comprehends that first consciousness as ¡¥impermanent
by means of a second consciousness, and the second by means of a third, and the third by
and the tenth by means of the eleventh (Here we should strike out the words ¡¥and that too
and the tenth by means of eleventh as that too is impermanent, painful, not self.¡¨ In the prev
stops at comprehending the fourth consciousness by fifth consciousness. But here he ends
tenth by the eleventh consciousness. He doesn¡¦t go beyond comprehending the tenth.

¡§After he has comprehended as ¡¥impermanent, painful, not self¡¦ the materiality of the disa
grows old in each stage¡¨ and so on. ¡§He comprehends that consciousness as ¡¥imperman
by means of a second consciousness, and the second by means of a third.. and the tenth by
as impermanent, painful, not self. It would be possible to go on comprehending it in this way
insight even or a whole day.¡¨ That means taking the tenth by the eleventh, taking the eleven
twelfth, taking the twelfth by the thirteenth and so on. So he could go on for the whole day.

¡§But both the material meditation subject and the immaterial meditation subject become far
comprehending is taken as far as the tenth consciousness. (It is enough just to take up to th
consciousness.) That is why it is said that it can be (I think ¡¥should be¡¦ is better, not ¡¥it ca
stopped at the tenth. (So a yogi must stop at the tenth. He must not go on beyond the tenth
make him distracted.) It is when he comprehends in this way that he is said to comprehend
is ¡¥comprehension by series¡¦. The first consciousness takes the materiality as object and t
the first consciousness as object and so on, until the eleventh consciousness takes the tenth
¡¥impermanent¡¦ and so on. Then he stops there.

¡§(5) By removal of false view, (6) by abolition of conceit, (7) by ending attachment: there is
method for any of these three. (There is no special method.) But when he has discerned this
described above and this immateriality as described here, then he sees that there is no livin
above the material and the immaterial¡¨ and so on. This is the description of removal of false
of conceit, and the ending of attachment. This is how he comes to this by discerning the me
materiality actually as impermanent, suffering and no-self.

Now paragraph 83 ¡§But in the Discourse on the Noble Ones¡¦ Heritages¡¨ - there are two ki
mentioned by the Visuddhi Magga. And the Sub-Commentary did not give us any informatio
methods, ¡¥Discourse of the Noble Ones¡¦ Heritages¡¦ and ¡¥Discourse on Purification¡¦. The
been two lines of instruction given at the time of Venerable Buddhaghosa.

¡§After setting forth the headings thus: ¡¥As removal of [false] view, as abolition of conceit, a
attachment¡¦, the following method is set forth: ¡¥There is no removal of [false] view in one
thus ¡§I see with insight, my insight¡¨; there is removal of [false] view in one who takes it thus
formations see formations with insight, comprehend, define, discern, and delimit them¡¨.¡¦¡¨
¡¥I see¡¦, then there is a kind of false view because you have not yet gotten rid of the view o
when you see that there are only formations, when you see formations with insight, then the
of false view.

¡§There is no abolition of conceit in one who takes it thus ¡¥I see thoroughly with insight, I se
insight¡¦.¡¨ So I can see this, maybe others cannot. ¡§There is abolition of conceit in one who
¡¥Only formations see formations with insight¡¦,¡¨ and so on. ¡§There is no ending of attachm
pleased with insight thus ¡¥I am able to see with insight¡¦.¡¨ Sometimes when people see th
attached to that seeing; they like it because this seeing is a result of the individual¡¦s medita
there is attachment to this seeing. When one is attached to this seeing, then one cannot get
attachment. So ¡¥I am able to see with insight¡¦ - there is no ending of attachment. But there
attachment in one who takes it thus ¡¥Only formations see formations with insight, compreh

¡§There is removal of [false] view in one who sees thus ¡¥If formations were self, it would be
them as self; but being not-self they are taken as self. (They are taken to be ¡¥self¡¦, althoug
are ¡¥not-self¡¦.) Therefore they are not self in the
sense of no power being exercisable over them; (They do not lend themselves to being orde
some beings.) they are impermanent in the sense of non-existence after having come to be;
the sense of oppression by rise and fall.¡¨ These are always explained with regard to being i
painful, and not self. ¡§They are not self in the sense of no power being exercisable over the
reason for their being anatta (not self). Non-existence after having come to be, this is the rea
impermanence. Oppression by rise and fall, this is the reason for being dukkha (suffering or
is abolition of conceit in one who takes it thus ¡¥If formations were permanent, it would be rig
them as permanent¡¦ and so on.¡¨ These paragraphs explain how conceit and others are ren

Paragraph 88 ¡§This is how he comprehends formations by attributing the three characterist
of the Immaterial Septad.¡¨ These are seven ways of comprehending the immaterial to be im
on.¡¨ At this stage both material meditation subject and the immaterial meditation subject ha
familiar to him.¡¨ He was very familiar with both matter and mind or mental things when he c
stage.

¡§Having thus become familiar with the material and immaterial meditation subjects, and so
here already a part of those 18 Principal Insights which are later on to be attained in all their
means of Full-Understanding as Abandoning starting with Contemplation of Dissolution, he c
things opposed to what he has already penetrated.¡¨ Now 18 principal insights are given her
will be described in the section on Contemplation of Dissolution and others will be explained
chapter. So we can just leave them here. They are called ¡¥the 18 principal vipassan?¡¦, 18
- contemplation of the impermanent, contemplation of pain, contemplation of not self, conter
dispassion and so on. We will come to them later.

Now we will go to the Knowledge of Contemplation of Rise and Fall in paragraph 93 and tho
practicing comprehension by groups, comprehension of matter and comprehension of mind
vipassan? knowledge in the yogi becomes strong. After that comprehending knowledge, the
knowledge of contemplation of rise and fall, contemplation of arising and disappearing. ¡§Ha
knowledge in this way by abandoning the perceptions of permanence, etc., which oppose th
impermanence, etc., he passes on from Comprehension Knowledge and begins the task of
Contemplation of Rise and Fall, which is expressed thus.¡¨ So from here we will from time to
notes. I think it is like a guide for the following paragraphs. After this first comprehension kno
passes on to Contemplation of Rise and Fall.

¡§When he does so, he does it first in brief.¡¨ He does the contemplation of rise and fall first

then he does it in detail by way of conditions and instances. So the first one is a brief metho
contemplation. ¡§When he does so, he does it first in brief. Here is the Text: ¡¥How is that u
contemplating present ¡¥states¡¦ change is knowledge of contemplation of rise and fall? ¡¥P
is born [materiality] (That means materiality that has been born is present.); the characteristi
generation is rise, the characteristic of its change is fall, the contemplation is knowledge¡¦.¡¨
materiality is born of materiality, which has been born, is present. Here ¡¥present materiality
¡¥born¡¦. That means it is included in the trio of instants.

Please see footnote 30 on the next page. ¡§Present materiality is called ¡¥born materiality¡¦;
in the trio of instants [of arising, presence and dissolution] is what is meant.¡¨ ¡¥Materiality th
born is present¡¦ means materiality that is endowed with three instants - arising, dissolution a
dissolution. That means the real present. ¡§But that is hard to discern at the start, so the inte
insight should be done by means of presence according to continuity.¡¨ To really see the th
(arising, present and dissolution) is difficult. So for the beginner it is almost impossible. Ther
insight should be done by means of presence according to continuity. That means the matte
does not go over to another condition. For example, when you are cold, you have certain kin
properties in your body. Those do not go over to the stage when you become warm and so
¡¥presence according to continuity.

There are different kinds of presence (paccupanna or present). Do you remember that? Som
present the whole life. We call it ¡¥present¡¦. Right? Also sometimes we call ¡¥present¡¦ that
some time, like the material properties lasting for the time when we are warm, when we are
are cold. For all these different material properties arise. That is continuity present. And the
present is the moment, the momentary present. That is actually the real present, which has
sub-moments of arising, present and dissolution. There are three kinds of present.

You can go to chapter 13, paragraph 111. ¡§Present materiality is born materiality; the chara
its generation is rise, the characteristic of its change is fall, the contemplation is knowledge¡¦
arising is characteristic of its generation and falling is characteristic of its change. And conte
knowledge of present feeling, perception, formations, consciousness, eye, etc. ¡¥Present be
that means becoming that has been born is present. ¡§The characteristic is rise, the charact
is fall. The contemplation is knowledge.¡¨ It is taken from the Pa?isambhid?magga.

Did you notice that it stops with becoming? Because with respect to ¡¥etc.¡¦ you have to und
things. Where do you find ¡¥becoming¡¦? In Dependent Origination. Right. After becoming w
old age and death. Right? So please read the end of footnote 30. ¡§For the elision represen
chapter 20, paragraph 9.¡¨ In this case, however, the last two members of the Dependent O
out. Although stages possessed of (Please add ¡¥birth¡¦ there.) birth, aging, and death are m

the heading of birth and of aging and death in Comprehension by Groups, etc., nevertheless description of Knowledge of Rise and Fall, if it were said ¡¥present birth is born; the characte generation is rise, the characteristic of its change is fall¡¦, etc., it would be tantamount to an and approval of the proposition that birth and aging and death were possessed of birth and That is why they are left out. Birth, aging and death are one thing and those having birth, ag are another. Let us say ignorance as an example. Ignorance has arising, presence and diss author does not stop at becoming, but goes on to birth, decay and death, then they themsel or something like that. It is an absurd saying. Birth possesses birth, aging possesses aging, possesses death. That is why they are left out. So that Text ends with ¡¥becoming¡¦ in order Birth is the arising of things. Right? And aging is the deterioration of things and then dissolut disappearing of things. So birth cannot have another birth although ignorance or formations decay and death. But birth itself cannot have birth, decay and death because it itself is birth. the last two links are left out here.

Paragraph 95 ¡§In accordance with the method of this text he sees the characteristic of gen the arising, the aspect of renewal, of born (¡¥Mentality¡¦ is missing there.) mentality and mat ¡¥rise¡¦, and he sees their (not ¡¥its¡¦) characteristic of change, their (not ¡¥its¡¦) destruction, (not ¡¥its¡¦) dissolution, as ¡¥fall¡¦. If you look at the passage in paragraph 94, there is materi then there is mentioned feeling, there is perception, formations, and consciousness. And als ear and so on. There are many things there. In accordance with this method in this text he s characteristic of generation or arising. The birth, the arising, the aspect of renewal of born m materiality, that is both mind and matter, not only matter but also of mind he sees. So actual of mind and matter as arising he sees. And he sees their characteristic of change, destructio as fall.

¡§He understands thus: ¡¥There is no heap or store of unarisen mentality-materiality [existin arising. When it arises, it does not come from any heap or store; and when it ceases, it does direction. There is nowhere any depository in the way of a heap or store or hoard of what ha on. Then there is the simile. ¡§It (sound) is brought into being owing to the lute, the lute¡¦s ne man¡¦s appropriate effort, and having been, it vanishes - so too all material and immaterial s having been, are brought into being, and having been they vanish.¡¨

Now ¡¥the lute¡¦s neck¡¦ - the P??i word here normally means ¡¥the lute¡¦s neck. But the Sub explains it to mean not the lute¡¦s neck. I think it is called ¡¥pick¡¦. It is something used to pla string. They use something. Right? It should be ¡¥owing to the lute, the pick, and the man¡¦s effort, and having been it vanishes¡¦ and so on. The sound arise only when the lute is played stored anywhere before it comes into being. And it is not stored anywhere after it goes out o same way mind and matter just arise and before arising they are not stored anywhere, and a

are not stored anywhere. That is why at every moment there is new mind, new matter and s

¡§Having given attention to rise and fall in brief thus, he again [does so in detail].¡¨ Now it ex
detail. ¡§He sees the rise of ¡¥the materiality aggregate in the sense of conditioned arising¡¦
arising of ignorance there is the arising of materiality.¡¨ Now what is meant here is that he s
arising of materiality by way of its conditions or its causes. So instead of saying ¡¥in the sens
conditioned arising¡¦, we should say ¡¥by the nature of arising of conditions¡¦. With the arisin
there is arising of materiality. That means because there is ignorance there is matter. So he
of matter by way of its cause. Because of the existence of ignorance there is arising. With th
ignorance there is the arising of materiality. With the arising of craving, with the arising of ka
the arising of materiality.

¡§(1) He sees the rise of ¡¥the materiality aggregate (again) by the nature of arising of condi
With the arising of ignorance there is the arising of materiality.¡¨ So these four are one group
is a separate group. ¡§(5) One who sees the rise of generation sees the rise of materiality ag
he just sees the arising of material aggregate not by way of causes, not by way of the arising
conditions. He just sees its arising.) One who ¡¥sees the rise of the materiality aggregate se
characteristics.¡¨ That means four by way of conditions, and one is called ¡¥by way of instan
to that later.

¡§ ¡¥He sees the fall of the materiality aggregate in the sense of conditioned cessation thus
should say ¡¥by the nature of cessation of conditions¡¦.) With the cessation of ignorance the
cessation of materiality. (When there is no ignorance, there is no materiality. So with the ces
conditions he sees the cessation of materiality. Or depending on the cessation of causes or
sees the cessation of materiality.) With the cessation of craving.., with the cessation of kamn
sees the fall of the materiality aggregate - again it should be - by the nature of cessation of c
thus. With the cessation of nutriment there is the cessation of materiality and so on; then (5)
the characteristic of change sees the fall of the materiality aggregate. (So when one sees ch
the fall of disappearance of materiality.) One who sees the fall of the materiality aggregate s
characteristics¡¦.¡¨

¡§Likewise: ¡¥He sees the rise of the feeling aggregate - the same thing again - by the natur
conditions¡¦. And then he sees the fall of feeling aggregates in the five ways. And as in the c
aggregate, [that is substituting ¡¥contact¡¦ for the ¡¥nutriment¡¦ in the case of materiality,] so
perception and formations aggregates. So also for the consciousness aggregate with this di
the phrases containing ¡¥contact¡¦ there are substituted ¡¥with the arising of mentality-mater
¡¥with the cessation of mentality-materiality¡¦.¡¨ That is because the fifth aggregate is consci
aggregate. In the Dependent Origination depending on mind and matter consciousness aris

¡§So there are fifty characteristics stated with the ten in the case of each aggregate by seein
fall.¡¨ There are five ways of seeing rise and five ways of seeing fall. So all together there are
aggregate. ¡§By means of which he gives attention in detail according to condition and acco
¡¥According to condition¡¦ means depending on arising or cessation of conditions, he sees th
cessation of five aggregates. ¡¥According to the moment¡¦ means seeing the very arising an
aggregates. Here he does not see the arising or falling of conditions, but just the arising and
aggregates themselves. That is mentioned here as according to instant or moment. ¡§The ri
thus; its fall is thus; so it rises, so it falls. As he does so his knowledge becomes clearer thus
seems, these states, not having been, are brought into being; having been, they vanish¡¦.¡¨

¡§When he sees rise and fall in two ways: according to conditions and according to instants,
Truths, aspects of Dependent Origination, Methods, and Characteristics, become evident to
book we should say ¡¥different Truths¡¦ rather than ¡¥several Truths¡¦. Then the author expla
by ¡¥according to condition¡¦ and what is meant by ¡¥according to instant¡¦. That is in paragr
with paragraph 100 and so on here he explains the different Truths, aspects of Dependent O
others.

¡§When he sees rise and fall in the two ways, according to condition and according to instan
of Origination becomes evident to him (¡¥The Truth of Origination¡¦ means the Second Noble
of Suffering.) through seeing rise according to condition owing to his discovery of the progen
sees the rise and fall in two ways, according to condition and according to instants, then the
becomes evident to him.) The Truth of Suffering becomes evident to him through seeing rise
to instant (now here according to instant) owing to his discovery of the suffering due to birth
¡¥which is birth¡¦. Suffering and birth are the same here. It is not ¡¥due to¡¦ birth.) The Truth
becomes evident to him through seeing fall according to condition owing to his discovery of
things produced by conditions when their conditions do not arise. The Truth of Suffering bec
him too through seeing fall according to instant owing to his discovery of the suffering which
his seeing of rise and fall becomes evident to him as the Truth of Path thus: ¡¥This is the mu
owing to abolition of confusion about it.¡¨ So all the Four Noble Truths become evident to hir
rise and fall of the aggregates in two ways: according to condition and according to instant.

¡§The Dependent Origination in forward order becomes evident to him through seeing rise a
owing to his discovery that ¡¥When this exists, that comes to be¡¦. The Dependent Originatio
becomes evident to him through seeing fall according to condition owing to his discovery tha
not exist that does not come to be¡¦. Dependently arisen states become evident to him throu
fall according to instant owing to his discovery of the characteristic of the formed; for the thir
of rise and fall are formed and conditionally arisen.¡¨ So seeing the five aggregates, things,

fall of five aggregates in this way makes him understand more clearly the Dependent Origina
order and reverse order and also the states mentioned in the Dependent Origination which a
¡¥dependently arisen states¡¦. That means actually all that are mentioned in the Dependent
Everything mentioned in the Dependent Origination arises from some other conditions. So th
dependently arisen states.

¡§The Method of Identity becomes evident to him through seeing rise according to condition
remember the four methods with which to understand the Dependent Origination? Go back t
309. There are four methods of treating the meaning. They are Method of Identity, the Metho
Method of Uninterest, and the Method of Ineluctable Regularity. So these are the four metho
should understand Dependent Origination or understand things. These methods become ev
rise and fall of aggregates in two ways.

¡§The Method of Identity becomes evident to him through seeing rise according to condition
discovery of unbroken continuity in the connection of cause with fruit.¡¨ There is connection
fruition, causes and effect. So when one sees the arising according to condition, that means
this condition, there is the fruit; because this is condition, there is fruit of it and so on. When
it, he understands it by way of the Method of Identity. That means there is the continuation o
effect.

¡§Then he more thoroughly abandons the annihilation view.¡¨ When he sees this, he abando
view; that means he abandons the view that a being is annihilated as death. Nothing arises
abandons this view when he sees arising according to condition. Because there is condition
arises depending on that condition. So this condition and fruit condition and fruit connection
and on. So there is some kind of identity in this continuity.

¡§The Method of Diversity becomes evident to him through seeing rise according to instant (
there is arising.), owing to his discovery that each [state] is new [as it arises].¡¨ Although ther
kind of continuity, each one is a new one. Since everything is new, new at every moment, th
permanency in the states. When he sees rising according to instant, then he can abandon th
things are permanent. That is because at every moment there is a new thing arising, and an
disappearing, and so there can be no permanency in those states. He sees that.

¡§The Method of Uninterestedness becomes evident to him through seeing rise and fall acco
owing to his discovery of the inability of states to have mastery exercised over them. Then h
abandons the self-view.¡¨ If it is to be called ¡¥self¡¦, then it must be able to exercise its autho
it. But now they just rise and fall; the states just rise and fall, and nobody can exercise autho
them, saying to be permanent or whatever. When he sees rising and falling according to con

able to abandon the self-view, the view that there is permanent self.

¡§The Method of Ineluctable Regularity becomes evident to him through seeing rise accordi
to his discovery of the arising of the fruit when the suitable conditions are there. Then he mo
abandons the moral-inefficacy-of-action view.¡¨ That means whatever you do does not amou
able to abandon that view because he sees the arising of aggregates or arising of states acc
conditions. Because of this condition there is this fruit. And this fruit is from this condition onl
from any other condition. So he is able to abandon the wrong view that even though you do
doesn¡¦t amount to doing anything, any kamma or whatever. Now here we have finished the
regard to Dependent Origination.

¡§The characteristic of not-self becomes evident to him through seeing rise according to con
his discovery that states have no curiosity (¡¥The states that have no curiosity¡¦ really means
no effort of their own.) and that their existence depends upon conditions.¡¨ In this paragraph
things that we should note. That is characteristic of individual essence and the characteristic
formed. I want you to understand these two, characteristic of individual essence and the cha
what is formed.

¡¥Characteristic of individual essence¡¦ means characteristics that they do not share with an
Let us take as an example contact. Contact has the characteristic of impinging on the object
characteristic is for contact only, not for feeling, and not for perception and so on. So they ar
individual characteristic or the individual essence.

¡¥The characteristic of what is formed¡¦ means the impermanent, suffering and no-self natur
the characteristic of what is formed. They are actually common characteristics of conditione
Everything that is conditioned has these three characteristics (arising, present and dissolutio

A yogi comes to see both characteristic of individual essence and the characteristic of what
practices vipassan? meditation. These two become evident to him owing to his discovery of
fall at the instant of rise and the non-existence of rise at the instant of fall. When there is risi
is no falling. When there is falling, there is no rising. When he discovers this, then the charac
what is formed and the characteristic of individual essence become clear to him. Here only r
mentioned, not the intermediate stage. Right? So footnote 32 says ¡§The inclusion of only ri
is because this kind of knowledge occurs as seeing only rise and fall, not because of non-ex
instant of presence.¡¨ That is because in vipassan? the yogis see the rising and falling. That
and falling are mentioned here, not because the intermediate stage is non-existent. There is
stage that is called ¡¥present¡¦. But in vipassan? meditation only rising and disappearing are
That is why these two only are mentioned.

¡§When the different truths, aspects of the Dependent Origination, methods, and characteris
evident to him thus, then formations appear to him as perpetually renewed.¡¨ I want to say ¡¥
instead of saying ¡¥perpetually renewed¡¦ because they are not ¡¥renewed¡¦. Actually at eve
a new phenomenon existing; it is not that something is renewed.

Student: Then how do things stay the same? Do you mean that all mind and matter, all state

Teacher: In the place of the old one which has disappeared, a new one takes its place. It is
nature, of the same kind. Let us say something like not one glass, but many glasses as an e
glass disappears, then you put another glass there. We can say the same in the sense that
a glass disappears, and the one that is there now is also a glass. But they are different. The
and the other is put in its place. In the same way one material property disappears and anot
place, another of the same kind or similar kind.

¡§ ¡¥So these states, it seems, being previously unarisen, arise, and being arisen, they ceas
not only always new (not ¡¥perpetually¡¦), but they are also short-lived like dew-drops at sun
bubble on water, like a line drawn on water, like a mustard seed on an awl¡¦s point, like a lig
And they appear without core, like a conjuring trick, like a mirage, like a dream, like a circle
firebrand (Some of these similes are not mentioned in the discourses. We cannot trace them
city, like froth, like a plantain trunk, and so on.¡¨

Now goblin city - do you know goblin city? It is lie a city created by goblins, or ghosts, or son
Sometimes you find yourself in a house, in a big building. Then next morning you find yours
ground. Nothing of the house you experienced during the night can be seen. So that kind of
to many people. I don¡¦t know if they happen here too. So they are called ¡¥goblin cities¡¦. Th
cities or whatever that are made to appear as real to human beings. Maybe in the movies yo
like these. A person enters the house and he enjoys the food in the house or whatever. And
finds himself lying on the ground, something like that. That is called ¡¥goblin city¡¦.

¡§At this point he has attained tender insight knowledge (It is still tender.) called ¡¥Contempl
and Fall¡¦, which has become established by penetrating the fifty characteristics in this mann
is subject to fall arises; and to be arisen necessitates fall¡¦.¡¨ I don¡¦t think that is acceptable.
what is subject to fall arises and what has arisen naturally falls.¡¨ It should be something like
the attainment of this he is known as a ¡¥beginner of insight¡¦.¡¨ Only when you attain to this
called a ¡¥beginner of insight¡¦. Before that you are not an official beginner.

Now we have Imperfections of Insight or Impediments of Insight. ¡§When a yogi reaches this

imperfections or impurities of insight arise in him.¡¨ These are the obstacles to progress, obs
attainment, obstacles to enlightenment. That is because if a yogi takes them to be enlighten
would not practice any further and so he will not get to enlightenment. These are called ¡¥Im
Insight¡¦; in P??i they are called the ¡¥Impurities of Insight¡¦. There are ten of them. ¡§They a
illumination, (2) knowledge, (3) rapturous happiness (That means p?ti.), (4) tranquillity, (5) b
resolution, (7) exertion, (8) assurance (I would say ¡¥establishment¡¦.), (9) equanimity, (10) a

So these ten things happen or arise in a person who has reached this stage of contemplatin
These imperfections ¡§do not arise either in a Noble Disciple who has reached penetration [
means in ones who have gained enlightenment.) or in persons erring in virtue, neglectful of t
subject and idlers.¡¨ They arise only in one who is practicing meditation, ¡§who keeps the rig
devotes himself continuously to his meditation subject and is a beginner of insight.¡¨ So thes
arise in Noble Disciples and also will not arise in those who do not practice meditation. Ther
these ten are explained one by one.

So let¡¦s go to illumination. ¡§Illumination is illumination due to insight. When it arises, the m
thinks ¡¥Such illumination never arose in me before. I have surely reached the Path, reache
he takes what is not Path to be the Path and what is not fruition to be Fruition. When he tak
the Path to be the Path and what is not Fruition to be Fruition, the course of his insight is int
(because he will not practice any more). He drops his basic meditation subject and sits enjo
illumination.¡¨

¡§But this illumination arises in one bhikkhu illuminating only as much as the seat he is sittin
another, the interior of his room; in another, the exterior of his room; in another, the whole m
quarter league.., a half league.., a league.., two leagues.., three leagues; in another bhikkhu
making a single light from the earth¡¦s surface up to the Brahm? World. But in the Blessed C
illuminating the ten-thousand-fold-world-element.¡¨ And then there is a story.

Now please read footnote 34. ¡§ ¡¥Illumination due to insight¡¦ is the luminous materiality ori
insight consciousness, and that originated by temperature belonging to his own continuity (T
body.). Of these, that originated by insight consciousness is bright and is found only in the m
body. The other kind is independent of his body.¡¨ I don¡¦t want to say that. ¡§The other kind
and spreads all round according to the power of his knowledge.¡¨ Here the translation is not
is manifest to him only¡¨, not ¡¥too¡¦. I would say ¡§It is manifest to him only and he sees any
in the place touched by it.¡¨ So the illumination is manifest only to him. Others won¡¦t see the
And he sees anything material in the place touched by it. But he would see things illuminate
light.

And then the Sub-Commentary raises a question. Does he see with eye consciousness or m
it says it should be said to be seeing with mind consciousness. That means he does not see
eyes, but with his mind he sees things touched by or illuminated by that bright light. And ther
the story of two Elders.

Next is knowledge. ¡§Knowledge is knowledge due to insight. As he is estimating and judgin
immaterial states perhaps knowledge that is unerring (¡¥Unerring¡¦ means undeterred.), kee
very sharp arises in him, like a lightning flash.¡¨

¡§Rapturous happiness (p?ti) due to insight. Perhaps at that time the five kinds of happiness
happiness, momentary happiness, showering happiness, uplifting happiness, and pervading
arise in him filling his whole body.¡¨ Do you remember the five mentioned in chapter 4, parag
on? Then there are tranquillity, bliss, resolution, exertion, and then assurance. Assurance is
establishment. So ¡¥assurance¡¦ really means mindfulness. His mindfulness is very strong a

¡§Equanimity is both equanimity about insight and equanimity in adverting. For equanimity a
is neutrality about formations, arises strongly in him at that time. So does equanimity in adve
mind door¡¨, not ¡¥it is also¡¦. That means equanimity in adverting in the mind door also aris
him.

And then attachment, that is real attachment. Now paragraph 124 ¡§Here illumination, etc., a
imperfections because they are the basis for imperfection, not because they are [kammically
because they are akusala). But attachment is both an imperfection and the basis for imperfe
last one is real akusala because it is lobha (attachment). The other nine are not akusala but
for akusala. They are conditions for akusala because when the yogi has illumination, then he
to the illumination and so on.

¡§As basis only they amount to ten; but with the different ways of taking them they come to t
view, by conceit, and by way of attachment, they become thirty. So each one can be taken b
by way of conceit, and by way of attachment. A skillful meditator is not deceived by these. S
they are impermanent and so on and they are not the right path to attainment, to enlightenm
here that the illumination and so on are not the right path, but the practice of vipassan? only
path. He decides this. When he decides this and this knowledge is established in him, then h
reached the knowledge and vision of what is the Path and what is not the Path. A person, a
reaching the contemplation of rise and fall will encounter these impediments. When he enco
impediments, he must be able to see them as impediments and as signs of enlightenment a

chapter. But the Purification of Knowledge and Vision of What is Path and What is not the P
There is overlapping of purity and vipassan? knowledge. If you look at the handout, you will

Student: Could you explain some way we could work with seeing rise and fall?

Teacher: At first you do not try to see the rising and falling; you try to get good concentration
to be mindful of what is happening at the present moment. Later on the arising and disappea
observe will become evident to you. So what is important is to get the necessary amount of
your concentration gets better, then you will come to see the rising and falling, rising and fall
have to see the things clearly. Right? After that, we see this is arising and this is falling or it i
arising and it is not falling. Before we see the real arising and falling, we have to see the thin

S?dhu! S?dhu! S?dhu!

Chapter 21
(Tape 43 / Ps: 1 -60)

Today we have come to chapter 21. Now let¡¦s say a meditator was meditating and practicin
meditation. Up until now he has reached the Knowledge of Seeing Rise and Fall. So first he
concentration and after that he comes to see mind and matter clearly. Then he sees the cau
matter. Next he contemplates on mental and physical phenomena by the use of comprehen
called ¡¥inferential vipassan?¡¦. And then he tries to see the rising and falling of mental and
phenomena. He observes the rising and falling of things.

His knowledge of vipassan? was somewhat developed. At that moment he was troubled by
of vipassan? or the ten impediments like illumination, joy, happiness, tranquillity and so on.
impediments or obstacles of vipassan? because if he thinks that they are indications of enlig
will not practice anymore. So he will not get any more progress. They are impediments or ob
progress in vipassan?. Therefore he has to surmount them. He has to regard them as just p
has to stick to the contemplation on the rising and falling of mental and physical phenomena
chapter ends with his being able to decide which is the right path and which is not the right p
these ten impediments are not the right path. He is not to be pleased with them; he is not to
Contemplation on the rise and fall is the right path. So his contemplation of rise and fall has
yet. He was disturbed by these ten impediments. Now free from impediments, he must go o
chapter he will go on, first practicing contemplation on rise and fall again.

There are two parts in the contemplation on rise and fall, the immature stage and the mature
practiced contemplation of rise and fall and it was not so mature. At that point he was disturb
ten impediments. Now he has cleared those impediments and so he is going to practice mo
its culmination with the Eight Knowledges, and Knowledge in Conformity with Truth is ninth.
there are nine vipassan? knowledges. These are what is called ¡¥Purification by Knowledge
Way¡¦. Until the end of the last chapter that is Purification by Knowledge and Vision of What
What is not the Path. That purification he has reached, and so the next purification is called
by Knowledge and Vision of the Way¡¦. And this stage of purity will consist of many stages o
knowledge. So here we have nine.

¡§The Eight should be understood as follows: (1) Knowledge of Contemplation of rise and fa
free from imperfections and steady on its course (It is that which is more mature.), (2) Know
Contemplation of Dissolution, (3) Knowledge of Appearance as Terror, (4) Knowledge of Co
(5) Knowledge of Contemplation of Dispassion, (6) Knowledge of Desire for Deliverance (or
from it), (7) Knowledge of Contemplation of Reflection, and (9) Knowledge of Equanimity ab
these states of knowledge he will get one after another.

¡§ ¡¥Knowledge of Conformity with Truth as ninth¡¦ is a term for Conformity.¡¨ It will become
¡§So one who wants to perfect this should make these kinds of knowledge his task, starting
Rise and Fall free from imperfections.¡¨ So he has to practice the Knowledge of Rise and Fa
of Rise and Fall again. ¡§Why does he pursue knowledge of rise and fall? To observe the th
characteristics.¡¨ He has been observing the three characteristics, but his observation of the
characteristics is not yet strong enough. In order to make that observation strong, he has to
observing the three characteristics again. ¡§The knowledge of rise and fall already dealt with
the ten imperfections (He was troubled previously by the ten imperfections of obstacles.), wa
observing the three characteristics in their true nature; but once freed from imperfections, it i
so. So he should pursue it again here in order to observe the characteristics.¡¨ He practices
rise and fall again. When he practices meditation, he sees the rising and falling or the rising
disappearing of things, that is the rising and disappearing of what he observes at the presen

Then the book explains the three characteristics - when they fail to become apparent and fo
first ¡§The characteristics fail to become apparent when something is not given attention and
conceals them. What is that? Firstly, the characteristic of impermanence does not become a
when rise and fall are not given attention, it is concealed by continuity.¡¨ Because it is conce
continuity, we cannot see the impermanence of things. That is because we cannot get rid of
continuity, so we are unable to see the impermanence of things. Impermanence is conceale
because we do not see the rise and fall of things.

¡§The (second) characteristic of pain does not become apparent (That means we are unable
when continuous oppression is not given attention (when we do not concentrate on being op
falling continuously), it is concealed by the postures.¡¨ That means we change from one pos
very often. When we change from one posture to another, the next posture is said to be una
the pain. That means when we have a little pain, then we change the posture. That is when
meditating especially. Let us say that we sit for some time, and there is pain or something in
we change to be free from it. So when we change, the pain is gone. The pain does not beco
because we change posture every now and then. We fail to see that physical phenomena ar
arising and disappearing. When we see the arising and disappearing and when we see that
also when we sit in one posture for some time, then we will come to see that it is really painf
suffering always.

The third characteristic is not self. It does not become apparent because resolution into the
is not given attention. That means when we do not see the mental and physical phenomena
elements, or in different components, there is the notion of compactness. We see things as
put together or they are held together by something. That dissolution into various elements

attention to; so that is concealed by compactness. Since it is concealed by compactness, we
them into their components. Therefore we fail to see the third characteristic of anatta or not s

¡§However, when continuity is disrupted by discerning rise and fall¡¨ - when you practice me
really see the rise and fall of things, then the continuity is disrupted. The continuity is broken
When the continuity is broken, then the characteristic of impermanence becomes clear. ¡§W
exposed by attention to continuous oppression, the characteristic of pain becomes apparent
nature.¡¨ There is an explanation down in footnote 3. We will read that later. ¡§When the res
compact is effected by resolution into elements (when we break them down into pieces), the
not self becomes apparent in its true nature.¡¨ So if we want to see the three characteristics,
to do is see the rise and fall of things and see the perpetual oppression by rise and fall. And
to break everything down into the component elements.

Now let us look at footnote 3, the last paragraph. ¡§Commenting on this paragraph in the Vis
Sub-Commentator says: ¡§¡¥When continuity is disrupted¡¦ means when continuity is expose
perpetual otherness of states (States are different at every moment. One state at this mome
at the next moment.) as they go on occurring in succession. For it is not through the connec
states¡¨ and so on. That sentence is not so good. What we should understand is that a perso
observes rise and fall, who really sees the rise and fall, to such a person these mental and p
do not manifest in a state of connectedness. That is because that person sees things rising
rising and falling. That means at every moment there is a new thing coming up and then disa
the next moment there is another new thing appearing and so on. So when he is seeing the
things, then states do not manifest to him in a state of connectedness. They appear to him b
disconnected like iron darts. That means that they appear like sparks, here and there, not co
whole. Therefore the characteristic of impermanence becomes very apparent to the meditato
to or who sees the rise and fall clearly.

¡§ ¡¥When the postures are exposed¡¦ means when the concealment of the pain that is actu
postures is exposed. For when pain arises in a posture, the next posture adopted removes t
concealing it. But once it is correctly known how the pain in any posture is shifted by substit
posture for that one, then the concealment of the pain that is in them is exposed because it
evident that formations are being incessantly overwhelmed by pain. ¡¥Resolution of the com
by resolving [what appears compact] in this way ¡¥The earth element is one, the water elem
etc.¡¨ In our meditation we note that this is the earth element, this is the water element, this i
element and so on, or this is feeling, this is perception and so on.

¡§ ¡¥When the resolution of the compact is effected¡¦ means that what is compact as a mass
as a function (That means ¡¥as to function¡¦.) what is compact as to object has been analyze

three kinds of compactness here - compact as to mass, compact as to function, and compac
when material and immaterial stages have arisen mutually steadying each other (That mean
each other.) [mentality and materiality, for example,] then, owing to misinterpreting that as a
compactness of mass is assumed through failure to subject formations to pressure.¡¨ ¡¥Failu
formations to pressure¡¦ means failure to contemplate on the formations. The P??i word use
¡¥maddana¡¦. It means ¡¥pressing or what is called ¡¥kneading¡¦, like kneading dough. The P
¡¥pressing¡¦. So he translated it as ¡¥pressure¡¦ here. But it is to be understood as contempl
has pressed the formations¡¦ means one who has contemplated on the formations. So we ca
compactness of mass is assured through failure to contemplate on the formations. That is w
contemplate on the formations, contemplate on them as impermanent and so on.

¡§And likewise compactness of function is assumed when, although definite differences exis
states¡¦ functions, they are taken as one.¡¨ When we see something, the eye has one functio
consciousness has another function. And what is seen has yet another function. So they hav
functions and they are doing their different functions at the moment. But when we see some
them as different functions. We just see them. We think that we see with the physical eyes a
seeing consciousness. If we pay no attention, if we do not practice meditation, we see the fu
whole. We don¡¦t see that it is the function of the eye, it is the function of seeing consciousne
When we see these functions as a whole, then it is the compact as to function.

The next one is ¡¥compact as to object¡¦. Let us say at one time we se a visible object and a
hear an audible object, and at yet another time we smell some scent. Although taking differe
although cittas are taking different objects, we take it to be just one and the same thing. We
is the same consciousness that sees, that hears, smells and so on. We think that it is all the
consciousness. We think that we have the same consciousness from the beginning of our lif
something like that. So when we take it like that, it is called ¡¥compact with regard to object¡
try to see one by one, that is breaking them down into their respective elements, the compac
so there can be no misinterpretation as a single unit.

¡§But when they are seen after resolving them by means of knowledge into these elements,
like froth subjected to compression by the hand. They are mere states occurring due to cond
this way the characteristic of not self becomes more evident.¡¨ So here we should understan
conceals the three characteristics, and failing what they are concealed. If we fail to see the r
then the continuity will conceal the impermanence. If we fail to make clear the postures, then
see the perpetual oppression. And so we will fail to see the second nature. If we cannot brea
their elements, then the compactness will conceal them. So we will not be able to see them
just the phenomena going on.

In connection with this the author gives us the information on what it is that we call ¡¥imperm
what is the characteristic of impermanence. The author tells us what is the mark to decide th
impermanent, or what is painful, or what the characteristic of pain is, and what is not self, an
characteristic of not self. The five aggregates are impermanent. The five aggregates are wha
impermanent because when we say that it is impermanent, we mean the five aggregates. Th
in the world. These five aggregates have a beginning and an end, and so they are imperman
impermanent? Because they rise and fall and change. That is one mark. Or because of their
having been, that is another mark. Because they rise and fall and change they are imperman
exist after coming into being. That means immediately after coming into being they disappea
disappear immediately after coming into being, they are impermanent. So there are two cha
marks given here. One is that they rise and fall and change, and so they are impermanent. T
they disappear after coming into being. That is why they are impermanent.

¡§Rise and fall and change are the characteristic of impermanence; or mode alteration (That
It just means a particular mode.), in other words non-existence after having been, is the cha
impermanence.¡¨ So we should say ¡§a particular mode which is known as non-existence af
characteristic of impermanence.¡¨

¡§The same five aggregates are painful.¡¨ What is dukkha? The five aggregates. ¡§Because
is impermanent is painful¡¦. Why? Because of continuous oppression.¡¨ So they are always o
and falling, rising and falling. ¡§The mode of being continually oppressed is the characteristic
we want to say something is painful, we have to see whether it is always oppressed by rising

¡§Those same five aggregates are not self because of the words, ¡¥What is painful is not se
there is no exercising of power over them. The mode of insusceptibility to the exercise of pow
characteristic of not self.¡¨ So we have no power over them: by their own nature they just ari
and we cannot make them not disappear after they have arisen. So we have no exercise of
is the characteristic of not self.

¡§The meditator observes all this in its true nature with the knowledge of the contemplation o
in other words, with insight free from imperfections and steady on its course.¡¨ He sees rise
clearly, and also sees the three characteristics clearly. That is only possible when he has ov
imperfections of vipassan? and his meditation is steady on its course.

Now let¡¦s read footnote 4. ¡§These modes, [that is, the three characteristics,] are not includ
aggregates because they are states without individual essence.¡¨ They are just marks. They
of the aggregates. That is why the characteristics are not included in the aggregates. ¡§They

from the aggregates because they are unapprehendible without the aggregates.¡¨ That is be
arising and disappearing of the aggregates. Without the aggregates we do not see the arisin
at all. Although they are different from the five aggregates, they cannot be apprehended, the
known, without the five aggregates. ¡§But they should be understood as appropriate concep
Again it is an unsatisfactory translation. ¡¥Pa??ati vises?¡¦ means a particular concept. They
appropriate concepts. That means the characteristic of impermanence, the characteristic of
characteristic of not self are particular appropriate concepts. They are themselves concepts.
their own individual essence. They are just the marks or signs of the impermanent, painful a
of the five aggregates. Instead of saying ¡¥appropriate conceptual differences¡¦, we should s
appropriate concepts that are reasons for differentiation in the explaining of dangers in the f
aggregates, and which are allowable by common usage in respect of the five aggregates.¡¨

In the next paragraph we have Knowledge of Contemplation of Dissolution. ¡§After a yogi re
this way, and examines, and investigates material and immaterial states, [to see] that they a
painful, and not self, then if his knowledge works keenly, formations quickly become apparen
his knowledge of arising and falling becomes stronger and stronger. As it gets stronger, the
more apparent more quickly and also his knowledge becomes more and more keen. ¡§Once
keenly and formations quickly become apparent, he no longer extends his mindfulness to th
presence, or occurrence, or sign, but brings it to bear only on their cessation as destruction,
breakup.¡¨

That means his knowledge becomes keener and keener. When knowledge becomes keener
appear to him more quickly. Formations rise and fall at their own speed. It is not that formati
fall slowly and now formations rise and fall quickly. They are rising and falling at their own pa
before his mind becomes mature or before his knowledge becomes strong, his seeing of the
so swift. Now his knowledge or his mind is very keen and so he can see formations very qui
come and go very quickly. In fact he cannot see the beginning, the middle and the end or all
their existence clearly. Because they are going fast, what he notices is just their disappearan
you are standing on the side of a freeway and the cars are going past you at very high spee

mixed with concepts. Before he reaches that stage, his understanding is mixed with concept
mental and physical phenomena mixed with concepts. Now when he reaches this stage, he
and physical phenomena purely, not mixed with shape, or form, or whatever, the concepts.
falling or the disappearance of things at this stage. This is called ¡¥Knowledge of Contempla
Dissolution¡¦.

¡§When insight knowledge has arisen in him in this way so that he sees how the field of form
arisen thus, ceases thus, it is called ¡¥Contemplation of Dissolution¡¦ at that stage, with refer
it is said.¡¨ So the following is a quotation from one of the books and there is an explanation
quotation. The style in the quotation (It is from the Pa?isambhid?magga.) is a little different f
in other books, like those in the Sutta Pi?aka. It is often not so easy to understand as the Su
So the commentator or author has to explain them in detail.

We may skip some passages or some paragraphs. Let¡¦s go to paragraph 14. ¡§He contemp
the word ¡¥anupassati¡¦ is translated as ¡¥he contemplates¡¦ here. And it is commented upon
as ¡¥he sees always accordingly¡¦. That is because it is commented upon ¡¥anu anu passati
passati¡¦ means he sees more or he sees much, not always ¡¥accordingly¡¦. And ¡¥he sees
again and again in various modes. That is what is meant. He contemplates only on the disap
observes or on the disappearing of mental and physical phenomena.

Paragraph 18 ¡§Progressing in this way, he relinquishes, he does not grasp. What is meant?
that] this contemplation of impermanence, etc., is also called both ¡¥relinquishment as giving
¡¥relinquishment as entering into¡¦ because, by substitution of opposite qualities, it gives up
along with aggregate producing kamma formations.¡¨ ¡¥Substitution of opposite qualities¡¦ - t
temporary abandonment. ¡§And because, by seeing the unsatisfactoriness of what is formed
by inclining towards, Nibb?na, which is the opposite of the formed.¡¨ So the meditator relinqu
and does not grasp at anything.

There are three kinds of abandonment. I hope you remember these three - momentary aban
abandonment, and absolute abandonment. ¡¥Momentary abandonment¡¦ means substituting
defilements. At the moment of studying, at the moment of taking the class, you do not have
like attachment, anger, hatred, or whatever. They are replaced by understanding. That is mo
are some conditions for anger to arise, then it will arise. So ¡¥he relinquishes¡¦ means that th

vipassan? meditation he is able to abandon mental defilements by way of substitution of opp
That means it can momentarily abandon the mental defilements.

There is another abandonment called what? Temporary abandonment. That means is lasts
abandonment. So it is able to keep those defilements at bay for a longer period of time. Whe
vipassan? meditation, you observe something. When you see it clearly and when you see th
disappears, you are able to get rid of mental defilements with regard to that object. When yo
meditation and when you have gained experience, then at that moment you can also abando
regard to those which you do not observe. Just as you can abandon mental defilements with
you observe, so you are able to abandon mental defilements with regard to those that you d
still remain suppressed or something like that. That is what is called ¡¥temporary abandonm
meditation¡¦.

These two kinds of vipassan? can be achieved, but absolute abandonment comes only at th
enlightenment. ¡§Therefore the bhikkhu who possesses that [contemplation] gives up defilem
Nibb?na in the way stated, he does not grasp (cling to) defilements by causing rebirth, nor d
(cling to) a formed object through failing to see its unsatisfactoriness. Hence it was said he r
he does not grasp.¡¨ This is Contemplation of Dissolution.

Paragraph 27 ¡§When he no longer vacillates and so constantly bears in mind that the unce
the undissolved will also dissolve, then he disregards the arising, presence, occurrence, and
formations, which keep on breaking up, like fragile pottery being smashed, like fine dust bein
like sesame seeds being roasted, and he sees only their break-up. Just as a man with eyes
of a pond or on the bank of a river during heavy rain would see large bubbles appearing on t
water and breaking up as soon as they appeared, so too he sees how formations break up a
Blessed One said of such a meditator:

¡¥And he who looks upon the world
As one who looks upon a bubble,
As one who looks upon a mirage,
Is out of sight of Death the King¡¦.¡¨

¡§When he constantly sees that all formations thus break up all the time, then contemplation
grows strong in him, bringing eight advantages, which are these: (So a person who has reac
knowledge gets these eight advantages.) abandoning of [false] view of becoming, giving up
constant application (That means always practicing.), a purified livelihood, no more anxiety o
concern, absence of fear, acquisition of patience and gentleness, and conquest of aversion
(That means neither glad nor sad.) Hence the Ancients said:

¡¥On seeing these eight perfect qualities

He contemplates formations constantly
Seeing break-up in order to attain
The Deathless, like the sage with burning turban¡¦.¡¨

What the verse says is: ¡§The sage on seeing these eight perfect qualities, comprehends fo
seeing breaking-up in order to attain the Deathless, like a man whose clothes or head are bu
strange that all the translators misunderstood the passage here. The P??i words used are ¡¥
¡¥cira¡¦. ¡¥Cela¡¦ means just cloth or clothes, not necessarily a turban. So there are two simil
whose clothes are on fire and a man whose head is on fire. If your clothes are on fire, you d
other things, but you try to put the fire out. And also if your head is burning, then you try to e
the burning on the head and don¡¦t do any other things. So it should be a person with clothe
or something like that. The reference given here is Sa?yutta Nik?ya, 440. I read this passag
but the passage referred to there. I read the English translations and I saw there also a turba
But the word ¡¥cela¡¦ does not mean ¡¥turban¡¦ but just ¡¥clothes¡¦ or ¡¥cloth¡¦. So this is the
Dissolution.

Next is the Knowledge of Appearance as Terror. ¡§As he repeats, develops and cultivates in
contemplation of dissolution, the object of which is cessation consisting in the destruction, fa
break-up of all formations, then formations classed according to all kinds of becoming, gene
station, or abode of beings, appear to him in the form of great terror.¡¨ That means when he
this knowledge of seeing the dissolution of things, then he comes to see all life this way, all l
becoming, generation, destiny, station or abode of beings. They all mean just life. Buddha d
different names and so all these are taken here. You can just say lives or existences. He se
life as a great terror, full of danger - "¡§s lions, tigers, leopards, bears, hyenas, spirits, ogres
bulls, savage dogs, rut-maddened wild elephants, hideous venomous serpents, thunderbolts
battle fields, flaming coal pits, etc., appear to a timid man who wants to live in peace.¡¨ A yo
see all these things, but we must understand that in the books it is given in all its diversity. A
yogi will not see all of them; he may see one or two of them. ¡§When he sees how past form
present ones are ceasing, and those to be generated in the future will cease, in just the sam
is called ¡¥Knowledge as Appearance as Terror¡¦ arises in him at that stage.¡¨ So he sees al
existence as terrible. Then a simile is given. I will not read this simile. There are two similes.

The second simile is in paragraph 31. ¡§A woman with an infected womb¡¨ - the P??i word u
¡¥Puti¡¦ means rotten and ¡¥paja¡¦ means offspring. Literally translated it means a woman wi
offspring. It may mean the same thing as ¡¥with an infected womb¡¦. It is a woman whose of
Whenever a son or a daughter is born, he or she dies sooner or later. That is what is meant.

Paragraph 32 is important. ¡§But does the knowledge of appearance as terror, fear or does

means when a yogi has reached this stage, is he afraid? Does he fear or is he afraid? No. If
if he fears, then he has fallen away from meditation because fear is an unwholesome menta
fear is in your mind or in the mind of a yogi, he is not doing meditation at that moment. So he

¡§For it is simply the mere judgment that past formations have ceased, present ones are cea
ones will cease. Just as a man with eyes looking at three charcoal pits at a city gate is not h
since he only forms the mere judgment that all who fall into them will suffer no little pain¡¨ an
Although he sees the existence or formations of mental and physical phenomena as terrible
himself does not fear them; he is not afraid of them.

Then paragraph 33 ¡§But it is called ¡¥appearance as terror¡¦ only because formations in all
becoming, generation, destiny, station, or abode, are fearful in being bound for destruction, a
appear only as terror. ¡§Here is the text about its appearance to him as terror¡¨ and so on. ¡§
the sign and the occurrence as empty, vain, void, without power or guide, like an empty villa
goblin city, etc., when he brings [them] to mind as not self, and so the sign and occurrence a
a terror.¡¨ The ¡¥sign¡¦ means the shape and form of mental and physical phenomena. And t
you understand what is meant by occurrence? He uses ¡¥occurrence¡¦ many times in this ch
really means not just arising, it means arising and continuing to stay for some time. The P??
¡¥pavatta¡¦. It does not means just arising; it means arising and then continuing for some tim
Knowledge of Appearance as Terror.

Next is the Knowledge of Contemplation of Danger. ¡§As he repeats, develops and cultivate
Appearance as Terror, he finds no asylum, no shelter, no place to go to, no refuge in any kin
generation, destiny, station, or abode.¡¨ When he sees all these as terrible, then he finds no
place, no solace because whatever phenomena he contemplates on, he sees them as all dis
is no shelter, no refuge. ¡§In all kinds of becoming, generation, destiny, station, and abode t
single formation that he can place his hopes in or hold on to. The three kinds of becoming ap
charcoal pits full of glowing coals, the four primary elements like hideous venomous snakes,
aggregates like murderers with raised weapons, the six internal bases like an empty village,
bases like village-raiding robbers, the seven stations of consciousness and the nine abodes
though burning, blazing and glowing with the eleven fires, and all formations appear as a hu
destitute of satisfaction or substance like a tumor, a disease, a dart, a calamity, an affliction.

During this stage, actually, he sees everything as faulty. He cannot see anything to hold on t
place his hopes on and so on. So he feels very helpless during this stage of meditation. ¡§Th
forest thicket of seemingly pleasant aspect but infested with wild beasts¡¨ and so on. The pla
good but there are ¡§wild beasts, a cave full of tigers, water haunted by monsters and ogres
raised sword, poisoned food, a road beset by robbers, a burning coal, a battle field between

armies, appear to a timid man who wants to live in peace.¡¨ So during this stage of knowledg
sees, he sees it as faulty, as dangerous, and there is no refuge or consolation for him at tha
Sometimes when yogis reach this stage, they don¡¦t know what to do because they feel like
or something like that. Whatever they observe seems to be going away. So there is no solac
even leave meditation and go back to their houses because they feel so helpless at this stag

There is a long quotation and the explanation. We will skip those. Then we come to paragra
Knowledges he understands: one who understands knowledge of danger understands, pene
kinds of knowledge, that is, the five based on arising, etc., and the five on non-arising and s
skilled in these two kinds of knowledge: with skill in the two, that is, knowledge of danger an
the state of peace. The various views will shake him not: he does not vacillate about views t
¡¥The ultimate Nibb?na is here and now¡¦. The rest is clear.¡¨ This is Contemplation of Dang
he sees danger and also he has the knowledge of the state of peace. ¡¥Nibb?na is good. Ni
the world is full of danger¡¦. So he sees there are two kinds of seeing here. One is positive a
negative. After seeing phenomena as dangerous, he goes on and he comes to another stag

¡§When he sees all formations in this way as dangerous, he becomes dispassionate toward
translate it as ¡¥turning away from¡¦. So he turns away from.) is dissatisfied with, takes no de
manifold field of formations belonging to any kind of becoming¡¨ and so on. When he sees d
is dispassionate towards them; he turns away from them. ¡§Just as a golden swan that loves
Citta Peak finds delight, not in a filthy puddle at the gate of a village of outcastes, but only in
Great Lakes, so too this meditator swan finds delight, not in the manifold formations seen cl
but only in the Seven contemplations, because he delights in development.¡¨ That means he
practice. ¡§And just as the lion, King of Beasts, finds delight, not when put into a gold cage,
Himalaya with its three thousand leagues¡¦ extent, so too the meditator lion finds delight, not
becoming of the happy destiny, but only in the three contemplations. And just as Chaddanta
all white with sevenfold stance, possessed of supernormal power, who travels through the a
not in the midst of a town, but only in the Chaddanta Lake and Wood in the Himalaya, so too
elephant finds delight, not in any formation, but only in the stage of peace seen in the way b
¡¥Non-arising is safety¡¦, and his mind tends, inclines, and leans towards that.¡¨

Now there is footnote 15 regarding Chaddanta. It is not an important thing, but we should un
Chaddanta. ¡¥Danta¡¦ means the tusk of an elephant and ¡¥cha¡¦ means six. So Chaddanta
with six tusks. In the J?taka it is explained that it is not that the elephant has six tusks, but th
has tusks which emit six colored rays. So when people paint Chaddanta Elephant, they pain
tusks. However in one of the paintings I remember seeing in a book, (I think they were paint
caves or some other caves in India.) they drew the elephant with six tusks. But in the J?taka
stated that the elephant has tusks emitting rays of six colors. That is why he is called ¡¥Chad

Chaddanta was one incarnation of the Bodhisatta. Before he became the Buddha, he was b
So this refers to him. ¡§All white with sevenfold stance, possessed of supernormal power, w
the air, finds pleasure, not in the midst of a town, but only in the Chaddanta Lake and Wood
so too this meditator elephant finds delight, not in any formation, but only in the stage of pea
way beginning ¡¥Non-arising is safety¡¦, and his mind tends, inclines, and leans towards that

Now I didn¡¦t intend to talk about this. In footnote 15 ¡§On the expression ¡¥with sevenfold st
Pa?isambhid?magga says¡¨ - then he does not translate it, ¡¥sevenfold stance¡¦, believe it o
P??i sentence there: ¡§hattha-p?da-v?la-vatthikosehi bh|miphusanehi sattahi pati??hito ti sa
touches the ground with seven of his limbs: ¡¥hattha¡¦, the trunk is one, ¡¥p?da¡¦ four feet, ¡¥
the tail, ¡¥vatthikosa¡¦ means the male member. It is explained this way in another Comment
not important here.

So this Knowledge of Dispassion. This Knowledge of Dispassion or Knowledge of Turning A
Knowledge of Danger. So it is logical. You first see the arising and disappearing and then af
only the disappearing. When you see things disappearing or disintegrating, you see that the
that they are dangerous, or that they are terrible. And then you find fault with them because
dangerous. You see danger in them or you find fault with them. After finding fault with them,
dispassioned towards them. You don¡¦t want anything to do with them. That is Knowledge of

¡§Knowledge of Contemplation of Danger is the same as the last two kinds of knowledge in
meaning¡¦ means in essence. In reality they are the same. ¡§Hence the Ancients said: ¡¥Kno
as Terror while one only has three names: It saw all formations as terror, thus the name ¡§A
Terror¡¨ arose; it aroused the [appearance of] danger in those same formations, thus the nam
of Danger¡¨ arose; becoming dispassionate towards those same formations, thus the name
Dispassion¡¨ arose¡¦. Also it is said in the text: ¡¥Understanding of Appearance as Terror, Kn
Danger, and Dispassion: these things are one in meaning, only the letter is different¡¦.¡¨ So o
are different, but the meaning is one. They mean the same vipassan? knowledge.

When one sees danger in them and wants to turn away from them, the next thing is Desire f
out of it. First you see danger and then you become dispassionate towards it and now you w
it, to get out of it. This is desire for deliverance. ¡§When, owing to this knowledge of dispassi
clansman becomes dispassionate towards, is dissatisfied with, takes no delight in, any singl
manifold formations in any kind of becoming, generation, destiny, station of consciousness o
his mind no longer sticks fast, cleaves, fastens on to them.¡¨ So whatever object he observe
not want to take it actually; his mind is not stuck to them. ¡§And he becomes desirous of bei
the whole field of formations and escaping from it.¡¨

So when we really see the danger of something, we want to get rid of it, we want to get out o
natural. And so here the similes are given - just as a fish in a net, a frog in a snake¡¦s jaws, a
shut into a cage and so on. There is mentioned here the moon inside R?hu¡¦s mouth. And th
said: ¡§R?hu is the name for the eclipse of the sun or moon, personalized as a demon who t
mouth.¡¨ So whenever there is an eclipse, we say ¡§R?hu has swallowed the moon¡¨ or ¡§R?
sun.¡¨ At the end of the eclipse we say ¡§Oh, R?hu has thrown up the sun or the moon.¡¨ R?
Prince Siddhatta gave the name ¡¥R?hula¡¦ to his son because a demon is a hindrance or a
his son was born, he thought that there was another attachment for him, another object of at
So he is like R?hu for him. So he gave his son the name ¡¥R?hula¡¦. This is desire for delive
to get rid of formations, to get rid of existence all together.

After that there is Knowledge of Contemplation of Reflection. He is doing it again here. ¡§Be
of deliverance from all the manifold formations in any kind of becoming, generation, destiny,
abode, in order to be delivered from the whole field of formations he again discerns those sa
attributing to them the three characteristics by knowledge of contemplation of reflection.¡¨ He
rid of the existence and all these things, but he cannot just leave them alone. He has to take
object of meditation again. So he has to see the impermanence, suffering and no self nature
formations again. In P??i the word is ¡¥pa?isankh?¡¦. ¡¥Pa?i¡¦ means again and ¡¥sankh?¡¦
knowing again, contemplating or observing the three characteristics again. ¡§He sees all form
impermanent for the following reasons¡¨ and so on. You can compare these passages with t
on comprehending by groups. So he again sees mental and physical phenomena as imperm
not self in different ways as they are non-continuous, temporary, limited by rise and fall and

Here a simile is given. This is a very good simile. I often tell this simile to people. Paragraph
does he discern them in this way? In order to contrive the means to deliverance.¡¨ Why does
mental and physical phenomena again? Because he must have some means of deliverance
thought to catch a fish, it seems, so he took a fishing net and cast it in the water.¡¨ Here a ¡¥
really means something like a basket. You put it in the water and then the fish is caught in th
you lower your hand and take hold of the fish. Actually it is not a basket. It has the shape of
it is something like a basket. You put it in the water and the fish are caught in it. There is a h
them out. ¡§So he took a fishing net and cast it in the water. He put his hand into the mouth
the water and seized a snake by the neck (thinking it was a fish). He was glad, thinking ¡¥I h
fish¡¦. In the belief that he had caught a big fish, he lifted it up to see. When he saw three ma
lines on the neck of the snake), he perceived that it was a snake, and he was terrified. He sa
dispassion (revulsion) for what he had seized, and desired to be delivered from it.¡¨ So he w
away, but he was afraid that it might bite him if he threw it away as it was. ¡§Contriving a me
deliverance, he unwrapped the coils from his hand, starting from the tip of the tail. Then he r
and when he had weakened the snake by swinging it two or three times round his head, he

¡¥Go, foul snake¡¦.¡¨ So his swinging the snake two or three times is like his contemplating o
impermanence and so on in the formations again. ¡§Then quickly scrambling up on to dry la
back whence he had come, thinking ¡¥Goodness, I have been delivered from the jaws of a h
then applying of the simile to the actual experience is in the next paragraph.

¡§At this point knowledge of reflection has arisen in him, with reference to which it is said¡¨ a
This is called ¡¥Knowledge of Reflection¡¦. I think in that book the word used is not ¡¥reflectio
other thing. It is the Knowledge of Re-Observation. That is very good.

Next is Discerning Formations as Void. ¡§Having thus discerned by Knowledge of Contempl
that ¡¥All formations are void¡¦, he again discerns voidness in the double logical relation¡¨ an
are not easy to understand. The double is easy to understand but not the quadruple logical r
itself is very strange. Let¡¦s talk about the double. ¡¥The double logical relation¡¦ means this
self or of what belongs to self. Here ¡¥this is void of self¡¦ is one and ¡¥this is void of what be
self¡¦ is another. So there are two ways of discerning the voidness. It is void of self and it is v
belongs to self.

Now the quadruple logical relation is very difficult to understand. Do you see that in paragrap
footnote 19 he says ¡§The passage is a difficult one¡¨. It is indeed. The P??i text is: ¡§N?ha?
kassaci ki?canat¡¦ asmi? na ca mama kvacani kismi?ci ki?canat¡¦ atthi¡¨. This passage actua
the translator was used by those of other faiths during the time of the Buddha. It may not be
actually. Do you know Prakrit languages? Prakrit languages are similar to P??i, but they are
P??i. It is something like a corrupt form of Sanskrit or P??i. So that is why this is very difficul
understand. But the footnote is very good, the last paragraph on that page. ¡§The Comment
given here is summed up by Pa?isambhid?magga as follows: Now seeing in four ways. Righ
relation. The first way is what? He sees the non-existence of a self of his own; that means th
of me. That is one seeing. And second he sees of his own self itself (not ¡¥too¡¦) that it is not
of another¡¦s self. There is no self of me and I am not the property of another person¡¦s self.
second one. The third one is that there is no self of another person and I am not the property
There are four: (1) There is no self in me, (2) somebody is not the property of myself, (3) the
of others, (4) and I am not the property of the self of others. In these four ways, he has to co
sees the non-existence of another¡¦s self; that is one thing. He sees of another that that othe
property of his own self. So in four ways he contemplates.

And then paragraph 55 in six modes again he contemplates that eye is void of self, or of the
self and so on. And next paragraph he contemplates in ten modes , and then in the next par
contemplates in twelve modes, and then in the next paragraph in forty-two modes.

¡§When he has discerned formations by attributing the three characteristics to them and see
this way, he abandons both terror and delight, he becomes indifferent to them and neutral, h
them as ¡¥I¡¦ nor as ¡¥mine¡¦, he is like a man who has divorced his wife¡¨ and so on. So we
next time. During this stage of knowledge he re-observes the mental and physical phenome
ways, say to see the impermanent, suffering and soulless nature of them. And Mah?si Say?
that a person need not go through all the modes given here; it is impossible. But as a book a
observing are given, but a person should not do all these in order to get the next higher stag
or two, and then he can go to the higher stages.

Oh! One thing please, in paragraph 57, about 4 line down ¡§as incapable of being had [as o
insusceptible to the exercise of mastery, as alien, as secluded [from past and future]¡¨ - in fa
secluded from cause and result.

And then in footnote 25 ¡§A meaning such as ¡¥what in common usage in the world is called
materiality¡¦ is not intended here because it is not implied by what is said.¡¨ The actual mean
different. ¡¥Because it is established without saying anything¡¦, what do you call that? It is so
it does not need any explanation.

Student: Self-evident.

Teacher: Oh, yes! Self-evident. So we can just say ¡¥because it is self-evident¡¦, not ¡¥it is n
what is said¡¦. It is so plain that it does not need any explanation. That is what is meant. ¡§Fo
usage of the world does not speak of mere materiality as a being.¡¨ When common people s
being¡¦, they do not mean that matter is a being. When they someone or something is a bein
mind and matter. The word ¡¥satta¡¦ in P??i here should not be understood as meaning ¡¥a
meaning atman or att?. That is what the Commentator is writing about. What is intended as
that is conjectured by outsiders. That means non-Buddhists.

We will go to Equanimity about Formations next time. As I said before, this book is very goo
what a yogi really experiences during practice of meditation without quotations. And so it is s
better reading than the Visuddhi Magga. But Visuddhi Magga is the basis for that book.

Student: Bhante, can we skip any of these stages?

Say?daw: No. We cannot skip the stages, but sometimes what happens is a person may go
stages in one day. That can happen but we cannot skip any stages because they are logical
other. But a person may go through three stages in only one day, sometimes maybe even m
in one day of meditation.

S?dhu! S?dhu! S?dhu!

, (Tape 44 / Ps: 49 ¡V 128)

We will begin with paragraph 53, chapter 21. From that paragraph begins actually Knowledg
Formations. Let me tell you something before that. A meditator of vipassan? goes through d
vipassan? knowledge. The first knowledge he experiences is the knowledge of defining min
knowledge of discrimination of discrimination of mind and matter, or seeing mind and matter
that knowledge he gains the knowledge of seeing the causes of mind and matter. And after
knowledge of comprehension. And at that stage he sees the common characteristic of phen
impermanence, suffering, and soullessness. And then he reaches another stage where he s
disappearing of whatever he observes. Going from that stage, he reaches another stage wh
dissolution or only disappearing vividly appears to him or he is able to comprehend the diss
disappearing more evidently.

And after that there are two stages in the knowledge of arising and disappearing. The first is
immature stage¡¦ and the other stage is called ¡¥mature stage¡¦. In between these two stage
stage not necessarily in vipassan? knowledge, the arising of impediments. So ten impedime
during the immature stage of knowledge of rise and fall. He surmounts them or decides that
right path and that meditation is the only right path. And then he practices again. He reaches
the mature stage of rise and fall. After that he sees only the dissolution, and then he sees da
mental and physical phenomena that are rising and falling or that are always disappearing.
difficult to be consistent with the translation of the P??i word. It is said in this book that know
fearful comes after the knowledge of seeing dissolution. So when you see things dissolving
then you see them as fearful. After seeing them as fearful, you get another kind of knowledg
danger in them or seeing faults in them. And then you become dispassioned towards them.
attached to them; you don¡¦t want to hold on to them, and then you want to get out of them;
free from them.

And then after that the yogi practices again on the three characteristics of mental and physic
After that he reaches this stage, the stage of Knowledge of Equanimity about Formations. T
simile given in paragraph 49. So we should read that paragraph again.

¡§A man thought to catch a fish, it seems, so he took a fishing net and cast it in the water. H
into the mouth of the net under the water and seized a snake by the neck. He was glad, thin
caught a fish¡¦. In the belief that he had caught a big fish, he lifted it up to see. When he saw
he perceived that it was a snake, and he was terrified. He saw danger, felt dispassion (revul
had seized, and desired to be delivered from it. Contriving a means to deliverance, he unwra

from his hand, starting from the tip of its tail. Then he raised his arm, and when he had weak
by swinging it two or three times round his head, he flung it away, crying ¡¥Go, foul snake¡¦.
scrambling up on to dry land, he stood looking back whence he had come, thinking ¡¥Goodn
delivered from the jaws of a huge snake!¡¦¡¨ This is the simile and then the application of the
practice is given in paragraph 50. So he wants to get rid of it and he has to find a means to g
That is contemplation on mental and physical phenomena again as impermanent, suffering a
that he reaches this stage. We have done this before, but I want to begin from here.

Paragraph 53 ¡§Having thus discerned by knowledge of contemplation of reflection (That m
or re-contemplation.) that ¡¥All formations are void¡¦, he again discerns voidness in the doub
relation thus. (So he contemplates on formations or mental and physical phenomena in doul
That is ¡¥This is void of self¡¦ or ¡¥This is void of what belongs to self¡¦.¡¨ And then he discern
in the quadruple logical relation. That means in four ways: ¡¥There is no ¡¥I¡¦ and ¡¥me¡¦; it is
property of another person; another has no ¡¥I¡¦ or no atman; what he thinks to be his atman
or something like that. This is called ¡¥the four quadruple logical relation¡¦. The text given he
difficult to understand and peculiar.

And then paragraph 55 he discerns voidness in six modes. And next in how many modes? I
modes, then in ten modes, then in twelve modes, then in forty-two modes through full under
investigation and so on. So he contemplates on the formations of voidness in different ways
the three characteristics of them.

Then paragraph 61 ¡§When he has discerned formations by attributing the three characteris
seeing them as void in this way, he abandons both terror and delight, he becomes indifferen
neutral, he neither takes them as ¡¥I¡¦ nor as ¡¥mine¡¦, he is like a man who has divorced his
this description is important. This is the description of the Knowledge of Equanimity about Fo
person has reached the Knowledge of Equanimity about formations, he abandons both terro
not afraid of anything and he is not attached to anything. His mind is always neutral. Howeve
thing may be, he doesn¡¦t see it as attractive and however provocative it may be, he doesn¡¦
provocative. And he becomes indifferent to them and neutral. He becomes indifferent to form
to what he observes through his practice of meditation. Now ¡¥indifferent to them¡¦ does not
not pay attention to them. Actually he pays attention to them, but he has no fear about them
like or dislike with regard to them. That is what is meant here by ¡¥He becomes indifferent to
becomes neutral¡¦. He neither takes them as ¡¥I¡¦ nor as ¡¥mine¡¦. This is actually the explan
indifferent to them. If you take them as ¡¥I¡¦ or as ¡¥mine¡¦, then you are not indifferent to the
biased. Let us say you take them to be ¡¥you¡¦ or you take them to be ¡¥your property¡¦. So
doesn¡¦t take them as ¡¥I¡¦ or as ¡¥mine¡¦, then he is said to be indifferent to formations and
formations.

Then paragraph 63 ¡§When he knows and sees thus, his heart retreats, retracts and recoils
of becoming, the four kinds of generation, the five kinds of destiny, the seven stations of con
the nine abodes of beings, his heart no longer goes out to them.¡¨ That means he retreats a
existences. If he is a human being, he is not attached to human existence and he is not atta
kinds of existence. So his heart retreats, retracts, and recoils. Then a simile is given. ¡§Just
drops, retreats, retracts, and recoils on a lotus leave that slopes a little and do not spread ou
heart retreats, retracts, and recoils. Just as a fowl¡¦s feather or a shred of sinew thrown on a
retreats, retracts and recoils, and does not spread out, so too his heart retreats, retracts, and
the three kinds of becoming.¡¨ Either equanimity or repulsiveness is established. ¡§In this wa
in him what is called ¡¥Knowledge of Equanimity about Formations¡¦.¡¨ Actually this is the hig
vipassan? knowledge.

Now it is said that his heart or mind retreats, retracts, and recoils. His mind is on the formati
if he practices vipassan? meditation, formations are the objects he has to take. So his mind
or it may be on mind, or it may be on different mental states and on different kinds of materia
mind always retreats, retracts, and recoils. In actual practice this means your consciousness
want to go to other objects. Formerly, before a person reaches this stage, there are distracti
meditator¡¦s mind goes out quite often. And he has to bring it back and so on. But when a yo
stage, his mind will not go out. Even if he deliberately sends his thought out, it will immediate
So his mind is so dispassioned towards things that whatever object he takes, his mind retrea
is when a yogi reaches the stage of Knowledge about Equanimity of Formations.

Paragraph 64 ¡§But if this [knowledge] sees Nibb?na, the state of peace, as peaceful, it reje
occurrence of all formations and enters only Nibb?na.¡¨ That means at this stage a yogi sees
is peace, then his mind rejects the occurrence of all formations. ¡¥Occurrence¡¦ really means
all formations and the mind enters into Nibb?na. That means he becomes enlightened. ¡§If h
Nibb?na as peaceful, it occurs again and again with formations as its object, like the sailors¡
this point a yogi may be practicing at this stage of knowledge and if he is a gifted person, he
enlightenment immediately or in a very short time. Sometimes he may not reach enlightenm
may remain at this stage for a long time, sometimes days or months maybe. When his mind
as peaceful, then it (the Knowledge of Equanimity about Formations) occurs again and agai
its object, like the sailors¡¦ crow.

Then there is the simile of the sailors¡¦ crow. ¡§When traders board a ship, they take with the
called ¡¥a land-finding crow¡¦.¡¨ There was no radar, so they had to depend on a crow. ¡§Wh
blown off its course by gales and goes adrift with no land in sight, then they release the land
It takes off from the mast-head, and after exploring all the quarters, if it sees land, it flies stra

the direction of it; if not it returns and alights on the mast-head. So too, if Knowledge of Equa
Formations sees Nibb?na, the state of peace as peaceful, it rejects the occurrence of all form
enters only into Nibb?na.¡¨ That means he becomes enlightened. If it does not see it, it occu
again with formations as its object. So a yogi may have to spend a considerably long time in
knowledge.

Paragraph 66 ¡§Now after discerning formations in the various modes, as though sifting flou
tray¡¨ - sifting, sometimes ¡¥sifting¡¦ means letting some particles go through the holes. Isn¡¦t
sifting? Here the action is not letting particles go through the holes. What do you call that ma
this? You put flour in the tray, and you turn it round and round so that the grosser particles c
then let softer particles remain. It is something like that. That is called ¡¥sifting¡¦?

Student: Yes, that is sifting. But there is still another kind of sifting. They are both called ¡¥si

Teacher: Yes, the flour becomes more and more subtle. ¡§As though sifting flour on the edg
carding cotton from which the seeds that have picked out, and after abandoning terror and c
becoming neutral in the investigation of formations¡¨ - do you notice the difference? On the c
says, ¡§He becomes indifferent to them.¡¨ That means indifferent to formations. Here he bec
not only to formations but to the investigation of formations. He doesn¡¦t want to investigate
indifferent to investigating them. ¡§He still persists in the triple contemplation.¡¨ He still does
in so doing, this [insight knowledge] enters upon the state of the triple gateway to liberation,
becomes a condition for the classification of Noble Persons into seven kinds.¡¨ And then the
explanations follow.

There is a lot of digression because the author wants us to know many things about this Kno
Equanimity about Formations. He describes many things here, so much, that we lose track c
Let¡¦s go to paragraph 83, Insight Leading to the Emergence of the Path.

Paragraph 83 ¡§Now when this clansman has reached equanimity about formations thus, his
its culmination and leads to emergence.¡¨ ¡¥Emergence¡¦ really means ¡¥to enlightenment¡¦,
¡¥Insight That Has Reached Culmination¡¦ or ¡¥Insight Leading To Emergence¡¦ are names
knowledge beginning with equanimity about formations, [that is, equanimity about formations
change-of-lineage.] It has ¡¥reached its culmination¡¦ because it has reached the culminating
This is the definition of the P??i word. ¡§It is called ¡¥leading to emergence¡¦ because it goes
emergence. The Path is called ¡¥emergence¡¦ because it emerges externally from the object
as a sign and also internally from occurrence [of defilement].¡¨ Now the Path (Magga) is call
It is called ¡¥emergence¡¦ in P??i ¡¥vu??h?na¡¦, because it emerges externally from the obje
interpreted as a sign. Now I am not so happy with the translation of ¡¥interpreted¡¦ or ¡¥interp

Actually it means contemplation on the objects of vipassan?. The P??i word used is ¡¥abhin
translates it as ¡¥interpreted¡¦. It may mean quite a different thing. What it means here is just
contemplating on the formations, contemplating on them as impermanent and so on. ¡¥Exte
objective basis interpreted as a sign and also internally from occurrence of defilement¡¦ mea
defilement. ¡§It goes to that, thus it is called ¡¥leading to emergence¡¦.¡¨ The sentence shoul
that. The meaning is that it joins with the Path. So after it there will come the Path conscious
¡¥insight leading to emergence¡¦ is the common name of the three vipassan? knowledges. F
Equanimity about Formations. After that there is the Knowledge of Conformity and after that
Knowledge of Change-of-Lineage. We will come to them later. So these three are called ¡¥In
Emergence of the Path¡¦. And then there are other explanations.

After this what happens next? Let¡¦s go to paragraph 128. ¡§As he repeats, develops and cu
equanimity about formations, his faith becomes more resolute (That means more firm or mo
energy better exerted, his mindfulness better established, his mind better concentrated, whil
about formations grows more refined.¡¨ So he goes on practicing meditation and his faculties
developed. His faith becomes more established and so on.

¡§Now he thinks ¡¥Now the Path will arise¡¦. Equanimity about formations¡¨ and so on. Here
should read like this: ¡§When it should be said: ¡¥Now the Path will arise¡¦¡¨, not ¡¥he thinks¡
P??i idiom. The yogi does not think, ¡§Now the Path will arise.¡¨ He does not know that the P
he doesn¡¦t know when the Path will arise. ¡¥When the Path will arise¡¦ means when he will
So the moment of enlightenment is what is called ¡¥Path¡¦ here. So he does not know that th
at this moment or at any moment. The P??i idiom means ¡¥when the Path is about to arise¡¦
meditation, and his meditation or his knowledge becomes more and more mature.

When it is the time for the Path to arise, when Path is about to arise, then what happens? ¡§
formations after comprehending formations as impermanent, or as painful, or as not self, sin
life-continuum.¡¨ Now he is practicing meditation, and so his mind is on the formations, seein
as impermanent and so on. Then what happens? When Path is about to arise, equanimity a
comprehending formations as impermanent and so on, sinks into the life-continuum. You kn
is bhava~ga. So bhava~ga arise at that time. When bhava~ga arises, equanimity about form
¡§Next to the life-continuum (immediately after life-continuum), mind-door adverting arises (M
arises at that moment.) making formations its object (taking formations as object), taking the
impermanent, or as painful, or as not self according to the way taken by equanimity about fo
next to the functional [adverting] consciousness (That means next to manodv?r?jjana or min
consciousness.) that arose displacing the life-continuum (That means the mind-door adverti
arises displacing the life-continuum.), the first impulsion consciousness arises (So the javan
arises.) making formations its object in the same say, maintaining the continuity of (the same

consciousness.¡¨ That means continuity of the same kind of consciousness because there is
consciousness. One consciousness is followed by another consciousness. So there is no ga
two moments of consciousness. But here ¡¥continuity of consciousness¡¦ means ¡¥continuity
consciousness¡¦.

Now first, say, there are vipassan? thought moments. Right? And then there is bhava~ga (lif
because Path is about to arise. After life-continuum there is what? Mind-door adverting. Afte
adverting what? Impulsion (javana). It is not one javana moment. How many?

Student: Seven.

Teacher: It will be seven all together, but first there are four moments of javana, Now you wi
¡§This is called ¡¥preliminary work¡¦.¡¨ The first moment of javana is called ¡¥preliminary wor
that a second impulsion consciousness arises making formations its object in the same way
¡¥access¡¦.¡¨ So we have ¡¥preliminary¡¦ as one moment and ¡¥access¡¦ as one moment. ¡§N
impulsion consciousness also arises making formations its object in the same way. This is c
¡¥conformity¡¦.¡¨ That is the third javana. ¡§These are the individual names. But it is admissib
three impulsions ¡¥repetition¡¦, or ¡¥preliminary work¡¦, or ¡¥access¡¦, or ¡¥conformity¡¦ indisc
So they can be called by any name.

And then there is another digression. ¡§Conformity to what?¡¨ After this will come gotrabhu
(change-of-lineage) which is described in the next chapter. So we will stop here. Now you ar
Path, but we have not yet reached Path. So here we have the four moments of impulsion of
javana. The first one is what? Preliminary. And the second? Access. And the third? Conform
have only three, but another moment which is change-of-lineage will arise. All these three he
formations as object. It will be different when the thought process reaches the next moment
(change-of-lineage). The change-of-lineage consciousness will take Nibb?na as object. But
formations or mind and matter as object. This is the sequence of real practice. A person rea
of Equanimity about Formations, and he practices it again and again. And when it becomes
will arise Path consciousness. Before Path consciousness there is a series of moments of co
first is the series of vipassan? moments. Then there is bhava~ga. Bhava~ga is followed by m
and mind-door adverting is followed by the first four moments of javana. They belong to k?m
three have already been mentioned. The last one will be mentioned later.

Now that we have seen the sequence, we will go back to paragraph 66, The Triple Gateway
enters upon the state of the triple gateway to liberation now with the predominance [of one] o
faculties according as the contemplation occurs in [one of] the three ways¡¨ and so on. Now
Equanimity about Formations is called ¡¥the gateway to liberation¡¦, ¡¥the gateway to Magga

three contemplations that are called the three gateways to liberation, according as it is said.
three kinds of gateways to liberation: ¡§(1) to the seeing of all formations as limited and circu
to the entering of consciousness into the signless element (So signless is one.), (2) to the st
the mind with respect to all formations and to the entering of consciousness into the desirele
(That is the second.), (3) to the seeing of all things (dhammas) as alien and to the entering o
into the voidless element (The third is voidness.). These three gateways to liberation lead to
the world.¡¨ So these are called ¡¥gateways to liberation¡¦. Actually this is contemplation - co
impermanent, contemplation as painful, and contemplation as no-self. They are given differe
¡¥signless¡¦, ¡¥desireless¡¦ and ¡¥voidness¡¦.

¡§Herein, as limited and circumscribed [means] as limited by rise and fall as circumscribed b
contemplation of impermanence limits them thus ¡¥Formations do not exist previous to their
exist before they arise.), and in seeking their destiny (I would say ¡¥in seeking their course¡¦
word ¡¥gati¡¦ can mean ¡¥destiny¡¦ or just ¡¥course¡¦. I think ¡¥course¡¦ is better.) so in seekin
course, sees them as circumscribed thus ¡¥They do not go beyond fall, they vanish there.¡¦
formations, he sees in this way. They do not exist before they come into being. After disappe
nowhere.) To the stirring up of the mind: (This is the explanation of that phrase.) by giving co
sense of urgency; for with the contemplation of pain consciousness acquires a sense of urge
formations. To the seeing --- as alien: to contemplating them as not self thus: ¡¥Not I¡¦, ¡¥No

¡§So these three clauses should be understood to express the contemplation of impermanen
in the answer to the next question [asked in the Pa?isambhid?magga it is said: ¡¥When he b
as impermanent, formations appear as liable to destruction. When he brings them to mind a
when he contemplates on them as painful.), formations appear as a terror, when he brings t
self, formations appear as void¡¦.¡¨

¡§What are the liberations to which these contemplations are the gateway? They are these t
signless, the desireless, and the void.¡¨ They come again and again. We have to see that th
gateways and there are the deliverances. So you enter through a gateway and you reach a
deliverance. These three deliverances also have the names ¡¥signless¡¦, ¡¥desireless¡¦, and
deliverance? It is explained as the Path. Right? So the Path is deliverance. ¡§When one who
resolution brings [formations] to mind as impermanent, he acquires the signless liberation. W
great tranquillity brings [them] to mind as painful, he acquires the desireless liberation. When
great wisdom brings [them] to mind as not self, he acquires he void liberation.¡¨ This is from
Pa?isambhid?magga.

Now the translation is not what I would like it to be. The meaning is that a person who conte
formations as impermanent becomes firm with resolution which means saddha (faith). A per

on the formations as impermanent makes his faith or confidence grow more and more. That
At first a person practices meditation with faith or something like trust in the teacher. The tea
the Buddha said that things are impermanent and so on. When the meditator first practices
practices on faith. He does so on the basis of faith. Since the Buddha said these are imperm
be impermanent, but he has not seen for himself. Now through the practice of meditation, he
And since he sees them for himself, he gains more faith or more confidence in the Buddha.
is very true that they are impermanent. Now I am seeing them myself that they are really imp
on. ¡¥When he contemplates on the impermanence of things¡¦ means when he really sees th
things. At that time his faith in the Buddha increases. That is what is meant here.

¡§When one who has great tranquillity brings [them] to mind as painful, he acquires the desi
liberation.¡¨ Here also if a yogi contemplates on formations as painful, then he increases tran
(passaddhi). It is a little difficult to understand. You contemplate on the painfulness of things
you get tranquillity. When you concentrate on the painfulness of things, how do you get tran
explained in the Sub-Commentary (T?k?) that when you contemplate on things as painful, y
the opposite of what is painful. Let us say you contemplate on Nibb?na as happiness. So wh
on formations as painful and on its opposite as happiness, then you get what is called ¡¥tran
a person brings the formations to mind as painful, then he increases his tranquillity. When a
mind the formations as not self, then he develops his wisdom. He makes his wisdom grow.
way. It is not because he has great resolution that he contemplates on the impermanence o
because he contemplates on the impermanence of things that he gets more faith or more co
contemplates on the painfulness of things he gets more tranquillity. Because he contemplate
nature of things he gets more understanding or wisdom. That is what is meant here.

We can refer to paragraph 76. ¡§When he brings formations to mind as impermanent, the fa
excess in him.¡¨ That is the correct meaning to understand. When he brings formations to m
the faith faculty becomes much in him. That is how to understand this passage.

And then paragraph 71 ¡§And here the signless liberation should be understood as the Nobl
occurred by making Nibb?na its object through the signless aspect.¡¨ So Nibb?na has also t
signless, desireless, and void. When the Path takes Nibb?na as object through the signless
called ¡¥signless liberation¡¦ or ¡¥signless Path¡¦. ¡§For that Path is signless owing to the sig
having arisen.¡¨ That is not so. What is meant here is that the Path is signless owing to its o
signless element. ¡¥Signless element¡¦ means signless Nibb?na here. Because it takes sign
object, it is called ¡¥signless¡¦; it is not because ¡¥the signless element has arisen¡¦. Nibb?na
said to have arisen, or to be existing, or to have gone out of existence. Nibb?na is eternal. It
beginning and no end. So here what is meant is that the Path is signless owing to its occurri
signless element. It simply means that because it takes signless Nibb?na as object, it is call

¡§In the same way the Path that has occurred by making Nibb?na its object through the des
desireless. And the Path that has occurred by making Nibb?na its object through the void as
These are just the explanations of how the deliverance of Path gets its names such as signl
desireless liberation, and void liberation. When you are actually practicing meditation, you w
about these names. Maybe these are for scholars. Later on you may want to find out what li
something like that. But in actual practice they won¡¦t come to mind.

Then he poses a question and a problem here. In Abhidhamma ¡¥signless¡¦ is not mentione
Abhidhamma. Only two are mentioned there. The answer is: ¡§This refers to the way in whic
the Path] and is expressed literally.¡¨ What this means is this refers to the way in which the r
comes from literally. Now Path gets names as ¡¥signless¡¦, or ¡¥desireless¡¦, or ¡¥void¡¦. Hov
these Names? There must be a course or there must be a source for these names, why Pat
¡¥signless¡¦, why Path is called ¡¥desireless¡¦ and so on. That depends upon how the conter
was done. So if the contemplation is done on a signless aspect, then the Path also gets the
and so on.

¡§However, in the Pa?isambhid?magga insight knowledge is expressed as follows: (1) It is e
the void liberation by its liberation from misinterpreting [formations]¡¨ and so on. It is a little c
here because we understand that liberation is a name for Path. But the Pa?isambhid?magga
the contemplation is called ¡¥signless¡¦ and so on. Actually it is not the contemplation, but th
called in P??i ¡¥vimokkha (liberation)¡¦. So ¡¥liberation¡¦ means Path, not contemplation. But
Pa?isambhid?magga it is said that contemplation is called ¡¥liberation¡¦. There are some gro
here. So how the Path gets its name depends upon the contemplation made before the Path

On the next page, 769 ¡§It is however void and desireless. And it is at the moment of the No
liberation is distinguished, and that is done according to insight knowledge¡¦s way of arrival a
That means it is done by way of insight as source. We take insight or contemplation as the s
which the Path gets. If the insight or if the contemplation is signless, then the Path is also sig
the insight or contemplation is desireless, the Path is also called ¡¥desireless¡¦. If the insight
contemplation is void, the Path is also called ¡¥void¡¦. So how the Path gets these names de
contemplation was done.

Paragraph 74 ¡§It becomes a condition for the classification of the Noble into seven kinds.¡¨
there are eight Noble Persons, eight Ariya Persons. For the first stage there are two, for the
there are two, for the third stage two, and for the fourth stage two. We have the person who
of First Path and then the person after the First Path. Then we have the person at the mome

and another person after the Second Pat, before the Third Path and so on. So there are eigl
But here they are described in a different way, and so according to this there are seven kind
Persons. These are what? ¡§(1) the Faith Devotee, (2) One Liberated by Faith, (3) the Body
Both Ways Liberated, (5) the Dhamma Devotee, (6) One Attained to Vision, and (7) One Lib
Understanding.¡¨ There are also different kinds of Noble Persons mentioned in Suttas and a
And then the description follows.

In paragraph 75 do you see the #4? ¡§4. He is called ¡¥Both Ways Liberated¡¦ when he has
Fruition (That means Arahantship.) after also reaching the immaterial jh?nas.¡¨ I didn¡¦t find
¡¥also¡¦ in the Visuddhi Magga, so we should leave it out. ¡§He is called ¡¥Both Ways Libera
reached the highest Fruition after reaching the immaterial jh?nas.¡¨ That means he practices
meditation first, and he gets the four immaterial jh?nas. And then he contemplates on the fo
jh?nas or some other formations, and then he gets enlightenment. So he is called ¡¥liberate
So there are these seven kinds of Noble Persons. Paragraph 76 I have already read about t
and 78 are the word explanations of the terms in P??i like saddh?nus?ri, saddh?vimutta and

Now let¡¦s go to paragraph 79, The Last Three Kinds of Knowledge are One. ¡§This Knowle
Formations is the same in meaning as the two kinds that precede it. Hence the Ancients sai
of Equanimity about Formations is one only and has three names. At the outset it has the na
Desire for Deliverance. In the middle it has the name of Knowledge of Reflection. At the end
reached its culmination it is called Knowledge of Equanimity about Formations¡¦.¡¨ So these
one kind of knowledge. But in the books they are described as three kinds of knowledge. So
Equanimity about Formations is one only and has three names. Therefore they can be calle
formations or they can be called by their respective names.

At the beginning of paragraph 80 something is missing. That is: ¡§It is said in the texts, also.
translation of that is missing. In the original it said: ¡§P??iyampi vutta?.¡¨ That is missing her
need ¡¥It is said in the texts also¡¦ because the following is a formation from the texts. ¡§How
understanding of desire for deliverance, of reflection, and of composure, is knowledge of the
equanimity about formations?¡¨ and so on. It was taken from the Pa?isambhid?magga. The
is given in paragraph 81.

And paragraph 82 ¡§Furthermore, it may be understood that this is so from the following text
said: ¡¥Desire for Deliverance, and Contemplation of Reflection, and Equanimity about Form
are one in meaning and only the letter is different.¡¨ This is another quotation that shows tha
are actually one. Then we have Insight Leading to Emergence of the Path in paragraph 83.
already.

Then in paragraph 84 there is a description of how a yogi contemplates and how he emerge becomes enlightened in many different ways. They are: (1) after interpreting the internal, it e internal, (2) after interpreting the internal, it emerges from the external, (3) after interpreting external, it emerges from the external, (4) after interpreting the external, it emerges from the after interpreting the material, it emerges from the material, (6) after interpreting the material from the immaterial, (7) after interpreting the immaterial, it emerges from the immaterial, (8) interpreting the immaterial, it emerges from the material, (9) it emerges at one stroke from th aggregates, (10) after interpreting as impermanent, it emerges from the impermanent, (11) a as impermanent, it emerges from the painful, (12) after interpreting as impermanent, it emer self¡¨ and so on. Now here ¡¥interpreting¡¦ means just the same thing that I said before, ¡¥co not really ¡¥interpreting¡¦. So contemplating the internal, it emerges from the internal and ext on.

We will read the explanation in paragraph 85. ¡§(1) Someone does his interpreting at the sta internal formations.¡¨ That means he contemplates on his internal formations, his material pr body, and mental states and mind, and so on. So he does his interpreting at the start with hi formations. ¡§After interpreting them he sees them. But emergence of the Path does not cor seeing the bare internal only since the external must be seen too, so he sees that another¡¦s well as un-clung-to formations [inanimate things], are impermanent, painful, not self.¡¨ Here contemplates on his body and mind and then he contemplates on other persons¡¦ aggregate and externally. ¡§At one time he comprehends the internal and at another time the external.¡ he cannot take internal and external at the same time. So at one time he will be contemplati formations and at another time on other people¡¦s formations. ¡§As he does so, insight joins while he is comprehending the internal. It is said of him that ¡¥after interpreting the internal, from the internal¡¦.¡¨ So in the beginning he contemplates on his own formations, and then h another person¡¦s formations. He does this during his meditation, sometimes contemplating formations and sometimes contemplating on others¡¦ formations. Then there is emergence after he contemplates on his own formations or after he contemplates on another¡¦s formatio come at any moment. ¡§As he does so, insight joins with the Path, while he is comprehendin Actually that means immediately after he is comprehending the internal. Then ¡§if his insight Path at the time when he is comprehending the external (That means immediately after com external if the Path arises.) it is said of him that ¡¥after interpreting the internal, it emerges fr external¡¦.¡¨ So this is just the different ways of understanding how the emergences are, and arises. Sometimes it may arise after the yogi has contemplated on his own formations and s contemplating on others¡¦ formations and so on.

And then paragraph 87 ¡§When he has done his interpreting in this way, ¡¥All that is subject subject to cessation¡¦ and so too at the time of emergence, it is said that ¡¥it emerges at one

the five aggregates¡¦.¡¨ Here actually he does not take all five aggregates at one time. Vipas
or vipassan? moments of consciousness arise very quickly so that they seem to be taken at
actually one aggregate is taken by each consciousness. He takes one and then he takes an
takes another. He cannot take all five together. Since Vipassan? is so fast at that time it is s
contemplates them at one stroke. Actually it cannot be that way. The other explanations are
understand.

Now the author wanted us to understand this knowledge very clearly. So he gave us twelve
twelve similes should be understood in order to explain this insight leading to emergence an
knowledge that precede and follow it. Here is the list: (1) The Bat, (2) the Black Snake, (3) th
the Oxen, (5) the Ghoul (It is like a ghost.), (6) the Child, (7) Hunger, (8) Thirst, (9) cold, (10)
(11) Darkness, and (12) by Poison, too.¡¨ Here #2 should not be a ¡¥black snake¡¦, but a ¡¥c
literal translation is ¡¥black snake¡¦, but it is not used in that sense actually. The P??i word is
¡¥ka?hasappa¡¦. ¡¥Ka?ha¡¦ means ¡¥black¡¦ and ¡¥sappa¡¦ means ¡¥snake¡¦. However when
joined, the word means ¡¥cobra¡¦. It does not mean a snake which is black in color; it means
cobras are generally black. No? Actually it doesn¡¦t matter whether we take it as a cobra or j
snake. The similes are explained one by one.

Let¡¦s read the first simile about the bat. ¡§The Bat. There was a bat, it seems. She had aligl
madhuka tree with five branches, thinking ¡¥I shall find flowers or fruits here¡¦. She investiga
but saw no flowers or fruits worth taking. And as with the first so too when tries the second, t
fourth and the fifth, but saw nothing. She thought ¡¥This tree is barren; there is nothing worth
here¡¦, so she lost interest in the tree. She climbed up on a straight branch, and poking her h
gap in the foliage, she looked upwards, flew up into the air and alighted on another tree.¡¨

Paragraph 92 ¡§Herein the meditator should be regarded as like the bat. The five aggregate
clinging are like the madhuka tree with the five branches. The meditator¡¦s interpreting of the
aggregates is like the bat¡¦s alighting on the tree. His comprehending the materiality aggrega
nothing there worth taking, comprehending the remaining aggregates is like her trying each
nothing there worth taking, trying the rest. His triple knowledge beginning with desire for deli
he has become dispassionate towards the five aggregates through seeing their characteristi
etc., is like her thinking ¡¥This tree is barren; there is nothing worth taking here¡¦ and losing i
His conformity knowledge (which comes after the knowledge of equanimity) is like her climb
branch. His change-of-lineage knowledge is like her poking her head out and looking upwar
Knowledge is like her flying up into the air. His Fruition Knowledge is like her alighting on a c
tree.¡¨

And then there is another simile, that of the black snake. This simile has already been given

But the application of the simile here is this. Change-of-lineage knowledge is like throwing th
Path Knowledge is like the man¡¦s standing and looking whence he had come after getting r
Knowledge is like his standing in a place free from fear after he had got away. This is the dif
have read that simile already. I think this is to be added to that simile because the moments
change-of-lineage and others are not explained there. We can combine these two to get the
then the other similes are explained such as the house, the oxen and so on.

The last group, paragraph 102 ¡§Hunger, Thirst, Cold, Heat, Darkness, and By Poison. Thes
however, are given for the purpose of showing that one with insight that leads to emergence
and leans in the direction of the supramundane states.¡¨ It is just to show that this person lea
Nibb?na or supramundane states.

Paragraph 109 ¡§That is why it is said above ¡¥when he knows and sees thus, his heart retr
recoils from the three kinds of becoming, the four kinds of generation, the five kinds of destin
stations of consciousness, and the nine abodes of beings, his heart no longer goes out to th
stage Mah?si Say?daw said that even if you try to send your thoughts to other objects, they
just want to be here on the object, not on the other objects - ¡§just as water drops retreat, re
recoil¡¨ and so on. At this point he is called ¡¥One Who Walks Aloof¡¦, with reference to whom

Then there is what governs the difference in the Noble Path¡¦s enlightenment factors, etc. Th
to understand how the enlightenment or how the Path is governed by or how the quality of P
vipassan? and also by some others.

¡§This knowledge of equanimity about formations governs the fact that the meditator keeps
furthermore governs the difference in the [number of the] Noble Path¡¦s enlightenment facto
and jh?na factors, the mode of progress, and the kind of liberation. For while some elders sa
jh?na used as the basis for insight [leading to emergence] that governs the difference in the
enlightenment factors, Path factors and jh?na factors, and some say that it is the aggregates
of insight that govern it, and some say that it is the personal bent (or one¡¦s wish) that gover
is (Let us leave out ¡¥only¡¦.) this preliminary insight and insight leading to emergence also t
understood to govern it in their doctrine also.¡¨ ¡¥Also¡¦ has been added twice here.

¡§There are three opinions on how the Path gets its name. The first group of teachers say w
explained in the following paragraphs. Let me tell you this. There are persons who do not ha
do not practice samatha meditation at all, but who practice vipassan? meditation. And there
jh?nas, but they don¡¦t use their jh?nas as the object of vipassan? meditation. They have att
When they practice vipassan? meditation, they do not contemplate on the jh?nas, but they c
mental and physical phenomena. And there are others who have jh?nas but who do not use

they practice vipassan? meditation. For them the Path that arises is like the first jh?na. That
all the components of the first jh?na. I will tell you again. You don¡¦t seem to understand.

Student: Could you explain a little about jh?na?

Teacher: Jh?nas are the higher states of consciousness. They are attained through the prac
meditation, not through vipassan? meditation. You may practice a disk or kasi?a meditation
breathing meditation, and then you get jh?na. So jh?nas are attained through the practice of
meditation. A person who practices vipassan? meditation may have not attained any of the j
person is a pure vipassan? meditator and so there are no jh?nas for him. There is another p
attained jh?nas, but he doesn¡¦t make use of the jh?nas at all when he practices vipassan?
is more or less like the other person who has no jh?na. And there is another person who use
he practices vipassan? meditation. That means he enters into jh?na but after emerging from
getting out of the jh?na, he does not use the jh?na as object of meditation, but he uses the c
as the object of meditation. So the Path of such a person is said to resemble the first jh?na.

Now there are five factors in the first jh?na - vitakka, vic?ra, p?ti, sukha, ekaggat? (initial app
sustained application, joy, happiness and one-pointedness of mind). In the second jh?na the
factors, in the third jh?na there are three factors, in the fourth jh?na there are two factors, an
fifth jh?na there are two factors. When a person who has no jh?na at all or who does not use
practice of vipassan? meditation attains Path, his Path is accompanied by these five factors
some of these in the eight factors of Path. What are the factors of Path? Right Understandin
Right Speech, Right Action, Right Livelihood, Right Effort, Right Mindfulness, and Right Con
are all there with the First Path. With First Path we can find vitakka (Vitakka is Right Though
p?ti, sukha, ekaggat?. So Path resembles first jh?na.

There is another person who practices samatha meditation and then reaches first, second, t
fifth jh?nas. He practices jh?na as a basis for vipassan?, and then he gets out of that jh?na,
takes the jh?nas as the object of meditation or other formations as the object of meditation a
Since he makes first jh?na, or second jh?na, or third jh?na, or fourth jh?na, or fifth jh?na as
vipassan?, his Path resembles the first, second, third, fourth or fifth jh?na. So if his Path res
second jh?na, then one factor will be missing from the Noble Eightfold Path. The factor vitak
missing. Right Thought is vitakka. And if it is the fourth jh?na, what will be missing? P?ti will
and p?ti is one of among the seven factors of enlightenment.

There are three opinions here. One group of teachers says that the jh?na which is made the
is what determines the quality of the Path. The second group says that it is the jh?na which
object of vipassan? meditation that determines the Path. And the third group says that it is th

person which determines the quality of the Path. So the first group emphasizes the jh?na wh
basis for vipassan?. That means firs the meditator enters into first jh?na and then emerges f
jh?na, and contemplates on the jh?na or other formations. And the second group emphasize
made the object of vipassan? meditation. Let us say he enters first jh?na, and after getting o
contemplates on the first jh?na as impermanent and so on, and then he gets the Path. So th
emphasizes the jh?na which is made the object of vipassan? meditation.

Now please be clear about the object of vipassan? and the basis of vipassan?. ¡¥The basis
before practicing vipassan?, he enters into the jh?na. And then he emerges from this jh?na,
things as object of vipassan? meditation. ¡¥Object of vipassan?¡¦ means contemplating on th
impermanent and so on. So there is the basis jh?na and the contemplated jh?na. The first g
basis jh?na and the second group emphasizes the contemplated jh?na. The third group emp
wish. It is a free country. That does not mean that simply by making a wish you can get Path

Suppose you enter into the first jh?na and then you make the second jh?na the object of me
will the Path be like? According to the first group of teachers your Path will be like the first jh
According to the second group of teachers your Path will be like the second jh?na. What abo
They say that it is according to your wish. If you want the Path to resemble the first jh?na, th
will be that way. But if you want your Path to resemble the second jh?na, then it will be like t
jh?na. So you have a choice there. That choice or wish comes only for those who possess jh
to have jh?nas. Then you make the jh?na the basis for vipassan? meditation and also you m
object of vipassan? meditation, and then you choose from these. Sometimes you have a wis
resemble the first jh?na¡¨ or ¡§May my Path resemble the second jh?na¡¨. But it is said that i
no such wish, then the Path will resemble the higher jh?na. For example, you enter into the
you get out of it, and then you make the second jh?na the object of meditation, and then the
you have no wish - whatever Path comes I don¡¦t mind - then your Path will resemble the se
it is the higher one. So the higher jh?na takes precedence there.

In the following paragraphs you will find factors seven, or six, or whatever. So seven factors
what? Without Right Thinking (vitakka). And six enlightenment factors mean without p?ti bec
missing in the fourth jh?na. So there are these three kinds of opinions or theories. The Visuc
that even according to these teachers vipassan? can be a deciding factor also. Not only jh?n
can also be the deciding factor.

Paragraph 117 deals with progress. Some people can get enlightenment in a short time with
but some have difficulty for a short time and still get enlightenment and so on. There are diff
people. ¡§But if [insight] has from the start only been able to suppress defilements with diffic
effort and with prompting, then it is called ¡¥of difficult progress¡¦. The opposite kind is called

progress¡¨ and so on. ¡§and when the manifestation of the Path, the goal of insight, is slowly defilements have been suppressed, then it is called ¡¥of sluggish direct knowledge¡¦.¡¨ Now insight¡¦ is not a correct translation of the word. I think the word here means ¡¥stagnation¡¦, ¡ of insight¡¦. That means the yogi has reached the stage of the Knowledge of Equanimity ab he is stuck there. He has to be doing that again and again. If he has to spend a long time in before reaching the Path, then he is said to be of what? Of sluggish direct knowledge. The i called ¡¥stagnant¡¦. It is stale or something like that because the meditator has to be at this s long time. ¡¥The manifestation of Path which has this stagnation of insight¡¦ means only afte time with that knowledge, there arises the Path. That is called ¡¥of sluggish knowledge¡¦. Th is called ¡¥of swift direct knowledge¡¦. If you don¡¦t have to spend much time in that stage of Equanimity about Formations, and if you get the Path in a short time, then you are called ¡¥o knowledge¡¦. ¡§So this Equanimity about Formations stands at the arrival point (That means the name for Path.) and gives its own name to the Path in each case, and so the Path has fo to the kind of progress.]¡¨ Now you will find the phrase ¡¥at the arrival point¡¦. That is the liter translation of the P??i word, and not even quite literal. The meaning is ¡¥the source for givin ¡¥the source for the name¡¦ or ¡¥the cause for the name¡¦.

¡§For one bhikkhu this progress is different in the four Paths, while for another it is the same however, the four Paths are of easy progress and swift direct knowledge.¡¨ For Buddhas eve ¡§Likewise in the case of the General of the Dhamma [the Elder S?riputta.]¡¨ So he is as goo and so he also the best. ¡§But in the Elder Mah? Moggall?na¡¦s case the first Path was of ea swift direct knowledge.¡¨ He became a Sot?panna just after listening to Venerable S?riputta So that time it was of easy progress and swift direct knowledge. ¡§But the others were of dif and sluggish direct knowledge.¡¨ He had to spend time practicing meditation. At one time he Buddha went to him and told him how to get rid of sleepiness and so on. For the other stage of difficult progress and sluggish direct knowledge.

And then we have predominance. ¡§As with the kinds of progress, so also with the kinds of are different in the four Paths for one bhikkhu and the same for another.¡¨ The four kinds of zeal or chanda, energy, consciousness, and inquiry. ¡¥Inquiry¡¦ really means understanding.

¡§[Liberation.] but it has already been told how it governs the difference in the liberation. Fur Path gets its names for five reasons.¡¨ Then Path gets its name as signless, as desireless, a for five reasons. They are: ¡§(1) owing to its own nature, or (2) owing to what it opposes, or its own special quality, or (4) owing to its object, or (5) owing to the way of arrival.¡¨ ¡¥The w arrival¡¦ means the source of the name. ¡¥Owing to its own nature¡¦ means owing to its funct functions, what functions it does, and so owing to its own nature. And the explanation follow about formations induces emergence by comprehending formations as impermanent, liberat

signless liberation¡¨ and so on. These are the five reasons, or how the Path gets named as ¡
on.

Paragraph 126 ¡§But while this name is inadmissible by the Abhidhamma method, it is howe
Suttanta method.¡¨ The name ¡¥signless¡¦ is not mentioned in the Abhidhamma. So accordin
can be no signless Path. But by the Suttanta method, by the discourse method it is admissib
¡§By that method change-of-lineage takes the name ¡¥signless¡¦ by making the signless Nib
Now change-of-lineage precedes Path. At the moment of change-of-lineage consciousness
object. And Nibb?na is described as ¡¥signless¡¦, ¡¥desireless¡¦, and ¡¥void¡¦. So if we take t
aspect of Nibb?na, and the change-of-lineage takes that Nibb?na as object, then the Path fo
Path is named through change-of-lineage as being signless. So the path is also named ¡¥sig
to Suttanta method the Path can get the name ¡¥signless¡¦, but according to Abhidhamma, n
can be called ¡¥signless¡¦ too according to the Path¡¦s way of arrival.¡¨ Since the Path is call
¡¥signless¡¦, the Fruition which follows it could also be called ¡¥signless¡¦. So the change-of-
cause for the path to get the name ¡¥signless¡¦ and the Path is the cause for the Fruition to g
¡¥signless¡¦. So in the Suttanta method these can be called ¡¥signless¡¦ or they get the name
But according to Abhidhamma method they cannot be called ¡¥signless¡¦.

I think we will stop here. Next time we will study conformity knowledge.

Student: Is Abhidhamma method the jh?na method?

Teacher: No. It is what is taught, what is said in Abhidhamma.

Student: But you talk a lot about jh?nas.

Teacher: Yes. The jh?nas are taught in Abhidhamma. Abhidhamma is not necessarily jh?na
method or not jh?na method.

Student: And vipassan??

Teacher: Vipassan? can be practiced unmixed with samatha and it can be practiced with sa
ways - vipassan? y?nika and samatha y?nika (one who has the vehicle of vipassan? and on
of samatha). When we say ¡¥one who has the vehicle of samatha¡¦, we mean that he practic
first and gets jh?na or gets sam?dhi. Then he takes that jh?na or sam?dhi as an object of m
practices vipassan? on it.

Student: Both of them are talked about in Abhidhamma?

Teacher: Both of them are taught in the Sutta Pi?aka. In one Sutta in the A?guttara Nik?ya t
about these two kinds of persons, one who has samatha as vehicle and the other who has v

S?dhu! S?dhu! S?dhu!

(Tape 45 / Ps: 128 ¡V 136)

We are on page 782. We are almost at the moment of enlightenment. We are very close to t
enlightenment. The yogi progresses from one stage of knowledge to another and so the last
about formations. When his Knowledge of Equanimity about Formations becomes mature, th
time when he gets enlightenment. ¡§As he repeats, develops, and cultivates that equanimity
his faith becomes more resolute, his energy better exerted, his mindfulness better establishe
better concentrated, while his equanimity about formations grows more refined.¡¨

¡§He thinks ¡¥Now the Path will arise¡¦.¡¨ As I told you, this P??i idiom was misunderstood b
translators, I think. There was one Burmese professor who translated the Visuddhi Magga in
did not get it correct. It is not that he thinks ¡¥Now the Path will arise¡¦ because the yogi does
when the Path will arise. The idiom used is ¡¥when the Path is about to arise¡¦. We can say
be said, now the Path will arise.¡¨ It means the same thing. When the Path is about to arise
the person is about to get enlightenment. ¡§Equanimity about formations after comprehendin
impermanent, or as painful, or as not self, sinks into the life-continuum.¡¨ ¡¥Life-continuum¡¦
bhava~ga. There are types of consciousness which are called ¡¥life-continuum¡¦. They are in
consciousness. They are more prominent when we are asleep, or when we have fainted, or
when he is about to get enlightenment, then there must come one thought process. In order
process to arise, there must be an interval of life-continuum. The yogi is practicing meditatio
knowledge of equanimity about formations grows and is more refined, and then there comes
maybe not only one moment, but a few moments of life-continuum.

¡§Next to the life-continuum, mind-door adverting arises making formations its object as imp
painful, or as not self according to the way taken by equanimity about formations.¡¨ So after
life-continuum there arises what is called ¡¥mind-door adverting consciousness¡¦. That mean
on the mind or the consciousness is turned towards the mind-door or turned towards the act
consciousness. So there are moments of bhava~ga which are inactive moments. Then after
adverting arises. At that moment the consciousness is turned towards the object of that cons
called ¡¥mind-door adverting¡¦. From this moment on the active moments arise making forma
That mind-door adverting consciousness takes formations as its object, viewing them as imp
painful, or as not self.

¡§Then next to the functional [adverting] consciousness that arose displacing the life-continu
next to the mind-door adverting consciousness.), the first impulsion consciousness arises m
its object in the same way, maintaining the continuity of consciousness.¡¨ After the mind-doc
consciousness, there arises first impulsion (first javana) consciousness. There will be four m
consciousness or sometimes three. ¡§The first impulsion consciousness arises making form
So it takes the same object as the mind-door adverting consciousness did. ¡§This is called t
work.¡¨ The impulsion or javana consciousness is called ¡¥the preliminary work¡¦. ¡§Next to t
impulsion consciousness arises making formations its object in the same way (taking the for
object). This is called the ¡¥access¡¦.¡¨ That means ¡¥approaching¡¦ or ¡¥going into the vicini
enlightenment¡¦. ¡§Next to that a third impulsion consciousness also arises making formatior
the same way. This is called ¡¥conformity¡¦. These are their individual names.¡¨ So ¡¥prelimi
¡¥access¡¦, ¡¥conformity¡¦ are their individual names. ¡§But it is admissible to call all three im
¡¥repetition¡¦, or ¡¥preliminary work¡¦, or ¡¥access¡¦, or ¡¥conformity¡¦, indiscriminately.¡¨ So y
these three by only one name, any name, or you can call them by their individual name. In t
first there is mind-door adverting consciousness and then there are three moments of javana
access, and conformity). Next is what is called ¡¥change-of-lineage¡¦. But before that we hav
about conformity.

¡§Conformity to what? To what precedes and to what follows.¡¨ So it conforms to what prece
what follows it. ¡§for it conforms to the functions of truth (actually correct functions or right fu
both in the eight preceding kinds of insight knowledge and in the 37 states partaking of enlig
follow.¡¨ So this consciousness conforms to the preceding eight kinds of vipassan? insight k
conforms to those that come later. They are the 37 states partaking of enlightenment. Actua
members of enlightenment. They arise at the moments of enlightenment. So it is in conformi
preceding knowledges and the succeeding ones.

¡§Since it s occurrence is contingent upon formations through [comprehending] the characte
impermanence, etc., it, so to speak, says ¡¥Knowledge of rise and fall indeed saw the rise a
precisely those states that possess rise and fall¡¨ and so on. It is as though this knowledge v
this. It is to show that it conforms to the previous knowledges.
Student: Are these rather unusual in that they are harmonious with both the conditioned and
Is that what is being said?

Teacher: No. In the series of the moments of consciousness the conformity is one, let¡¦s say
it conforms to what precedes it, that is the stages of vipassan? knowledge, because the yog
one stage to another. And then at the moment of enlightenment there will be 37 states parta
enlightenment or as the members of enlightenment. So it conforms to these states too. so it

a bridge. It conforms to both. It is harmonious both with preceding and succeeding.

Student: Is it harmonious with the unconditioned?

Teacher: Not yet. It takes conditions or formations as object.

Student: They are still conditions?

Teacher: Yes. The object is still conditioned things or formations because it is in the limit of v
has not yet gone beyond vipassan?. It is still vipassan?. Since it is still vipassan?, it must tak
conditioned things or formations as object. Vipassan? does not take Nibb?na as object or th
object. This paragraph describes how it conforms to the previous knowledges and then the s

And then a simile is given. ¡§Just as a righteous king, who sits in the place of judgment hear
pronouncements of the judges while excluding bias and remaining impartial, conforms both t
pronouncements and to the ancient royal custom by saying ¡¥So be it¡¦, so it is here too.¡¨ N
bias¡¦, I want you to mark there. That means the king does not act through attachment, or th
whatever. We will come to this later.

In paragraph 55 in chapter 22 there is a section called ¡¥Bad Ways¡¦. Actually ¡¥bad ways¡¦
improper action, maybe that is bias. When you do something, you may be biased because y
person, or you are angry with that person, or you are afraid of some repercussions, or you s
ignorant. You don¡¦t know anything about that, then you make mistakes there. Here the king
not biased and ¡§remaining impartial, conforms both to their pronouncements and to the and
and so on. Conformity is like the king. The eight kinds of knowledge are like the eight judges
is the Knowledge of Conformity.

I think you remember the Insight Leading to the Emergence. Do you remember these three i
emergence? This is paragraph 134 in chapter 21. ¡§Though this conformity knowledge is the
Leading To Emergence that has conformations as its object, still change-of-lineage is the las
kinds of Insight Leading To Emergence.¡¨ ¡¥Insight Leading to Emergence¡¦ means ¡¥desire
and then ¡¥re-contemplation¡¦, and ¡¥equanimity about formations¡¦. These three kinds of kn
Insight Leading To Emergence. ¡¥Emergence¡¦ means enlightenment. It gets our of sa?s?ra
that. So there are three insights leading to emergence. ¡§Though this conformity knowledge
Insight leading to Emergence that has conformations as its object, still change-of-lineage kn
last of all the kinds of Insight Leading To Emergence.¡¨ The last one is change-of-lineage (g
So change-of-lineage takes Nibb?na as its object, but the others take formations as their obj
difference.

Student: So change-of-lineage is the bridge?

Teacher: Yes. It is like a gate to enlightenment. Do you have the chart? Now if you look at th
you will see #11 sa~kh?rupekkh? ???a (Knowledge of Equanimity about Formations), and #
(Knowledge of Conformity), and #13 gotrabhu ???a (Knowledge of Change-of-Lineage). So
desire for freedom and so on, but these three are called '¡¥vu??h?na-g?min? vipassan?¡¦. Y
¡¥vu??h?na-g?min? vipassan?¡¦. They mean insight leading to emergence. So these three a
leading to emergence¡¦. Among them the first two take formations as object and the last one
change-of-lineage or gotrabhu ???a, takes Nibb?na as object. That is what this paragraph is
this conformity knowledge is the end of the Insight Leading To Emergence that has conform
object.¡¨ so two of them take formations as object. And #12 the knowledge of conformity is th
last. So it is said here ¡§(It) is the end of the Insight Leading To Emergence that has conform
object, still change-of-lineage knowledge is the last of all the kinds of Insight Leading To Em
Insight Leading To Emergence is the name of the three vipassan? knowledges - Knowledge
Formations, Knowledge of Conformity, and Knowledge of Change-of Lineage. We haven¡¦t c
change-of-lineage yet.

And then Sutta references are given. In paragraph 135 different words used for this knowled
are described. Sometimes in some discourses it is called ¡¥aloofness (atammayat? in P??i)¡
Sutta it is called ¡¥dispassion (nibbida)¡¦, and in another Sutta it is called ¡¥cultivation of perc
(sa??aga)¡¦, and then in another it is called ¡¥principal factor of purity (parisuddhi-padh?niya
Pa?isambhid?magga it is called by three names thus ¡¥Desire for deliverance, contemplatio
equanimity about formations¡¦.¡¨ These three are collectively called ¡¥Conformity Knowledge
Pa?isambhid?magga. ¡§In the Pa??h?na it is called two names thus ¡¥conformity to change
conformity to cleansing¡¦. In the Rathavin?ta Sutta it is called ¡¥Purification by knowledge an
way¡¦.¡¨ So it has many names and it is described by different names in different discourses.
these discourses and when we see these words, we are to understand that these words refe
knowledge described here. After the conformity knowledge comes change-of-lineage.

Chapter 22
(Tape 45 / Ps: 1- 46)

Change-of-Lineage is actually next to the enlightenment, next to the Path consciousness. Cl
comes next. Its position is to advert to the Path, and so it belongs neither to Purification by K
Vision of the Way nor to Purification by Knowledge and Vision.¡¨ There are seven stages of
vipassan? and they are given in this chart. So Knowledge of Change-of-Lineage does not be
purifies; it is just in between the one purity and the other. ¡§Its position is to advert to the Pat
it belongs neither to Purification by Knowledge ad Vision of the Way (that is the previous one
Purification by Knowledge and Vision (the succeeding one), but being intermediate, it is una
cannot say that it is included in the previous purity or the succeeding purity. So it is free from
purities. ¡§Still it is reckoned as insight because it falls in line with insight.¡¨ That is because
in the flow of insight vipassan?, so it is called ¡¥vipassan?¡¦. But strictly speaking, it is not vip
because it does not take formations as object; it takes Nibb?na as object.

¡§Purification of Knowledge and Vision (the last purification), properly consists in knowledge
Paths, that is to say, the Path of Stream Entry, the Path of Once-Return, the Path of Non-Re
of Arahantship.¡¨

¡§[Change-of-Lineage Knowledge and Knowledge of the First Path]
Herein, nothing further needs to be done by one who wants to achieve, firstly, the knowledge
Path.¡¨ Now he is very, very close to the Path consciousness or enlightenment. So he doesn
anything more. ¡§For what he needs to do has already been done by arousing the insight tha
knowledge. As soon as conformity knowledge has arisen in him in this way, and the thick mu
truths has been dispelled by the respective force peculiar to each of the three kinds of confo
consciousness no longer enters into, or settles down on, or resolves upon any field of forma
his consciousness does not want to be on the formations at all. That is because he has seen
impermanent, as painful, and as not self. So his mind ¡§does not cling to anything, cleaves,
it, but retreats, retracts and recoils as water does from a lotus leaf, and every sign as object,
occurrence as object, appears as an impediment.¡¨ At that moment he doesn¡¦t want to dwel
on mind and matter which he has been observing all through vipassan? meditation.

Paragraph 5 ¡§Then while every sign and occurrence appears to him as an impediment, whe
knowledge¡¦s repetition has ended, change-of-lineage knowledge arises in him.¡¨ After the c
knowledge, the consciousness which is called ¡¥conformity knowledge¡¦ disappears. Then it
consciousness called ¡¥change-of-lineage¡¦.

¡§Change-of-lineage knowledge arises in him, which takes as its object the signless, no-occ

no-formation, cessation, Nibb?na, (So it takes Nibb?na as object.) - which knowledge passe
lineage, the category, the plane, of the ordinary man and enters the lineage, the category, th
Noble Ones.¡¨ Now there is the meaning of the P??i word ¡¥gotrabhu¡¦. In that word ¡¥gotra¡
¡¥bhu¡¦ has two meanings. One meaning is ¡¥to overpower or to go beyond¡¦. The other mea
into, or to go into, or to enter¡¦. So the word ¡¥gotrabhu¡¦ means going beyond the lineage of
persons (puthijjana) or reaching into the lineage of Noble Persons. So ¡¥change-of-lineage¡¦
overpowering one lineage and then entering another lineage. So ¡¥passes out of the lineage
or to go beyond the lineage of ordinary persons and enter into the lineage of Noble Persons
this, Path will arise. As son as Path arises, he becomes a Noble Person; he is no longer an
At this point he has not yet changed, but he is prepared to change into another person. That
called ¡¥change-of-lineage¡¦.

Student: Does he know this is happening?

Teacher: After the enlightenment there will come the process of reflection on the Path, Fruit
that time he knows. These moments are very brief you know. Gotrabhu is just one moment
then Path consciousness he has never experience this in his life before. So it is like an over
experience although it lasts for only one brief thought moment. After this brief thought mome
changed person, changed mentally.

¡§Being the first adverting, the first concern, the first reaction, to Nibb?na as object, fulfills th
of a condition for the Path in six ways.¡¨ So it is condition for the Path in six ways - as proxim
contiguity, repetition, decisive support, absence, and disappearance conditions. You have to
Pa??h?na in order to understand these conditions. Pa??h?na conditions are described in th
Dependent Origination. So it serves as conditions for the Path consciousness.

¡§How is it that understanding of emergence and turning away from the external is change-
knowledge?¡¨ and so on. These are quotations. In this quotation there is footnote #1 ¡¥away
external¡¦. He misunderstood the Sub-Commentary. ¡§It is the understanding of the turning a
effected, which turning away is emergence from the field of formations; it is termed external
unformed element¡¦s existence is external¡¦.¡¨ That is not correct. Now here the formations a
¡¥external¡¦. ¡¥Turning away from the external¡¦ means turning away from the formations. Ac
are not necessarily external. If you are watching your own breath, or watching your own con
watching your own feelings, how could they be external? They are actually internal. But here
¡¥external¡¦ here. So ¡§It is termed (¡¥It¡¦ means the formations.) ¡¥external¡¦ because it is ex
unformed element.¡¨ That means they are not the unformed element. ¡¥Unformed element¡¦
they are other than Nibb?na. So they are called ¡¥external¡¦. In fact they are not external; the
internal. You are watching your own mind and matter. They are internal. But they are here c

because they are out of Nibb?na. It is something like that. So the footnote should be: ¡§It is
because it is external to the unformed element.¡¨ Stop there. Then there is a note. ¡§The unf
Nibb?na) is classed as ¡¥external¡¦ under the ¡¥Internal triad of the Abhidhamma M?tik?¡¨ is
Although it is not wrong, it is not necessary here.

In the first book of Abhidhamma Nibb?na is described as ¡¥external¡¦. Although the yogis rea
is external, not internal. That is described in the first book of Abhidhamma. So Nibb?na is ex
but here formations are called ¡¥external¡¦ just because they are not Nibb?na; they are out o

Paragraph 6 ¡§Here is a simile that illustrates how conformity and change-of-lineage occur w
objects though occurring in a single cognitive series with a single adverting.¡¨ As a rule, one
process must have only one object. If you look at the seeing thought process, there are 17 m
consciousness in that thought process. All 17 moments of consciousness take the present v
object. There should be no difference of object in one given thought process for different con
that one given thought process. But here it is different. Here some types of consciousness ta
object and some others take Nibb?na as object. Although it is called one thought process, th
of object for some types of consciousness in this thought process. This thought process beg
adverting, and then there are three moments of impulsion. After that there is change-of-linea
moments plus change-of-lineage, these four are javana (impulsion) moments. Now mind-do
the three moments immediately following take formations as object. But change-of-lineage ta
object. Then Path takes Nibb?na as object. And then Fruition takes Nibb?na as object. In thi
thought process there is difference of object. ¡§Here is a simile that illustrated how conformit
change-of-lineage occur with different objects though occurring in a single cognitive series (
thought process.) with a single adverting.¡¨ Each thought process has one adverting at the b
Sometimes if the object is through the five senses, then there is five-sense-door adverting. I
through mid-door, then there is mind-door adverting. So each thought process has one adve
said here ¡¥with a single adverting¡¦. With a single adverting, then ordinarily the object must
But in this particular thought process of enlightenment, there is difference of object. Some m
formations as object and some others take Nibb?na as object.

In this paragraph the author explains this: ¡§Suppose a man wanted to leap across a broad
himself on the opposite bank, he would run fast, and seizing a rope fastened to the branch o
stream¡¦s near bank and hanging down, or a pole would leap with his body tending, inclining
towards the opposite bank, and when he had arrived above the opposite bank, he would let
opposite bank, staggering first and then steady himself there; so too this meditator, who war
himself on Nibb?na, the bank opposite to the kinds of becoming, generation, destiny, station
fast by means of the contemplation of rise and fall, etc., (That is he is running fast at that tim
seizing with conformity¡¦s adverting to impermanence, pain, or not self the rope of materiality

the branch of his selfhood and hanging down, or one among the poles beginning with feelin
first conformity consciousness (So the first conformity consciousness is like leaping.) withou
with the second he tends, inclines, and leans towards Nibb?na, like the body that was tendi
leaning towards the opposite bank; then, being with the third next to Nibb?na, which is now
the other¡¦s arriving above the opposite bank (Now he is on the opposite bank.), he lets go t
object (He no longer takes formations as object.) with the ceasing of that consciousness, an
change-of-lineage consciousness he falls on to the unformed Nibb?na, the bank opposite; b
man did, for lack of previous repetition, he is not yet properly steady on the single object. Aft
steadied by path Knowledge.¡¨

He crosses over to the other bank and on the other bank he lets go of the rope or lets go of
Then he falls on the bank which is Nibb?na. The first fall he was not yet steady and next mo
consciousness arises, he was steadily established on the other bank or on Nibb?na.

Paragraph 7 ¡§Herein, conformity is able to dispel the murk of defilements that conceals the
unable to make Nibb?na its object.¡¨ It is the difference between conformity and change-of-li
conformity can dispel the defilements that conceal the truths, but it is unable to make Nibb?
Change-of-lineage is only able to make Nibb?na its object, but it is unable to dispel the mur
the truths. That is because they have different functions. Then the smile follows. We will ski

In paragraph 12 there is another simile. ¡§here is a simile for this. An archer, it seems, had a
at a distance of eight usabhas (about 100 yards), and wrapping his face in a cloth and armi
arrow, he stood on a wheel contrivance (a revolving platform). Another man turned the whe
when the target was opposite the archer, he gave him a sign with a stick. Without pausing a
archer shot the arrow and hit the target.¡¨ Now in P??i the word ¡¥one hundred¡¦ was used s
target, but 100 targets put 100 or 200 yards away. And the man is on a wheel contrivance o
platform. The other man turns the platform and the archer was blindfolded. When he is face
target, then the man will give him a sign, maybe something like a bell. With that sign he sho
the arrow hits the target. There is not one target, but 100 targets. So the P??i word used he
sata?¡¦. It is not one but one hundred. The reason why he took it to be one may be the use
number here. In P??i the number one hundred is a singular number. So you say ¡¥a hundre
P??i. You use the singular number, not the plural number. You say a hundred men? I don¡¦t
equivalent in English. The word used ¡¥lakkha sata?¡¦ is singular in number. Although the gr
is singular, the meaning is plural. It is many, one hundred. In P??i grammar such peculiaritie
you have to understand that too. An archer had a hundred targets set up at a distance of eig
on.

Let¡¦s go to the First Fruition. ¡§Immediately next to that knowledge, however, there arise eit

three Fruition consciousnesses, which are its result. For it is owing to this very fact that supr
profitable [consciousness] results immediately that it is said: ¡¥And which he called the conc
immediate result¡¦, and ¡¥Sluggishly he reaches what has immediate result for the destructio
and so on.¡¨ Now the Path consciousness is immediately followed by how many Fruition con
three. Path consciousness is the cause and Fruition consciousness is the result. So here the
the cause immediately. There is no interval between cause and effect in this particular case.
description of dhamma there is a word called ¡¥ak?liko¡¦. And that word ¡¥ak?liko¡¦ is misund
persons. ¡¥A¡¦ means ¡¥not, ¡¥kala¡¦ means ¡¥time¡¦ and ¡¥ika¡¦ means ¡¥having, so having
translated as timeless. But the real meaning or the real interpretation of the word is not that
timeless, but that it gives immediate results. That is the correct meaning. That means there i
time between cause and its result. Because of that it is said in the Ratana Sutta ¡¥that which
concentration with immediate result¡¦ or something like that.

Paragraph 16 ¡§Some, however, say there are one, two, three, four, or five Fruition conscious
there is difference of opinion among Therav?da Buddhists also. The common opinion is that
moments or three moments of Fruition consciousness. But there are some who say that ther
Fruition consciousness, or two, or three, or four, or five Fruition consciousnesses. ¡§That is i
For change-of-lineage knowledge arises at the end of conformity¡¦s repetition, so at the mini
two conformity consciousnesses (In order for it to be repetition there must be at least two. R
If it is only one, we cannot call it repetition. So repetition means at least two. There must be
of conformity.) since one alone does not act a repetition condition. And a single series of imp
maximum of seven (impulsion) consciousnesses.¡¨ When javana arises, it arises seven time
times. But at the moment of death it arises only five times or when someone has fainted only

¡§Consequently, that series which has tow conformities and change-of-lineage as third and
as fourth has three Fruition consciousnesses.¡¨ So three conformity moments plus one chan
four. Path consciousness is five, so how many remain? Two. In that case there must be two
consciousnesses. Sometimes there are only two conformity consciousnesses instead of thre
quick intelligence there are only two conformity moments. When there are two conformity m
change-of-lineage, the fourth is Magga, and so there must be three Fruition consciousnesse
either two or three Fruition consciousnesses immediately following the Path consciousness.
four Fruition consciousnesses, or five Fruition consciousnesses, or one Fruition consciousne

In paragraph 17 we have another difference of opinion. ¡§Some say that that which has four
change-of-lineage as fifth, and Path consciousness as sixth has one Fruition consciousness
refuted because it is the fourth or the fifth [impulsion] that reaches [the Path], not those after
to their nearness to the life-continuum.¡¨ When you are going towards a steep cliff, when you
this cliff, you cannot stop there because you are going with force. You simply fall into the pre

same way, the thought moments are going very fast, so they cannot stop at Magga in the si
why it is refuted that there is one Fruition consciousness only. So it is inadmissible when you
is only one Fruition consciousness because there cannot be one Fruition consciousness. Th
thought process comes too close to bhava~ga. When it comes too close to bhava~ga, it can
consciousness at the sixth moment. And if the Path is known at the sixth moment, there ca
consciousness at the seventh moment. That cannot be accepted as correct.

Paragraph 18 ¡§And at this point this Stream Enterer is called the Second Noble Person.¡¨ S
Second Noble Person. Now at the moment of the Path consciousness he is called the First
next moment he is called the Second Noble Person, just in one sitting, in a very, very brief s
thought moments. At the Path moment he is the First Noble Person and at the Fruition mom
Noble Person. That is why there are eight Noble Persons. I believe that we can only meet fo
those who have reached the Fruition stage. ¡§However negligent he may be, he is bound to
suffering when he has traveled and traversed the round of rebirths among deities and huma
seventh time.¡¨ This is because he has become a Sot?panna (a Stream Enterer or Stream V
negligent he may be - that means if he does not practice more meditation; it does not mean
breaking the five precepts. If he gives up meditation and he does not meditate to reach the h
then he is bound to make an end of suffering when he has traveled and traversed the round
deities and human beings for the seventh time. So he will be reborn only seven times, and a
he will surely become an Arahant and then he makes an end of suffering. So a Sot?panna h
rebirths.

Paragraph 19 ¡§At the end of the Fruition his consciousness enters the life-continuum.¡¨ So
period there is life-continuum. That means at the end of that thought process. ¡§After that, it
mind-door adverting interrupting the life-continuum for the purpose of reviewing the Path.¡¨ N
after becoming a Noble Person, he reviews the Path, the Fruition, Nibb?na, defilements aba
defilements remaining. These five things a person who has reached enlightenment reviews

Student: So enlightenment here is different from Nibb?na?

Teacher: Yes. Enlightenment is the consciousness here and Nibb?na is the object of that en
At the moment of enlightenment the Path consciousness arises and the Path consciousness
object. So Nibb?na is an external object. It is taken as an object by the Path consciousness
Fruition consciousness. Immediately after the enlightenment, a person reflects upon or revie
things. What are the five? Path, Fruition, Nibb?na, defilements abandoned, and defilements
defilements I have abandoned and what defilements are remaining this also the meditator re
among these five ¡§ Trainers may or may not have the reviewing of the defilements abandon
remaining.¡¨ So the last two they may or may not review. Therefore, the first three, they defi

that is the Path, Fruition and Nibb?na. But defilements abandoned and defilements remainin
not review. ¡§In fact it was owing to the absence of such reviewing that Mah?n?ma asked th
stage is there still unabandoned by me internally owing to which at time states of greed inva
remain¡¦?¡¨ Now Venerable Mah?n?ma was an enlightened person, but sometimes he had t
of fear, thoughts of anger. He didn¡¦t review the defilements when he became enlightened. S
which defilements he had abandoned or which remained to be abandoned. So he asked the
Buddha told him that because he did not review the defilements, therefore, he did not know.
should be quoted¡¨ - it is from the Majjhima Nik?ya.

[Knowledge of the Second Path - Third Noble Person]
Paragraph 22 ¡§However, after reviewing in this way, either while sitting in the same sessior
occasion the Noble Disciple who is a Stream Enterer makes it his task to reach the second p
both greed for sense desires and ill will¡¨ and so on. A person may proceed to get the secon
one sitting or he may stop practicing after he reaches the first stage. He may take a rest or h
practice meditation for any length of time. That is up to him. In the same session or on anoth
will continue his practice. Sometimes a person becomes a Sot?panna and then he may rem
maybe months or years. And then he practices meditation and he reaches the second stage
the four stages, or three stages, or two stages at one sitting. So it depends upon his wish to
higher stages.

¡§He brings to bear the Faculties, the Powers, and the Enlightenment Factors, and he works
that same filed of formations, classed as materiality, feeling, perception, formations, and cor
with the knowledge that they are impermanent, painful, not self, and he embarks upon the p
insight.¡¨ So after reaching the first stage, if he wants to reach the second stage, he must pra
vipassan? meditation again. But at that time his vipassan? becomes swift, not like vipassan?
persons. Still he must practice vipassan? again to reach the second stage, and to reach the
to reach the fourth stage. Before every stage he must practice vipassan?. That is why we sa
no enlightenment without vipassan?. So vipassan? must precede all enlightenment or all ari
consciousness. So we have the Second Path and the Third Noble Person, the Second Fruiti
Person and so on.

[The Second Fruition - Fourth Noble Person]
Paragraph 24 ¡§The Fruition consciousness should be understood to follow immediately upo
the same way as before. And at this point this Once-Returner is called the Fourth Noble Per
reached the second stage).¡¨ So it is the Fourth Noble Person. ¡§He is bound to make an en
returning once to this world.¡¨ Now what is meant by ¡¥to this world¡¦? To this human world.
the second stage, he may be reborn as a celestial being, and from there he will be reborn as
again. So he is the one who returns here once, thus a Once-Returner. So ¡¥to this world¡¦ m

human world¡¦.

The Third Path is Non-Returner. Right? And then the Third Path is immediately followed by
after Third Fruition he is called a Non-Returner. And so he is called the Sixth Noble Person.

Paragraph 27 ¡§[After death,] he reappears apparitionally [elsewhere] and attains complete
without ever returning, without ever coming to this world again through rebirth-linking.¡¨ Ther
words ¡¥to this world¡¦. Here ¡¥to this world¡¦ means ¡¥to this sensuous world¡¦. That means
human beings and to the world of lower celestial beings. There is a difference between the t
this world¡¦ means ¡¥to this human world¡¦, but here ¡¥to this world¡¦ means ¡¥to this human
celestial worlds¡¦. That is because after reaching the third stage of enlightenment and after b
Non-Returner, he will be reborn in the brahm? world, not in the world of human beings nor in
lower celestial beings. He will be reborn as a brahm? in what are called ¡¥the abodes of pure
five realms up in the scale of the 31 planes of existence. So he will be reborn in one of the p
¡¥to this world¡¦ here means not only this human world but this k?m?vacara world.

Paragraph 28 ¡§Now after reviewing in this way, either while sitting in the same session or o
occasion this Noble Disciple¡¨ and so on, he becomes an Arahant. So the Fourth Magga and
arise. After the Fruition he is called the Eighth Noble Person or an Arahant. We say that ther
Noble Persons, eight kinds of Noble Persons. But in actual practice we can meet only four N
because the first, the third, the fifth and the seventh persons exist only for one thought mom
we catch that one thought moment? So in practical terms there are four Noble Persons, but
are eight Noble Persons. That is because they are different at the Path consciousness mom
Fruition consciousness moments.

Paragraph 32 ¡¥States associated with Path¡¦ means states at the moment of Path consciou
accompanying the enlightenment. There are said to be 37 of these states. They are the four
mindfulness, the four right endeavors, the four roads to power, the five faculties, the seven e
factors, and the Noble Eightfold Path. If you add them all up together, you get 37. In reality t
37 states. There are how many? Do you Abhidhamma students remember? There are only
because, for example, mindfulness (sati) is one mental factor, but here it is described as fou
foundations of mindfulness). And the second the four endeavors, is just viriya. The one viriy
here as four. So in reality there are only 14. I think it is described somewhere.

Paragraph 34 ¡§Foundation (pa??h?na) is because of establishment by going down into¡¨ an
description of the P??i words ¡¥pa??h?na¡¦, ¡¥upa??h?na¡¦, ¡¥sati¡¦, and so on. ¡§Mindfulnes
foundation is ¡¥Foundation of Mindfulness¡¦.¡¨ So ¡¥Foundation of Mindfulness¡¦ means firm
mindfulness. ¡§It is of four kinds because it occurs with respect to the body, feeling, conscio

dhamma objects, taking them as foul, painful, impermanent, and no self, and because it acc
function of abandoning perception of beauty, pleasure, permanence, and self. That is why ¡¥
Mindfulness¡¦ is said.¡¨ So one mindfulness is described here as four because it occurs with
feeling, consciousness and dhamma objects, taking them as foul, painful, impermanent, and
same time abandoning the perception of beauty, pleasure, permanence, and self. So these
That is why there are four foundations of mindfulness.

Paragraph 35 The next one is the four endeavors. ¡§By it they endeavor, thus it is endeavor
are word explanations. So one viriya is described here as four because it has different functi
accomplishes the functions of abandoning arisen unprofitable things, preventing the arising
arisen, arousing unarisen profitable things, and maintaining those already arisen.¡¨ With rega
there are two aspects and with regard to kusala there are two. There is endeavoring to get r
which are past, endeavoring not to have akusala or not to have fresh akusala arise, endeavo
not yet arisen arise, endeavoring to develop kusala which has arisen. So there are four aspe
there are four kinds of right endeavor or right effort.

Paragraph 36 is about the iddhip?da. They are called in P??i ¡¥iddhip?da¡¦, ¡¥the Roads to
Basis for Success¡¦. I think they are mentioned somewhere else in chapter 12, paragraph 44
iddhip?da? ¡§It is fourfold as zeal (desire) and so on.¡¨ What are the other three? Zeal, effort
consciousness and inquiry (That means pa???.) ¡¥Inquiry¡¦ really means understanding corr
inquiring, not just investigating. So these are the Roads to Power. ¡§These are supramunda
of the words ¡¥If a bhikkhu obtains concentration, obtains mental unification by making zeal
is called concentration through zeal¡¦, etc., they are also mundane as states acquired by pre
zeal, etc., respectively.¡¨ At the moment of enlightenment they are supramundane, but at the
practice of vipassan? meditation they are mundane.

Paragraph 37 ¡§ ¡¥Faculty¡¦ is in the sense of predominance, in other words, of overcoming,
states, as faculties,] respectively overcome faithlessness, idleness, negligence, distraction a
So there are five faculties. What are the five? Faith, effort, mindfulness, concentration and w
opposites are faithlessness, idleness, negligence, distraction and confusion. ¡§ ¡¥Power¡¦ is
unwaveringness because these states, as power are incapable of being overcome respectiv
and so on.¡¨ They are strong factors. they cannot be overcome by their opposites. That is wh
powers¡¦. ¡§Both are fivefold as consisting in faith, [energy, mindfulness, concentration, and
That is why ¡¥Five Faculties¡¦ and ¡¥Five Powers¡¦ is said.¡¨

Paragraph 38 ¡§Mindfulness, [investigation-of-states, energy, happiness, tranquillity, concen
equanimity,] as factors in a being who is becoming enlightened, are the ¡¥Seven Enlightenm
They are called ¡¥Seven Factors of Enlightenment¡¦. And the seven are sati (mindfulness), in

states (That means pa??? actually.), viriya (effort), happiness (p?ti), tranquillity (passaddhi),
concentration (sam?dhi), and equanimity (upekkh?). These are called ¡¥Seven Factors of E
Right View, right Thinking, Right Speech, Right Action, Right Livelihood, Right Effort, Right M
Right Concentration are the eight factors of the Noble Eightfold Path.

Paragraph 39 ¡§so there are these 37 states partaking of enlightenment. Now in the prior sta
insight is occurring, they are found in a plurality of consciousness as follows.¡¨ When you are
vipassan? meditation, these factors or these states arrive in your mind, but with different kin
consciousness. At one time you may be dwelling on body contemplation or mindfulness of th
time the mind may be on the feelings and so on. So there is plurality of consciousness which
them. But at the moment of Path consciousness it is said that they all arise. They are found
consciousness as follows and so on. ¡§At the time of arising [of any one] of these four kinds
knowledge, [all these states] are found in a single consciousness.¡¨ All these states arise tog
single Path consciousness. So that is the difference. When they are mundane, they arise wi
of consciousness, but when they are supramundane, they arise with one type of consciousn
consciousness. ¡§In the moment of Fruition the 33 excepting the Four Right Endeavors are
Four right Endeavors also accompany Fruition consciousness, but their function is prominen
Path consciousness. That is why they are excluded. In fact Path consciousness is also acco
Viriya is a mental factor which accompanies many types of consciousness. Fruition conscio
accompanied by viriya.

Paragraph 40 ¡§When these are found in a single consciousness in this way, it is the one ki
whose object is Nibb?na that is called ¡¥the Four Foundations of Mindfulness¡¦¡¨ and so on.
with one consciousness at the moment of Path consciousness, then they do not take differe
time because Path consciousness takes Nibb?na as object. They also take Nibb?na as obje
difference. The we have nine in one way, one in two ways, then in four ways, in five ways a
making you more familiar with these states.

Nine in one way - that means nine states have only one function, one name. There are 37. S
37 names. So nine have only one name. It is something like that. ¡§These nine are zeal, co
happiness, tranquillity, equanimity, thinking, speech, action, and livelihood, and they are fou
way¡¦ as road to power consisting in zeal, etc. since they do not belong to any other group.¡
only one name. ¡§(2) One in two ways: faith is found ¡¥in two ways, as a faculty and as a po
four ways and (4) in five ways: the meaning is that another one is found in four ways and an
Herein, concentration is the ¡¥one in four ways¡¦ since it is a faculty, a power, an enlightenm
a Path factor; understanding is the ¡¥one in five ways¡¦ since it is these four and also a road
These just make you more acquainted with these mental states. ¡§(5) In eight ways, and (6)
the meaning is that another is found in eight ways and another in nine ways. Mindfulness is

ways¡¦.¡¨ That means mindfulness has eight names among these 37. That is there is mindfu
foundations of mindfulness, as a faculty, as a power, as an enlightenment factor and as a Pa
¡§Energy is the ¡¥one in nine ways¡¦ since it is four Right Endeavors, a road to power, a facu
enlightenment factor, and a Path factor.¡¨ So endeavor has the most or the greatest causenu
functions.

Paragraph 44 ¡§[(2) Emergence:] mundane insight induces no emergence either from occur
internally], because it does not cut off originating, which is the act of causing occurrence, or
[of formations externally], because it has the sign as object.¡¨ Now there is emergence from
emergence from sign. Some emerge from occurrence, some from sign, or some from both.

¡§Change-of-lineage does not induce emergence from occurrence [internally] because it doe
originating.¡¨ At the moment of change-of-lineage no mental defilement is eradicated, so it d
emergence from occurrence. It emerges from occurrence of mental defilement. ¡§But it d?e
from the sign.¡¨ That is because it does not take formations as object. ¡¥Sign¡¦ here means s
formations. It takes Nibb?na as object. So it emerges from the sign, but not from the occurre
is said ¡¥Understanding of emergence and turning away from the external is knowledge of c
and so on. ¡§These four kinds of [Path] knowledge emerge from the sign be cut off because
signless as their object and also from occurrence because they cut off origination. So they e
both.¡¨ Now Path consciousness emerges from both sign and occurrence. Since they do not
object, then they emerge from sign. Since at the moment of Path consciousness mental defi
eradicated, they emerge from the occurrence of mental defilements. So the Path emerges fr
occurrence.

Paragraph 45 I want to point to one thing on page 797, about 9 lines down. You see there ¡§
the sense of directing emerges from wrong thinking.¡¨ Sometimes we describe the Noble Eig
present during vipassan? meditation. We say when you practice vipassan? meditation, all th
working harmoniously in your mind. How? Let us say you try to concentrate on the breath. N
effort to keep your mind on the object. So there is Right Effort. And then when you make effo
it were hits the object or hits the target, something like that. So that is Right Mindfulness that
object. And then your mind sticks to the object for some time. That is Right Concentration. A
Concentration you see the true nature of things. You see that they are impermanent, and yo
and disappearing. That is Right Understanding. So how many do you get? Four. And the thr
Right Action and Right Livelihood, are already accomplished when you take precepts before
meditation. So they are also said to be accomplished. Now we have seven. What about Rigl
Thought¡¦ really means the mental factor which is called ¡¥vitakka¡¦ or ¡¥initial application of
right Thought does not mean thinking of Nibb?na or thinking of formations. It is that mental f
directs the mind to the object or that takes the mind to the object.

Student: So it could be intention?

Teacher: No. Not intention. It is something that takes the mind to the object. When you shoo
the force of the bow, it is something like that. Without vitakka mind will not take an object. So
vitakka (initial application) to take our mind to the object. so applying the mind to the object i
by Right Thought or the initial application. So here we see that. ¡¥Right Thinking in the sens
means the mental factor pushing the mind to the object, taking the mind to the object. If initia
doesn¡¦t take the mind to the object, then mind cannot see anything at all. That is why it is gr
Right Understanding. So Right Understanding and Right Thought belong to the group of unc
Effort, Right Mindfulness, and Right Concentration belong to the group of concentration. And
belong to the group of s?la or moral purity. So ¡¥Right Thought¡¦ really means that mental fa
mental state which takes the mind to the object or which pushes the mind to the object. That
here.

Paragraph 46 And then ¡¥Coupling of Powers¡¦, I think we will have to do it next time. Oh, we
it. ¡§At the time of developing the eight mundane attainments the serenity power is in excess
practice jh?nas, the ¡¥eight mundane attainments¡¦ mean the eight jh?nas. When you develo
serenity power is in excess. ¡§While at the time of developing the contemplations of imperm
insight power is in excess.¡¨ So when you practice vipassan? meditation, vipassan? meditati
when you practice samatha, samatha is in excess. ¡§But at the Noble Path moment they oc
the sense that neither one exceeds the other.¡¨ At the moment of Path consciousness both a
and vipassan?. ¡§So there is coupling of the powers in the case of each one of these four ki
according as it is said¡¨ and so on. So there is serenity power and insight power. During the
one or the other is in excess, but at the moment of Magga, they are equal, neither one exce
serenity and insight have a single nature in the sense of emergence, they are coupled togeth
exceeds the other. Hence it was said: He develops serenity and insight coupled together in t
emergence. Emergence and coupling of the power should be understood here in this way.¡¨

In paragraph 47 we have (4) the kinds of states that ought to be abandoned, (5) also the act
abandoning. They are important. According to this explanation we know what kinds of menta
eradicated by which stages - first stage, second stage, third stage and fourth stage. So after
reaches to the first stage, he must have abandoned or eradicated certain kinds of mental de
after the second stage, he must have eradicated other kinds of mental defilements and so o
described in the following paragraphs. We will do them next week.

S?dhu! S?dhu! S?dhu!

(Tape 46 / Ps: 47 ¡V 103)

Paragraph 47 ¡§ 4. The kinds of states that ought to be abandoned, 5. also the act of their a
which kinds of states these four Paths abandon and the act of abandoning. ¡§Now which sta
abandoned by which kinds of knowledge among these four should be understood, and also
them.¡¨

¡§For they each and severally bring about the abandoning of the states called fetters¡¨ and s
severally¡¦ is not a correct translation. The P??i is yathayoga?. It means ¡¥as is proper¡¦ or ¡
may be¡¦. That means each of them abandon defilements and others differently. ¡§For as is
about the abandoning of the states called fetters, defilements, wrongnesses, worldly states,
perversions, ties, bad ways, cankers, floods, bonds, hindrances, adherences, clingings, inhe
stains, unprofitable courses of action, and unprofitable thought arisings.¡¨ The mental defiler
different names. All of them are mental defilements.

The first one is fetters. ¡§Herein, the fetters are the ten states beginning with greed for the fi
so called because they fetter aggregates [in this life] to aggregates [of the next], (they fetter)
its fruit or (they fetter) beings to suffering.¡¨ That is why they are called ¡¥fetters¡¦. They are l
ropes.

¡§For as long as the ones exist there is no cessation of the others.¡¨ As long as there are fet
no cessation of aggregates, no cessation of kamma, no cessation of fruit, and no cessation
suffering. They are called ¡¥fetters¡¦.¡¨

¡§And of these fetters, greed for the fine material, greed for the immaterial, conceit, agitation
ignorance, are called the ¡¥five higher fetters¡¦ because they fetter beings to aggregates, etc
the higher [forms of becoming], while false view of individuality, uncertainty, adherence to rit
rituals, greed for sense desires, and resentment, are called the ¡¥five lower fetters¡¦ because
beings to aggregates, etc., produced in the lower states of existence. The other five fetter be
higher forms of existence. There are higher and lower fetters. All together there are ten. Whi
abandoned by which Path will be explained later. Right now the author is giving the lists of th
first is the ten fetters.

The second group is the ten defilements. ¡§The defilements are the ten states, namely, gree
conceit, [false] view, uncertainty, stiffness [of mind], agitation, consciencelessness, shamele
ten are called ¡¥defilements¡¦. ¡§They are so called because they are themselves defiled and
defile the states associated with them.¡¨ They are themselves impurities and they make othe
they are called ¡¥defilements¡¦. In P??i they are called ¡¥kilesas¡¦.

¡§The wrongnesses are the eight states, namely, wrong view, wrong thinking, wrong speech
opposite of the Noble Eightfold Path.) wrong action, wrong livelihood, wrong effort, wrong m
concentration which with wrong knowledge and wrong deliverance come to ten.¡¨ That mean
and wrong deliverance they are ten.

Footnote 14 ¡§ ¡¥Wrong knowledge¡¦, which is wrong because it does not occur rightly [i.e. i
truth], and is wrong and mistaken owing to misinterpretations, etc., is just delusion. ¡¥Wrong
is the wrong notion of liberation that assumes liberation to take place in a ¡¥World Apex¡¦.¡¨
that when a being reaches the highest existence, there will be liberation. That is called ¡¥wro
liberation¡¦. There are eight wrongnesses or there can be ten wrongnesses. When we take t
wrong knowledge and wrong deliverance.

The next one is the worldly states. They are the states which people meet or experience in t
There are said to be eight of these states, namely, gain, loss, fame, disgrace, pleasure, pain
praise. The P??i words used for gain and loss are l?bha and al?bha. ¡¥Al?bha¡¦ means non-
For fame the word used is ¡¥yasa¡¦ and for disgrace the word used is ¡¥ayasa¡¦. The word ¡¥
things. One is fame and the other is followers. We interpret this here not as fame, but to hav
to have students or pupils. For disgrace we say to be alone, not to be with followers or havin
We do not say ¡¥fame and disgrace¡¦ because they are the same as the last two, praise and
interpretation is that instead of fame it is having friends, or followers, or having students. Ins
disgrace we say not having many followers. Pleasure, pain, blame, praise - these eight are t
life and nobody can escape them. ¡§They are so called because they continually succeed ea
the world persists.¡¨ At times there is gain and at other times there is loss and so on. Someti
what you want and sometimes you don¡¦t get what you want or you lose what you have.

¡§But when the worldly states are included, then by the metaphorical use of the cause¡¦s na
the approval that has the gain, etc., as its object and the resentment that has the loss, etc., a
should also be understood as included.¡¨ Here the translation is a little different than the orig
said in the original is that by the metaphorical use of the causes named for its fruit the appro
resentment are to be understood as meant by worldly states. When we say ¡¥worldly states¡
and so on, but here we do not mean gain, loss, etc., but approval or resentment or our react
conditions. These are the eight conditions of life. When we have gain, then we have approva
are attached to gain. When we have loss, we have aversion. That approval and resentment
aversion are what are meant by these worldly states, not just the gain, loss, etc. The approv
resentment is taken to be meant by worldly states by the metaphorical use of the causes na
That means the name is really the cause¡¦s name, but we must take the fruit of it.

There is gain. Because there is gain there is approval. That means there is attachment. Atta

by gain. When we say ¡¥gain¡¦, gain is the name of the cause. What we must really understa
that cause. It is like saying sugar is diabetes.

¡§The kinds of avarice are the five, namely, avarice about dwellings, families, gain, Dhamma
which occur as in ability to bear sharing with others any of these things beginning with dwell
Pa4l0I word for the kinds of avarice is macchariya. Macchariya is one of the mental factors.
really means inability to bear sharing with others. I have this thing and I don¡¦t want to share
persons. If other persons come and make use of it, I am angry. That is what is meant by ava
not just stinginess. We have two mental factors issa and macchariya. Avarice here is not sti
stinginess is lobha. It is attachment. This mental factor is accompanied by dosa. It is intolera
things with others. There are five, namely, dwellings, families, gain, Dhamma and praise. So
want people to come to our place and live with us. That is avarice with regard to dwelling. ¡¥
meaning for monks, not particularly for lay people. Monks always depend upon lay people fo
we may have attachment. Let us say that he is my supporter. So I do not want other monks
my supporter¡¦s family. It is something like that. Gain is what one gets. Dhamma - that mean
meditation and you may have some results and you don¡¦t want those results to happen to o
other persons get the same results, you are not happy. And then the last one is called ¡¥pra
word is ¡¥va??a¡¦. That is interpreted to mean two things. One is appearance or you may sa
other is praise. Let us say you have a beautiful face. Then you don¡¦t want other people to h
face. It is something like that. So ¡¥va??a¡¦ can mean both beauty or appearance and praise

¡§The perversions are the three, namely, perversion of perception, of consciousness, and of
apprehending objects that are impermanent, painful, not self, and foul, as permanent, pleasa
beautiful.¡¨ If we take things as permanent, as pleasant, as self, and as beautiful, it is one of
of perversions. There are three - perversion of perception, perversion of consciousness and
view.

¡§The ties are the four beginning with covetousness, so called because they tie the mental b
material body. They are described as ¡¥the bodily tie of covetousness¡¦, ¡¥the bodily tie of ill
bodily tie of adherence to rites and rituals¡¦, and ¡¥the bodily tie of insisting or misinterpreting
¡§this [only] is the truth¡¨.¡¦ This alone is true and others are false. It is something like that. T
called ¡¥tie¡¦ here. There are four ties.

¡§Bad ways is a term for doing what ought not to be done and not doing what ought to be do
(desire), hate, delusion, and fear.¡¨ The P??i word is ¡¥agati¡¦. It is actually bias. So we shou
attachment or out of desire, not zeal. If I am attached to someone, then I may have a favora
him. I am not just towards other people. That is what is called here ¡¥bad ways¡¦. Sometimes
and so we do not act justly towards him. Sometimes we are afraid. If we do this, a person wi

back to me. So we are afraid of him. So we may practice favoritism towards him. Sometimes
delusion. Because I am ignorant I favor one over the other. These are called ¡¥bad ways¡¦.

¡§Cankers (?savas): as far as change of lineage [in the case of states of consciousness] and
acme of becoming [in the case of the kinds of becoming (Here ¡¥becoming¡¦ means realms o
is to say, the fourth immaterial state,] there are exudations owing to the [formed nature of the
The real meaning here is that these cankers exude or drip like pus or something dripping fro
word is ¡¥?sava¡¦. ¡¥?¡¦ means ¡¥as far as¡¦ and ¡¥sava¡¦ means ¡¥to drip¡¦ or ¡¥exude¡¦. Her

they can take the highest realm as object. It is to be understood by way of taking object. ¡¥T
means they take them as object.

There is a footnote. I don¡¦t think he really understood what he was referring to here. ¡¥As fa
don¡¦t know whether it can be explained in English. The P??i word ¡¥?¡¦, here translated as
mean two things. Let us say one is as far as change of lineage. It may mean as far as chang
excluding change of lineage. It just reaches up to that dhamma. Sometimes it may mean ¡¥i
two meanings for the P??i word ¡¥?¡¦ or ¡¥as far as¡¦. That means for example the fields exte
mountain. They stop when there is a mountain. The fields do not include the mountain. Whe
Buddha¡¦s fame goes as far as the highest realm, that is including the highest realm. Here in
So ¡¥as far as change of lineage¡¦ means up to change of lineage. ¡¥As far as the acme of b
far as the highest realm¡¦ means including the highest realm. I think you say ¡¥through¡¦ or s
that. Right? So ¡¥Monday through Friday¡¦ means Monday and the rest including Friday.

¡§This is a term for greed for sense desires, greed for becoming, wrong view, and ignorance
exuding [of these defilements] from unguarded sense doors like water from cracks in a pot in
constant trickling, or because of their producing the suffering of the round of rebirths.¡¨

The next one is the floods. It is the same thing. They are called ¡¥floods¡¦ ¡§in the sense of s
into the ocean of becoming, and in the sense of being hard to cross.¡¨

¡§The bonds are so called because they do not allow disengagement from an object and dis
suffering. Both ¡¥floods¡¦ and ¡¥bonds¡¦ are terms for the cankers already mentioned.¡¨ The
sometimes called ¡¥cankers¡¦, sometimes ¡¥floods¡¦, sometimes called ¡¥bonds¡¦.

¡§The hindrances are the five, namely, lust, [ill will, stiffness and torpor, agitation and worry,
uncertainty,] in the sense of obstructing and hindering and concealing [reality] from consciou

are the five hindrances that we often encounter during meditation.

¡§Adherence (misapprehension - par?m?sa) is a term for wrong view, because it occurs in t
the individual essence of a given state (That means going beyond the individual essence of
apprehending elsewise an unactual individual essence.¡¨ That means taking something wro

The clingings are the up?d?nas. ¡§The clingings are the four beginning with the sense desir
described in all their aspects in the description of Dependent Origination.¡¨

¡§The inherent tendencies are the seven, namely, greed for sense desire, etc., in the sense
stated thus: the inherent tendency to greed for sense desires, the inherent tendency to rese
[false] view, uncertainty, greed for becoming, and ignorance.¡¨ There are seven all together.
owing to their inveteracy that they are called inherent tendencies since they inhere as cause
of greed for sense desires, etc., again and again.¡¨ ¡¥Inherent tendencies¡¦ really means sev
defilements. However when they are called ¡¥inherent tendencies¡¦, they are not the real def
are those that can arise when there are conditions for their arising. When they really arise w
¡¥defilements¡¦ or ¡¥kilesas¡¦.

I am liable to get attached to things. But right now I am teaching Dhamma and there is no at
mind. I am free from attachment now. But if I see something which I like and I am attached t
attachment arises. There is a liability of attachment to arise in me. That is what is called ¡¥a
tendency¡¦. When attachment really arises, it is defilement. Before reaching the stage of defi
are called ¡¥latent tendencies¡¦ or ¡¥inherent tendencies¡¦. It is like being under the surface.
surfaces, it is called ¡¥defilement¡¦. When it lies dormant underneath, it is called ¡¥anusaya (
tendencies)¡¦. There are seven. We will talk more about them later.

¡§The stains are the three, namely, greed, hate, and delusion. They are so called because t
dirty like oil, black, and mud, and because they dirty other things.¡¨

¡§The unprofitable courses of action are the ten, namely, killing living things, taking what is
sexual misconduct; false speech, malicious speech, harsh speech, gossip; covetousness, ill
view. They are so called since they are both unprofitable action [kamma] and courses that le
destinies (unhappy rebirths).¡¨

¡§The unprofitable thought arisings are the twelve consisting of the eight rooted in greed, the
hate, and the two rooted in delusion.¡¨ They are, the twelve unwholesome types of consciou
¡¥cittupp?da¡¦ is translated here as thought arisings. Actually they are types of consciousnes
twelve types of unwholesome consciousness.

¡§So these [four kinds of knowledge] each and severally (or as is proper) abandon these sta
the fetters. How?¡¨

¡§The five states eliminated by the first knowledge in the case of the fetters, firstly, are: false
personality, doubt, adherence to rites and rituals, and then greed for sense desires and rese
[strong enough] to lead to states of loss.¡¨ With regard to defilements or these unwholesome

Knowledge eliminates is the subtle forms of greed, delusion and so on. The grosser forms o
and so on are eradicated by the first Path, by the second Path and by the third Path. There i
here. They are eliminated by the fourth Knowledge and it does not say that they are only eli
fourth Knowledge. We have to understand in this way.

¡§In the case of wrongness, wrong view, false speech, wrong action, wrong livelihood are el
first Knowledge. Wrong thinking, malicious speech, and harsh speech are eliminated by the
The third Knowledge is the An?g?m? (the Non-Returner). Right? The An?g?m? can eradica
the grosser forms of attachment. ¡§Wrong thinking, malicious speech, and harsh speech, ar
third Knowledge. And here only volition is to be understood as speech.¡¨ Although the word
we must understand it to mean volition. ¡§Gossip, wrong effort, wrong mindfulness, wrong c
deliverance, and wrong knowledge, are eliminated by the fourth Knowledge.¡¨ Here also sin
¡¥only¡¦, we must understand that the stronger ones are destroyed by the previous Knowled
Paths.

¡§In the case of the worldly states, resentment is eliminated by the third Knowledge, and ap
eliminated by the fourth Knowledge. Some say that approval of fame and praise is eliminate
Knowledge.¡¨ He didn¡¦t say whether it is to be accepted or not. Maybe the author doesn¡¦t li
just gives it as information.

¡§The kinds of avarice are eliminated by the first Knowledge only.¡¨ The five kinds of avarice
by the first Knowledge.

¡§In the case of perversions, the perversion of perception, consciousness and view, which fi
the impermanent and self in the not-self, and the perversion of view finding pleasure in pain
the foul, are eliminated by the first Knowledge. The perversions of perception and conscious
beauty in the foul are eliminated by the third Path. The perversions of perception and consci
pleasure in the painful are eliminated by the fourth Knowledge.¡¨

¡§In the case of ties, the bodily ties of adherence to rites and rituals and of the insistence
(misinterpretation) that ¡¥This is the truth¡¦, are eliminated by the first Knowledge (because t

wrong views). The bodily tie of ill will is eliminated by the third Knowledge. The remaining on
by the fourth Path.¡¨

¡§The bad ways are eliminated by the first knowledge only.¡¨ When a person becomes a Sot
practice favoritism.

¡§In the case of the cankers, the cankers of view is eliminated by the first Knowledge (becau
view). The canker of sense desire is eliminated by the third Knowledge. The other two are e
fourth Knowledge.¡¨

¡§The same thing applies in the case of the floods and the bonds.¡¨

¡§In the case of the hindrances, the hindrances of uncertainty is eliminated by the first Know
it is doubt). The three, namely, lust, ill will and worry, are eliminated by the third Knowledge.
means desire for sensual things. ¡§Stiffness and torpor and agitation are eliminated by the fo
Knowledge.¡¨

¡§Adherence is eliminated by the first Knowledge.¡¨ ¡¥Adherence¡¦ just means wrong view. W
eliminated by the first Knowledge.

¡§In the case of the clingings (up?d?na), since according to what is given in the Texts all wo
sense desires.¡¨ That means objects of sense desires. I would like to put ¡§all worldly states
sense desires¡¨, not ¡¥sense desires as object¡¦. ¡§All worldly states are objects of sense de
greed both for the fine material and the immaterial falls under sense desire clinging.¡¨ You re
clingings. Right? Sense desire clinging, wrong view clinging, and the others are also wrong
word ¡¥sense desire¡¦ is used here in P??i k?mup?d?na, we must understand that sense de
material and the immaterial states are taken as sense desire here because they are lobha o
here ¡¥sense desire clinging¡¦ just means attachment (lobha).

¡§In the case of the inherent tendencies, the inherent tendencies to [false] view and to uncer
eliminated by the first Knowledge. The inherent tendencies to greed for sense desire and to
eliminated by the third Knowledge. The inherent tendencies to conceit (pride), to greed for b
ignorance are eliminated by the fourth Knowledge.¡¨

¡§In the case of the stains, the stain of hate is eliminated by the third Knowledge, the others
by the fourth Knowledge.¡¨

¡§In the case of the unprofitable courses of action, killing living things, taking what is not give

misconduct, false speech, and wrong view, are eliminated by the first Knowledge. The three
speech, harsh speech, and ill will, are eliminated by the third Knowledge. Gossip and coveto
eliminated by the fourth Knowledge.¡¨

¡§In the case of the unprofitable thought arisings, the four associated with [false] view, and t
with uncertainty, making five, are eliminated by the first Knowledge. The two associated with
eliminated by the third Knowledge. The rest are eliminated by the fourth Knowledge.¡¨

Do you find mention of the second Knowledge? No. Right? Why? Did you ever wonder? The
not eliminate any mental defilements all together. It makes the remaining mental defilements
is why it is not mentioned here.

For your knowledge or information the first Knowledge or Path eliminates what? Wrong view
second Knowledge eliminates what?

Student: It just weakens the defilements

Teacher: It does not eliminate mental defilements, but it weakens the mental defilements. Th
eliminates what? Attachment for sensual things, the k?m?vacara and aversion (dosa) or ill w
fourth Knowledge eradicates the remaining mental defilements.

Now we come to an interesting discussion. ¡§And what is eliminated by any one of them is a
is why it was said above ¡¥So these [four kinds of Knowledge] as is proper abandon these s
the fetters¡¦.¡¨

¡§The act of abandoning: but how then? Do these {Knowledges] abandon these states when
they are future, or when they are present?¡¨ It¡¦s very interesting. We say that Path Knowled
mental defilements. The question here is do these Knowledges abandon these states (¡¥The
defilements.) when they are past, or when they are future, or when they are present. In P??i
past, future and present. ¡§What is the position here? For firstly if [they are said to abandon]
future, it follows that the effort is fruitless.¡¨ That is because the past is already past and you
have to do anything about it. It has already gone. And the future has not come. So you cann
about it either. So there is no question about the Path Knowledges abandoning the past defi
future defilements. But what about the present ones? Does the Path eliminate the present m
the mental defilements that are existent at the moment? No. That is because if they are pres
no Path at all. Path and mental defilements do not arise together. Then the Path eradicates

¡§Then if it is when they are present, it is likewise fruitless because the things to be abandon

simultaneously with the effort, and it follows that there is development of a Path that has def
follows that defilements are dissociated [from consciousness] though there is no such thing
defilement dissociated from consciousness.¡¨ There are three things here. If you say that the
abandoned when they are present it is fruitless because the things to be abandoned exist si
the effort. That means the things to be abandoned would arise simultaneously with the effort
here is Path consciousness. ¡§It follows that there is development of Path (That means arisi
has defilement.¡¨ If you say that the present defilements are eliminated, then that amounts to
and defilements arise together. No defilements can arise with Path. Defilements are unwhole
and Path is a wholesome mental state. Unwholesome mental states and wholesome mental
the same time. ¡§It follows that defilements are dissociated.¡¨ Then you may say at the mom
are no defilements. The Path eradicates the defilements. If you say this, then it amounts to s
defilements can arise without consciousness. That is not so. Defilements are mental factors
factors they can only arise when there is consciousness. They are never dissociated from co
you say at the Path moment defilements are eliminated, then you are saying that they can b
consciousness. Path consciousness does not eradicate the past defilements, nor the future
present defilements. If there are defilements in the mind, there can be no Path at all. It eradi

¡§That is not an original argument.¡¨ Here ¡¥original¡¦ means this argument or this discussion
to this book only. This discussion has appeared already in other books. ¡§For in the Texts fir
is put.¡¨ He quotes the Texts. The Texts are the same as what we have said. Magga eradica
nor the future, nor the present defilements.

Then what does it eradicate? What does it abandon? Go to paragraph 80. ¡§What does that
abandoning of defilements that have soil [to grow in].¡¨ It is difficult here, the use of the P??i
¡¥bh|mi???¡¦. ¡§But are defilements that have soil [to grow in] past, future or present?¡¨ Are t
defilements that have soil to grow in past, future, or present? The answer is: ¡§They are sim
described as arisen by having soil [to grow in].¡¨ They are just that. We cannot say that they
that they are future, or that they are past. They are just those that have arisen by having soil

¡§Now there are various meanings of ¡¥arisen¡¦, that is to say, (1) arisen as ¡¥actually occur
on.

Student: Is this close to saying they are empty?

Teacher: No. We will explain later. Then the Commentator brings in four kinds of what are ca
The P??i word is ¡¥uppanna¡¦. On the handout I gave you the P??i word also. There are fou
(that which has arisen). There are four things which are called ¡¥uppanna¡¦ in P??i. The wor
means that which has arisen.

The first meaning is arisen as actually occurring. That means all that is reckoned to possess
moments of arising, aging and dissolution. That means it is the real present things. Because
something is present, we mean that it possesses the three stages of arising, staying and dis
arising, aging and dissolution. Thus it is the real present. This real present is sometimes call
(that which has arisen)¡¦.

The next one is ¡¥arisen as being and gone¡¦. That means they have arisen and now they ar
arisen and gone. They are also called ¡¥arisen¡¦. There are two of them. Wholesome and un
(cittas and cetasikas) which have experienced the stimulus of an object (That means which
object.) and disappeared. They are also called ¡¥arisen as been and gone¡¦. Here ¡¥been¡¦ r
¡¥experienced¡¦. The second is anything conditioned that has reached the three moments be
and has ceased. Something conditioned which has come into being and then disappeared is
called ¡¥arisen¡¦. It is having been and gone.

The third is arisen by opportunity made. Past kamma is called ¡¥arisen by opportunity made
past. Although it is past, it is called ¡¥arisen¡¦. That means it is still with us or something like
Because it has stood (That is the direct translation), it has existed inhibiting the result of othe
has made opportunity for its own result to arise in the future. When there is kamma and then
leaves something like a potential in the continuity of beings to give results in the future. Whe
opportunity for its results to arise in the future, it inhibits the results of other kammas. The se
future result. The future result is also called ¡¥uppanna¡¦. Although it has not yet arisen, it is
¡¥arisen¡¦. That is because when opportunity to arise is made, it is sure to arise in the future
is accumulated, when kamma is done, then the fruit is sure to arise. The future result can be
¡¥arisen¡¦, although in fact it has not yet arisen.

The fourth one is arisen by having soil to grow in. We are concerned with this. Arisen by hav
in - that means unwholesome kamma which has not been eradicated with respect to any giv
¡¥soil¡¦ here? ¡¥Soil¡¦ here means the five aggregates in the three planes of becoming, which
of vipassan?, and ¡¥what has soil¡¦ means mental defilements which are capable of arising w
those aggregates. So what the Path eliminates is this kind of defilement ¡¥arisen by having s
Here ¡¥soil¡¦ means the five aggregates in the three planes of becoming. They are the objec
meditation. ¡¥What has soil¡¦ means the mental defilements which are capable of arising wit
aggregates.

Suppose I see an object, a desirable object. And I do not practice vipassan? toward that obj
to be beautiful. Although at that moment I may have no attachment, since I have taken it to b
can have attachment with regard to that thing in the future. That kind of attachment or menta

what is called ¡¥which is the soil to grow in¡¦.

With regard to objects we have to practice vipassan? meditation in order to see their true na
see that they are impermanent and so on. When we have seen that, when we have practice
them, then the defilements are not said to be inherent in these objects. But with regard to ob
we fail to observe by vipassan?, there is always the possibility that the defilements will arise
to those things. Defilements which can arise through not having observed objects by vipassa
¡¥having soil to grow in¡¦. Actually what the Path eradicates is not the present mental defilem
past mental defilements, not the future mental defilements, but it is something like future. Th
liability in our continuity. When there are conditions, defilements can arise. That liability is wh
eradicated by the Path consciousness. That liability is called here ¡¥those having soil to grow
means in my continuity of consciousness they can arise. They have my continuity as a soil t
I have taken that object to be beautiful, to be permanent, to be pleasant, to be substantial or
have taken this thing to be permanent and so on, then at any time the defilement can arise.
which can occur through not being observed by vipassan? are what are called ¡¥those that h
in¡¦. It has obtained or it has got my continuity to grow in, to arise in.

¡§And that is not meant objectively.¡¨ That means having the soil to grow in. ¡¥Having the so
the soil not as an object, but as a place to grow in, as a base. That is also important becaus
is by way of taking an object that it has got the soil, then it can mean, say, there is an Araha
be beautiful. A man saw the Arahant and he had sexual desires for that Arahant. He wanted
his wife or something like that. And so even with regard to the body of an Arahant, mental de
arise in other persons by taking the body of an Arahant as an object. If we mean that ¡¥havin
means having the soil as an object, then it will mean that an Arahant can eradicate the ment
another person. Because that person has taken the Arahant as an object and then he has a
mind. So ¡¥having the soil¡¦ does not mean having soil taken as an object. ¡¥Having the soil
got somewhere or some place to grow in or grow out of. ¡§Like those that arose in the rich m
respect to the aggregates in Mah?-Kacc?na¡¨ - he had wrong desires for Venerable Mah?-K
brahman student Nanda with respect to Uppalava???¡¨ - Venerable Uppalava??? was an Ar
in love with her. One day when she came back from the sun, he raped the nun. So ¡¥having
having soil taken as an object. It is by way of having a place or having a base. If we say the
which has the soil to grow in by way of taking object, then we mean the defilement in anothe
Nobody, even the Buddha, can eradicate defilement in another person. I can eradicate defile
but not the defilements in another person¡¦s mind. So it is to be understood as ¡¥having soil¡
soil not as an object, not as being taken as an object. It is having it as its location or somethi
that.

¡§And if that were what is called ¡¥arisen by having soil [to grow in]¡¦ no one could abandon

becoming because it would be unabandonable.¡¨ That means because it belongs to another
by having soil [to grow in]¡¦ should be understood [subjectively] with respect to the basis [for
oneself].¡¨ That means they should be understood as having the place to live or to exist. ¡§F
defilements that are the root of the round are inherent in [one¡¦s own] aggregates not fully ur
insight.¡¨ If we do not practice vipassan? towards things, then we do not fully understand the
¡¥Fully understand¡¦ means seeing their arising and disappearing, their characteristics, and
to get rid of mental defilements with regard to them. ¡§For the defilements that are the root o
inherent in [one¡¦s own] aggregates not fully understood by insight from the instant those ag
And that is what should be understood as ¡¥arisen by having soil [to grow in]¡¦, in the sense
unabandoned.¡¨

In brief what the Path abandons or eliminates is the mental defilements which would arise w
conditions, which would arise because one has not seen them correctly, one has not fully ur
liability is what the Path consciousness eradicates and not the real mental defilements arisin
That is because when there are mental defilements, there can be no Path consciousness ar
consciousness, there can be no mental defilements. I think if you understand this, the other
difficult.

Then the author gives another set of four kinds of uppanna. Paragraph 89 ¡§Besides these t
ways of classing ¡¥arisen¡¦, namely, (5) arisen as happening, (6) arisen with apprehension o
arisen through non-suppression, (8) arisen through non-abolition.¡¨

¡§Herein, ¡¥arisen as happening¡¦ is the same as (1) ¡¥arisen as actually occurring¡¦.¡¨ That
rightly in existence lasting for three moments.

¡§When an object has at some previous time come into focus in the eye, etc., and defilemen
but arose in full force later on simply because the object had been apprehended (That mean
permanent and so on.), then that defilement is called ¡¥arisen with apprehension of an objec
defilement that arose in the Elder Mah?-Tissa after seeing the form of a person of the oppos
wandering for alms in the village of Kaly?ne.¡¨ (It is Kaly?ne, not Kaly?na.) Before there was
in the Elder Mah?-Tissa. Then he saw a person of the opposite sex and then the defilement

¡§As long as a defilement is not suppressed by either serenity or insight, though it may not h
entered the conscious continuity, it is nevertheless called ¡¥arisen through non-suppression
it has not really arisen, but it is called ¡¥arisen¡¦ because it has not been suppressed.

¡§Because there is no cause to prevent its arising [if suitable conditions combine]. But even
suppressed by serenity or insight, they are still called ¡¥arisen through non-abolition becaus

for their arising has not been transcended unless they have been cut off by the Path.¡¨ That
have not been cut off or abandoned by the Path consciousness. They are called ¡¥arisen th
non-abolition¡¦. Abolition and suppression are different here. ¡¥Suppression¡¦ means keepin
some time. ¡¥Abolition¡¦ means eradicating all together.

¡§Like the Elder who had obtained the eight attainments and the defilements that arose in hi
going through the air on his hearing the sound of a woman singing with a sweet voice as sh
flowers in a grove of blossoming trees.¡¨ He had obtained the eight attainments. That means
the mental defilements by the eight attainments. The defilements arose in him while as he w
the air. He was going through the air and he heard a woman singing as she was plucking flo
arose in him. Such defilements are called ¡¥those arisen through non-abolition¡¦. Because th
abolished, because they are not eradicated, they may arise when there are conditions. So th
kinds.

¡§And the three kinds, namely, (6) arisen with apprehension of an object, (7) arisen through
and (8) arisen through non-abolition, should be understood as included by arisen by having
in].¡¨ The fourth of the first list corresponds to three of the second list.

¡§So as regards the kinds of ¡¥arisen¡¦ stated, the four kinds, namely, (1) as actually occurri
and gone, (3) by opportunity made, and (5) as happening, cannot be abandoned by any [of
knowledge because they cannot be eliminated by the Paths. But the four kinds of ¡¥arisen¡¦,
having soil [to grow in], (6) with apprehension of an object, (7) through non-suppression, an
non-abolition, can all be abandoned because a given mundane or supramundane knowled
nullifies a given one of these modes of being arisen.¡¨ When we say that the Path abandons
second four. ¡¥The second four¡¦ here means one of the first and three of the second list - s
soil¡¦, ¡¥with apprehension of an object through non-suppression and non-abolition¡¦. So wh
eradicates is the inherent tendencies or the latent tendencies, not the ones that have arisen
consciousness. When they are in the consciousness, we cannot eradicate them simply beca
That is why in the Suttas, especially in the Commentaries, it is said ¡¥anup?d? nirodha¡¦.

That means non-arising in the future. It is called ¡¥cessation¡¦, so cessation of mental defile
non-arising of them in the future. The mental defilements arise and disappear by themselve
anything about them. They arise and disappear.
¡¥The cessation of mental defilements¡¦ really means not letting them arise again. Non-arisi
is what is called ¡¥the cessation of mental defilements¡¦. Here also when there is Path, it has
render them inactive or to render them unable to arise.

Now we have the four functions in a single moment. It is said that the Path does the four fun

simultaneously. What are the four? ¡§Now at the time of penetrating to the Truths each one
Knowledges is said to exercise four functions in a single moment. These are full understand
Noble Truth), abandoning (the Second Noble Truth), realizing (the Third Noble Truth), and d
Fourth Noble Truth).¡¨ At one moment the Path consciousness or the Path Knowledge exerc
functions, not one by one, but simultaneously these four functions are done.

Then the simile of a lamp is given here. In paragraph 95 ¡§another method: as the sun, whe
four functions simultaneously¡¨ and so on is another simile. Then ¡§Another method: as a bo
functions¡¨ is another simile. These similes are given to illustrate the four functions done by
consciousness simultaneously.

Paragraph 97 ¡§So when his Knowledge occurs with the four functions in a single moment a
penetrating the Four Truths, then the Four Truths have a single penetration in the sense of t
in sixteen ways.¡¨ There are sixteen ways or sixteen meanings mentioned here, four for eac

¡§How is there single penetration of the Four Truths in the sense of trueness? There is a sin
of the Four Truths in the sense of trueness in sixteen aspects: suffering has the meaning of
meaning of being formed, meaning of burning (torment), meaning of change, as its meaning
are the four meanings of the First Noble Truth. Then the four meanings of the Second Noble
¡§meaning of accumulation, meaning of source, meaning of bondage, meaning of impedime
of the third are: ¡§meaning of escape, meaning of seclusion, meaning of not being formed, m
deathless.¡¨ The meanings of the Fourth Noble Truth are ¡§meaning of outlet, meaning of ca
seeing, meaning of dominance.¡¨ These are called ¡¥the sixteen ways of the Four Noble Tru

Paragraph 98 raises a question. ¡§Here it may be asked: since there are other meanings of
too, such as a disease, a tumor, etc., why then are only four mentioned for each?¡¨ Now if yo
chapter 20, paragraph 18, you will find that there are forty ways of looking at things as imper
on. So the First Noble Truth has more than four meanings. It has other meanings like a dise
on. So why are they not taken and only these four are taken? ¡§We answer that in this conte
what is evident through seeing the other [three Truths in each case].¡¨

¡§Firstly in the passage beginning ¡¥Herein, what is knowledge of suffering? It is the underst
of understanding..that arises contingent upon suffering as its object [individually]. But in the
beginning ¡¥Bhikkhus, he who sees suffering sees also its origin¡¦ it is presented as accomp
function with respect to the other three Truths simultaneously with its making one of them its
sometimes it is described as seeing one each, one at a time, but in other passages the seei
occurring at the same time, seeing the four at the same time.

¡§As regards these [two contexts], when, firstly, knowledge makes each Truth its object sing
Say?daw purposefully omitted ¡¥when suffering is made the object¡¦.) suffering has the char
oppressing as its individual essence¡¨ and so on. In these paragraphs we should strike out t
brackets. It is inserted by the translator and it is not warranted by the Sub-Commentary. Par
after ¡¥likewise¡¦ those things in brackets should be removed. ¡¥[When suffering is made the
be removed. If suffering is made the object, then the only thing it will see is the first meaning
and not the others. What the author is explaining here is that when you see the Second Nob
Truth of origin, the sense of being formed of the First Noble Truth becomes evident. When y
Truth, then seeing the First Truth becomes evident. When you see the Third Noble Truth, ar
First Noble Truth becomes evident. Wen you see the Fourth Noble Truth, yet another meani
Truth becomes evident. That is why these four are mentioned here. So when you see the Fi
meaning of oppression is evident. When you see the Second Noble Truth, the meaning of b
First Noble Truth becomes evident. When you see the Third Noble Truth, the meaning of bu
the First Noble Truth becomes evident. When you see the Fourth Noble Truth, the meaning
Truth, that is change, becomes evident. That is why these four meanings are given. By seei
and also by seeing the other Truths, the meanings of the given Truth becomes evident. The
this meaning. So we do not need ¡¥[when Suffering is made the object]¡¦, ¡¥[when Origin is
¡¥[when Cessation is made the object]¡¦, ¡¥[when Path is made the object]¡¦.

Then in paragraph 99 an example is given. ¡§As the Beauty¡¦s (Sundari¡¦s) ugliness did to th
through seeing the celestial nymphs.¡¨ Sundari was said to be very beautiful, maybe like a b
was very beautiful. And so Nanda was very much in love with her. But the Buddha wanted to
So Buddha took him to the celestial world and showed him the celestial nymphs. After seein
nymphs, Nanda was asked ¡§Who is more beautiful the celestial nymphs or Sundari?¡¨ Ther
is like a she-monkey we saw on our way here.¡¨ After the sight of the nymphs Sundari seem
ugly. Sundari was a beautiful woman. Here also ¡§the cooling Path removes the burning of t
so Suffering¡¦s sense of burning becomes evident through seeing the Path.¡¨ When you see
burning becomes evident.

OK. That should be the end of it.

S?dhu! S?dhu! S?dhu!

(Tape 46 / Ps: 47 ¡V 103)

Paragraph 47 ¡§ 4. The kinds of states that ought to be abandoned, 5. also the act of their a
which kinds of states these four Paths abandon and the act of abandoning. ¡§Now which sta
abandoned by which kinds of knowledge among these four should be understood, and also
them.¡¨

¡§For they each and severally bring about the abandoning of the states called fetters¡¨ and s
severally¡¦ is not a correct translation. The P??i is yathayoga?. It means ¡¥as is proper¡¦ or ¡
may be¡¦. That means each of them abandon defilements and others differently. ¡§For as is
about the abandoning of the states called fetters, defilements, wrongnesses, worldly states,
perversions, ties, bad ways, cankers, floods, bonds, hindrances, adherences, clingings, inhe
stains, unprofitable courses of action, and unprofitable thought arisings.¡¨ The mental defiler
different names. All of them are mental defilements.

The first one is fetters. ¡§Herein, the fetters are the ten states beginning with greed for the fi
so called because they fetter aggregates [in this life] to aggregates [of the next], (they fetter)
its fruit or (they fetter) beings to suffering.¡¨ That is why they are called ¡¥fetters¡¦. They are l
ropes.

¡§For as long as the ones exist there is no cessation of the others.¡¨ As long as there are fet
no cessation of aggregates, no cessation of kamma, no cessation of fruit, and no cessation
suffering. They are called ¡¥fetters¡¦.¡¨

¡§And of these fetters, greed for the fine material, greed for the immaterial, conceit, agitation
ignorance, are called the ¡¥five higher fetters¡¦ because they fetter beings to aggregates, etc
the higher [forms of becoming], while false view of individuality, uncertainty, adherence to rit
rituals, greed for sense desires, and resentment, are called the ¡¥five lower fetters¡¦ because
beings to aggregates, etc., produced in the lower states of existence. The other five fetter be
higher forms of existence. There are higher and lower fetters. All together there are ten. Whi
abandoned by which Path will be explained later. Right now the author is giving the lists of th
first is the ten fetters.

The second group is the ten defilements. ¡§The defilements are the ten states, namely, gree
conceit, [false] view, uncertainty, stiffness [of mind], agitation, consciencelessness, shamele
ten are called ¡¥defilements¡¦. ¡§They are so called because they are themselves defiled and
defile the states associated with them.¡¨ They are themselves impurities and they make othe
they are called ¡¥defilements¡¦. In P??i they are called ¡¥kilesas¡¦.

¡§The wrongnesses are the eight states, namely, wrong view, wrong thinking, wrong speech
opposite of the Noble Eightfold Path.) wrong action, wrong livelihood, wrong effort, wrong m
concentration which with wrong knowledge and wrong deliverance come to ten.¡¨ That mean
and wrong deliverance they are ten.

Footnote 14 ¡§ ¡¥Wrong knowledge¡¦, which is wrong because it does not occur rightly [i.e. i
truth], and is wrong and mistaken owing to misinterpretations, etc., is just delusion. ¡¥Wrong
is the wrong notion of liberation that assumes liberation to take place in a ¡¥World Apex¡¦.¡¨ I
that when a being reaches the highest existence, there will be liberation. That is called ¡¥wro
liberation¡¦. There are eight wrongnesses or there can be ten wrongnesses. When we take t
wrong knowledge and wrong deliverance.

The next one is the worldly states. They are the states which people meet or experience in t
There are said to be eight of these states, namely, gain, loss, fame, disgrace, pleasure, pain
praise. The P??i words used for gain and loss are l?bha and al?bha. ¡¥Al?bha¡¦ means non-
For fame the word used is ¡¥yasa¡¦ and for disgrace the word used is ¡¥ayasa¡¦. The word ¡¥
things. One is fame and the other is followers. We interpret this here not as fame, but to hav
to have students or pupils. For disgrace we say to be alone, not to be with followers or havin
We do not say ¡¥fame and disgrace¡¦ because they are the same as the last two, praise and
interpretation is that instead of fame it is having friends, or followers, or having students. Ins
disgrace we say not having many followers. Pleasure, pain, blame, praise - these eight are t
life and nobody can escape them. ¡§They are so called because they continually succeed ea
the world persists.¡¨ At times there is gain and at other times there is loss and so on. Someti
what you want and sometimes you don¡¦t get what you want or you lose what you have.

¡§But when the worldly states are included, then by the metaphorical use of the cause¡¦s na
the approval that has the gain, etc., as its object and the resentment that has the loss, etc., a
should also be understood as included.¡¨ Here the translation is a little different than the orig
said in the original is that by the metaphorical use of the causes named for its fruit the appro
resentment are to be understood as meant by worldly states. When we say ¡¥worldly states¡
and so on, but here we do not mean gain, loss, etc., but approval or resentment or our react
conditions. These are the eight conditions of life. When we have gain, then we have approva
are attached to gain. When we have loss, we have aversion. That approval and resentment
aversion are what are meant by these worldly states, not just the gain, loss, etc. The approv
resentment is taken to be meant by worldly states by the metaphorical use of the causes na
That means the name is really the cause¡¦s name, but we must take the fruit of it.

There is gain. Because there is gain there is approval. That means there is attachment. Atta
by gain. When we say ¡¥gain¡¦, gain is the name of the cause. What we must really understa
that cause. It is like saying sugar is diabetes.

¡§The kinds of avarice are the five, namely, avarice about dwellings, families, gain, Dhamma
which occur as in ability to bear sharing with others any of these things beginning with dwell

Pa4l0I word for the kinds of avarice is macchariya. Macchariya is one of the mental factors.
really means inability to bear sharing with others. I have this thing and I don¡¦t want to share
persons. If other persons come and make use of it, I am angry. That is what is meant by ava
not just stinginess. We have two mental factors issa and macchariya. Avarice here is not sti
stinginess is lobha. It is attachment. This mental factor is accompanied by dosa. It is intolera
things with others. There are five, namely, dwellings, families, gain, Dhamma and praise. So
want people to come to our place and live with us. That is avarice with regard to dwelling. ¡¥
meaning for monks, not particularly for lay people. Monks always depend upon lay people fo
we may have attachment. Let us say that he is my supporter. So I do not want other monks
my supporter¡¦s family. It is something like that. Gain is what one gets. Dhamma - that mean
meditation and you may have some results and you don¡¦t want those results to happen to o
other persons get the same results, you are not happy. And then the last one is called ¡¥pra
word is ¡¥va??a¡¦. That is interpreted to mean two things. One is appearance or you may sa
other is praise. Let us say you have a beautiful face. Then you don¡¦t want other people to h
face. It is something like that. So ¡¥va??a¡¦ can mean both beauty or appearance and praise

¡§The perversions are the three, namely, perversion of perception, of consciousness, and of
apprehending objects that are impermanent, painful, not self, and foul, as permanent, pleasa
beautiful.¡¨ If we take things as permanent, as pleasant, as self, and as beautiful, it is one of
of perversions. There are three - perversion of perception, perversion of consciousness and
view.

¡§The ties are the four beginning with covetousness, so called because they tie the mental b
material body. They are described as ¡¥the bodily tie of covetousness¡¦, ¡¥the bodily tie of ill
bodily tie of adherence to rites and rituals¡¦, and ¡¥the bodily tie of insisting or misinterpreting
¡§this [only] is the truth¡¨.¡¦ This alone is true and others are false. It is something like that. T
called ¡¥tie¡¦ here. There are four ties.

¡§Bad ways is a term for doing what ought not to be done and not doing what ought to be do
(desire), hate, delusion, and fear.¡¨ The P??i word is ¡¥agati¡¦. It is actually bias. So we shou
attachment or out of desire, not zeal. If I am attached to someone, then I may have a favora
him. I am not just towards other people. That is what is called here ¡¥bad ways¡¦. Sometimes
and so we do not act justly towards him. Sometimes we are afraid. If we do this, a person wi
back to me. So we are afraid of him. So we may practice favoritism towards him. Sometimes
delusion. Because I am ignorant I favor one over the other. These are called ¡¥bad ways¡¦.

¡§Cankers (?savas): as far as change of lineage [in the case of states of consciousness] and
acme of becoming [in the case of the kinds of becoming (Here ¡¥becoming¡¦ means realms o

is to say, the fourth immaterial state,] there are exudations owing to the [formed nature of th
The real meaning here is that these cankers exude or drip like pus or something dripping fro
word is ¡¥?sava¡¦. ¡¥?¡¦ means ¡¥as far as¡¦ and ¡¥sava¡¦ means ¡¥to drip¡¦ or ¡¥exude¡¦. Her
should be understood as taking as an object. ¡¥Exude¡¦ actually means these take somethin
exude as far as change of lineage, as far as the highest existence or highest realm. These c
Lobha, di??hi (wrong view), moha (ignorance). These can take objects up to change of linea
they can take the highest realm as object. It is to be understood by way of taking object. ¡¥T
means they take them as object.

There is a footnote. I don¡¦t think he really understood what he was referring to here. ¡¥As fa
don¡¦t know whether it can be explained in English. The P??i word ¡¥?¡¦, here translated as
mean two things. Let us say one is as far as change of lineage. It may mean as far as chang
excluding change of lineage. It just reaches up to that dhamma. Sometimes it may mean ¡¥i
two meanings for the P??i word ¡¥?¡¦ or ¡¥as far as¡¦. That means for example the fields exte
mountain. They stop when there is a mountain. The fields do not include the mountain. Whe
Buddha¡¦s fame goes as far as the highest realm, that is including the highest realm. Here in
So ¡¥as far as change of lineage¡¦ means up to change of lineage. ¡¥As far as the acme of b
far as the highest realm¡¦ means including the highest realm. I think you say ¡¥through¡¦ or s
that. Right? So ¡¥Monday through Friday¡¦ means Monday and the rest including Friday.

¡§This is a term for greed for sense desires, greed for becoming, wrong view, and ignorance
exuding [of these defilements] from unguarded sense doors like water from cracks in a pot i
constant trickling, or because of their producing the suffering of the round of rebirths.¡¨

The next one is the floods. It is the same thing. They are called ¡¥floods¡¦ ¡§in the sense of s
into the ocean of becoming, and in the sense of being hard to cross.¡¨

¡§The bonds are so called because they do not allow disengagement from an object and dis
suffering. Both ¡¥floods¡¦ and ¡¥bonds¡¦ are terms for the cankers already mentioned.¡¨ The
sometimes called ¡¥cankers¡¦, sometimes ¡¥floods¡¦, sometimes called ¡¥bonds¡¦.

¡§The hindrances are the five, namely, lust, [ill will, stiffness and torpor, agitation and worry,
uncertainty,] in the sense of obstructing and hindering and concealing [reality] from consciou
are the five hindrances that we often encounter during meditation.

¡§Adherence (misapprehension - par?m?sa) is a term for wrong view, because it occurs in t
the individual essence of a given state (That means going beyond the individual essence of
apprehending elsewise an unactual individual essence.¡¨ That means taking something wro

The clingings are the up?d?nas. ¡§The clingings are the four beginning with the sense desir
described in all their aspects in the description of Dependent Origination.¡¨

¡§The inherent tendencies are the seven, namely, greed for sense desire, etc., in the sense
stated thus: the inherent tendency to greed for sense desires, the inherent tendency to rese
[false] view, uncertainty, greed for becoming, and ignorance.¡¨ There are seven all together.
owing to their inveteracy that they are called inherent tendencies since they inhere as cause
of greed for sense desires, etc., again and again.¡¨ ¡¥Inherent tendencies¡¦ really means sev
defilements. However when they are called ¡¥inherent tendencies¡¦, they are not the real def
are those that can arise when there are conditions for their arising. When they really arise w
¡¥defilements¡¦ or ¡¥kilesas¡¦.

I am liable to get attached to things. But right now I am teaching Dhamma and there is no at
mind. I am free from attachment now. But if I see something which I like and I am attached t
attachment arises. There is a liability of attachment to arise in me. That is what is called ¡¥an
tendency¡¦. When attachment really arises, it is defilement. Before reaching the stage of defi
are called ¡¥latent tendencies¡¦ or ¡¥inherent tendencies¡¦. It is like being under the surface.
surfaces, it is called ¡¥defilement¡¦. When it lies dormant underneath, it is called ¡¥anusaya (
tendencies)¡¦. There are seven. We will talk more about them later.

¡§The stains are the three, namely, greed, hate, and delusion. They are so called because t
dirty like oil, black, and mud, and because they dirty other things.¡¨

¡§The unprofitable courses of action are the ten, namely, killing living things, taking what is
sexual misconduct; false speech, malicious speech, harsh speech, gossip; covetousness, ill
view. They are so called since they are both unprofitable action [kamma] and courses that le
destinies (unhappy rebirths).¡¨

¡§The unprofitable thought arisings are the twelve consisting of the eight rooted in greed, the
hate, and the two rooted in delusion.¡¨ They are, the twelve unwholesome types of consciou
¡¥cittupp?da¡¦ is translated here as thought arisings. Actually they are types of consciousnes
twelve types of unwholesome consciousness.

¡§So these [four kinds of knowledge] each and severally (or as is proper) abandon these sta
the fetters. How?¡¨

¡§The five states eliminated by the first knowledge in the case of the fetters, firstly, are: false

personality, doubt, adherence to rites and rituals, and then greed for sense desires and rese
[strong enough] to lead to states of loss.¡¨ With regard to defilements or these unwholesome
two or three layers. There are some defilements that are strong enough to lead to rebirth in
There are some defilements that are not strong enough to lead to rebirth in woeful states, bu
defilements..

The first Knowledge or the first Path eliminates false views of personality, doubt, adherence
rituals, and then greed for sense desires and resentment that are strong enough to lead to s
first Path eradicates false view of personality, doubt, and adherence to rites and rituals all to
and for all. Greed for sense desires and resentment it cannot eradicate all together, but it de
stronger forms of sense desire and resentment which lead to states of loss. That means whi
woeful states. That means a being after becoming a Sot?panna may still have lobha and do
eradicates di??hi (wrong view) and vicikicch? (doubt). There are other mental defilements re
mental defilements are not strong enough to give rebirth in the four woeful states.

¡§The remaining gross greed for sense desires and resentment are eliminated by the secon
greed for sense desires and resentment are eliminated by the third Knowledge. The five beg
for the fine material are only [actually] eliminated by the fourth Knowledge.¡¨ We have to und
eradication of defilements in this manner. The first Path eliminates the ability of some menta
to lead us to the four woeful states.

Then there is a note. ¡§In what follows, we shall not in every instance specify the fact with th
¡¥only¡¦, nevertheless whatever we shall say is eliminated by one of the [three] higher Know
understood as only the [residual] state eliminated by the higher Knowledge; for that state wil
been rendered not conducive to states of loss by the preceding Knowledge.¡¨ Do you unders

Student: No.

Teacher: ¡§In what follows, we shall not in every instance specify the fact with the expressio
You see the word ¡¥only¡¦ in the paragraph above. ¡§The five beginning with greed for the fi
ONLY eliminated by the fourth Knowledge.¡¨ If the author says ¡¥only¡¦, we have to understa
the author does not use the word ¡¥only¡¦, we have to understand in another way. That is wh
translation is not so understandable.

Let us look at the next one. ¡§In the case of the defilements, [false] view and uncertainty are
the first Knowledge.¡¨ They are eliminated totally. ¡§Hate is eliminated by the third Knowledg
Greed, delusion, conceit, mental stiffness, agitation, consciencelessness, and shamelessne
by the fourth Knowledge.¡¨ Here it doesn¡¦t say ¡¥fourth knowledge only¡¦. Right? There is no

We have to understand that greed, delusion, conceit and others are eliminated by the prece
elimination of the preceding Paths is of the stronger forms of greed, delusion and so on. Wh
Knowledge eliminates is the subtle forms of greed, delusion and so on. The grosser forms o
and so on are eradicated by the first Path, by the second Path and by the third Path. There i
here. They are eliminated by the fourth Knowledge and it does not say that they are only eli
fourth Knowledge. We have to understand in this way.

¡§In the case of wrongness, wrong view, false speech, wrong action, wrong livelihood are el
first Knowledge. Wrong thinking, malicious speech, and harsh speech are eliminated by the
The third Knowledge is the An?g?m? (the Non-Returner). Right? The An?g?m? can eradica
the grosser forms of attachment. ¡§Wrong thinking, malicious speech, and harsh speech, ar
third Knowledge. And here only volition is to be understood as speech.¡¨ Although the word
we must understand it to mean volition. ¡§Gossip, wrong effort, wrong mindfulness, wrong c
deliverance, and wrong knowledge, are eliminated by the fourth Knowledge.¡¨ Here also sin
¡¥only¡¦, we must understand that the stronger ones are destroyed by the previous Knowled
Paths.

¡§In the case of the worldly states, resentment is eliminated by the third Knowledge, and ap
eliminated by the fourth Knowledge. Some say that approval of fame and praise is eliminate
Knowledge.¡¨ He didn¡¦t say whether it is to be accepted or not. Maybe the author doesn¡¦t li
just gives it as information.

¡§The kinds of avarice are eliminated by the first Knowledge only.¡¨ The five kinds of avarice
by the first Knowledge.

¡§In the case of perversions, the perversion of perception, consciousness and view, which fi
the impermanent and self in the not-self, and the perversion of view finding pleasure in pain
the foul, are eliminated by the first Knowledge. The perversions of perception and conscious
beauty in the foul are eliminated by the third Path. The perversions of perception and consci
pleasure in the painful are eliminated by the fourth Knowledge.¡¨

¡§In the case of ties, the bodily ties of adherence to rites and rituals and of the insistence
(misinterpretation) that ¡¥This is the truth¡¦, are eliminated by the first Knowledge (because t
wrong views). The bodily tie of ill will is eliminated by the third Knowledge. The remaining on
by the fourth Path.¡¨

¡§The bad ways are eliminated by the first knowledge only.¡¨ When a person becomes a So
practice favoritism.

¡§In the case of the cankers, the cankers of view is eliminated by the first Knowledge (becau
view). The canker of sense desire is eliminated by the third Knowledge. The other two are e
fourth Knowledge.¡¨

¡§The same thing applies in the case of the floods and the bonds.¡¨

¡§In the case of the hindrances, the hindrances of uncertainty is eliminated by the first Know
it is doubt). The three, namely, lust, ill will and worry, are eliminated by the third Knowledge.
means desire for sensual things. ¡§Stiffness and torpor and agitation are eliminated by the fo
Knowledge.¡¨

¡§Adherence is eliminated by the first Knowledge.¡¨ ¡¥Adherence¡¦ just means wrong view. V
eliminated by the first Knowledge.

¡§In the case of the clingings (up?d?na), since according to what is given in the Texts all wo
sense desires.¡¨ That means objects of sense desires. I would like to put ¡§all worldly states
sense desires¡¨, not ¡¥sense desires as object¡¦. ¡§All worldly states are objects of sense de
greed both for the fine material and the immaterial falls under sense desire clinging.¡¨ You re
clingings. Right? Sense desire clinging, wrong view clinging, and the others are also wrong
word ¡¥sense desire¡¦ is used here in P??i k?mup?d?na, we must understand that sense de
material and the immaterial states are taken as sense desire here because they are lobha o
here ¡¥sense desire clinging¡¦ just means attachment (lobha).

¡§In the case of the inherent tendencies, the inherent tendencies to [false] view and to uncer
eliminated by the first Knowledge. The inherent tendencies to greed for sense desire and to
eliminated by the third Knowledge. The inherent tendencies to conceit (pride), to greed for b
ignorance are eliminated by the fourth Knowledge.¡¨

¡§In the case of the stains, the stain of hate is eliminated by the third Knowledge, the others
by the fourth Knowledge.¡¨

¡§In the case of the unprofitable courses of action, killing living things, taking what is not give
misconduct, false speech, and wrong view, are eliminated by the first Knowledge. The three
speech, harsh speech, and ill will, are eliminated by the third Knowledge. Gossip and coveto
eliminated by the fourth Knowledge.¡¨

¡§In the case of the unprofitable thought arisings, the four associated with [false] view, and t

with uncertainty, making five, are eliminated by the first Knowledge. The two associated with
eliminated by the third Knowledge. The rest are eliminated by the fourth Knowledge.¡¨

Do you find mention of the second Knowledge? No. Right? Why? Did you ever wonder? The
not eliminate any mental defilements all together. It makes the remaining mental defilements
is why it is not mentioned here.

For your knowledge or information the first Knowledge or Path eliminates what? Wrong view
second Knowledge eliminates what?

Student: It just weakens the defilements

Teacher: It does not eliminate mental defilements, but it weakens the mental defilements. Th
eliminates what? Attachment for sensual things, the k?m?vacara and aversion (dosa) or ill w
fourth Knowledge eradicates the remaining mental defilements.

Now we come to an interesting discussion. ¡§And what is eliminated by any one of them is a
is why it was said above ¡¥So these [four kinds of Knowledge] as is proper abandon these s
the fetters¡¦.¡¨

¡§The act of abandoning: but how then? Do these {Knowledges] abandon these states when
they are future, or when they are present?¡¨ It¡¦s very interesting. We say that Path Knowled
mental defilements. The question here is do these Knowledges abandon these states (¡¥The
defilements.) when they are past, or when they are future, or when they are present. In P??i
past, future and present. ¡§What is the position here? For firstly if [they are said to abandon]
future, it follows that the effort is fruitless.¡¨ That is because the past is already past and you
have to do anything about it. It has already gone. And the future has not come. So you cann
about it either. So there is no question about the Path Knowledges abandoning the past defi
future defilements. But what about the present ones? Does the Path eliminate the present m
the mental defilements that are existent at the moment? No. That is because if they are pres
no Path at all. Path and mental defilements do not arise together. Then the Path eradicates

¡§Then if it is when they are present, it is likewise fruitless because the things to be abandon
simultaneously with the effort, and it follows that there is development of a Path that has def
follows that defilements are dissociated [from consciousness] though there is no such thing
defilement dissociated from consciousness.¡¨ There are three things here. If you say that the
abandoned when they are present it is fruitless because the things to be abandoned exist si
the effort. That means the things to be abandoned would arise simultaneously with the effort

here is Path consciousness. ¡§It follows that there is development of Path (That means arisi
has defilement.¡¨ If you say that the present defilements are eliminated, then that amounts to
and defilements arise together. No defilements can arise with Path. Defilements are unwhole
and Path is a wholesome mental state. Unwholesome mental states and wholesome mental
the same time. ¡§It follows that defilements are dissociated.¡¨ Then you may say at the mom
are no defilements. The Path eradicates the defilements. If you say this, then it amounts to s
defilements can arise without consciousness. That is not so. Defilements are mental factors
factors they can only arise when there is consciousness. They are never dissociated from co
you say at the Path moment defilements are eliminated, then you are saying that they can b
consciousness. Path consciousness does not eradicate the past defilements, nor the future
present defilements. If there are defilements in the mind, there can be no Path at all. It eradi

¡§That is not an original argument.¡¨ Here ¡¥original¡¦ means this argument or this discussion
to this book only. This discussion has appeared already in other books. ¡§For in the Texts fir
is put.¡¨ He quotes the Texts. The Texts are the same as what we have said. Magga eradica
nor the future, nor the present defilements.

Then what does it eradicate? What does it abandon? Go to paragraph 80. ¡§What does that
abandoning of defilements that have soil [to grow in].¡¨ It is difficult here, the use of the P??i
¡¥bh|mi???¡¦. ¡§But are defilements that have soil [to grow in] past, future or present?¡¨ Are t
defilements that have soil to grow in past, future, or present? The answer is: ¡§They are sim
described as arisen by having soil [to grow in].¡¨ They are just that. We cannot say that they
that they are future, or that they are past. They are just those that have arisen by having soil

¡§Now there are various meanings of ¡¥arisen¡¦, that is to say, (1) arisen as ¡¥actually occur
on.

Student: Is this close to saying they are empty?

Teacher: No. We will explain later. Then the Commentator brings in four kinds of what are ca
The P??i word is ¡¥uppanna¡¦. On the handout I gave you the P??i word also. There are fou
(that which has arisen). There are four things which are called ¡¥uppanna¡¦ in P??i. The wor
means that which has arisen.

The first meaning is arisen as actually occurring. That means all that is reckoned to possess
moments of arising, aging and dissolution. That means it is the real present things. Because
something is present, we mean that it possesses the three stages of arising, staying and dis
arising, aging and dissolution. Thus it is the real present. This real present is sometimes call

(that which has arisen)¡¦.

The next one is ¡¥arisen as being and gone¡¦. That means they have arisen and now they ar
arisen and gone. They are also called ¡¥arisen¡¦. There are two of them. Wholesome and un
(cittas and cetasikas) which have experienced the stimulus of an object (That means which
object.) and disappeared. They are also called ¡¥arisen as been and gone¡¦. Here ¡¥been¡¦ r
¡¥experienced¡¦. The second is anything conditioned that has reached the three moments be
and has ceased. Something conditioned which has come into being and then disappeared is
called ¡¥arisen¡¦. It is having been and gone.

The third is arisen by opportunity made. Past kamma is called ¡¥arisen by opportunity made
past. Although it is past, it is called ¡¥arisen¡¦. That means it is still with us or something like
Because it has stood (That is the direct translation), it has existed inhibiting the result of othe
has made opportunity for its own result to arise in the future. When there is kamma and then
leaves something like a potential in the continuity of beings to give results in the future. Whe
opportunity for its results to arise in the future, it inhibits the results of other kammas. The se
future result. The future result is also called ¡¥uppanna¡¦. Although it has not yet arisen, it is
¡¥arisen¡¦. That is because when opportunity to arise is made, it is sure to arise in the future
is accumulated, when kamma is done, then the fruit is sure to arise. The future result can be
¡¥arisen¡¦, although in fact it has not yet arisen.

The fourth one is arisen by having soil to grow in. We are concerned with this. Arisen by hav
in - that means unwholesome kamma which has not been eradicated with respect to any giv
¡¥soil¡¦ here? ¡¥Soil¡¦ here means the five aggregates in the three planes of becoming, which
of vipassan?, and ¡¥what has soil¡¦ means mental defilements which are capable of arising w
those aggregates. So what the Path eliminates is this kind of defilement ¡¥arisen by having s
Here ¡¥soil¡¦ means the five aggregates in the three planes of becoming. They are the objec
meditation. ¡¥What has soil¡¦ means the mental defilements which are capable of arising wit
aggregates.

Suppose I see an object, a desirable object. And I do not practice vipassan? toward that obj
to be beautiful. Although at that moment I may have no attachment, since I have taken it to b
can have attachment with regard to that thing in the future. That kind of attachment or menta
what is called ¡¥which is the soil to grow in¡¦.

With regard to objects we have to practice vipassan? meditation in order to see their true na
see that they are impermanent and so on. When we have seen that, when we have practice
them, then the defilements are not said to be inherent in these objects. But with regard to ob

we fail to observe by vipassan?, there is always the possibility that the defilements will arise
to those things. Defilements which can arise through not having observed objects by vipassa
¡¥having soil to grow in¡¦. Actually what the Path eradicates is not the present mental defilem
past mental defilements, not the future mental defilements, but it is something like future. Th
liability in our continuity. When there are conditions, defilements can arise. That liability is wh
eradicated by the Path consciousness. That liability is called here ¡¥those having soil to grow
means in my continuity of consciousness they can arise. They have my continuity as a soil t
I have taken that object to be beautiful, to be permanent, to be pleasant, to be substantial or
have taken this thing to be permanent and so on, then at any time the defilement can arise.
which can occur through not being observed by vipassan? are what are called ¡¥those that h
in¡¦. It has obtained or it has got my continuity to grow in, to arise in.

¡§And that is not meant objectively.¡¨ That means having the soil to grow in. ¡¥Having the so
the soil not as an object, but as a place to grow in, as a base. That is also important becaus
is by way of taking an object that it has got the soil, then it can mean, say, there is an Araha
be beautiful. A man saw the Arahant and he had sexual desires for that Arahant. He wanted
his wife or something like that. And so even with regard to the body of an Arahant, mental de
arise in other persons by taking the body of an Arahant as an object. If we mean that ¡¥havi
means having the soil as an object, then it will mean that an Arahant can eradicate the ment
another person. Because that person has taken the Arahant as an object and then he has a
mind. So ¡¥having the soil¡¦ does not mean having soil taken as an object. ¡¥Having the soil
got somewhere or some place to grow in or grow out of. ¡§Like those that arose in the rich m
respect to the aggregates in Mah?-Kacc?na¡¨ - he had wrong desires for Venerable Mah?-K
brahman student Nanda with respect to Uppalava???¡¨ - Venerable Uppalava??? was an Ar
in love with her. One day when she came back from the sun, he raped the nun. So ¡¥having
having soil taken as an object. It is by way of having a place or having a base. If we say the
which has the soil to grow in by way of taking object, then we mean the defilement in anothe
Nobody, even the Buddha, can eradicate defilement in another person. I can eradicate defile
but not the defilements in another person¡¦s mind. So it is to be understood as ¡¥having soil¡
soil not as an object, not as being taken as an object. It is having it as its location or somethi
that.

¡§And if that were what is called ¡¥arisen by having soil [to grow in]¡¦ no one could abandon
becoming because it would be unabandonable.¡¨ That means because it belongs to another
by having soil [to grow in]¡¦ should be understood [subjectively] with respect to the basis [for
oneself].¡¨ That means they should be understood as having the place to live or to exist. ¡§F
defilements that are the root of the round are inherent in [one¡¦s own] aggregates not fully un
insight.¡¨ If we do not practice vipassan? towards things, then we do not fully understand the

¡¥Fully understand¡¦ means seeing their arising and disappearing, their characteristics, and
to get rid of mental defilements with regard to them. ¡§For the defilements that are the root c
inherent in [one¡¦s own] aggregates not fully understood by insight from the instant those ag
And that is what should be understood as ¡¥arisen by having soil [to grow in]¡¦, in the sense
unabandoned.¡¨

In brief what the Path abandons or eliminates is the mental defilements which would arise w
conditions, which would arise because one has not seen them correctly, one has not fully ur
liability is what the Path consciousness eradicates and not the real mental defilements arisin
That is because when there are mental defilements, there can be no Path consciousness ar
consciousness, there can be no mental defilements. I think if you understand this, the other
difficult.

Then the author gives another set of four kinds of uppanna. Paragraph 89 ¡§Besides these t
ways of classing ¡¥arisen¡¦, namely, (5) arisen as happening, (6) arisen with apprehension o
arisen through non-suppression, (8) arisen through non-abolition.¡¨

¡§Herein, ¡¥arisen as happening¡¦ is the same as (1) ¡¥arisen as actually occurring¡¦.¡¨ That
rightly in existence lasting for three moments.

¡§When an object has at some previous time come into focus in the eye, etc., and defilemen
but arose in full force later on simply because the object had been apprehended (That mean
permanent and so on.), then that defilement is called ¡¥arisen with apprehension of an objec
defilement that arose in the Elder Mah?-Tissa after seeing the form of a person of the oppos
wandering for alms in the village of Kaly?ne.¡¨ (It is Kaly?ne, not Kaly?na.) Before there was
in the Elder Mah?-Tissa. Then he saw a person of the opposite sex and then the defilement

¡§As long as a defilement is not suppressed by either serenity or insight, though it may not h
entered the conscious continuity, it is nevertheless called ¡¥arisen through non-suppression
it has not really arisen, but it is called ¡¥arisen¡¦ because it has not been suppressed.

¡§Because there is no cause to prevent its arising [if suitable conditions combine]. But even
suppressed by serenity or insight, they are still called ¡¥arisen through non-abolition becaus
for their arising has not been transcended unless they have been cut off by the Path.¡¨ That
have not been cut off or abandoned by the Path consciousness. They are called ¡¥arisen th
non-abolition¡¦. Abolition and suppression are different here. ¡¥Suppression¡¦ means keepin
some time. ¡¥Abolition¡¦ means eradicating all together.

¡§Like the Elder who had obtained the eight attainments and the defilements that arose in hi
going through the air on his hearing the sound of a woman singing with a sweet voice as sh
flowers in a grove of blossoming trees.¡¨ He had obtained the eight attainments. That means
the mental defilements by the eight attainments. The defilements arose in him while as he w
the air. He was going through the air and he heard a woman singing as she was plucking flo
arose in him. Such defilements are called ¡¥those arisen through non-abolition¡¦. Because th
abolished, because they are not eradicated, they may arise when there are conditions. So th
kinds.

¡§And the three kinds, namely, (6) arisen with apprehension of an object, (7) arisen through
and (8) arisen through non-abolition, should be understood as included by arisen by having
in].¡¨ The fourth of the first list corresponds to three of the second list.

¡§So as regards the kinds of ¡¥arisen¡¦ stated, the four kinds, namely, (1) as actually occurri
and gone, (3) by opportunity made, and (5) as happening, cannot be abandoned by any [of
knowledge because they cannot be eliminated by the Paths. But the four kinds of ¡¥arisen¡¦,
having soil [to grow in], (6) with apprehension of an object, (7) through non-suppression, and
non-abolition, can all be abandoned because a given mundane or supramundane knowled
nullifies a given one of these modes of being arisen.¡¨ When we say that the Path abandons
second four. ¡¥The second four¡¦ here means one of the first and three of the second list - so
soil¡¦, ¡¥with apprehension of an object through non-suppression and non-abolition¡¦. So wh
eradicates is the inherent tendencies or the latent tendencies, not the ones that have arisen
consciousness. When they are in the consciousness, we cannot eradicate them simply beca
That is why in the Suttas, especially in the Commentaries, it is said ¡¥anup?d? nirodha¡¦.

That means non-arising in the future. It is called ¡¥cessation¡¦, so cessation of mental defile
non-arising of them in the future. The mental defilements arise and disappear by themselves
anything about them. They arise and disappear.
¡¥The cessation of mental defilements¡¦ really means not letting them arise again. Non-arisi
is what is called ¡¥the cessation of mental defilements¡¦. Here also when there is Path, it has
render them inactive or to render them unable to arise.

Now we have the four functions in a single moment. It is said that the Path does the four fun
simultaneously. What are the four? ¡§Now at the time of penetrating to the Truths each one
Knowledges is said to exercise four functions in a single moment. These are full understand
Noble Truth), abandoning (the Second Noble Truth), realizing (the Third Noble Truth), and d
Fourth Noble Truth).¡¨ At one moment the Path consciousness or the Path Knowledge exerc
functions, not one by one, but simultaneously these four functions are done.

Then the simile of a lamp is given here. In paragraph 95 ¡§another method: as the sun, whe
four functions simultaneously¡¨ and so on is another simile. Then ¡§Another method: as a bo
functions¡¨ is another simile. These similes are given to illustrate the four functions done by
consciousness simultaneously.

Paragraph 97 ¡§So when his Knowledge occurs with the four functions in a single moment a
penetrating the Four Truths, then the Four Truths have a single penetration in the sense of t
in sixteen ways.¡¨ There are sixteen ways or sixteen meanings mentioned here, four for each

¡§How is there single penetration of the Four Truths in the sense of trueness? There is a sin
of the Four Truths in the sense of trueness in sixteen aspects: suffering has the meaning of
meaning of being formed, meaning of burning (torment), meaning of change, as its meaning
are the four meanings of the First Noble Truth. Then the four meanings of the Second Noble
¡§meaning of accumulation, meaning of source, meaning of bondage, meaning of impedime
of the third are: ¡§meaning of escape, meaning of seclusion, meaning of not being formed, m
deathless.¡¨ The meanings of the Fourth Noble Truth are ¡§meaning of outlet, meaning of ca
seeing, meaning of dominance.¡¨ These are called ¡¥the sixteen ways of the Four Noble Tru

Paragraph 98 raises a question. ¡§Here it may be asked: since there are other meanings of
too, such as a disease, a tumor, etc., why then are only four mentioned for each?¡¨ Now if yo
chapter 20, paragraph 18, you will find that there are forty ways of looking at things as imper
on. So the First Noble Truth has more than four meanings. It has other meanings like a dise
on. So why are they not taken and only these four are taken? ¡§We answer that in this conte
what is evident through seeing the other [three Truths in each case].¡¨

¡§Firstly in the passage beginning ¡¥Herein, what is knowledge of suffering? It is the underst
of understanding..that arises contingent upon suffering as its object [individually]. But in the
beginning ¡¥Bhikkhus, he who sees suffering sees also its origin¡¦ it is presented as accomp
function with respect to the other three Truths simultaneously with its making one of them its
sometimes it is described as seeing one each, one at a time, but in other passages the seei
occurring at the same time, seeing the four at the same time.

¡§As regards these [two contexts], when, firstly, knowledge makes each Truth its object sing
Say?daw purposefully omitted ¡¥when suffering is made the object¡¦.) suffering has the char
oppressing as its individual essence¡¨ and so on. In these paragraphs we should strike out t
brackets. It is inserted by the translator and it is not warranted by the Sub-Commentary. Par
after ¡¥likewise¡¦ those things in brackets should be removed. ¡¥[When suffering is made the

be removed. If suffering is made the object, then the only thing it will see is the first meaning and not the others. What the author is explaining here is that when you see the Second Nob Truth of origin, the sense of being formed of the First Noble Truth becomes evident. When y Truth, then seeing the First Truth becomes evident. When you see the Third Noble Truth, ar First Noble Truth becomes evident. Wen you see the Fourth Noble Truth, yet another meani Truth becomes evident. That is why these four are mentioned here. So when you see the Fi meaning of oppression is evident. When you see the Second Noble Truth, the meaning of b First Noble Truth becomes evident. When you see the Third Noble Truth, the meaning of bu the First Noble Truth becomes evident. When you see the Fourth Noble Truth, the meaning Truth, that is change, becomes evident. That is why these four meanings are given. By seei and also by seeing the other Truths, the meanings of the given Truth becomes evident. The this meaning. So we do not need ¡¥[when Suffering is made the object]¡¦, ¡¥[when Origin is ¡¥[when Cessation is made the object]¡¦, ¡¥[when Path is made the object]¡¦.

Then in paragraph 99 an example is given. ¡§As the Beauty¡¦s (Sundari¡¦s) ugliness did to th through seeing the celestial nymphs.¡¨ Sundari was said to be very beautiful, maybe like a b was very beautiful. And so Nanda was very much in love with her. But the Buddha wanted to So Buddha took him to the celestial world and showed him the celestial nymphs. After seein nymphs, Nanda was asked ¡§Who is more beautiful the celestial nymphs or Sundari?¡¨ Ther is like a she-monkey we saw on our way here.¡¨ After the sight of the nymphs Sundari seem ugly. Sundari was a beautiful woman. Here also ¡§the cooling Path removes the burning of t so Suffering¡¦s sense of burning becomes evident through seeing the Path.¡¨ When you see burning becomes evident.

OK. That should be the end of it.

S?dhu! S?dhu! S?dhu!

Chapter 23
(Tape 47 / Ps: 1-49)

The last chapter is a description of the benefits in developing understanding. That means th
meditation.

Student: I want to note something. Most people when they come want to know what they ca
meditation. In America this should be the first chapter instead of the last chapter.

Teacher: Right. We have to wait until the end. ¡¥Developing understanding¡¦ means the prac
meditation. What benefit can you get? Removal of the various defilements, experience of th
cessation, ability to attain the attainment of cessation, and achievement of worthiness to rec
so on. There are four benefits to be derived from the practice of meditation, especially the pr
vipassan? meditation. I say ¡¥especially vipassan?¡¦ because it says developing understand

Paragraph 2 ¡§It should be understood that one of the benefits of the mundane developmen
the removal of the various defilements beginning with mistaken view of individuality. This sta
Delimitation of Mentality-Materiality.¡¨ When you get to that stage of knowledge, when you s
clearly and nothing else, then you abandon the mistaken view of individuality, the mistaken v
a person, there is an individual and so on. ¡§Then one of the benefits of the supramundane
understanding is the removal, at the Path moment, of the various defilements beginning with
That is at the Path moment, you abandon defilements or fetters all together. This is the bene
supramundane development.

¡§With dreadful thump the thunderbolt
Annihilates the rock.
The fire whipped by the driving wind
Annihilates the wood.
The radiant orb of solar flame
Annihilates the dark.
Developed understanding, too,
Annihilates inveterate
Defilements¡¦ netted overgrowth,
The source of every woe.
This blessing in this very life
A man himself may know.¡¨

So you will get this benefit in this very life.

Paragraph 3 Next is the experience of the taste of the Noble Fruit. Now after Path follows F
immediately. ¡§Not only the removal of the various defilements but also the experience of th
Noble Fruit is a benefit of the development of understanding. For it is the fruitions of Stream
the Fruits of Asceticism -, that are called the ¡¥Noble Fruit¡¦.¡¨ The Noble Fruits or the Four F
called ¡¥the Fruits of Asceticism¡¦ or ¡¥the Fruits of Monkhood¡¦. In P??i they are called ¡¥s?
There is a discourse by that name, ¡¥S?ma??aphala Sutta¡¦, in the D?gha Nik?ya (The Colle
Discourses). In that discourse the Buddha explained the benefits of being a monk, somethin
benefits. For example, he does not have to worry about his livelihood and so on. Step by ste
the benefits of the life of a monk until the Arahantship or until the person becomes an Araha
the Fruition state is called ¡¥the benefit of being a monk or an ascetic¡¦. ¡§Its taste is experie
ways, that is to say, in its occurrence in the cognitive series of the Path, and in its occurrenc
attainment of Fruition.¡¨ At the moment of enlightenment there is one thought process. So in
process there is the Path consciousness for one moment. And that Path consciousness mor
or three moments of Fruition. So ¡¥in the cognitive series of the Path¡¦ means in that first mo
enlightenment. After that the cognitive series or thought process stops and the consciousne
life-continuum. Then later on, maybe on the same day or a few days later, he wants to expe
again. Then he practices vipassan? meditation. At that time only the Fruition consciousness
consciousness although he practices vipassan? meditation. That is because his aim is not to
his aim is for Fruition consciousness to arise in him for some period of time. So the taste of F
twofold - first at the moment of enlightenment, later on when he enters into Fruition attainme
enters into Fruition attainment, then this Fruition consciousness arises in his mind, say millio
without any interruption. So he is like in jh?na state. When a person is in jh?na, he doesn¡¦t
thing. The functions of the five senses are temporarily suspended when he is in the jh?na st
thing happens when a person is in a state of Fruition attainment. There are two kinds of exp
taste. One is during the Path thought process and the other is at the attainment of Fruition la
similar to entering into a jh?na state. ¡§Of these, only its occurrence in the cognitive series o
has been shown.¡¨ That means it has been shown before in the previous chapter.

Now the author in paragraph 4 is going to describe the Fruition attainment in detail. ¡§Furthe
people say that the Fruit is the mere abandoning of fetters¡¨ - this is the opinion of some tea
Venerable Buddhaghosa did not approve. So the people say that Fruit is the mere abandoni
nothing more than that. The following Sutta can be cited in order to convince them that they
this is something like a debate or a controversy. According to these teachers, there is no sep
is Fruit. Just the mere abandoning of fetters is called ¡¥Fruit¡¦. So for them there is no separa
Then the author of the Visuddhi Magga brings out the Text from the Pa?isambhid?magga to
wrong. ¡§How is it that understanding of the tranquilizing of effort is knowledge of Fruit?¡¨ He
means Path. So it should not be ¡¥tranquilizing of effort¡¦, but ¡¥tranquilizing by effort is know
Fruit¡¦.

¡§At the moment of the Stream-Entry Path, Right View in the sense of seeing emerges from
emerges from the defilements and from the aggregates that occur consequent upon that [wr
externally it emerges from all signs. Right View arises because of the tranquilizing of that eff
¡¥Right View¡¦ means ¡¥Fruition¡¦. So Fruition arises because of the tranquilizing of that effo
because at the moment of Fruition the effort of Path has already ceased. ¡§This is the Fruit o
this should be given in detail.¡¨ If you want to read about it in detail, you have to go to the
Pa?isambhid?magga. ¡§Also such passages as ¡¥The four Paths and the four fruits - these
measureless object (A ¡¥measureless object¡¦ means Nibb?na.)¡¦ and ¡¥An exalted state is a
proximity condition, for a measureless state¡¦.¡¨ The first is taken from the Dhammasa~ga??
taken from the Pa??h?na. So this is a digression.

Paragraph 5 ¡§However, in order to show how it occurs in the attainment of Fruition there is
of questions.¡¨ According to these questions he will explain: (1) What is Fruition attainment?
attains it?, (3) Who do not attain it?, (4) Why do they attain it?, (5) How does its attainment o
(6) How is it made to last?, (7) How does the emergence from it come about?, (8) What is ne
(9) What is Fruition next to?

The first question is: ¡§What is Fruition attainment? It is absorption in the cessation in which
Fruition consists.¡¨ I don¡¦t think this translation is correct. Actually what it means is: ¡§It is ab
of the Noble Fruit in the cessation.¡¨ ¡¥Cessation¡¦ here means Nibb?na. So it is the absorpt
Fruition in Nibb?na. That means Noble Fruition is arising again and again taking Nibb?na as
absorption of the Noble Fruition in the cessation.¡¨ We may put the word ¡¥Nibb?na¡¦ after co
parenthesis.

¡§Who attains it? Who do not attain it? No ordinary men attain it. Why? Because it is beyond
all Noble Ones attain it. Why? Because it is within their reach. But those who have reached
not attain a lower Fruition (That means they do not enter the lower Fruition attainment.) beca
each successive Person is more tranquilized than the one below.¡¨ Actually it means when y
stage, the first stage disappears. It is something like that. ¡¥They are tranquilized¡¦ really me
¡¥disappearance¡¦. When you get to the Second Path, then there is no First Path. ¡§And thos
reached a lower Path do not attain a higher Fruition because it is beyond their reach.¡¨ So if
attained only the First Magga, you can go into First Fruition, but not the second stage of Fru
third stage of Fruition and so on. Then when you have reached the second stage, you can e
stage of Fruition. You cannot enter into the first stage of Fruition because it has already gon
and the fourth you have not yet attained. So you can enter into the second stage only. If you
third stage, you can enter into the third stage of Fruition only, not the first nor the second be
have disappeared, and not the fourth because you have not yet attained it. ¡§But each one a

appropriate Fruition.¡¨ We may say that Sot?panna can attain only first Fruition attainment, t
can only attain the second Fruition attainment and so on.

Paragraph 7 ¡§But there are some who say that the Stream Enterer and Once-Returner do n
only the two above them attain it.¡¨ This is the opinion of some teachers. ¡§The reason they
these two show achievement in concentration.¡¨ It is said that only when a person who has r
stage of enlightenment has he really achieved concentration. That means his concentration
only when he reaches the third stage and also the fourth stage. So the Stream Enterer and
have much achievement in concentration. These teachers think that these two cannot enter
attainment. ¡§But that is no reason, since even the ordinary man attains such mundane conc
within his reach.¡¨ So if even puthujjanas can reach the jh?nas and enter into jh?na attainme
Stream Enterer and Once-Returner not able to go into their respective attainments? Therefo
no reason at all. ¡§But why argue here over what is and what is not a reason? Is it not said i
follows?¡¨ And then he brings out the Text. We will skip over it.

Paragraph 8 ¡§Why do they attain it? For the purpose of abiding in bliss here and now.¡¨ Tha
terms to enjoy themselves or to enjoy the bliss of Nibb?na here and now. ¡§For just as a kin
royal bliss and a deity experiences divine bliss, so too the Noble Ones think ¡¥We shall expe
supramundane bliss, and after deciding on the duration, they attain the attainment of Fruition
choose.¡¨

In footnote 3 ¡§Although they are resultant states¡¨ - now during the Fruition attainment, the
consciousness alone arises, perhaps millions of times. Fruition consciousness is resultant c
Right? With regard to other resultant consciousness do we have choice? We have no choice
past kamma. So we have to just accept it. We see something good and there is eye conscio
cannot avoid that. We have to accept it. But with regard to this resultant consciousness, Fru
consciousness, there is a choice. ¡§Although they are resultant states, nevertheless the stat
attainment occur in the Noble Person only when he chooses since they do not arise without
and do so only when they are given predominance.¡¨ So when they want to go into Fruition a
to practice. They have to do something. They have to practice vipassan? meditation again.
without preliminary work. That is why they are said to be ¡¥with predominance¡¦. That means
javanas. The Fruition consciousness has the javana function. And then there is what is calle
(adhipati)¡¦. When they arise, they have this predominance in them. What are the four adhip
(chanda), (2) consciousness (citta), (3) effort (viriya), (4) investigation (vima?s? or pa???). Y
these four in The Manual of Abhidhamma. So I think the last part of the translation is not so
¡¥they do so only when they are given predominance.¡¦ Actually when the Fruition conscious
these four has the function of predominance. One will always have predominance. And they
preliminary work. That is why, it is said in the Visuddhi Magga ¡¥whenever they choose¡¦. It i

other types of resultant consciousness.

Paragraph 9 ¡§How does its attainment come about? How is it made to last?¡¨ That means h
does the emergence from it come about? In the first place its attainment comes about for tw
bringing to mind any object other than Nibb?na, and with bringing Nibb?na to mind only, acc
said.¡¨

Paragraph 10 ¡§Now the process of attaining it is as follows.¡¨ It describes how to enter into
attainment. ¡§A Noble Disciple who seeks the attainment of Fruition should go into solitary re
means he should go to a place where he has seclusion. ¡§He should see formations with ins
rise and fall and so on.¡¨ That means he must practice vipassan? meditation and see the rise
mental and physical phenomena and then he must go up stage by stage of vipassan? know
insight has progressed [as far as conformity], then comes change-of-lineage knowledge with
object. And immediately next to it consciousness becomes absorbed in cessation with the at
Fruition. And here it is only Fruition, not Path, that arises even in a Trainer, because his tend
Fruition attainment.¡¨

There is footnote 4. Right? ¡§Then comes change-of-lineage knowledge with formations as i
Change-of-lineage is what? The P??i is gotrabhu. In the Path process change-of-lineage tak
It takes Nibb?na as object. But in this thought process it takes formations as object, not Nibb
change-of-lineage not have Nibb?na as its object here as it does when it precedes the Path?
thought process change-of-lineage takes Nibb?na as object. Why does it not take it here? ¡§
belonging to Fruition are not associated with an outlet [as in the case of the Path].¡¨ ¡¥Outlet
¡¥getting you out of sa?s?ra or out of mental and physical phenomena. Because it is the fun
us say to take you out of sa?s?ra, but it is not the function of Fruition. ¡§For this is said ¡¥Wh
are an outlet? The four unincluded Paths¡¦.¡¨ So only the four Paths are called ¡¥outlet¡¦. The
¡¥niyy?na¡¦. That means something that takes something out of something. ¡§Here it is only
that arises even in a Trainer.¡¨ ¡¥Trainer¡¦ means a person who is enlightened, but who is no
So such persons are called Trainers¡¦. So even in a Trainer, Path consciousness does not a
tendency or his intention is to Fruition attainment. His aim is not to get Path consciousness b
Fruition attainment. That is why Path does not arise although he practices vipassan? medita
progresses through the successive stages of vipassan? knowledges, maybe even in one sitt
consciousness does not arise because his intention is not to get Path consciousness.

Paragraph 11 ¡§But there are those who say that when Stream Enterer embarks on insight,
attain Fruition attainment¡¦, he becomes a Once-Returner, and a Once-Returner a Non-Retu
they say. ¡§They should be told ¡¥In that case a Non-Returner becomes an Arahant, and an
Buddha, and a Pacceka Buddha a Buddha.¡¨ That is not the case. ¡§For that reason, and be

contradicted as well by the Text quoted above, none of that should be accepted. Only this sl
Fruition itself, not Path, arises also in the Trainer. And if the Path he has arrived at had first j
Fruition will have the first jh?na too when it arrives. If the Path has the second, so will the Fr
so with the other jh?nas.¡¨ Now when a person gets Path consciousness, his first conscious
first jh?na, or second, or third, or fourth, or fifth jh?na depending upon how many jh?na facto
that Path consciousness. If the Path consciousness is or belongs to first jh?na, then the Frui
consciousness must also be first jh?na fruition consciousness because it must resemble its
cause. If when he gets the Path, that Path has only four jh?na factors, then his Fruition cons
this thought process must also have four jh?na factors. So it belongs to the second jh?na ar
how attainment comes about and how a person enters into Fruition attainment.

Paragraph 12 ¡§It is made to last in three ways, because of the words ¡¥Friends, there are th
for the persistence of the signless mind deliverance: they are the non-bringing to mind of all
bringing to mind of the signless element, and the prior volition¡¦. Herein, the prior volition is t
predetermining of the time before attaining; for it is by determining it thus ¡¥I shall emerge at
time¡¦ that it lasts until that time comes. This is how it is made to last.¡¨ So here ¡¥the prior v
means predetermining ¡¥I will be in this attainment for one hour or two hours¡¦ and so on.

Paragraph 13 ¡§Emergence from it comes in two ways, because of the words ¡¥Friend, there
for the emergence from the signless mind deliverance: they are the bringing to mind of all si
non-bringing to mind of the signless element¡¦. Herein, ¡¥of all signs¡¦ means the sign of mat
of feeling, perception, formations, and consciousness. Of course, a man does not bring all th
once (Not all these five become the object of his mind at once.), but this is said in order to in
the emergence from it should be understood in this way: emergence from the attainment of
in him when he brings to mind whatever is the object of the life-continuum.¡¨ Now a person is
from the attainment when life-continuum arises. So long as he is in attainment, then only the
consciousness arises time after time after time. When at the predetermined time the life-con
is said to have emerged from the attainment of Fruition. That is when he brings up the objec
life-continuum. You know that the life-continuum takes kamma, or the sign of kamma, or the
object. When life-continuum arises, the object also changes. During the Fruition attainment t
Nibb?na. But when the life-continuum arises, the object is one of the three (kamma, or sign
of destiny).

Paragraph 14 ¡§What is next to Fruition? What is Fruition next to?¡¨ You have to understand
processes in order to understand this paragraph. ¡§In the first case either Fruition itself is ne
Fruition or the life-continuum is next to it.¡¨ Now during the Fruition attainment thought proce
Fruition moment follows another Fruition moment and so on. Fruition itself is next to Fruition
follows after another. ¡§Or the life-continuum is next to it.¡¨ That means at the end of Fruition

there is life-continuum. So life-continuum follows it. ¡§But there is Fruition that is (a) next to t
(following the Path immediately in the Path thought process), (b) there is that next to Fruition
the Path thought process the second Fruition and the third Fruition.), [c] there is that next to
change-of-lineage (That is in the Fruition attainment thought process.), and (d) there is that
base consisting of neither perception nor non-perception.¡¨ That is during the attainment of c
will be described later.

¡§Herein, (a) it is next to the Path in the cognitive series of the Path. (That means the Path t
process.) (b) Each one that is subsequent to a previous one is next to Fruition. [c] Each first
attainments of Fruition is next to change-of-lineage. And Conformity should be understood h
¡¥Change-of-lineage¡¦ (Here actually conformity is called ¡¥change-of-lineage¡¦.); for this is s
Pa??h?na.¡¨ So he cites the Pa??h?na as proof. ¡§In the Arahant conformity is a condition, a
condition, for Fruition attainment. In Trainers, conformity is a condition, as proximity conditio
Fruition attainment.¡¨ So in the Pa??h?na the word ¡¥conformity¡¦ is used, not ¡¥change-of-li
describes here as change-of-lineage is actually to be taken as conformity. ¡§ (d) The Fruition
which there is emergence from the attainment of cessation is next to the base consisting of
nor non-perception.¡¨ That is during and after the cessation attainment. We will come to that

Paragraph 15 ¡§Herein, all except the Fruition that arises in the cognitive series of the Path
Fruition attainment.¡¨ Except those that arise in the Path thought process, the other Fruition
occur as Fruition attainment described here. ¡§So whether it arises in the cognitive series of
Fruition attainment,

Asceticism¡¦s Fruit sublime
Which tranquilizes all distress,
Its beauty from the deathless draws,
Of a sweet purifying bliss
It is the fountainhead besides,
Whose honey-sweet ambrosia
A deathless sustenance provides.
Now if a wise man cultivates
His understanding, he shall know
This peerless bliss, which is the taste
The Noble Fruit provides; and so
This is the reason why they call
Experience here and now aright
Of flavor of the Noble Fruit
A blessing of fulfilled insight.¡¨

This is the benefit of vipassan? meditation.

Next we come to the attainment of cessation. ¡¥Attainment of cessation¡¦ means attainment
citta, cetasika and r|pa born-of-citta. That is called ¡¥attainment of cessation¡¦. In this attainm
activities of mind are temporarily suspended. When a person is in that attainment, there is n
whatsoever. He may be like a statue for as long as he wishes, say for one day, two days, at
beings for seven days. During that period he may be like a statue. And then there are questi
Let¡¦s go to the answers.

Paragraph 18 ¡§What is the attainment of cessation? It is the non-occurrence of consciousn
concomitants owing to their progressive cessation.¡¨ When a person enters into this cessatio
into the jh?nas one by one. He enters into first jh?na, and then enters into the second jh?na
he enters into the second jh?na, initial application (vitakka) ceases. And when he enters into
jh?na, sustained application (vic?ra) ceases and so on. So they cease gradually until he rea
ar|p?vacara (formless) jh?na. ¡¥Attainment of cessation¡¦ means cessation of consciousness
concomitants. ¡¥Its concomitants¡¦ means cetasikas.

¡§Who attains it? Who do not attain it? No ordinary men, no Stream Enterers or Once-Retur
Non-Returners and Arahants who are bare insight workers, attain it.¡¨ That means beings wh
vipassan? and become Non-Returners and Arahants cannot enter into this cessation attainm
Non-Returner or an Arahant, if you do not have jh?nas, then you cannot enter into this attain
practice jh?na first, then practice vipassan?, and attain to the third stage and fourth stage of
can enter into this attainment. ¡§But both Non-Returners and those cankers destroyed (That
who are obtainers of the eight attainments (That means four r|p?vacara jh?nas and four ar|p
They are called ¡¥eight attainments¡¦ or we may say ¡¥nine attainments¡¦ if we take the r|p?v
five.), attain it¡¨ and so on. ¡§And these qualifications are not to be found together in any per
than Non-Returners and those whose cankers are destroyed, who are obtainers of the eight
qualifications mentioned in the quotation are not to be found together in any persons other th
Non-Returners and Arahants. ¡§That is why only they and no others attain it.¡¨ Non-Returner
have eight jh?nas or nine jh?nas can go into this attainment of cessation. ¡§But which are th
Actually they are digressions.

We will go to paragraph 27. ¡§Mastery: there are five kinds of masteries.¡¨ They are also des
4. So I want you to note down chapter 4, paragraph 131 and following. You may go back an

¡§Where do they attain it?¡¨ In which realms can they attain or can they go into this attainme
paragraph 29. ¡§In the five-constituent becoming.¡¨ Do you know the five-constituent becom
where there are five aggregates. Human beings, devas, and r|p?vacara brahm?s have the fi
becoming. But the ar|p?vacara brahm?s do not have the five-constituent becoming; they hav

five-constituent becoming. Why? Because of the necessity for the succession of [all] the atta
order to get into this attainment of cessation, one must begin with the first r|p?vacara jh?na a
second, third, fourth, and so on. But if you are reborn as a formless brahm?, you do not have
r|p?vacara jh?nas. So you cannot enter r|p?vacara jh?nas in the formless state. If you are re
formless brahm?, you cannot enter into the r|p?vacara first, second, third, fourth and fifth jh?
the four-constituent becoming (That is ar|p?vacara.) there is no arising of the first jh?na, etc
is not possible to attain it there. But some say that is because of the lack of a physical basis
there].¡¨ So some people say that because there is no physical basis for the mind there, that
attainment cannot be entered into. Actually not only the physical basis but all material prope
found in the ar|p?vacara.

Paragraph 30 ¡§Why do they attain it? Being wearied by the occurrence and dissolution of fo
attain it thinking ¡¥Let us dwell in bliss by being without consciousness here and now and re
cessation that is Nibb?na.¡¨ Now they are wearied by the arising and disappearing of format
to dwell in bliss by being without consciousness here and now and reaching the cessation th
is also a way of kind of enjoying themselves, that is to be without mental activities for some t

Paragraph 31 ¡§How does its attainment come about? It comes about in one who performs t
striving with serenity and insight and causes the cessation of [consciousness belonging to] t
consisting of neither perception nor non-perception. One who strives with serenity alone rea
consisting of neither perception nor non-perception and remains there, while one who strives
alone reaches attainment of Fruition and remains there. But it is one who strives with both, a
performing the preparatory tasks, causes the cessation of [consciousness belonging to] the
neither perception nor non-perception, who attains it. This is in brief.¡¨ So you must practice
vipassan? coupled when you want to get into this attainment of cessation. If you do only sam
get into this cessation attainment. And also if you do only vipassan?, you cannot get into this
first you enter into first jh?na. Then you emerge from this first jh?na and practice vipassan?
jh?na. So it goes in pairs, samatha and vipassan?, samatha and vipassan?.

Paragraph 32 ¡§But the detail is this. When a bhikkhu who desires to attain cessation has fin
has to do with his meal and has washed his hands and feet well, he sits down on a well-prep
secluded place. Having folded his legs crosswise, set his body erect, established mindfulnes
(That means towards the meditation object.), he attains the first jh?na, and on emerging he s
formations in it with insight as impermanent, painful, not self.¡¨

¡§This insight is threefold insight that discerns formations, insight for the attainment of Fruitio
insight for the attainment of the cessation.¡¨ There are three kinds of vipassan?. ¡§Herein, in
discerns formations, whether sluggish or keen, is the proximate cause only for Path.¡¨ You p

and it is the cause only for the Path. ¡§Insight for the attainment of Fruition (That means insi
for the attainment of Fruition.), which is only valid when keen, is similar to that for the develo
Path. Insight for the attainment of cessation is only valid when it is not over-sluggish and not
If it is over-sluggish, it cannot cause the cessation of the neither perception nor non-percepti
is over-keen, if it is too strong, too keen, then it will go on to the Fruition and not to the cessa
attainment. If it is too keen, it sees dangers and others in the formations. So it leaps into Fru
attainment, not cessation attainment. So here the insight should not be over-sluggish or ove
¡§Therefore he sees those formations with insight that is not over-sluggish and not over-kee

Paragraph 34 ¡§After that, he attains the second jh?na, and on emerging he sees formations
like manner. After that he attains the third jh?na¡¨ and so on. ¡§After that he attains the base
boundless consciousness (That means the second ar|p?vacara jh?na.), and on emerging he
in like manner. Likewise he attains the base consisting of nothingness (third ar|p?vacara jh?
he does the fourfold preparatory task.¡¨ So after emerging from the third ar|p?vacara jh?na,
entering into jh?na. He must do these four preparatory tasks.

Now the translator got it wrong here with regard to non-damage to other¡¦s property. It is non
property that is not attached to him. So the first one is important. I checked it with the other t
made by a Burmese author. He was also wrong. What it really means is non-damage to the
physically attached to him. Maybe they are misled by the word ¡¥nanabhaddha¡¦ in P??i. It is
the P??i word ¡¥ekabhaddha¡¦. That means ¡¥attached to¡¦, ¡¥attached to one¡¦, or ¡¥connec
¡¥Nanabhaddha¡¦ means the opposite of that. So the real meaning is the property that is not
attached to him.

In paragraph 35 this ¡§refers to ¡¥what the bhikkhu has about him that is not his personal pr
is wrong.) a robe and bowl, or a bed and chair, or a living room, or any other kind of requisite
but the property of various others.¡¨ No. It is other kinds of requisites that lie unattached to h
enters into this attainment, he has his robe. Right? He has worn his robe. If he has a bowl a
left, he may have that bowl too. They are connected or attached to his body. He may have s
robes or some other things, not with him or not attached physically to him. For those things
something so that they do not get damaged by fire, by water, by bites of rats and so on. So t
non-damage to the property that is not attached to him, his property, not the property of othe
possible for others¡¦ property to be like insured, we need such a monk, only one such monk.
resolved that such property will not be damaged, will not be destroyed by fire, water, wind, t
and so on. Here is the form of the resolve: (he makes the resolution in this way.) ¡¥During th
let this and this not be burned by fire; let it not be swept off by water; let it not be spoilt by wi
it not be stolen by thieves; let it not be devoured by rats, and so on¡¦. When he has resolved
they are not in danger these seven days.¡¨ That means for as long as he is in the attainment

Paragraph 36 ¡§If he does not resolve in this way, they may be destroyed by fire, etc., as in
Elder Mah?-N?ga. He went for alms into the village where his mother, a lay follower, lived. S
gruel and seated him in the sitting hall. The Elder sat down and attained cessation.¡¨ So he
cessation attainment in the village, in the sitting hall. ¡§while he was sitting there, the hall ca
The other bhikkhus each picked up their seats and fled. The villagers gathered together, and
they said ¡¥What a lazy monk!¡¦ The fire burned the grass thatch, the bamboos and timbers,
the Elder.¡¨ The fire did not burn the Elder, but everything else was burned. ¡§People brough
it out. They removed the ashes, did the repairs (that means like making the ground smooth
scattered flowers, and then stood respectfully waiting. The Elder emerged at the time he had
Seeing them, he said ¡¥I am discovered!¡¦ (Because he didn¡¦t want the people to know that
or an Arahant.) And he rose up into the air and went to Piya~gu Island.¡¨ So ¡§This is no-dan
(not ¡¥others¡¦ property¡¦) that is not attached to him.¡¨

Paragraph 37 ¡§There is no special resolving to be done for what is his own personal proper
what is attached to his body, not ¡¥his own personal property¡¦. For the robe he is wearing, h
to bother. He doesn¡¦t have to worry about that. He doesn¡¦t have to make a resolution for th
robe he is wearing. It will be taken care of. There is no special resolving to be done for what
his body such as the inner and outer robes or the seat he is sitting on. ¡§He protects all that
the attainment itself, like those of the Venerable Sa?j?va. And this is said ¡¥There was succe
intervention of concentration in the Venerable Sa?j?va. There was success by intervention o
the Venerable S?riputta.¡¨ So you go back to chapter 12, paragraph 30. When you see that,
Venerable Sa?j?va was in attainment and people didn¡¦t know that he was a monk and so th
wood on him and then set it on fire. But he was not burned because he was in attainment.

Paragraph 38 ¡§The Community¡¦s (or Sa~gha¡¦s) waiting is the Community¡¦s (Sa~gha¡¦s) e
is: till this bhikkhu comes there is no carrying out of acts of the Community (Sa~gha).¡¨ Whe
what we call ¡¥the acts of Sa~gha¡¦, then all monks must assemble to a place. If one monk i
from the assembled monks, then that act becomes invalid. So he must come to where the o
assembled. But when he is in attainment, he may not be able to come. So he must do some
here it is not the actual Community¡¦s waiting that is the preparatory task, but the adverting t
waiting.¡¨ That means thinking of the waiting. ¡§So it should be adverted to in this way ¡¥Wh
for seven days in the attainment of cessation, if the Community wants to enact a resolution,
emerge before any bhikkhu comes to summon me¡¦.¡¨ So if the Sa~gha expects him, then h
attainment. He must resolve like that.

Paragraph 39 ¡§But if he does not do so, then perhaps the Community assembles, and not s
¡¥Where is the bhikkhu?¡¨ and so on. If he does not make the resolution before entering the

he will not emerge from it automatically. But he will emerge from it when a monk goes to him
him ¡¥You are expected by the Sa~gha¡¦. Then he will surely emerge from the attainment.

Paragraph 40 Then the third one is the Master¡¦s summons. ¡¥Master¡¦ means the Buddha.
come, then he must go to the Buddha and so on. It is similar to Community¡¦s waiting.

Paragraph 42 The fourth one is the limit of life duration. So he must think of how long he will
enters into this attainment. At least he must know that he is going to live more than seven da
there will be a dilemma. That is because during the attainment death cannot come. So he m
preparatory task although the others can be ignored. So he should attain only after advertin
it is said that while it may be permissible to omit adverting to others (the other three), this ho
be adverted to.¡¨

¡§Now when he has thus the base consisting of nothingness and done this preparatory task
base consisting of neither perception nor non-perception. Then after one, or two, turns of co
passed (That means one or two moments of the fourth ar|p?vacara jh?na.), he becomes wit
So consciousness ceases at that moment. He achieves cessation. There are no cittas, no ce
r|pa-born-citta. ¡§But why do consciousnesses not go on occurring in him after the two cons
Because the effort is directed to cessation.¡¨ His effort is directed to cessation, so there is ce
consciousness. ¡§For the bhikkhu¡¦s mounting through the eight attainments, coupling togeth
serenity and insight is directed to successive cessation, not to attaining the base consisting
perception nor non-perception. So it is because the effort is directed to cessation that o more
consciousnesses occur.¡¨ So there are not many moments of consciousness; only two cons

Paragraph 44 ¡§But if a bhikkhu emerges from the base consisting of nothingness without ha
preparatory task and then attains the base consisting of neither perception nor non-percepti
to become without consciousness: he returns to the base consisting of nothingness and sett
he will not be able to make it disappear; he will go back to the third one.

Paragraph 48 ¡§How is it made to last? It lasts as long as the time predetermined for its dura
interrupted meanwhile by the exhaustion of the life span, by the waiting of the Community, o
summons.¡¨

Paragraph 49 ¡§How does the emergence from it come about? The emergence comes abou
of the Fruition of non-return in the case of the Non-Returner, or by means of the Fruition of A
the case of the Arahant.¡¨

TAPE ENDS

beneficial for your understanding of the Buddha¡¦s teachings. This transcription has not been
the record of spontaneous exchanges between the teacher and students. Therefore it is pos
some errors. We are certain that such errors are infrequent and minimal. Say?daw is a meti
teacher and offers these teaching in this manner out of compassion for those people interes
study and practice of meditation and Buddhism.

ÉÍÍÍ

result of deep-seated emotions and craving.

There is one main characteristic which separates human beings from animals, that is, they have a mind to think and reflect about their existence and the life and phenomena around them. Despite having such a highly developed mind, they are unable to use their minds to the fullest because of delusion. A religion can be used as a means to remove that delusion, subdue the animal nature and cultivate humane qualities consistent with what can justly be regarded as 'human nature'.

A mind expresses its human nature through kindness and compassion, consideration to others, providing services to relieve others of their suffering. When that mind is cultivated beyond humanism and constantly dwells in equanimity and radiates loving kindness, compassion, sympathetic joy to all beings without distinction, that mind has realised its 'divine nature'.

The divine nature is not cultivated by offering prayers to some supernatural powers, if a person does not spend time cultivating his virtues. From the Buddhist point of view, there is, in fact, no necessity for some external divine inspiration to influence and ennoble the mind. This is something which a person will have to do himself. He ennobles his mind by eliminating negative characteristics such as ignorance, hatred, jealousy, and selfishness, while cultivating positive qualities of friendliness, love and compassion.

Cultivating the mind so that it can be refined to realise its divine nature is a noble task to be undertaken by all. It is our task to use our human nature to remove our animal nature and use religion to cultivate our divine nature. Buddhism takes us one step further in cultivating our virtues. Through the Dhamma, we can transcend our divine nature and achieve one more

level, namely, the fourth and most important nature, the 'Enlightened Nature', which is the state of self-awakening and realisation into the nature of life as it really is.

The first step towards transforming ourselves is to understand what Buddhism is: What is it really? What are the aspects in the understanding and practice of Buddhism? What is its doctrinal content? And how can it be adopted and practised in modern society? These are important questions which will be dealt with in this booklet.

WHAT IS BUDDHISM?

Buddhism is based on the Buddha's teaching, the Dhamma, which was given by the Master more than 2,500 years ago. Western writers have tried various ways to classify Buddhism in the categories they know best. Some say it is not a religion, but only a philosophy. Others say that Buddhism is not philosophy, but only a moral code. Despite these interpretations, millions acknowledge it as a religious way of life.

Is Buddhism a Religion?

Before answering this question, let us examine the meaning of this word 'religion'. Some definitions given in the dictionary are: 'Belief in God or way of worship or praying to God; obedience to God; binding man to God; practice of sacred rites; recognition of a higher unseen controlling power; one of the various systems of faith and worship based on such belief; life as lived under the rules of a monastic life.'

In considering these definitions, some aspects are in agreement with the principles of Buddhism, while others

are not. We must remember that the word 'religion' is only an English word which has concepts linked to the beliefs of the English people. The Buddha did not speak English and of course he did not describe his teaching by using this term.

Generally, for practical purposes, we can describe Buddhism as a religion. Here, religion is taken to mean a method or way of life which was introduced for man to be righteous and noble, for him to maintain his human dignity and intelligence, and for him to attain final liberation through mental purity. Religion helps man to develop his mental processes and leads him to experience happiness and peace. There should not be any controversy in applying this word to Buddhism if it is understood that 'religion' is used in this context. One should not be involved in hair-splitting arguments as to whether or not an ethical-moral system should be called a 'religion'. If it brings good results without the dependence on mere belief or imagination then it should be accepted.

Is Buddhism a Philosophy?

Philosophy is the search for knowledge, especially for the nature and meaning of existence. It is the 'love' for knowledge, but there is no mention about whether this knowledge would be translated into practical modes of behaviour to guide a person in his daily life. The Buddha's teaching is sublime and deep, surpassing the thoughts of even the most respected philosophers. But the Dhamma is not mere philosophy because philosophy is empirical by nature. It is a practical method which had been realised by the penetrative and analytical mind of the Buddha who taught the Dhamma for man's daily application.

The Buddha's doctrine of analysis is based on

understanding and his own experiences. His approach to the problem of human suffering is essentially empirical and experimental, not speculative and metaphysical. The Dhamma is not founded on mere views or theories which, like many of the views given by different philosophers, contradict one another. A philosopher's contribution is gauged from an intellectual standpoint, and not necessarily whether it contains elements of goodwill and compassion. By contrast, the Buddha's doctrine is not dry philosophy for people to talk about using cold intellect. It is a methodical system for self-development, centred on love, selflessness and compassion.

Buddhism is a philosophy to the extent that it describes the principles underlying the actions and behaviour of men and explains the nature of life. It suggests ways how we can lead a meaningful religious life without falling back on traditional beliefs which are based on the mythologies of primitive times. The Buddha wants us to lead a rational, noble way of life and use our human intelligence for the benefit of all. Hence, the Buddhist way of life is reasonable and practical for all times and in any society and country. It promotes harmony and does not create hostility or disturb the followers of other religions.

Buddhism is the treasure store of wisdom resulting from a most intensive search conducted by a prince imbued with infinite love and deep compassion for suffering humanity. This search was conducted over many of his lives and over an incomprehensible period of time. The good fruits of the practice of Buddhism can be experienced within this life itself as well as hereafter, for such is the nature of the Buddha Dhamma. Since Buddhism addresses itself to the most pervasive problems of humanity and all living beings, namely, suffering, and it prescribes a method by which suffering

and greed can be overcome, Buddhism can even more appropriately be regarded as a mental therapy.

Is Buddhism a Way of Life ?

Buddhism is described by Western scholars as a way of life, since the belief in God (which is tied to their concept of religion) is not pivotal in the Buddha's teaching. But describing it as a way of life is insufficient to convey the full scope of the message disseminated by the Buddha.

Buddhism is a rational, liberal and noble method for those who sincerely want to understand the reality of life. It is a righteous way of life for man to do good, be good and lead a happy life without depending on external powers. It is a gradual path of mental evolution which culminates in supreme wisdom and perfection or liberation. No matter what label is attached to the teachings, the Dhamma remains as the absolute truth which can lead people to perfect peace and bliss.

From the Buddhist viewpoint, a religion is not something that has come down from heaven in order to teach man to fulfil a divine purpose, but a way of life which has developed on earth to satisfy the intellectual and spiritual yearning of mankind. In practising Buddhism as a way of life, one should not depend on faith alone but use one's understanding and experience which have been accumulated through the use of human intelligence.

Practising Buddhists do not worry about changing circumstances which are yet to come. They maintain awareness of their mental state here and now. It is by being mindful of our present mental state and thoughts as they arise that we really come ‘alive’ during those moments. Otherwise, we are still dreaming of and living

in the past or future. The future will look after itself if the present is well-lived. The strong emphasis on awareness and living in the present is also linked to reaping the results of our deeds here and now in this very life. In Buddhism we do not have to wait for our next life to experience good results. It is, therefore, not some kind of an escapist asceticism, but a down-to-earth realism.

THREE ASPECTS TO UNDERSTANDING BUDDHISM

There are many aspects to consider in Buddhism, but a comprehensive treatment of the subject will certainly go beyond the scope of this booklet. For our purpose, let us consider only three aspects in the understanding and realisation of Buddhism, namely, the intellectual, spiritual, and practical aspects.

The Intellectual Aspect

The use of our intellect is important in understanding and practising the Buddha's teaching. Through analysis, we can realise the Truth at a deeper level, gain a proper understanding of our life and the nature of worldly conditions, and by so doing, gain more confidence and faith in the Dhamma.

Buddhism teaches that despite the importance placed on reason in understanding and appreciating the Dhamma, our intellect alone does not lead to mental purification. One cannot become perfect through mere intellect, no matter how well developed it may be. The factual knowledge of the Dhamma by itself does not develop a person's humane qualities if he does not train and purify his mind. Such knowledge should be accompanied by spiritual development, made possible through the

practice of Dhamma.

The Spiritual Aspect

Spiritual perfection, an accomplishment which is most difficult but important, can only be gained through insight and realisation which bring about a complete transformation of one's thoughts and actions. Through mental purification, one realises the absolute truth and achieves purity of mind.

Selfish desire will have no place in that bright, dynamic and pure mind which is dedicated to doing what is good, without harbouring ulterior motives. A pure mind will enable a person to lead a noble life and practise important virtues such as honesty, selfless service, kindness, understanding, patience and tolerance.

The Practical Aspect

Buddhism is not a pack of beliefs, some mumbo-jumbo or a fabulous myth told to entertain the anxious mind or a nice fairy tale to satisfy the yearnings of emotion. It is a practical method for personal transformation and spiritual liberation taught by the Master. It is based on his own search and realisation.

Buddhism places heavy emphasis on practice. A person who is knowledgeable in the various doctrines but does not practise them is like one who could recite recipes from a huge cookery-book without trying to prepare a single dish. His hunger cannot be relieved by book knowledge alone.

A practical method to lead a Buddhist way of life is to

cultivate the three ennobling qualities of //Dana-Sila-Bhavana//. When the practice of these three stages are well advanced, a person becomes a religious man in the truest sense.

1. //Dana// is charity or sacrificing something for the welfare of others in order to reduce selfish desire or greed.

2. //Sila// is upholding morality through self-discipline by leading a harmless and respectable life and by training the mind or the five senses not to become slaves to sensual pleasures. This kind of discipline trains one's mind and allows oneself and others to live peacefully.

3. //Bhavana// is mental culture for the purpose of cultivating the mind in order to maintain peace and happiness.

In leading mankind to a religious way of life, the Buddha did not impose any religious laws or commandments for people to obey, nor did he introduce a set of punishments for those who violate religious principles. He did not condemn or curse anybody who did not wish to follow his advice. In addition, he did not create fear in people's mind by threatening them with vivid descriptions of hell-fire. Instead, he advised people to practise the Dhamma by realising the value of good conduct and to give up evil practices after understanding the bad effects of such conduct.

The way of spiritual transformation rests on the three pillars of //Sila-Samadhi-Panna//, that is, morality, mental development and wisdom. Without developing these qualities, one will have difficulties in leading a happy and peaceful life. This booklet will describe in some detail later what constitutes each of the pillars.

At this juncture, it is useful to be reminded that Panna (wisdom or realisation) goes beyond mere knowledge, which could be obtained by reading a book or hearing a talk. Through the practice of morality (Sila) and mental development (Samadhi), one develops a penetrative insight and realisation into the nature of every existing thing in its proper perspective. This wisdom is gained by harnessing the purified mental energy pulsating in the cosmos through meditation. When realisation appears, the trained mind becomes an unshakeable dynamic force that can handle any human problem without anxiety, hatred or worry. That mind, suffused with wisdom and free from illusion or hallucination, is invaluable for understanding and overcoming worldly problems.

DOCTRINAL CONTENT OF BUDDHISM

The best source of information on the Buddhist doctrine and the practice of //Sila-Samadhi-Panna// is the //Tripitaka//, which contains 45 years of the Buddha's sermons and ministry. The //Tripitaka// is divided into the //Sutta, Vinaya and Abhidhamma//. The //Sutta Pitaka// contains the conventional or simple teaching on how to lead a noble life. The //Vinaya Pitaka// contains the disciplinary code for those who have renounced the worldly life to lead a pure, monastic life, while moral psychology and in-depth analysis of the mind and elements is contained in the //Abhidhamma Pitaka//.

The core of Buddhism is contained within the Four Noble Truths and the Eightfold Path. The Eightfold Path, which is also the Fourth Noble Truth taught by the Buddha, can be summarised into the practice of //Sila-Samadhi-Panna// described earlier. In addition, to gain a proper perspective in life, it is also

important for us to discuss the doctrines of //kamma//
and rebirth in order to realise that we are the masters
of our own destiny.

Message of All Buddhas

Before discussing the Four Noble Truths and the
Eightfold Path, it will be useful for us to state in
very few words what the Buddha taught. It is possible
for us to summarise the 45 years of the Buddha's
ministry and the Truth contained in the //Tripitaka//.

The Buddha's teaching may be summarised in the following
words:

Not to do evil,
To do good,
To purify the mind.

Simple as these words may seem, this advice contains the
pith of the teaching of all Buddhas. It may be simple
enough for a child to understand, but may take many
lifetimes to perfect.

The Buddhas or the Enlightened Ones appear in this world
from time to time to convey the same message. Buddhas do
not have different or conflicting messages because there
is but one Truth, and the Buddhas have realised IT. Out
of compassion, they teach us to walk along this same
path of Righteousness to realise the way to happiness,
just like they did. By walking this Path, it is possible
for us to realise our potential for awakening and become
Buddhas just like them.

This advice teaches us to be perfect in thought and
conduct. To begin with, there are five moral principles
or precepts for Buddhists to observe in their daily

life. The Five Precepts are: abstaining from killing, stealing, sexual misconduct, telling lies, and taking intoxicating drugs and liquor. These do not encompass all evil deeds, but it is good to try not to violate at least these five moral principles to start with.

The precepts are training rules voluntarily undertaken by the individual to help him lead a harmless life, a life filled with compassion, generosity, contentment, truthfulness and mindfulness. Can a rational, far-sighted person point out anything wrong with living in accordance with these training rules? What would happen to a society if every one of its members goes against these principles?

In his infinite wisdom, the Buddha knew that we cannot be perfect at once. Hence, he starts us off by encouraging us to restrain from committing these five harmful deeds. Once we make progress in laying down a firm moral foundation, we can gradually practise mental purification. Buddhism allows an individual to make progress on the basis of his level of realisation and does not dogmatically impose on him a rigid code of conduct without regard to his potentials, level of development and attitudes.

These five precepts are useful for cultivating humane qualities and virtues such as kindness, honesty and understanding. These are qualities important for maintaining peace and security. The motivation for upholding these precepts is not the fear of punishment, but understanding and compassion. When the Buddha said ‘Not to do evil’, it was with the welfare of others in mind.

As human beings, it is our duty to perform some service to others by practising generosity, kindness and giving a helping hand to others who need our support to rid

themselves of grievances, worries and other problems. By rendering selfless service to others, not only do we bring benefits to others, we reduce our selfishness as well. We should not perform a good deed with ulterior motives, since our deeds will be marred by the impure intentions.

So the real Buddhist concept of ‘Not to do evil’ and ‘To do good’ is not based on punishment and reward, but on the need to reduce our selfish desire and cultivate our mental purity. We do not use fear to force people into complying with these precepts. Using fear instead of understanding will not give rise to the cultivation of sympathetic feelings and can result in people becoming superstitious and dogmatic.

The avoidance of evil and the performance of good are highly commendable, but they are not enough. From experience we know that as long as the greed, anger and illusion which are deeply embedded in the mind are not removed, we are still capable of committing some bad deeds. Hence, there is a need for us to purify the mind. To do this, we will have to constantly watch the mind and remove from it mental impurities. When impure thoughts and motivations are extinguished, the mind is always good and pure, and we will reach the final goal.

The Noble Truths

A clear understanding of the Four Noble Truths is fundamental to the practice of Buddhism. These Truths consist of the realisation of the nature of suffering, the cause of suffering, the freedom from suffering, and the method to bring an end to the suffering and achieve liberation. Without an understanding of these four important truths, we will not realise the nature of human problems and will have to continue experiencing

suffering. We struggle to escape from unsatisfactoriness, but without the necessary insight we will not find the way to remove the root cause of our problems. In fact through ignorance we create more problems as a result of our misguided conception of the world.

In only one religion - Buddhism - are the Four Noble Truths explained with such clarity. Through the understanding of these truths, we realise that suffering is nothing more than the unsatisfactoriness regarding our lives and feelings. The causes of unsatisfactoriness are natural and are not created by anybody or any power. In every element and form of energy, friction, clashes, imbalances or changes take place continually, as confirmed by science. All visible objects exist as a result of friction which causes change, and change is the characteristic of life. When this state of flux which we experience physically and mentally at every moment is compounded with human emotion and craving, we experience unsatisfactoriness or suffering.

From the Dhamma we realise that the cause of suffering is not the 'original sin' or due to a curse or influence of any god, devil or ghost, as believed by some religion, but by our own craving for existence and sense pleasures. People experience suffering when they give in to ignorance and try to satisfy their insatiable sense desires, which can only lead to worries, fear, and disappointments. Therefore, when a person realises the Four Noble Truths, he takes steps to overcome his unhappiness by reducing his craving and aversion, which are the roots of all evil actions.

The Noble Path

After realising the cause of suffering, we can eradicate

it by following the method prescribed by the Buddha. This method or path is called the Noble Eightfold Path, which is to be practised by anyone who wishes to experience peace and happiness.

This noble path consists of the following eight factors: Right Understanding, Right Thought, Right Speech, Right Action, Right Livelihood, Right Effort, Right Mindfulness, and Right Concentration. A person strengthens his //Sila// or moral discipline by practising Right Speech, Right Action and Right Livelihood. //Samadhi// or mental culture is developed through the application of Right Effort, Right Mindfulness and Right Concentration. The development of //Sila// and //Samadhi// will give rise to //Panna// or wisdom which comprises Right Understanding and Right Thought. The uniqueness and supremacy in the Buddha's teachings rest in this practical method. When practised, it is possible for a person to purify his mind and undergo spiritual development to become someone perfect and noble.

The Noble Eightfold Path is universal in character and brings good results when applied not only to those who profess Buddhism, but to anyone who puts it into practice. There is no denying that when practising this method we will have from time to time to face difficulties which can be overcome by applying right effort. But if we choose not to follow this path, we are not free from difficulties either. We will have to face other kinds of difficulties, the most serious of all is that the opportunities for doing good and meeting good, spiritual friends becomes markedly reduced. It is so easy for one to go from spiritual light to darkness; it is so difficult to go from darkness to spiritual light.

Nibbana

The Noble Eightfold Path relieves one from suffering and brings happiness and peace in this present and future lives. But this is not all. The practice of this path will ultimately lead one to the attainment of the ultimate bliss of Nibbana. Nibbana is not a mystical concept, but a perfect expression of an Absolute which goes beyond any expression of happiness as defined in a worldly sense.

If we can understand the reality of ourselves, we can easily understand what the Buddha taught. We may go around the world in search of the truth revealed by him, but we will not find it until we search within ourselves using //insight meditation// as taught by the Buddha. Through insight meditation, we can penetrate into reality and gain complete freedom from birth, decay, worries, miseries and unsatisfactoriness. We attain the peace, happiness and tranquillity known as Nibbana, the fruit obtained by someone who has developed his mind to the apex of purity and perfection.

From the discussion on the Four Noble Truths and the Eightfold Path, it is clear that the way to liberation is through the practice of the Dhamma and does not involve the intervention or grace of a god or brahma. Therefore, we must not be passive and fatalistic by hoping that someone out there will save us from the rounds of Samsara. If we cultivate ourselves to be wholesome beings, the results will come as a natural course of events. In addition, Buddhists do not believe that a person will have to face the rewards of and punishments for his deeds because of his fate or through the judgment of some divine being. Instead, it is the operation of the natural law of moral causation or kamma that brings happiness or suffering to a person.

Kamma

The kammic law of cause and effect is important in helping us understand the cause of inequalities among mankind. We are all conditioned by our wholesome or unwholesome thoughts, words and actions. Whatever actions we perform intentionally are motivated by wholesome or unwholesome thoughts. Based on these motivations, we create accordingly good or bad kamma. Good kamma bring good results, while bad kamma bring bad results. The results of our good and bad kamma can ripen either within this lifetime or hereafter.

The kammic law is a natural, universal law and is not created by any supreme being. Through the operation of this law, all beings reap the fruits of their deeds which enable some to be born rich, handsome and well-respected, while others are born poor, ugly and of lowly birth. Buddhism does not accept the belief that a god or devil is responsible for the differences among beings. The Buddha says that pleasant and unpleasant feelings are not created by God as reward or punishment, but arise as a natural effect of our own good and bad actions. Everyone has to experience the good and bad effects of his or her actions, regardless of whether he or she believes in kamma or not.

Therefore, unlike what some people believe, man is certainly not an experiment started by a supernatural being and who can be done away with when unwanted. Buddhism regards man as being capable of developing his understanding to free himself from suffering if he is shown how his ignorance can be removed.

Rebirth

According to the Buddha, the present life is not the

first nor will it be the last. The life process continues so long as the craving for existence prevails in the mind, and this craving, in turn, accumulates good and bad kammic forces. Therefore, as long as these conditioning forces and the craving for existence remain, rebirth will continue to occur.

Our existence does not begin with this human life nor does it end with an eternal life in heaven or hell. Our lives have been evolving over countless existences according to quality of our accumulated kamma. This process will continue until a person someday realises the causes of his existence, and through realisation he works towards bringing this process to a complete and irrevocable end. That attainment is the final goal called Nibbana.

Rebirth rather than reincarnation is taught in Buddhism. The difference is that in reincarnation it is believed that a soul undergoes repeated births, while rebirth does not subscribe to the idea of a soul.

How rebirth is possible without a soul as taught in Buddhism is a revolutionary religious idea. All other religions before or after the Buddha strongly upheld the belief in a soul because without it, they could not explain what would happen to life after death. The Buddha has very clearly explained how rebirth can take place without such an entity. According to Buddhism, the belief in a soul is the result of the misconception or misunderstanding of human consciousness. To understand the Buddha's interpretation of rebirth*, one must study Buddhist psychology on the nature of mental faculties and the nature of kammic forces and cosmic energies.

(* For a better understanding of this process, refer to 'Do You Believe In Rebirth' by the author.)

Man is reborn continually in Samsara until he realises the value of rising above all human weaknesses by cultivating a noble mind. When he is ready to accept the responsibilities of life and to develop a penetrative understanding into reality, he begins to move in an upward spiral. A man can save himself through his own efforts, guided by Dhamma. In this context, the Buddha is regarded as a saviour in so far as he has shown the path for man to save himself.

In Buddhism, the destiny of man is, therefore, not placed at the mercy of a supernatural being who acts at his whims to grant salvation, but is determined by the effort made by a person to cultivate wholesome thoughts, words and actions. When a person fully understands his moral responsibilities, he is suddenly raised from a piteous state of helplessness to someone filled with inspiration, responsibility and self-respect.

PRACTICE OF BUDDHISM IN MODERN SOCIETY

After discussing some important doctrines as taught by the Buddha, it will be useful to examine how some of the teachings can be applied in modern society in general and in the Malaysian context in particular.

Culture, Rites and Rituals

Although religious rites, rituals and ceremonies are not favoured by intellectuals, such practices are important for developing and maintaining the devotional aspects of a religion and for creating a sense of inspiration among the masses. For many people, cultivating devotion is the first important step towards the experience of a religion. If there is no devotional and cultural aspect in Buddhism, people who are attracted to rites and

ceremonies may be drawn to some other kinds of beliefs which offer these practices, although they are steeped in superstition or blind faith.

It is important for religions to have some harmless and reasonable practices for people to express their devotion and spiritual feelings. Many of the Buddhist ceremonies help to cultivate good habits and positive emotions in the followers so that they become kind, considerate and cultured people. When performed with understanding and earnestness, these practices strengthen one's qualities and avoid an over-intellectualisation of Buddhism which could make it seem rather cold, detached and academic.

An effective way to introduce moral lessons is by using pictures, symbols and images and giving entertaining talks by injecting amusing but instructive anecdotes. This method appeals to many people, especially the young and it can help them understand certain aspects of Buddhism. Certain stage performances depicting historical Buddhist events can help to create a good impression in young minds.

The Buddha's advice regarding traditions and customs was neither to accept nor to reject anything without considering whether such practices are meaningful and useful to all. Less dependence is placed on these methods once a person has learned the Dhamma to lead a meaningful Buddhist life. The Buddha says that whatever methods we use to train the mind, our attitude should be like a man who uses a raft to get across a river. After crossing the river, he does not cling to the raft, but leaves it on the other side to continue his journey. Similarly, cultural practices should be regarded merely as an aid to gain inspiration and not as an end in themselves.

Buddhist cultural practices vary from country to country. When performing these traditional practices, we must be careful enough not to categorise Buddhism as belonging to one of them. For example, we should not think of Chinese Buddhism, Sinhalese Buddhism, Japanese Buddhism, etc. This creates disharmony and misunderstanding. We should also be aware of some so-called Buddhist leaders who try to reinforce their own Buddhist labels by incorporating many forms of charms, divine powers, mystical and supernatural concepts to hoodwink the masses. Such unscrupulous actions are done with a total disregard of what the Buddha has said about such practices.

The Buddhist Concept of Worship

Ignorant critics always condemn the practice of paying homage in front of a Buddha image as idol worshipping. To them, this practice is bad. But they do not realise the significance of paying respects to a Master who has taught mankind how to lead a noble religious life. They do not realise this is the way Buddhists appreciate the Enlightenment, perfections, wisdom, and sacredness of the Buddha and the noble services he rendered to humanity. In failing to understand these reasons, they criticise Buddhists for keeping Buddha images.

Is paying respect to a Buddha image indispensable in Buddhism? The image is not compulsory for a person to lead a Buddhist life, but paying respects before a Buddha image is a meaningful and harmless form of devotional practice. It is difficult to understand why others exploit this issue to condemn a gentle religion. Do Buddhists violate any moral principles or violate the peace and happiness of others when they pay respects to their Master who is symbolised by an image?

The Buddha did not advocate any rites and rituals, but concentrated only on disseminating the Dhamma and pointing out the righteous way of life. He did not even ask his followers to worship him by erecting images. Long after the Buddha passed away, some of his followers erected his images but only as a mark of respect. The image symbolises the perfections of the Buddha - his purity, compassion and wisdom - noble qualities which are highly regarded by all cultured people. In any case, the Buddha image is one of the most beautiful works of art man is capable of. Many unbiased non-Buddhists also keep Buddha images because they appreciate how an image of the Buddha can create a deep sense of calmness in the mind. Gazing at the Buddha image has therapeutic value.

Distorted Images

On the other hand, when we observe how some of the so-called Buddhists practise this religion, it is difficult to argue that they are not idol worshippers because their entire religious activities centre around this form of reverence, as if this is the most important aspect of Buddhism. Acting on ignorance, they have developed mythological beliefs and erected various kinds of images with many faces, hands, eyes and heads, superstitiously thinking that they can achieve their worldly needs by appealing to such images. These images only reflect the limited understanding and confused mental attitude of those who introduce them.

The time has come. for people to recognise the real Dhamma, to be less superstitious about such images and to maintain the Buddha image as the focal point of their devotion. If people can do that, the good name of Buddhism can be upheld. We can practise Buddhism while maintaining our traditions, but we should refrain from introducing our own traditions as Buddhism. Because

traditional Buddhists continue to practise their old ethnic rites, people mistake or misinterpret these practises as Buddhism. Certain unscrupulous missionaries take advantage of the situation to ridicule and condemn Buddhism, as a ploy to indoctrinate people and convert them into their religion.

Therefore, those who wish to perform such ceremonies as part of their cultural practices should take care not to confuse them with Buddhism or to carry them out in Buddhist temples. They must take care not to allow such practices to create wrong impressions amongst the public and cause damage to Buddhism.

Confidence and a Religious Life

Religious devotion can be misdirected if proper understanding is not developed. Devotees should guard themselves against being emotionally manipulated by various individuals and groups who try to win converts or to gain some personal benefit. We must develop confidence in the Dhamma which shows the way to cultivate ourselves to the highest level by practising all the good qualities and avoiding human weaknesses.

Buddhism teaches that a truly religious life is one based on moral discipline and mental training and not through mere faith or praying to external powers. A religious man is one who contributes to the peaceful co-existence among beings and practises goodwill, compassion, harmony and understanding. The duty of a religion is to train the human mind to achieve this end and to guide humanity towards spiritual development, a noble attainment sadly lacking among humankind today.

The lack of spiritual development brings about worldly-minded and selfish people who are the cause of

many human problems. Some of these people build a religious philosophy around their materialist orientations. By so doing, the religion they practice loses its purity and has only turned into another convenient means for people to justify their materialistic desires. Buddhism teaches that there is one method for worldly, material gain and another for spiritual development. We should not regard material gain as being synonymous with religious development. At the same time, leading a religious lay life does not mean that one should neglect one's occupation and become careless with one's wealth and property. We should not practise our religion in such a way that it disrupts and destroys the potential for material growth. Conversely, a religious person should try to achieve material aims without in any way violating the peace and happiness of others.

Tolerance in Buddhism

The spirit of tolerance in Buddhism is remarkable. It has contributed to the maintenance of a peaceful, healthy religious atmosphere amongst different religious groups and various Buddhist denominations without any bloodshed for the last 2,500 years. This is indeed a commendable achievement in the history of religions. Buddhism is liberal in that it guides us to lead normal lives without undergoing suffering in the name of religion. As Buddhists we need not become slaves either to sense pleasures or to any supernatural power. But by cultivating human dignity, virtue and intelligence, we can gain true wisdom which will conquer all ignorance.

Buddhism does not encourage people to depend on supernatural or miraculous powers for spiritual development. The belief in miraculous powers and mystical powers in themselves will never give anyone

mental purity. Purity in Buddhism is not based on physical phenomenology, but psychological purity.

Some missionaries condemn Buddhists by calling them names such as heathens, pagans and idol worshippers, but Buddhists never condemn the followers of other religions in retaliation. They never claim that the followers of other religions will not get the chance to experience heavenly bliss. In short, while practising their own religion, Buddhists respect the right of other people to practise their own religions. They can agree to disagree with other religionists amicably, without creating conflict and hostility or giving up their own Buddhist concepts. This religion does not condemn other religionists as sinners, but respects the teachings of all the other religious teachers who tried to uplift the moral standards of society.

Buddhism is not a 'lazy man's' religion which teaches that salvation can be gained through prayers alone, nor a 'Yes man's' religion which accommodates all the beliefs and practices upheld by the so-called Buddhists as well as other religionists. Buddhism has its own identity. If the practices of others are not meaningful and justifiable, Buddhists believe that it is their duty to gently point out the Buddhist point of view so that people can reconsider their actions and beliefs. This should not be viewed as criticism.

Concept of God and Sin

According to Buddhism, the belief in the forgiveness of sins by a supernatural being is not justifiable. The effects of certain evil deeds that we have committed can only be overcome by increasing our meritorious deeds and maintaining healthy, pure minds. This cannot be done by merely praying to anybody.

This is a religion for people to practise on the basis of their own convictions and understanding and not out of the fear of eternal hell-fire. The idea of being made to suffer eternally in hell is foreign to Buddhism which teaches that both enjoyments and suffering are temporary and not eternal.

The belief in a creator God is the most important concept to the followers of every religion. To them, there is no life or religion without God. However, Buddhism does not acknowledge the same belief. The concept of God in Buddhism is entirely different from that in the other religions. Buddhists work for their salvation by leading a noble, religious life and through mental purification without depending on any God. Yet, they do accept the existence of many gods. To Buddhists, gods can help materially but they are not all-powerful and cannot help us to achieve mental purification and final salvation. We must do that ourselves.

Confusion in Modern Buddhism

So far, we have touched on the fundamental teachings of Buddhism, its purpose, concepts, practices, the ultimate goal of life as well as how to overcome human problems. We have also discussed the Buddhist attitude towards various other viewpoints, why intellectuals respect this profound teaching, and how narrow minded people condemn this religion and exploit Buddhist tolerance. Let us now try to examine some of the problems which exist among Buddhists themselves so that we can enhance our understanding and practice of this religion and be worthy disciples of our great teacher.

At the beginning, different schools of Buddhism sprang up in India due to different views held regarding

certain aspects of the Buddha's teaching. The followers did not do this for their personal gain or power nor out of any ulterior motive. But today it seems that many different sects of Buddhism are trying to introduce their own form of Buddhism with some motives of their own with the result that they depart from the original message of the Buddha.

The Buddha's message which has been introduced as Buddhism is meant for all mankind and not merely for one particular race or country. If people understand this, there will be no need for them to talk about the different brands of Buddhism because Buddhism means Truth. The Truth is for all and no particular group can pretend to monopolise it.

Different Brands of Buddhism

Since Buddhism does not command people to do away with age-old cultural traditions in order to practise this religion, people have taken advantage of this by adopting many kinds of practices not in conformity with the teaching of the Buddha. In various countries which had accepted Buddhism, the followers have incorporated many of their traditional practices into Buddhism and eventually introduced the Buddha's teaching according to their beliefs and understanding. This has resulted in Sri Lankan Buddhism, Thai Buddhism, Burmese Buddhism, Indian Buddhism, Chinese Buddhism, Korean Buddhism, Japanese Buddhism, Tibetan Buddhism and Western Buddhism. This is in marked contrast to the policy of other religions which demand that existing traditional beliefs must be cast aside after conversion.

While the diversity of Buddhist practices has provided a richness of a wide variety of religious cultures, unfortunately the liberal Buddhist attitude towards

traditional practices has become a stumbling block in the effort to create Buddhist unity. It has also created feelings of superiority among some groups of Buddhists which have led to discrimination amongst the followers of Buddhism in their respective countries. Each group tries to glorify its own form of Buddhism as being far superior to that of others. But these groups do not realise that in doing so, they are exposing their own egoism in the name of Buddhism. They emphasise more on these cultural practices and introduce them as part of Buddhism. They also try to create false confidence in the minds of others by suggesting that the Buddha had revealed those practices secretly to some of his favourite disciples. This assertion cannot be supported because the Buddha had proclaimed that there were no secrets in his teaching and that he had revealed all the important doctrines to all his disciples. In addition, many of those practices that people believe to be the teaching of the Buddha are not found in the original Pali Tripitaka. Some realise that it is only through these practices that they can gain more popularity to achieve their own ends.

Buddhist Concoctions

Some Buddhist groups try to accommodate and practise all kinds of beliefs and traditions to show that they are working for religious harmony amongst the different schools of Buddhism. Such an approach does not really bring harmony because there soon appears yet another sect which claims to have chosen the eclectic approach. If they were to practise Buddhism that way, it is difficult to understand what they would introduce as the basic teachings or the absolute truth of the Master. One must try to follow the guidelines given by the Buddha without mistaking cultural traditions for the Dhamma. Those who try to incorporate all the traditions, beliefs

and customs as practised or adopted in different countries are like those who take a mixture of different kinds of medicines such as Western medicine, Indian medicine, Chinese medicine and other native medicine, when they are sick. Instead of getting cured, such a mixture can aggravate the sickness. That is why we must have a particular method to practise Buddhism and it has to be one which can be supported by the original teaching of the Buddha.

Buddhists at the Crossroads

In a country like Malaysia where there exist many Buddhist traditions, Buddhists face difficulties in choosing a method for them to practise. In traditional Buddhist countries, there is a particular method of practising Buddhism according to their culture. But here, some religious masters, preachers and gurus who come from other countries try to introduce Buddhism according to their own beliefs, traditions and customs, and maintain that their practices are more effective and purer than those of others. While appreciating their services, we should like to mention that more misunderstanding and confusion are created among local people who listen to many of these visiting religious masters. This situation has become a big problem especially among the youths who try to understand the basic teaching of the Buddha. Although there are many Buddhist schools in Malaysia with their traditional beliefs and cultural practices, the best advice that we can give to beginners who have problems choosing which tradition to follow is to study the basic teaching of the Buddha first-hand before they attempt to follow any religious master from a particular school of Buddhism.

The problems faced by the Buddhist community are many. Many elders pay more attention to their traditional

practices and are ignorant about the Teaching. Some Western-oriented young people study the intellectual aspects of the Dhamma, sometimes at the neglect of the actual practice as well as the other invaluable aspects of the religion. Many who are born Buddhists remain as free thinkers and are not committed to any religious values. There are very few facilities available in this country where young Buddhists can learn about their religion, even in many Buddhist temples. Temples are maintained only as places of worship or for tourism rather than places where people can learn the Dhamma. Those who had their education in missionary schools have been influenced by the indoctrination of other religionists so that they do not know how to appreciate their own religion. Some carry out cultural practices under the guise of ‘Buddhism’ and this has contributed to making a mockery of this noble religion in the eyes of those who are not familiar with the true Buddhist culture, history and way of life.

Buddha in Different Names

Some Buddhists try to introduce different Buddhas by using a variety of names. They also single out one particular Buddha as their Buddha whom they claim to be the most powerful and 'true' Buddha. Such claims reflect their poor mentality. They coin various names for the Buddhas according to their limited way of thinking and judge the validity of a Buddha based on their selfish personal needs. The Enlightened Buddhas who appeared on this earth from time to time should not be discriminated in any way whatsoever. All of them gained the same enlightenment, the same perfection and expounded the same doctrine. The appearances of such Buddhas in the world are very rare, but these people with their lively imaginations conjure different names of the Buddha whom they introduce from time to time as real Buddhas. Such

proliferation of claims and beliefs has contributed to a great deal of confusion in the Buddhist community. Today, there is even competition within the Buddhist community in commercialising the names and images of the Buddhas.

Publications

Buddhist publications themselves create problems. Numerous books and booklets have been published and distributed as Buddhist literature in many parts of the world. But very unfortunately, it is hard to say whether many of these publications contain any real teachings of the Buddha. Sometimes they create more superstitious beliefs and confusion. On the other hand, some writers try to show their scholarship by bringing forth various speculative issues as an attempt to show the superiority of their particular school and their own scholarship. Then there are the books written by non-Buddhists who deliberately or through ignorance distort the true teachings by misinterpreting what the Buddha taught. If the readers are unbiased and well-informed, they can easily see through these writings and realise that these are the works of unscrupulous intellectual fools who create more confusion among the public and encourage discrimination within the Buddhist community. On the other hand, if the readers have a shallow knowledge of the basic teachings of the Buddha, they may lose confidence in Buddhism after reading such publications. The problem is some writers have commercialised their publications for their personal gain and have never considered the damage that they create by misleading people in the name of Buddhism.

Under such trying conditions where diverse interpretations of Buddhism prevail, we should return to the true Dhamma taught by the Buddha. To distinguish

true Dhamma from other teachings, there is no better way than to use the criteria given by the Buddha himself. Speaking of the test of Dhamma to Maha Pajapati, the Blessed One said:

'These are not Dhamma:

'The teachings and doctrines that conduce to passion, not to dispassion; to bondage, not to detachment; to increase of worldly possessions, not to their decrease; to greed, not to abstinence; to discontent, not to content; to company, not to solitude; to slothfulness, not to energy; to delight in evils, not to delight in good - of such teachings and doctrines you may say firmly: 'These are not Dhamma, This is not the message of the Master'.'

'But these are Dhamma:

'Of whatever teachings and doctrines you can assume yourself that they are the opposite of these things, you may then say firmly; 'These are Dhamma. This is the message of the Master'.'

CONCLUSION

Buddhism originated in India and many Buddhist practices were nurtured according to Indian traditions and environment. Despite its place of origin, the Dhamma or Sublime Teaching that the Buddha expounded is timeless and universal, and is not confined to the Indian sub-continent but is meant for all mankind. He has given all the necessary advice to guide mankind to lead a noble way of life and experience spiritual solace and fulfilment. In his teaching, the Buddha discusses all the existing human problems and the ways to overcome them so that true peace and happiness can be maintained.

There is an urgent need today for Buddhist leaders, writers and devotees to understand that the essence of the Buddha's Teaching is unalterable and constant. We must learn to forget our differences and develop the important fundamental aspects of Buddhist practices which are common to all schools of Buddhism. Buddhism must transcend all national, racial, and cultural barriers.

We must study the Teaching in its original form and mould our lives accordingly. It is through the practice of Dhamma that the real Buddha can be known. The Buddha has said, 'He who sees the Dhamma sees me.' The Dhamma is not a set of teachings for us to accept and believe in, but to try out and see for ourselves. Our Enlightened Master himself said: 'Ehipassiko', that is, 'Come and See!' If we accept the Dhamma as our refuge and guide, we will need no other authority.

"In the unessential they imagine the essential, in the essential they see the unessential, - they who entertain (such) wrong thoughts never realise the essence."

Dhammapada - 11

THE LAST WORDS OF THE BUDDHA

Then the Blessed One addressed the Venerable Ananda: It may be, Ananda, that to some of you the thought may come: "Here are (we have) the Words of the Teacher who is gone; our Teacher we have with us no more". But Ananda, it should not be considered in this light. What I have taught and laid down, Ananda, as Doctrine (Dhamma) and Discipline (Vinaya), this will, be your

teacher when I am gone.

'Just as, Ananda, the bhikkhus now address one another with the word "Friend" (Avuso), they should not do so when I am gone. A senior bhikkhu, Ananda, may address a junior by his name, his family name or with the word "Friend"; a junior bhikkhu should address a senior as "Sir" (Bhante) or "Venerable" (Ayasma).'

Then the Blessed One addressed the bhikkhus: 'It may be, Bhikkhus, that there may be doubt or perplexity in the mind of even one bhikkhu about the Buddha, or the Dhamma, or the Sangha, or the Path, or the Practice. Ask Bhikkhus. Do not reproach yourselves afterwards with the thought: "Our Teacher was face to face with us; we could not ask the Blessed One when we were face to face with him".'

When this was said, the bhikkhus remained silent.

A second time and a third time too the Blessed One addressed the bhikkhus.....as above.

The bhikkhus remained silent even for the third time.

Then the Blessed One addressed them and said: 'It may be, Bhikkhus, that you put no questions out of reverence for your Teacher. Then, Bhikkhus, let friend speak to friend.'

Even at this, those bhikkhus remained silent.

Then the Venerable Ananda said to the Blessed One: 'It is wonderful, Sir. It is marvellous, Sir. I have this faith, Sir, in the community of bhikkhus here, that not even one of them has any doubt or perplexity about the Buddha, or the Dhamma or the Sangha; or the Path, or the Practice.'

'You speak out of faith, Ananda. But in this matter, Ananda, the Tathagata (i.e. Buddha) knows, and knows for certain, that in this community of bhikkhus there is not even one bhikkhu who has any doubt or perplexity about the Buddha, or the Dhamma, or the Sangha, or the Path, or the Practice. Indeed, Ananda, even the lowest in spiritual attainments among these five hundred bhikkhus is a Stream-entrant (Sotapanna), not liable to fall (into lower states), is assured, and is bound for Enlightenment.'

Then the Blessed One addressed the bhikkhus, saying: 'Then, Bhikkhus, I address you now: Transient are conditioned things. Try to accomplish your aim with diligence.'

(From the Mahaparinibbana-sutta of the Digha-nikaya, Sutta No.16)

Revised from an address delivered at the annual Vesak meeting of the Buddhist Vlhara in Washington D.C., on May 13, 1979

Buddhism as a Practical Teaching

Buddhism is a vast and complex subject and volumes have been written on its many aspects. Any subject so vast can be interpreted in different ways by different people. Some could emphasize certain aspects of the teaching and de-emphasize or ignore altogether other aspects. Ultimately each person has his own understanding of Buddhism. In this paper my intention is to try to convey to you my own understanding of the relevance of Buddhism for worldly existence, especially urban existence.

We can say that there are two broad perspectives in understanding Buddhism or any other great message or philosophy. The first is a more or less literary understanding of the sacred texts as the total truth. This is the approach of the unquestioning believer. The second might be called the contextual approach whereby the teaching is related to a particular socio-historical context. In this approach, the words of the teacher are not taken as absolutes. Instead they are understood in the context in which they were spoken, and in terms of such questions as to whom and under what circumstances. Such an approach also implicitly looks at the teacher as an analytically and practically-minded person and not as a divinely inspired prophet. This approach is particularly suitable to the study of Buddhism because the Buddha is unique among the founders of great religions to insist that he was human and not divine, or divinely inspired. In this paper I adopt this second approach.

My theme is selected from the very center of Buddhism. It is the question of mental peace and tranquility, the ultimate version of which is Nirvana. I would like to suggest that the search for such ultimate tranquility is full of meaning and relevance also for proximate tranquility, or peace of mind here and now. In other words, I would like to suggest that the Buddhist teaching is not oriented towards the release from Samsara alone: and that it offers help and solace for the sorrows of the mind here and now, in our present existence. Before coming to the relevance of Buddhism for urban life which is emphasized in this paper, it is necessary to address

ourselves to the large question of its relevance to mundane existence in general. This is necessary because it is sometimes claimed, both by critics of Buddhism and by certain scholars, that Buddhism is only concerned with the spirit, with salvation, and with the other world; and that it has no interest in, or orientation to, human existence here and now; and therefore it is not useful to us in our daily lives. Such a view was expressed by German sociologist Max Weber. Because of his pre-eminent position as a great exponent of social thought, many of his followers have blindly accepted this view, and written long treatises using as a basic premise the idea that Buddhism is indifferent to the social, political and economic world. Writing on what he called "ancient Buddhism," Weber says, "it is a specifically unpolitical and anti-political status religion, more precisely, a religious 'technology' of wandering and intellectually-schooled mendicant monks." Weber thought that Buddhism has no concern with society here and now, and that its only concern is the ultimate concern of "blowing out," or extinguishing the self. This is an extreme view of Buddhism, and we find no basis for such views in the available historical facts of early Buddhism. Why, then, did Weber hold such a view? It is because the sources from which he learnt about Buddhism were second-hand sources, written in English or German by writers who emphasized certain doctrines and left out the social and political background. These writers wrote in this way because they were reacting to the theistic doctrines of their own cultures which they found unacceptable, and were idealizing the rationality of the Buddhist quest. In the process they forgot the human and social content of early Buddhism.

Critics of Buddhism have similarly, without adequate knowledge of the background, considered Buddhism to be selfish and lacking in a positive attitude to contemporary existence. They have considered Buddhism to be concerned with private salvation alone. It is sufficient to say that this cannot be true for the reason that a basic premise of Buddhism is //anatta//, or the rejection of the theory of an individual soul.

Study of the Buddhist sources themselves -- rather than second hand sources -- make it quite clear that the Buddhist teaching is not

concerned with the destiny of the individual, but the whole realm of being, which inevitably encompasses social and political matters. These matters receive copious attention in the teachings of the Buddha as represented in the early Buddhist texts.

A review of the social context of the rise of Buddhism and its early history by reference to the Buddhist texts themselves, will show us that Buddhism, from its inception, was concerned with social and political matters as much as it was concerned with the discipline of the mind with a view to ultimately breaking the chain of causation that binds men to Samsaric existence.

The time of the Buddha was a time of considerable significance from the point of view of political evolution. It was a time when society was experimenting with a new form of government -- monarchy. The existing form of government was republican and the time of the Buddha was a time of transition when both types existed side by side. Some, like the Shakyan republic to which the Buddha was born, were at that time exhibiting features of both forms; they were in an advanced stage in the transition to monarchy. The expanding monarchies were a threat to the continuity of the republics. An equally dangerous threat to them was feuding among themselves.

The republics were located in the middle of the Gangetic plain in a line that stretched from northwest to southeast. They were the republics of the Shakyas, Koliyas, Moriyas, Mallas and Vajjis. All these names are familiar to anyone with even a faint acquaintance with Buddhist literature -- either the canonical literature or the non-canonical works such as the Jataka stories. The Vajjian republic was a loose confederation consisting of such republics as the Licchavis, Videhas and Mallas.

The republics were governed by the elders of the tribal groups that constituted them. Discussion was the method used in making decisions. The leaders met regularly in an assembly known as the Sangha. The Buddha seems to have organized his monastic order on these same lines in which discussion and argument were the basis of decisions: as we all know, his monastic order was known by the same

name -- Sangha. Since the republican assembly or Sangha was the core of their organization the republics were themselves known as Sanghas. These were by no means democracies. The elders were not elected representatives. They were the leading men of the tribe.

We noted that the monarchies were expanding at the expense of the republics. We cannot go into the complex reasons why this was so. Although the Buddhist Sangha itself was organized on republican principles, the Buddha seems to have thought pragmatically and impartially of the monarchy. Perhaps he may have considered an enlightened and powerful monarchy sympathetic to his teaching to be useful in facilitating the spread of the doctrine. This may be the reason why the Buddha maintained close association with the important monarchs of the time. Pasenadi, the King of Koshala, and Bimbisara, the King of Magadha, were close friends and ardent supporters of the Buddha. We read in the literature that Pasenadi visited the Buddha frequently to have discussions with him. It was at Shravasti, the capital of Pasenadi's kingdom that the Buddha delivered the majority of his discourses. Similarly, King Bimbisara, ever since he first met the Buddha, was a firm supporter of the Buddha and Sangha. Now, if we pause for a moment to remember that these two kingdoms -- Koshala and Magadha -- covered most of the lower Gangetic plain, it becomes clear that the Buddha was directly and closely in contact with the two most important political centers of the time. These two kings -- Pasenadi and Bimbisara -- who were the Buddha's disciples, asked him for advice not only on religious and moral matters but also on political and social matters.

The //Maha Parinibbana Sutta// gives a dramatic example. Bimbisara was no longer the King of Magadha. His son, Ajatasatru had ascended the throne. Ajatasatru is about to wage war against the Vajjian republic to the north of his kingdom, across the river Ganges. He sends a messenger to the Buddha, who was at that time residing at Rajagriha, the capital of Magadha, asking for advice. The Buddha's words to the messenger sum up the source of the strength of the republican form of government. His words were that so long as the Vajjians continue to observe their traditions properly and to meet regularly in their republican assembly seeking agreement in all

matters, so long as they honor their elders and maintain their customary rites and ceremonies as a republic, no harm can be done to them. The messenger interpreted this to mean that the Vajjians cannot be militarily defeated but they could be destroyed as a political entity by the subversive means of creating internal strife and dissension, that is, by destroying the essential republican principle of agreement and concord. (Incidentally, this may be the reason why creation of dissension among the Sangha is considered one of five heinous crimes, //anantarya karma//, in Buddhism.) Indeed, soon afterwards, dissension tore apart the Vajjian republic and Ajatasatru was able to annex it to the Magadhan Kingdom. The Buddha's statement was an astute political observation. This is not surprising because the Buddha as Prince Siddhartha was brought up to be a ruler, and by the time he renounced lay life he was already well trained in statecraft and the military arts, like any other heir to a kingdom at that time, So the Buddha was undoubtedly familiar with the concerns of government and it is unlikely that he would have lost all interest in it, especially in view of his close association with kings and other political leaders. Even the most artistic or poetic dreamer has an idea of what society and polity should be -- that is, has a theory of society and political organization, and we all know that the Buddha was no dreamer.

It indeed appears that the Buddha gave careful thought to monarchical and republican forms of government. As we noted, he actively associated with kings, but his own Sangha, the monastic order, he decided to organize on the basis of the original Sanghas or republics. As we noted, the source of strength of the republican form was expressed in the Buddha's evaluation of the Vajjian republic. That source of strength was frequent meeting and reaching agreement on matters relating to government. So, agreement or concord is considered the basis of the Sangha. Even today communities of Buddhist monks, despite organizational elaboration of modern times, preserve the idea of agreement or concord, as seen in such terms as //natti// (resolution) and //sammuti// (agreement) used in monastic deliberations.

So, the Buddhist Sangha is organizationally very different from a

monarchy. Whereas for lay society the Buddha seems to have considered righteous kingship as the suitable form of government, for his own community of disciples he rejected the principle of personal rule. The impression we get is that the Buddha weighed realistically the two organizational forms and rejected the one in favor of the other as the basis of organization of the Sangha. This is a decision that illustrates realistic concern with social order and forms of government, rather than an ascetic indifference to the political affairs of men.

From these large issues of political and social order, if we come down to matters on the other end of the spectrum, such as the affairs of the householder, the Buddha expressed equal knowledge and interest. A good example is found in the text dealing with the question asked by the young householder Sigala, who asks the Buddha for advice regarding his moral duties. The answer given by the Buddha is comprehensive. It shows that Buddhism was neither other-worldly nor solely spiritual nor selfish. Since this advice is so detailed it is sometimes referred to as the Vinaya for the householder, implicitly comparing it to the elaborately detailed code of conduct laid down by the Buddha for the monkhood.

So far, I have tried to show that early Buddhism, contrary to certain opinions, showed ample concern for and knowledge of society here and now. Let us now narrow down this same perspective to bring out the special significance of Buddhism for urban life in general and especially for the life of the large, busy and competitive modern city which most of us have chosen as our home.

Any significant and complex creation of the human mind, such as a philosophy, a theory, or an invention, comes into being due to two broad factors. One is undoubtedly the creativity, the genius, of the mind that conceived it. Very often we are content with emphasizing this factor alone. There is no doubt that all due credit must go to the creator of an idea. But we must not forget that there is another factor. This factor is the times, the environment, or the state of thinking in the context of which the new theory or philosophy appears. If we think for a moment of the field of science, it is easy to

realize that theory could not come into being except for the existing theory or theories which the new theory is replacing. This is what we mean by the expression that a given thinker stands on the shoulders of his predecessors. This is so even if the thinker rejects his predecessors, because rejection of a theory is often only partial and there is always a corner of the foundation of the demolished theory on which the new theorist can build profitably. Indeed, by the advancement of knowledge we mean nothing but the partial replacement of old theories by new ones. But the new theories are possible only because old theories were there for the new theories to demolish. The physics of Einstein was made possible, because the physics of Newton was already there. We say science is cumulative.

When we come from the physical and natural sciences to the social sciences and philosophies, it is abundantly clear that theories or philosophies arise -- without forgetting individual genius -- not only from pre-existing knowledge, but even more demonstrably, from the social and economic environment. For example, I do not think you would quarrel with me if I were to say that //Das Kapital//, the great work of Karl Marx, could not have been written in ancient India or Greece or even in Medieval Europe. We can indeed say that //Das Kapital// could have only been written in a post-industrial European country which had established a certain type of production relations. We are making a similar statement when we say that Hobbes' //Leviathan//, is a justification of the nation-state and its armed guardian, the absolute monarch. There is no great work dealing with man and his society that cannot be partially explained with reference to its social origin.

If we adopt a truly inquiring spirit we must look at the Buddhist doctrine, which is a philosophy of man, society, and of human destiny, in the same way, that is, we must partially understand it in relation to the social, political and economic environment in which it came into being. What was the nature of this environment?

About the time of the Buddha there was an increase in agricultural activity in the area, that is, the middle Gangetic plain. This means the opening up of forest land for agriculture. A clear result of this

kind of change is demographic change. With nomadic peoples, population density is low. But with extensive cultivation, a given area can support -- especially with rice cultivation -- a much higher density. The pastoral diet of meat and milk also would have been replaced by rice which we today associate with higher human fertility. This would have in turn given rise to opening up of more land, and this process seems to have given rise in some areas to an urban pattern of social life. By the time of the Buddha several big cities, such as Shravasti, Saketa, Kaushambi, Kashi (Varanasi), Rajagriha and Champa were already in existence. Further, there was a whole constellation of smaller cities such as Kapilavastu, Vesali, Mithila, and Gaya. These cities and towns were centers of industry and trade. They had guilds of wood-workers, iron-workers, leather-workers, painters, ivory-workers and so on. These guilds seem to have been organized bodies with effective control over their membership -- like trade unions. The cities were also political and administrative centers. They were busy places because of either their strategic location or their proximity to some natural resource such as iron-ore. From these facts we can infer that these cities had developed a style of life that is distinct from that of the rural areas. In addition to being political and business centers, these cities were centers of learning; and they also supported typically urban forms of entertainment such as theatre, dance, singing, gambling, alcohol, and prostitution. In other words, they had developed some of the characteristic features of city life that we have today, in our own cities.

I have referred to the two forms of government -- monarchist and republican -- and noted that this was a period of transition from republicanism to monarchy. That is, the republican form was in decline. It is of great interest to look at the causes of this decline, and we have no better analysis than the Buddha's evaluation of the chances of survival of the Vajjian republic which we have already referred to. The Buddha's words were that if the Vajjians respected their elders, if they held the customary republican rites, if they met regularly and reached agreement, then their republic would be invincible. In sum, the republic would survive so long as there was agreement and concord. This statement is a clue to an important social process that was taking place, because the Vajjian republic was soon

vanquished, not so much by the enemy's sword, but by the internal dissension of its elite, that is by lack of agreement, lack of concord. What does this mean? What is the meaning of the absence of concord? It can only mean one thing -- that the individual will had triumphed over the collective will, over agreement, over concord. When there was concord there was a suppression of the individual will in favor of the collective will. When concord ceased to exist, the individual will was set free to assert itself in competition with each other. Republicanism gave way to monarchy where individuals claimed private authority in their own relatively higher or lower status positions. So, we seem to be confronted with a set of interrelated factors -- the increase of population, the rise of urbanism and the rise of individualism. These are classic features of a syndrome that could bring about social turmoil, dislocation and confusion referred to by sociologists as //anomie//, a state in which the norms of society are called into question, giving rise in the individual members of the society to a heightened sense of dislocation, isolation and anxiety. These are characteristic problems of our own urban civilization today, for which we as a society seek remedy in various rehabilitative and preventive programs, and as individuals in therapy and stimulative or antidepressive medicines which we are told from time to time, could be harmful. It is with this picture of the social background in mind that we must return to our discussion on the rise of Buddhism. When we do so we can see how Buddhism provided & soothing remedy for the society's dislocations and confusions. We can see Buddhism as a response to this social illness. It is tempting to refer to some of the early sculptures where the Buddha is depicted as //bhesajja guru// or a doctor who cures the ills of the world.

Certain Buddhist myths of origin of private property express with particular clarity the ills of individualism. According to one of these myths, in the beginning there was an idyllic state when a self-generating and exquisite variety of rice sprang from the earth and was freely available to everyone. The earth was made of sugar. So, two of the commodities that people from oriental countries love -- rice and sugar -- were freely and abundantly available. It was common property. There was no notion of individual ownership. Suddenly, greed or the desire for individual ownership arose, that is, individualism

emerged subjugating the common will and consent. And people started partitioning the earth and fencing plots of land as individually owned. As a mystical punishment for this greed, the rice stopped growing by itself and the earth lost its sugary taste. The idyllic state came to an end and ever since man had to till the soil, use fertilizer, sow the seed, reap the harvest, thresh it and do all kinds of other exacting tasks to earn a living. The moral of the story is very clear. Uncontrolled individual desire and greed had brought about misery.

When we place the Buddhist doctrine into this context some of its ideas become more and more intelligible. For example, we can look at the doctrine of //anatta// or the "no-soul theory" as it is sometimes called. Of all great religions Buddhism alone denies the existence of a private, individual soul. Indeed, the entire effort of the Buddhist is to undermine and erode the idea of a permanent individual personality. If one were to consider the individualism of the urban society as an important cause of an increased sense of dislocation and anxiety among its members, it is no surprise that a remedial doctrine emphasizes the need to abandon the ego-centrism and the inordinately high evaluation of the individual. What would be a more effective way of doing this than by a philosophical denial that the individual exists?

At this point we may digress into the Buddha's decision to organize his monastic order along non-individualist lines. We have discussed at some length the two alternative forms of social and political organization -- the monarchist and the republican. The monarchist form seems to have arisen, we noted, as a result of the subordination of the collective will and the rise of the individual will. We also noted that the Buddha may have considered an enlightened and righteous monarchy to be beneficial to the spread of the Dhamma. But as a form of social organization for his monkhood of disciples, he clearly preferred the republican form where the assertion of the individual will was given no place, and where agreement and concord, and therefore, the assertion of the collective will was given emphasis. In other words, by organizing the, monastic order as a non-authoritarian order, or as a Sangha, the Buddha seems to have

expressed the idea that unbridled individualism was not a way to organize a society of persons in search of mental tranquillity.

To return to our discussion of doctrinal concepts, we may look at //tanha// or attachment, one of the causes of suffering. Attachment could be for anything and when coupled with individualism, it would be greatly intensified, Because, the more you designate certain things as your own and no one else's, the more you expect it to be so, and the greater the anxiety in your attempt to protect and preserve that claim, and the greater the suffering when you lose it. On the other hand, if one could devalue the notion of 'mine', the notion of personal belongingness, one would develop an equanimity, which would shelter one from the anxiety of attachment.

The fact that Buddhism in its social concern, was probably a response to urbanism is further seen if we reflect on the fact that the Buddha's teaching was mostly conducted in the cities. Except for the brief period in which he experimented with asceticism and the time he temporarily journeyed to the countryside, the Buddha lived in urban surroundings. It was near the great metropolitan center of Benaras that he expounded the //Dhammacakkappavattana Sutta//, the Setting in Motion of the Wheel of the Dhamma, popularly known as the First Sermon. From there he returned to Rajagriha, the capital of Magadha, another big city. We know from the information given in the discourses themselves that the vast majority of the discourses were delivered in the two big cities of Rajagriha and Shravasti. We can also infer that he resided mostly in the city of Shravasti. He first went there at the invitation of the merchant and banker Anathapindika. Anathapindika first met the Buddha when he was on a visit -- very likely a business visit -- to Rajagriha where the Buddha was residing at the time. When Anathapindika returned to his home city of Shravasti, he bought a piece of land at a very high price -- we know that real estate prices are high in big cities -- and built a suitable monastery in anticipation of the Buddha's visit. This monastery, or vihara, is the celebrated Jetavana, where the Buddha was to preach many discourses in the subsequent years. The Buddha spent twenty-five Vassa or rainy seasons at this vihara. Rajagriha, the capital of Magadha was then ruled by king Bimbisara who, as we noted, was a close friend of the

Buddha. Even when the Buddha was living in Shravasti, he made frequent visits to Rajagriha. Many important discourses were delivered in Rajagriha, where there were eighteen large monasteries. That there were so many monasteries lends support to the view that the urban center was the fertile ground in which early Buddhism thrived.

The city depicts in clear relief the cause of suffering -- a heightened sense of the individual and resulting desire. This causes confusions, anxieties and a sense of deprivation in day-to-day living. But this is not all. The same cause -- desire or //tanha//, according to Buddhist thought, results in ultimate suffering of continuing rebirth in Samsara. If desire is both the cause of suffering in this world and ultimate suffering as Buddhism understands it, that is continuing re-birth in Samsara, then our attempts to eradicate desire for the purposes of getting rid of Samsaric existence also should help us in getting rid of our confusions, anxieties and our sense of deprivation in //this// world, here and now.

The Buddhist method of eradicating the cause of suffering is through mental discipline which will lead the practitioner to //upekkha// or equanimity. By equanimity we mean the ability to remain, as the Maha Mangala Sutta puts it, "...unshaken when touched by the way of the world." The "way of the world" is that there is both pleasure and pain in it. In our day-to-day life, when something pleasurable happens, we are thrilled and overjoyed; and when we have a painful experience we are greatly depressed. We react excessively to both experiences. Equanimity is the ability to remain unmoved either way and maintain a balanced outlook. This is the secret of happiness. This state can be reached according to Buddhism, only by achieving control over one's own mind through systematic meditation and concentration. Concentration is simply a technique of tying up the mind that otherwise runs wild.

It is easy to intellectually understand that meditation will train our minds to //upekkha// or equanimity. I think we all understand this. But understanding is different from realization. Realization is difficult. To give an example, we all know that our minds get attracted to a thing of beauty, whether it is a beautiful creation, or

a beautiful thing or a beautiful person. Similarly, we know that we are repelled by a thing that is ugly and unpleasant. This happens every time. We intellectually understand this. But that is not enough. To achieve equanimity we must realize that such attraction and repulsion is the way with the mind. But it can and should be brought under control. We must think of the mind as if it were something exterior to ourselves. Then it would be a phenomenon that we could objectively see. If we can achieve this state, we have achieved the ability to remain relatively calm and unmoved when confronted with the ways of the world. Then we would neither be unduly attracted by beauty nor unduly repelled by ugliness. That is a consummation devoutly to be wished.

For the follower of the Dhamma, mental discipline shortens samsaric suffering. But it can also relieve us of anxiety here and now, because it trains our minds to achieve //upekkha// or equanimity in the face of worldly happenings. If so, it is a healthy alternative to professional therapeutic help or tranquilizing drugs for relieving our anxieties and stresses. When we look at Buddhism this way we have an answer to the sceptics -- Buddhist or non-Buddhist -- who do not believe in a life hereafter. If you succeed in disciplining your mind to achieve equanimity, then you have conquered yourself, and reached peace and tranquillity within yourself. Mental discipline is simply a piece of knowledge we have, a technique with which we may combat the restlessness, indiscipline and the lack of decorum of our minds, and the resulting states of anxiety and disturbance. One does not have to be a Buddhist or believer in re-birth to make use of that technique. It is a question of the existence of problem and a way of solving it. It does not matter whether one is Buddhist, non-Buddhist, atheist or sceptic. Meditative technique is not a matter of faith, it is a matter of putting the technique to use. It is not an object of veneration, it is a method foe gaining one's own peace of mind. It is a road to tranquillity without tranquilizers. Although hermitages may be located in forests, it is no wonder that to-day meditation movements are urban phenomena, and the occupants of forest hermitages are not peasants but, most of the time, city people.

The believer knows that meditation will stand him in good stead in

his sojourns in Samsara. The sceptic -- if he trains his mind -- will reap the same benefits if it turns out that, contrary to his beliefs, re-birth is a fact, and he is reborn. If not, meditation would still bring him peace of mind here and now in this world. We can confidently echo the Sinhalese poet Alagiyavanna, the author of //Subhasita//, that "irrespective of whether there is another existence or not, it is not a bad idea to do good deeds."

THE BUDDHIST PUBLICATION SOCIETY

The BPS is an approved charity dedicated to making known the Teaching of the Buddha, which has a vital message for people of all creeds. Founded in 1958, the BPS has published a wide variety of books and booklets covering a great range of topics. Its publications include accurate annotated translations of the Buddha's discourses, standard reference works, as well as original contemporary expositions of Buddhist thought and practice. These works present Buddhism as it truly is -- a dynamic force which has influenced receptive minds for the past 2500 years and is still as relevant today as it was when it first arose. A full list of our publications will be sent upon request with an enclosure of U.S. $1.00 or its equivalent to cover air mail postage.

.....Beginning of file.....

THE SONG OF CH'AN TAO CHIA
(THE PRECEPTS OF ZEN TAOISM)

Have compassion for all sentient beings,
causing them no unnecessary hurt, nor needless harm.
Refrain from needless competitiveness,
from contriving for self-advantage,
and from subjugating others.

When accepting authority over others,
know also that you accept responsibility for their wellbeing.
Value true friendship, and fulfill your obligations,
rather than striving with egotistical motive.

Seek liberation from the negative passions
of hatred, envy, greed and rage,
and especially from delusion,

deceit and sensory desire.
Learn to let go of that which cannot be owned,
or which is destroyed by grasping.

Seek the courage to be;
defend yourself, and your convictions.
Accept transience, the inevitable and the irrevocable.
Know that change exists in everything.
Negate the barriers to your awakening;
discover the positive in the negative,
and seek a meaningful purpose in what you do.

Be just and honourable;
take pride in what you do,
rather than being proud of what you have accomplished.
Having humility and respect,
give thanks to those from whom you learn,
or who have otherwise helped you.
Act in harmony with your fellow beings,
with nature, and with inanimate objects.

Know that a thing or an action
which may seem of little value to oneself,
may be a priceless treasure to another.
Help those who are suffering or disadvantaged,
and as you yourself become awakened,
help those who seek to make real their own potential.
Know that there is no shame in questioning.
Be diligent in your practice,
and on hearing the music of the absolute,
do not be so foolish as to try to sing its song.
Remember to renew the source,
in order to retain good health.

Seek neither brilliance nor the void;
just think deeply, and work hard.
When still, be as the mountain;
when in movement be as the dragon riding the wind.

Be aware at all times,
like the tiger which only seems to sleep,
and at all times let the mind be like running water.

When you are required to act,
remember that right motive
is essential to right action,
just as right thought is essential to right words.
Beware of creating burdens
for yourself or others to carry.
Act with necessary distinction,
being both creative and receptive,
and transcending subject/object dichotomy.

Know that you are not the centre of the universe,
but learn to put the universe at your centre
by accepting the instant of your being.
Seek security within yourself,
rather than in others.
Know that even great worldly wealth,
and the accumulation of material things
are of little worth,
compared with the priceless treasures;
love, peace and the freedom to grow.

Allow yourself to be,
so that your life may become a time of blossoming.

[Last updated: 27 November 1993]

The Zen Buddhist texts listed below have been translated from Japanese
and rendered into a thoughtful English by the Diamond Sangha members,
Honolulu, Hawaii headed by Robert Aitken Roshi. Although the basic work
was done in the 1970s and the 1980s translations of some of the texts
are not final as they tend to continue to be improved on and refined.
These texts are used with gratitude and delight by members of several
affiliated Zen centers and communities, including California Diamond
Sangha, Santa Rosa and Berkeley, USA (headed by John Tarrant Roshi);
Sydney Zen Center, Australia, and the Zen Group of Western Australia,
Perth, Australia.

[The final authoritative version of the sutras - as translated in Dec
1991 by Robert Aitken Roshi can be now found in the document called:
diamond-sangha-zen-sutras.txt available from the coombspapers at the
above internet address, or DIA-SANG.ZIP from DharmaNet.]

==========
ZEN BUDDHIST PRECEPTS
Sydney Zen Centre, 251 Young St., Annandale, Sydney NSW 2038, Australia
==========

THE THREE PURE PRECEPTS
With Commentaries from the Kyojukaimon

Keep all precepts.

This is the cave where all Dharmas of all Buddhas arise.

Practise all good Dharma.
This is the root-origin whence all Buddhas and Dharmas arise.

Save the many beings.
The Dharma of the Supreme Way is the way to do and have done.

==========

THE THREE VOWS OF REFUGE
With Commentary from the Kyojukaimon

I take refuge in the Buddha;
I take refuge in the Dharma;
I take refuge in the Sangha.

The Great Precepts of all the Buddhas have been maintained and protected by all the Buddhas. Buddhas hand them down to Buddhas, and Ancestral Teachers hand them down to Ancestral Teachers.
Acceptance and observance of the Precepts transcends past, present, and future, and the perfect accord between the realization of teacher and disciple, and continues through all ages.

Our great teacher Shakyamuni Buddha imparted them to Mahakashyapa, and Mahakashyapa transmitted them to Ananda.
Already the Precepts have passed through many generations in direct succession, reaching down to the present head of this temple.

Now, receiving the Great Precepts, I vow to requite my deep obligation to the Buddhas and Ancestral teachers. I pledge to establish these Precepts as essential teachings for human beings and all other beings so that eventually all will inherit the wisdom of the Buddha.

==========

THE TEN GRAVE PRECEPTS

With Commentaries by Bodhidharma and Dogen Zenji

1. Not Killing.
Bodhidarma: Self-nature is subtle and mysterious. In the realm of the everlasting Dharma, not giving rise to the ideal of killing is called the Precept of Not Killing.
Dogen Zenji: The Buddha seed grows in accordance with not taking life. Transmit the life of Buddha's wisdom and do not kill.

2. Not Stealing.
Bodhidharma: Self-nature is subtle and mysterious. In the realm of the unattainable Dharma, not having thoughts of gaining is called the Precept of Not Stealing.
Dogen Zenji: The self and things of the world are just as they are. The gate of emancipation is open.

3. Not Misusing Sex.
Bodhidharma: Self-nature is subtle and mysterious. In the realm of the ungilded Dharma, not creating a veneer of attachment is called the Precept of Not Misusing Sex.
Dogen Zenji: The Three Wheels are pure and clear. When you have nothing to desire, you follow the way of all Buddhas.

4. Not Lying.
Bodhidharma: Self-nature is subtle and mysterious. In the realm of the inexplicable Dharma, not preaching a single word is called the Precept of Not Lying.
Dogen Zenji: The Dharma Wheel turns from the beginning. There is neither surplus nor lack. The whole universe is moistened with nectar, and the truth is ready to harvest.

5. Not Giving or Taking Drugs.
Bodhidharma: Self-nature is subtle and mysterious. In the realm of the intrinsically pure Dharma, not giving rise to delusions is called the Precept of Not Giving or Taking Drugs.
Dogen Zenji: Drugs are not brought in yet. Don't let them invade. That is the great light.

6. Not Discussing Faults of Others.
Bodhidharma: Self-nature is subtle and mysterious. In the realm of the flawless Dharma, nor expounding upon error is called the Precept of Not Speaking of Faults of Others.
Dogen Zenji: In the Buddha Dharma, there is one path, one Dharma, one realization, one practice. Don't permit fault-finding. Don't permit haphazard talk.

7. Not Praising Yourself While Abusing Others.
Bodhidharma: Self-nature is subtle and mysterious. In the realm of the equitable Dharma, not dwelling upon I against you is called the Precept of Not Praising Yourself while Abusing Others.
Dogen Zenji: Buddhas and Ancestral Teachers realize the empty sky and the great earth. When they manifest the noble body, there is neither inside nor outside in emptiness. When they manifest the Dharma body, there is not even a bit of earth on the ground.

8. Not Sparing the Dharma Assets.
Bodhidharma. Self-nature is subtle and mysterious. In the genuine, all-pervading Dharma, not being stingy about a single thing is called the Precept of Not Sparing the Dharma Assets.
Dogen Zenji: One phrase, one verse--that is the ten thousand things and one hundred grasses; one dharma, one realization--that is all Buddhas and Ancestral Teachers. Therefore, from the beginning, there has been no stinginess at all.

9. Not Indulging in Anger.
Bodhidharma: Self-natue is subtle and mysterious. In the realm of the selfless Dharma, not contriving reality for the self is called the Precept of Not Indulging in Anger.
Dogen Zenji: Not advancing, not retreating, not real, not empty. There is an ocean of bright clouds. There is an ocean of solemn clouds.

10. Not Defaming the Three Treasures.
Bodhidhrma: Self-nature is subtle and mysterious. In the realm of the One, nor holding nihilistic concepts of ordinary beings and sages is called the Precept of Not Defaming the Three Treasures.
Dogen Zenji: The teisho of the actual body is the harbour and the weir.

This is the most important thing in the world. Its virtue finds its home in the ocean of essential nature. It is beyond explanation. We just accept it with respect and gratitude.

PREFACE

To study ancient texts is like visiting a foreign city: Time & inclination determine whether you want a quick, pre-packaged tour of the highlights, a less structured opportunity for personal exploration, or both. This book on the connotations of the words nibbana (nirvana) & upadana in the early Buddhist texts is organized on the assumption that both approaches to the topic have their merits, and so it consists of two separate but related parts. Part I, The Abstract, is the quick tour--a brief survey to highlight the main points of the argument. Part II, The Essay, is a chance to make friends with the natives, soak up the local atmosphere, and gain one's own insights. It takes a more oblique approach to the argument, letting the texts themselves point the way with a minimum of interference, so that the reader may explore & ponder them at leisure. Part I is for those who need their bearings and who might get impatient with the seeming indirection of Part II; Part II is for those who are interested in contemplating the nuances, the tangential connections & the sense of context that usually get lost in a more structured approach.

Either part may be read on its own, but I would like to recommend that anyone seriously interested in the Buddha's teachings take the time to read reflectively the translations that form the main body of Part II. People in the West, even committed Buddhists, are often remarkably ignorant of the Buddha's original teachings as presented in the early texts. Much of what they know has been filtered for them, at second or third hand, without their realizing what was added or lost in the filtration. Although the quotations in Part II, by their sheer length & numbers, may at times seem like overkill, they are important for the context they give to the teachings. Once the teachings have context, one can have a surer sense of what is true Buddha Dhamma and what are filtration products.

This book has been many years in preparation. It began from a casual remark made one evening by my meditation teacher--Phra Ajaan

Fuang Jotiko--to the effect that the mind released is like fire that has gone out: The fire is not annihilated, he said, but is still there, diffused in the air; it simply no longer latches on to any fuel. This remark gave me food for thought for a long time afterwards. When I came to learn Pali, my first interest was to explore the early texts to learn what views they contained about the workings of fire, and how these influenced the meaning of nibbana--literally, 'extinguishing'--as a name for the Buddhist goal. The result of my research is this book.

Many people have helped in this project, directly or indirectly, and I would like to acknowledge my debts to them. First of all, Phra Ajaan Fuang Jotiko, in addition to being the original inspiration for the research, provided me with the training that has formed the basis for many of the insights presented here. The example of his life & teachings was what originally convinced me of Buddhism's worth. A.K. Warder's excellent Introduction to Pali made learning Pali a joy. Marcia Colish & J. D. Lewis, two of my professors at Oberlin College, taught me--with no small amount of patience--how to read & interpret ancient texts. Ven. Bhikkhu Bodhi, Donald Swearer, John Bullitt, Margaret Dornish, Robert Ebert, Michael Grossi, Lawrence Howard, & Doris Weir all read earlier incarnations of the manuscript and made valuable suggestions for improvements. I, of course, am responsible for any mistakes that may still remain.

Finally, I would like to dedicate this book in gratitude to my father, Henry Lewis DeGraff, and to the memory of my mother, Esther Penny Boutcher DeGraff, who taught me the value of truth, inner beauty, & goodness from an early age.

ABBREVIATIONS

Vedic Texts:

AV	Atharva Veda
BAU	Brhadaranyaka Upanisad
ChU	Chandogya Upanisad
KathU	Katha Upanisad
KauU	Kausitaki Upanisad
MaiU	Maitri Upanisad
RV	Rg Veda
SvU	Svetasvatara Upanisad

Pali Buddhist Texts:

A	Anguttara Nikaya
D	Digha Nikaya
Iti	Itivuttaka
Khp	Khuddaka Patha
M	Majjhima Nikaya
Mv	Mahavagga
S	Samyutta Nikaya
Sn	Sutta Nipata
Thag	Theragatha
Thig	Therigatha
Ud	Udana

References to D, Iti, Khp, M are to discourse (sutta). The reference to Mv is to chapter, section and sub-section. References to other Pali texts are to section (samyutta, nipata or vagga) & discourse.

All translations are the author's own. Those from the Pali Canon are from the Royal Thai Edition (Bangkok: Mahamakut Rajavidyalaya, 1982).

Terms marked in the text with an asterisk (*)are explained in the End Notes.

Because Pali has many ways of expressing the word 'and,' I have--to avoid monotony--used the ampersand (&) to join lists of words & short phrases, and the word 'and' to join long phrases & clauses.

PREFACE

This book is an attempt to give an organized, detailed account of the Patimokkha training rules and the tradi-tions that have grown up around them. It is aimed those whose lives are affected by the rules -- bhikkhus who live by them, and other people dealings with the bhikkhus -- so that they will be able to find gathered in one volume as mu information as possible on just what the rules do and do not entail. Students of Early Bu Theravadin history, or contemporary Theravadin issues should also find this book interesti anyone who is serious about the practice of the Dhamma and wants to see how the Bud ramifications of Dhamma practice in daily life. The amount of information offered here the book's strength and its weakness. On the one hand, it encompasses material that in otherwise unavailable in Eng-lish or even in romanized Pali, and should be sufficient to se life-long companion to any bhikkhu who seriously wants to benefit from the precise and t training the rules have to offer. On the other hand, the sheer size of the book and the mas to be remembered might prove daunting or discouraging to anyone just embarking on the

To overcome this drawback, I have tried to organize the material in as clear-cut a ma possible. In particular, by analyzing each rule into its component factors, I have tried to sh the rule's precise range but also how it connects to the general pattern of mindfully analy own actions in terms of such factors as intention, perception, object, effort, and result -- a that plays an important role in the training of the mind. Secondly, I have provided short for the rules and have gathered them, organized by topic, in the Rule Index at the back of If you are new to the subject of Buddhist monastic discipline, I suggest that you read the R first, to grasp the gist of the rules and their rela-tionship to the Buddhist path, before goir the more detailed discussions in the body of the book. This should help you keep the gen the rules in mind, and keep you from getting lost in the mass of details. I am indebted many people who helped directly and indirectly in the writing of this book. Phra Ajaan Fua (Phra Khru Nanavisitth) and Phra Ajaan Thawng Candasiri (Phra Nanavisitth), my first tea gave me a thorough grounding in the subject. Ven. Brahmavamso Bhikkhu gave many ho writing detailed criticisms of early versions of the manuscript during the long period of rese led up to the book, forcing me to deepen my knowledge and sharpen my presentation of was a brief period when he and I thought of co-authoring the book, but the many questions be settled concerning form and content eventually required that one person go it alone, a lot to be that person. Still, much of the precision of the book is a result of his efforts, even cases where I had to differ with his opinions. As the manuscript began to approach its Ven. Phra Nanavarodom, Bhikkhu Bodhi, Thiradhammo Bhikkhu, Amaro Bhikkhu, Suvir and Doris Weir all read copies of it and offered valuable suggestions for improvement. I, o remain responsible for any errors it may still contain. I dedicate this book in gratitude respect to my preceptor, Phra Debmoli (Samrong Gunavuddho) of Wat Asokaram, Samut and to all my teachers in the path of the Dhamma-Vinaya.

If one regards himself superior or equal or inferior by reason of the body that is impermanent, painful and subject to change, what else is it than not seeing reality? Or if one regards himself superior or equal or inferior by reason of feelings, perceptions,

volitions or consciousness, what else is it than not seeing reality? If one does //not// regard himself superior or equal or inferior by reason of the body, the feelings, perceptions, volitions or consciousness what else is it than seeing reality?

//From the Discourses of the Buddha,
Khandha-Samyutta No. 49//

* * * * * * * *

WHAT CAN BE DONE ABOUT CONCEIT?

Dr. Elizabeth Ashby

In Christian literature of the lighter sort we sometimes come across the expression "Little Devil DOUBT." This personage is not known to Buddhists, but another little devil can be still more devastating. He is an ugly little Mara, named CONCEIT. Unlike his big brother Pride, who is not lacking in dignity, Conceit is a mean, slinking little devil, lurking in dark corners and always ready to rush out and nip our heels. Doubt is slain when the disciple wins the stream: Conceit being a manifestation of Pride, remains a menace to the very end.

Pride in all its forms, devolves from self-esteem, which is in reality "ego-worship." It stems, so they say, from Greed, the first of the Roots of evil. The thought here is rather subtle: when the ordinary person thinks of greed he thinks first of what one puts into one's tummy --that second helping of plum-pudding, or the consumption of a pound of candies in a single evening. The commentators of old were much more drastic. Greed is "delight in one's own possessions." Hence we can be greedy about anything to which we have affixed the label "mine." My car, my table, my cat, my best beloved. The Greedy aspect of Conceit is recognized when we realize we are "taking delight" in our own good qualities or capacities.

Conceit can arise from the most trivial cause. One completes a piece of work, and having made a good job of it, one is naturally pleased. There's no harm in that: we all know the difference between a worker whose only interest is his pay-packet, and the man who takes pride in his work. The trouble arises when we begin to make comparisons -- "X. couldn't have done it half as well." That may be quite true, but it is dangerous to think that because one's skill is superior in a single instance that one is therefore a better person. That is "Superiority Conceit," and it has its counterpart in the "Inferiority Conceit" of the unsuccessful person, and the "Equality Conceit" of the man who says "I'm as good as you." With the underlying implication "And a good deal better!"

A feeling of superiority is a very pleasant mental state, but it is essentially //akusala// -- unhealthy and unskilled, highly dangerous in its results.

Any conceit that arises in connection with the practice of Dhamma is much to be deplored. This sometimes occurs when students are making good progress in their studies. Some queer experience or flash of "insight" is assumed to be a sign of virtue or an advance towards Higher Consciousness, and the student, instead of checking up on his experience with a wise teacher, jumps to the conclusion that he is half-way to being an Arahant. We do well to remember that no two people have exactly the same experience in regard to meditation practice. The was recognized in the Buddha's own day : Sariputta was revered for his wisdom, and Moggallana for his psychic powers, but both were venerated as "Great Beings."

Conceit is very prone to arise when one is praised for some particular work or mental quality. Within limits praise from a knowledgeable person is stimulating and encouraging; some people who are modest or diffident by nature can only work well when they are appreciated. The trouble is that too much praise, particularly if it borders on flattery, stimulates the sense of "I"-ness. The ego sticks out its chest and feels two inches taller; it has a delicious feeling of security and believes itself to be invulnerable!

This is the nasty sort of pride that the ancient Greeks called //hubris//; it was looked upon as an insult to the gods, and when the Olympians found a man suffering from it they unloosed Nemesis, the goddess of revenge, who brought him to death or destruction.

The cultivation of humility is not easy; there's a temptation to indulge in mock-modesty, and untruthfully disclaim any real achievement, and still worse to be conceited about not being conceited. It is wiser, I think, to tackle Conceit at its first uprising; if one can do that, then Humility will develop in the natural course of events.

For our comfort we find that much can be done to curb the activities of this persistent Mara. Pride has been aptly described as the "giant weed." We may grub up a few roots in this life-span, but the thing has already gone to seed and will appear in the future.

One year's seeds,
Seven years weeds,

say the old gardeners. If we acquire the habit of eradicating conceit in this life, the habit will travel on in our sankharas and bear good fruit in future lives.

Methods

(1) Recognize Conceit whenever he pops up and //name// him. This as readers will remember is the advise given by Nyanaponika Thera in his valuable articles in "Sangha." Mara, like Satan, hates to be recognized. This practice is doubly effective because it "keeps one on one's toes," and induces a real dislike of the tendency.

(2) Get back to the first two "steps" of the Noble Eightfold Path (a) Right Understanding of the mental quality or capacity involved: to see according to reality "This (quality) is not mine; I am not this; there is no self in it"; (b) Right Aspiration towards the expunging of Conceit. In the Discourse on Expunging (Majjh. Nik. I.8)

we read "Now I say that the arising of thoughts is very helpful in regard to skilled states of mind. Therefore the thought should arise 'Others may be harmful; as to this we will not be harmful' and so on for all our evil propensities. Others may be conceited; but we as to this will not be conceited.'"

The method of analysis is also helpful. "I" am being praised for some real or imagined virtue, say generosity. Generosity is non- greed (//alobha//) one of the Good Roots, and as such appears in the list of dharmas given in the Abhidharma philosophy. According to Mahayana "All dharmas are empty of own-being" -- that is to say they are non-existent. Therefore "I" am being praised for something which doesn't exist. This is so absurd that it knocks the bottom out of my conceit.

Alternatively "I" am the result of past kamma. My talents are not due to my own virtue, but have arisen on account of the skilled actions performed by vanished personalities whose kammic descendant "I" am. Therefore it is silly of me to be conceited about qualities which are not in any real sense "mine."

Again and again in the suttas we find the expression "Thus must you train..." This is Buddhist mental culture: it is Right or Supreme Effort to put down unskilled mental states and prevent them rising in the future, and furthermore to encourage the arising of skilled states.

A word of warning may not be out of place here. It is inadvisable to dwell too much on our so-obvious faults. By unwisely reflecting on them we encourage them to root themselves still more firmly in our unconscious (i.e our //sankharas//). Instead remember the advice of Paul the Apostle "Whatsoever things are true, whatsoever things are honest... whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, if there be any praise, //think on these things//." We as Buddhists have the Buddha Dhamma to think about -- "lovely in the beginning, lovely in the middle, lovely in the ending." This as Dr. Henn Collins has pointed out is the true philosopher's stone whose alchemy will transmute the base metal of our ordinary consciousness into the gold of Enlightenment.

From "The Sangha" The Journal of
the English Sangha Association, III,11.

* * * * * * * *

THE MASTERY OF PRIDE

By Brian Fawcett

Few of us are free from Pride in one form or another. We know that in the interests of spiritual development it must be killed out. We are taught as much, and accept the teaching without question. But the method by which Pride may be eliminated is a problem not easy to solve, and the indirect, sweeping precepts of the sages are of little practical help to us. It is all very well saying: "Kill out this, and kill out that," but what we want to know is, how may we go about it?

In the first place: what //is// Pride?

Let us call analogy to our aid. Regard pride as a weed, propagating itself with alarming fecundity in the garden of the mind. Its root is not visible, but the flowering shoots are in plain view. Cut down these shoots and either they grow again or the roots puts out new ones. The only way to destroy it is to dig it up altogether. That root is //Self-Esteem//. From it grow the roots of //Conceit, Boastfulness, Ambition, Jealousy, Envy and Intolerance//. There are others, but let us take these six manifestations for the sake of discussions. Unbiased, detached self-scrutiny will disclose what others may exist in one's own character, and it is unlikely that all will be found equally developed. There is cause for alarm when we discover them in ourselves. Pride is invariably despised when observed in others, yet we sometimes boast of possessing it. "I have my pride, you know," is a

common assertion.

Beneath every manifestation of Pride, lies //Self-Esteem//. It is the conviction of superiority over others -- the feeling that we are what they are not, or that we can do what they cannot do. Successes in early childhood may sow the seeds of it. The praise of relatives fosters it. Once planted, it grows, and not even the flattening criticism by one's own contemporaries in adolescence can stop it. By and by it becomes a habit to compare oneself with the people one meets or passes in the street, generally to their disadvantage. What we know of our own accomplishments is measured by what we presume they lack. We think we know our friends inside and out, and our judgments are based on a firm belief in the infallibility of our perception. There is a tendency to group those who are not obviously outstanding under the heading of "Ordinary People," and sometimes to place them in the inferior category for no more reason than that they look as if they belong there. How often we hear the remark: "He seems so ordinary, but when you get to know him there's a lot in him!" We are surprised to see our spot judgement wrong -- that there really is something in that very ordinary-looking person. Can we honestly claim to be free of this habit of automatically comparing others with our own ideas of ourselves? If so, then //Self-Esteem// is not present.

It would be bad enough if Pride flourished in no more then //Self-Esteem//, but it must manifest itself in every way it can. It strives to show on the surface, which is perhaps just as well, for then it becomes obvious. //Conceit//, first shoot of the weed Pride, is //Self-Esteem// manifesting in visible form. Not content with merely feeling superior to the people around us, we show it in our bearing. A glance from some passer-by of the opposite sex may be interpreted as a look of approval. The fine figure reflected in the shop window as we pass engenders a feeling of warm satisfaction. Smart clothes, we believe, do justice to our carriage. We may not be so tall as that person over yonder, but we have a more distinguished look. No one would pick out any one of them in a crowd, but all can see we are different. Crude, isn't it? But that is the way //Conceit// affects us, and its crudity is indeed shocking when self-analysis brings us face to face with it. Inspired by a consciousness of a desire for

Truth, our minds turn the searchlight of enquiry inwards upon our own characters, and then there dawns the realization that //Conceit// has been part of us for as long as we remember. Formerly, we would have angrily denied the charge of being conceited. Now we see that it is well founded. Our "apartness," our treasured "individuality," is plainly one of its aspects.

//Conceit// has grown without its presence being suspected, and an even more dangerous and disgusting shoot has sprung up beside it. This is //Boastfulness// -- //Self-Esteem's// oral manifestation. One of our national conventions is the taboo on bragging, and the idea of voicing a plain, undisguised boast would shock us as much as it would disgust the conventional listener. a very admirable convention too -- but it by no means eliminates //Boastfulness//, for there are other ways of boasting, and as long as the //desire// to call attention to oneself exists, that particular ramification of Pride is a danger. We can get others to boast for us. We can also impress them (particulary our relations) that they sing our praises to others. In this way we gain more than were it to come from ourselves, and run no risk of its incurring disagreeable criticism. We can seek publicity and, once gained, declaim it. We may artfully bring a conversation round to a point at which we "modestly" have to admit to something we are really proud of. It takes a certain amount of courage to probe one's own secret heart and bring to light some of the many ways in which we who sincerely believe ourselves to be guiltless can actually indulge in //Boastfulness//. It is one of the most persistent roots of the weed of Pride, and the most dangerous because so frequently overlooked.

There are two kinds of //Ambition//. There is //Wrong Ambition//, and //Right Ambition//. One is based on //Self-Esteem//; the other is free of any taint of it. //Wrong Ambition// is the desire to excel or succeed in order to enhance one's standing -- one's reputation. It is the urge to achieve with the object of "putting the other chap's eye out!" In its more acceptable, and therefore more insidious aspect, it is the will to gain admiration and respect -- to become, in fact, a worldly "success," which nearly always means a financial success. Confident of our great worth, we cannot be satisfied until repeated success have called the attention of others to it. We feel that wealth

is a concrete recognition of it.

//Right Ambition//, on the other hand, is above itself. It is the will to succeed, not for the gratification of self-esteem, but to further achievement for its own sake. The painter who strives to express adequately the idea inspiring him -- the poet who seeks to express an emotion as it has never been expressed -- the craftsman ever intent on bettering his achievement -- all are followers of //Right Ambition//. Their "selves" are forgotten. They work as instruments, and they feel that in the expression of their art is little personal, but rather a universal power whose tools they are. Noblest ambition of all is the desire to achieve an objective of disinterested service to one's fellow creatures, whether human or animal. it is sometimes gratifying to learn how many of us have this objective.

//Jealousy// might be defined as the resentment felt against another for competing at the same level. Note that it is //at the same level// that competition begets jealousy. An admission of inferiority by the other will quickly banish the jealousy we may feel against him. Those we admit to be our superiors do not arouse our jealousy. It is a bestial emotion, but one that undoubtedly had its uses in our passage through the lives in the Instinctive Mind, for it was an aid to our survival. Carried over into the influence of Intellect it has no place, and puts a drag on our upward progress. He who is at one moment the object of our jealousy, is regarded with affection once that jealousy has been smothered. What may has served us for the conservation of the means of life when we existed in a lower condition is now no more than a vehicle for Pride's manifestation, and its redundancy is obvious the moment the reason has torn Jealousy's red veil from the perception. We know it is useless, and long to rid ourselves of it. We seem to succeed, and then conditions come about favorable to its reappearance, and the unwelcome pangs are felt again. Remember, then, that it is a shoot of //Self-Esteem// and until that root has been killed out the shoot may be beaten down only to blossom again.

We joke about //Envy//, and are inclined to look on it as less

despicable than Jealousy, its near relative. Think about it -- think over and around it -- define it to yourself -- get to know it. When the nature of an unpleasant thing is known, it is less to be dreaded. With all these ramifications of the weed of Pride the same approach can be recommended. Define them to yourself. Figure out what they are and how much you are subject to their influence. //Envy// can be called the resentment felt against another for possessing that which one values and does not posses oneself. It may be only a gentle resentment sometimes, but is dangerous nevertheless, for it may become fierce. Underlying it is the feeling, "Why should he have it, and not I?" //Self-Esteem// is outraged.

Then there is //Intolerance//. Sometimes it is the only form of Pride we are subject to. It is often the most robust shoot of the whole plant. It springs directly from //Self-Esteem//, for it is a refusal to accept anything that conflicts with our own ideas. It is to brand as wrong all that to us is not right. //Intolerance// causes us to condemn a person for doing that with which we disagree, but let him do just what we would do ourselves and -- here is what is so unreasonable -- a feeling of jealousy may be aroused. Pride sweeps us first one way, then another. There is no keeping our feet when once in its grasp. Don't expect Pride to be in any way "reasonable," for it wilts and disappears in the light of reason, its greatest foe.

We are repeatedly being asked: "Why carry the burden of Pride? Throw it aside! It is so much relief to rid yourselves of its weight and know the lightness of freedom!" We feel inclined to retort: " That's all very well, but //how// can we get rid of it? We know we must, but we don't know how to begin!"

The sickle which can cut down these roots is Reason -- calm reflection -- Meditation. Make it your task for a few weeks to give up half an hour daily for reasoning it out, and the results may amaze you. Look at yourself, as it were, from outside. Be honest with yourself, in making a searching examination to determine how Pride is manifesting through you, for fair self-analysis is in itself a powerful weapon to use against it. Classify those manifestations. Reason them out. Do they make sense? In your everyday life try and

form the habit of watching with interest to spot each of Pride's several shoots as it appears, and once a week spend a meditation hour in asking yourself for a detailed report of every one noted. Form a picture in your mind of the perfect character, and compare your own character with it. For example, say to your self: "Now, I think there was an inclination to boast in my remark to Mrs. So-and-so at tea yesterday. How would the Ideal Being have acted under the circumstances?" Or again: "Would the Ideal Being have considered himself superior in bearing to those ugly people I passed in such-and-such a street? Of course not! He would have been above that." The power of standing apart from, and criticizing, the Ego who is subject to Pride, allows you to find satisfaction in adverse criticism from others. Whereas formerly you felt bitter if ridiculed or put "in the wrong," it now amuses you, for you see what good medicine it is for the Self you desire to set free. When others treat you with intolerance, welcome it, for they are doing you a favor by striking direct at your own intolerance. Seek those things which formerly aroused in you the pangs of Envy or Jealousy. Find pleasure in feeling that other self hurt by them, knowing that the wounds are suffered by the false Ego -- Pride -- and not by the real You. It will not be long before the pain is gone, and then you will have a good laugh at the memory of that squirming demon who fled surprised and vanquished.

We who are subject to Conceit dread ridicule. Cease to dread it. When we see the wicked caricatures, or witness those vivid mimicries of ourselves, it is for us to welcome them, for they are aiding us materially in the conquest of Pride. So also, to hear ourselves belittled is an antidote for Boastfulness. When we do, there is no need to hide a raging heart behind a sickly smile. Once we have learned the trick of standing apart from ourselves these things can no longer hurt.

But beat down the shoots of Pride as we may, we cannot be free from the weed until the root has gone. It is right to prevent the shoots from thriving. Destroy them by all means. But Pride will persist in making its appearance until //Self-Esteem// is rooted out -- and to accomplish that is the hardest job of all!

Here is a tip that may perhaps be of service. Try and form the habit of supposing every passer-by on whom the thoughts rest to be possessed of at least one attribute superior to your own. Think to yourself: "This creature isn't much to look at, but I'll bet she is far more even-tempered than I am!" Look at that rather foppish young man whose appearance used to annoy you, and think: "All the same, in a pinch he would show far greater physical courage than I." Cease to regard the large, loud-mouthed person as empty-headed, and think instead: "He's probably far cleverer with his hands than I." We are all learning our lessons in Life's school-room. Some are more advanced than us in one thing, and behind us in others. The person who cannot resist the temptation to gratify the senses may nevertheless be a good angel to others in need of help. The thief may be an actual hero. If we consistently regard others as possessing at least one of those desirable characteristics we ourselves are striving for, we are actually admitting our inferiority, and //Self-Esteem// suffers a staggering blow. Remember that //Self-Esteem// is a habit, and just as a habit must be acquired, so may it be abandoned. We are not born with it. We cultivate it by regarding ourselves as superior to others in some particular thing -- later in more things -- ultimately in everything. Kill it out by recognizing the superiority of others in some way. Credit them with that superiority, even though you don't know they possess it. //Self-Esteem// will die for lack of nourishment, and one day will come the first joyful realization that there is no Him nor Her nor You, but that we are all one. You need not fear going too far and acquiring an "inferiority complex." Your eyes will be open, and what you will find is True Humility.

From "The Sangha," V.1.

THE BUDDHIST PUBLICATION SOCIETY

The BPS is an approved charity dedicated to making known the

Teaching of the Buddha, which has a vital message for people of all creeds. Founded in 1958, the BPS has published a wide variety of books and booklets covering a great range of topics. Its publications include accurate annotated translations of the Buddha's discourses, standard reference works, as well as original contemporary expositions of Buddhist thought and practice. These works present Buddhism as it truly is -- a dynamic force which has influenced receptive minds for the past 2500 years and is still as relevant today as it was when it first arose. A full list of our publications will be sent upon request with an enclosure of U.S. $1.00 or its equivalent to cover air mail postage. Write to:

When I was separated from my little one, his father and the old mahout, it was the end of the world for me. For days and months I had gone about in a daze. But that experience I have related in a previous story. Now I would like to tell you about the peacock.

The peacock was kept in a cage in the temple premises. I never could understand why the monk allowed him to be caged up like that. The whole day long he used to pace back and forth, back and forth, unceasingly inside his cage. When this gorgeous creature let out his mournful cry, which resounded through the air, I recognized the call all too well. The note of pain, grief, lamentation and despair in the cry was unmistakable. I realized he was suffering from the pain of separation -- from his mate, perhaps, his kith and kin, his familiar haunts in the jungle, and furthermore, he was experiencing extreme frustration at being locked up in a cage. I walked up close to the cage and observed the marvelous colors of his body. He was a majestic specimen. He stood still, posing, feeling my admiring gaze on him. At that moment I knew he was not feeling any grief or loneliness. He was finding self-affirmation in my admiring gaze, no doubt.

I lost myself in the sheer beauty of his form, complexity of design and color. He held his arched neck in a stately fashion, its head proudly poised with its dainty coronet. From the top of his head, down over his neck to his breast and under-carriage, he wore, like a coat of mail, an eye-shattering resplendent blue. Then came a bold pattern of black and white on its wing feathers, ending in a band of buff edging. On the nape of his neck, where the blue ended, there was a scarf, as it were, of ornate embroidery in greens and golds. I had never seen anything like it before; not even the richest of caparisons I and my companions wore in the Esala Perahera could compare with this. And the whole of his body had a wet glistening gold sheen to it. The fine quills of his green tail feathers with their "eyes" seemed a-quiver as though just dipped in liquid gold.

As I contemplated this ornate bird, this mythical vehicle of a Hindu god, my admiration slowly gave way to sadness. My little one's father too had been a lordly, majestic specimen, but old age, sickness and death had overtaken him in the end. The peacock was in the prime of his life but if I were able to telescope time into a few minutes' duration, I would see the change taking place in him very clearly revealed before me as though I were watching a film. The change in us takes place in such slow motion that we do not notice it from moment to moment. Once an arctic tern told me that when he looked down from

way up high at the great wide ocean beneath him, he saw no motion at all. Only a frozen sheet of blue with gashes of white swirls all over like a "still" from a film. That did not mean there was no motion in what he saw. So perhaps we do not see the constant flux in us and all around us, but it is there all the same.

Though the peacock's carriage was haughty, his lackluster eyes betrayed his wretchedness. I longed to comfort him. But what comforting words could I give him?

"Friend," I said finally, trying hard to swallow down the lump that had got stuck in my throat, "We must count ourselves fortunate to be in the peaceful precincts of this temple."

The peacock jerked his neck around and focused on me with angry red eyes. "You call me fortunate?" he asked, "Do you speak in jest? I have been sentenced for life in this hideous iron cage and you call me fortunate? What wrong have I done to deserve this punishment?"

"We are all prisoners of our karma -- up to a certain point," I said. "Listen to the monk when he preaches to devotees on a full-moon day. I have learnt such lessons from his sermons."

"Listening to sermons will not unlock the door of this prison, will it?"

"It will unlock other doors -- the doors of your mind. The mind is free to roam anywhere at will. By disciplining it, you can attain the highest bliss inside this cage. Make out of your penance a unique opportunity to free your mind."

"Free my mind?" the peacock let out a hollow croak.

"Yes. Discipline your mind. Start today itself and see if it does not bring you peace and freedom from suffering."

"How does one discipline one's mind?"

I was about to teach him the technique of the in-and-out breathing meditation when the tortoise spoke up. I had not seen him among the tall grass and weeds by the cage.

"You are talking about being imprisoned in a cage," he said, "but what about my carapace that I carry around with me wherever I go?"

"But that is your protection, not your prison," the peacock countered, pecking away at the iron rails and sometimes trying desperately to grip one rail in between his beak and to pull it out.

"Exactly. I do not look upon it as a burden or prison but my protection. Like Kapuri here, I have learnt to listen to the words of the Dhamma. We are blessed to live in these grounds, as she says, where we can hear the words of the Dhamma and live within sight of the Sangha who are protectors and teachers of the Buddha-word. Like Kapuri, I meditate too. I can reach far beyond the confines of my carapace. The mind's potentialities are infinite."

"And what do you meditate on?" the peacock asked with idle curiosity.

"On my thoughts. I watch each thought as it arises and passes away. I place a guard at the gateway of my mind and I challenge each and every thought as it comes, peruse its identity card, check the contents of its accompanying baggage and prevent it entry if it is unwholesome. Now I have become so adept at this exercise that I can even forestall unwholesome thoughts before they show their faces at the gate. Haven't you heard the words of the Tibetan yogi, Milarepa: 'Let no perverted thought find entry in your mind'? Then when wholesome thoughts come and I have checked their credentials, I let them in and even encourage them to bring their friends. In that manner do I pass the time of day."

"And you don't get bored?"

"I used to, at the beginning, when I was a novice at the practice of mental discipline. Not only bored, I used to have all sorts of unruly thoughts barging through the gateway. There would be a veritable

clamor and scrimmage at the entrance and then an onrush of chaos. Thoughts of hate, desire, worries, anxieties and even sloth and torpor would manage to slip in surreptitiously, and also doubt and skepticism, all trying their best to destroy my concentration. Such impeding thoughts are common to us all. But as I progressed with my meditations, my mindfulness became sharper and more alert in recognizing them, stalling them or chasing them away. They now only strengthen my will to persevere."

"You are luckier than us," I said, "for you have a carapace which shields you from the external world. We are exposed and vulnerable and are being continually bombarded by sense-impressions. This makes the work of our meditations so much more difficult."

"How can I meditate?" the peacock asked irritably. "I'm all the time thinking of home -- my little corner of the jungle grassland which was my kingdom." He sighed deeply. "There I roamed at will with my dear ones, roosting in the low wood-apple trees, scratching for grub under scrub jungle. I was a king among the fraternity of jungle birds. Even the beasts of the jungle respected me. How sweet were conversations with them all. Even when the rowdy monkeys came bounding from tree to tree and saw me, they would pause to exchange a few words of polite chatter. Pleasant was the speech of jungle friends to my ears. Pleasant was it under the shade of the trees and sweet the taste of fruits and the waters of clear, cool, meandering streams in the grasslands. That whole kingdom is now lost to me. A whole world did I lose when I was ensnared by a two-legged hunter."

"Moan not and do not think with bitterness of the two-legged hunter. He was your karma," I said. "I know exactly how you must feel for I too lost a whole world. However, I practice very diligently the exercises set for meditation, which is the only way out of pain, grief, lamentation and despair."

"Your little corner of the jungle," the tortoise said, "is not safe from the destructive powers of the elements, earthquakes, cyclones, fires and man. Neither are you. You yourself fell victim to man's cunning. You know the jungle teems with wild, wily beasts of

carnivorous bent from whom even you and your dear ones are not safe. You say the sweetest taste you ever want is the taste of jungle fruits and the water of the jungle streams. But where is that world now? There is no security in the external world because nothing is free from change. The world of sense cannot offer a safe refuge to anyone."

"You take our advice and start disciplining your mind from today," I said, and gave him a lesson on mindfulness of breathing and the meditation on loving-kindness. Having given the instructions, we left him.

On the following day when I went to see how the peacock was, I found him in a very depressed state of mind. The tortoise was already there trying to console him.

"But is there any harm in hoping?" the peacock asked tremulously as soon as he saw me.

"Hoping for what?"

"Hoping that I may escape this prison one day and return to my corner of the jungle? Hoping that some day in the future I may be able to join my loved ones? It is this hope that is preventing me from languishing away inside this cage."

"Dear friend, do not languish away with vain hoping," I said gently. "Do not knock your head against a stone wall. Let that stone wall turn into vistas along which your mind can travel to real freedom."

The peacock suddenly sat on the floor of the cage in a heap of feathers, like a rebellious child.

"Am I to end my days then in this miserable cage?" he cried out shrilly. "Kapuri, you are wise and talk like an oracle. Do please read my future. What does it hold? Will I never go back home and see my dear ones?"

I could see that the peacock had begun to panic. Fear was written all

over his quivering, harried face.

"No one can see the future," I said, "for the future is as yet unchartered. You can work out your deliverance by making fresh, wholesome karma. Seek your refuge in that karma."

"Tortoise, sir, you look like a sage," the peacock turned to him beseechingly, "Surely, you can read my future?"

The tortoise came up close to the cage, then peering at the peacock, whispered softly and soothingly.

"There is hope -- much hope to be had in your own efforts. Seek your refuge in discipline. Strive hard. Be brave! If you will excuse me, I will go back to my meditations now," the tortoise added, "but I shall come again to see you, later."

"Thank you, sir, I'm most grateful to you."

After the tortoise went away, I remained with the peacock. He looked desperate still and had begun to shiver. Slowly, I thrust my trunk through the gap between the rails and stroked him gently.

"You are shivering," I told him. "Do you know why you are shivering?"

The peacock shook his head.

"It's because you are afraid. You are frightened of losing that so-called world of security -- your loved ones, familiar haunts and friends. I went through the same experience when the little one was taken away from me and before that, when his father left me, and later, when my old mahout died." I fell silent, recalling those grim days when I alternated between panic, anguish, fear and despair which filled my legs with disquiet. I remembered how restless I was, so restless that I was unable to stay still even for a minute. I swayed to and fro while I was tethered to a coconut tree in the temple premises, just as the peacock paced back and forth in his cage. To and fro, to and fro, I swayed, swaying my head and trunk as well and

lifting my feet one after the other in a tormented, unceasing motion. Then I remembered how I used to stand stricken with fear, my hide and my legs visibly shaking, uncontrollably.

Once, when this happened, my young mahout noticed me shivering and rubbed my body all over and covered me with a heavy cloth, thinking I had caught a chill. But the cloth was not necessary. The moment his hand touched my body, I felt a warmth coursing through me. There was no magic in his touch, either. It was my instantaneous response to that physical contact of concern.

Reflecting on the instantaneous warmth that coursed through my body when the mahout touched me and how the kindly feelings of gratitude surged through me, ousting grief, I had begun to see how quickly feelings arise and pass away. All feelings are mere phenomena, the monk had said in a sermon. We are but a continual arising and a passing away of physical and mental phenomena, conditioned by a host of physical and mental phenomena and conditioning more physical and mental phenomena to arise.

The monk had described this life process as corporeality, consisting of the four elements of earth, water, heat and air, together with the mental factors of feeling, perception, mental formations and consciousness; all fleeting phenomena and nothing abiding in them -- no self. Our mind, rooted in ignorance, tries to attach a subject to these fleeting phenomena which are as insubstantial as foam.

Reflecting on that experience of warmth that coursed through my body and how the kindly feelings of gratitude ousted grief, I realized how good it was to cultivate and augment these thoughts of gratitude, loving-kindness, compassion and joy. That was a sure way of dispelling grief and losing one's so called "self."

Then I remembered how in those days, when I was estranged from thoughts of loving-kindness and sunk in my grief, my chest used to hurt, as if a dagger had been plunged into it. Sometimes it used to burn as though in flames. So did my head beneath the scalp as if it was exposed to the raw air. The monk had said in a sermon once that we

are all burning like a fire, all the time. The sense organ of sight -- the eye -- when it comes into contact with its sense-object, starts up a conflagration in our minds, he had said. So also the other senses when they come into contact with their respective sense-objects. The resulting process of physical and mental phenomena is like a raging fire.

"Did you have nightmares?" the peacock's question cut across my thoughts, bringing me up sharply to the present.

"Of course. They were frightful images thrown up by fear -- my little one looking lost and forlorn, weeping for me or tearfully asking me why I had let him go. Then death. Yes, I dreamt of death too. Not as something peaceful or as a release from suffering but something that evoked in me a dreadful fear of the deep, dark, unknown. These nightmares came to me in symbols but nevertheless they struck chords of doom in me."

"So how did you overcome fear?"

"Well, even while groveling in the depths of abysmal despair, when the ground underneath my feet seemed to be sliding away, the words of the Blessed One would percolate through to my consciousness as I recalled the monk intoning passages from the Banner Protection."

"Tell me the Banner Protection," the peacock begged. He was still shivering.

So I began to chant it and the peacock settled down to listen.

"Once when the Buddha was residing near Savatthi at Jetavana at the monastery of Anathapindika, he addressed the monks..."

And I chanted on but the peacock began to doze off. When I finished, I found that the peacock had truly fallen asleep. So I quietly left him.

A few days later, when my mahout led me into the temple premises after bathing me in the river, following a hard day's work at a dam site,

the tortoise told me that the peacock wanted to see me. The tortoise had been teaching him the in-and-out breathing meditation and the meditation on lovingkindness again, but the peacock was not making much progress with them, so it seemed. We went together to see him.

"How do you feel today?" I asked him cheerfully.

"A little better," he said, "but tell me, did repeating the Banner Protection really help you to get rid of fear?"

"Yes, when the full meaning of the words sank into my mind, repeating the protection helped me a great deal. You see, you must have faith in the Buddha-Dhamma. Not blind faith but faith resulting from having tested the validity of the Dhamma in the light of your own experience. When I contemplated the meaning of the words, I realized that fear arises because one is afraid to lose what one values, like one's life or what one thinks, in ignorance, is valuable and what one wants all the time and having which gives one a feeling of security. This object which one values does not last forever and so the sense of security derived from it is also not lasting. It cannot last because of change. One cannot ignore change in life. Change is suffering. And what is at the root of wanting this and wanting that or not wanting this or not wanting that? It is craving. Cut off craving and one is spared fear and anguish. So simple is the remedy but so difficult -- oh, so difficult! -- to do. But give up attachment I had to. You see, there was nothing else I could do."

"I cannot give up my past," the peacock shook his head sadly. "It is impossible."

We knew the peacock said this because he was an aesthete and an epicurean. We realized that the chasteness of mental culture did not appeal to him. He told us that when he was in the jungle grasslands, he had been used to dancing in the sun, listening to concerts of bird song, tasting wild fruits and spending his time agreeably with a community of peacocks and peahens. It seemed his enjoyment of life was so intense that sometimes he would break into an impromptu dance which was appreciated by an applauding audience. He confessed to us that it

was truly this that he enjoyed more than anything else -- the adulation and admiration of his circle of friends among the bird population and the friendlier of the jungle beasts. Even leopards were seen to amble over to the edge of the jungle to watch his performances, which took place in a naturally formed shallow amphitheater. Finally, it had come to a stage when his performances became the be-all and end-all of his life, for he had come to delight in the adulation and admiration of all those around him. If he had no new audience to bedazzle every day he became bored and irritable. He had no idea to what extent he had been pampering his ego-supporting delusion.

"I do not think I will be successful in severing attachment," the peacock shook his head again.

"I know giving up attachment cannot be done without pain," I said. "Can one amputate a limb without anaesthesia without feeling pain? Well, cutting off attachment is like that. It was like that when my little one was taken away from me, and before that when his father left me, and after that, when the old mahout died. When one loses the object of one's attachment, there is bound to be sorrow and fear because one feels insecure. It is this attachment that gives one that false sense of 'self.'"

"Listen to me," the tortoise said patiently. "We are all, to a greater or lesser extent, prisoners of our karma -- but our minds are always free to make new karma. That is why the message of the Buddha-Dhamma holds out so much hope and promise for the future to beings suffering in samsara. It is not a pessimistic message but one that reveals the true nature of existence and offers hope for release."

"Is it through disciplining the mind alone that one can achieve freedom and happiness?" the peacock asked dubiously.

"Mind is chief," the tortoise declared firmly and quoted from the Dhammapada:

"All mental states have mind as their forerunner, mind is their

chief and they are mind-made. If one speaks or acts with a polluted mind, then suffering follows one as the wheel follows the hoof of the draught-ox.

"All mental states have mind as their forerunner, mind is their chief and they are mind-made. If one speaks or acts with a pure mind, then happiness follows one like one's shadow that never departs."

"But one cannot rush headlong into meditation without first having prepared the groundwork for it," I said. "If one disciplines oneself in normal day-to-day activities, by keeping the five or eight precepts, one would have already prepared the foundation for mental culture. You see, discipline in day-to-day life is very important for purifying the mind. Defilements are then easier to get rid of. Observing the precepts implies the application of discipline conscientiously and scrupulously over our actions, both with regard to our thoughts as well as actions that stem from thoughts. A highly trained discipline is an essential prerequisite for a meditator seeking the path of freedom."

"Correct," the tortoise said. "Now, peacock, you are in an enviable position to practice the five precepts or even the eight precepts. But know that mind is the fore-runner of all evil and guard your mind, for that is your greatest treasure. When an angry thought comes into your mind, observe it, analyze why you are angry and check it. In that way, discipline your mind."

"Also faith is very necessary," I said, "implicit faith and confidence in the path of mental discipline undertaken. Effort too is necessary; unflagging effort, mindfulness, concentration, all of which ultimately lead to wisdom or insight. These are the factors that help to make good one's escape from samsara. But the humble foundation is discipline in day-to-day life and that cannot be achieved without some basic disciplining of the mind."

The peacock was now listening with avid interest. "Tell me," he said,

"did you say that by putting a guard at the gateway of the mind and allowing only wholesome thoughts to enter, good karma is made?"

"Yes, indeed," the tortoise said, "that is correct."

We noticed that now the peacock had become quiet and calm. "Try the meditation," the tortoise advised him. "First do the meditation on lovingkindness to all as I have taught you and then do the in-and-out breathing meditation."

The peacock nodded and we left him.

Some days later, when I went to see him, I found he was in a better frame of mind. He did not seem so obsessed with his past and the pain of separation from it. He was obviously making an effort to keep his mind on the present moment, all the time.

"Truly, the past is only a construction of the mind," he confided in me. "I am learning to let go of it."

"Good," I said, "Then you will realize that clinging to ideas and concepts and such mental constructions are all superficial and misleading. They all arise mostly out of ignorance and have only one purpose -- self-affirmation. You will realize this when you go on meditating on your thoughts."

"Not so fast," he said, "I have not given up the notion of 'self' yet. But perhaps if I persevere hard enough I might see that 'no-self' point of view."

"Experience it, see it," I told him. "The point of view of 'no-self' is not merely to be understood conceptually. It is to be experienced, to be seen and realized for oneself. Only then will all your grief and pain fall away."

ABOUT THE AUTHOR

Suvimalee Karunaratna was born in Sri Lanka in 1939 and received her early education in Washington, D.C. and in Colombo. While living in Rangoon, where her father was posted as the Sri Lankan ambassador to Burma from 1957-61, she received meditation instructions from the Ven. Mahasi Sayadaw and the Ven. Webu Sayadaw. Her first volume of short stories was published in 1973, and several of her short stories have appeared in anthologies of modern writing from Sri Lanka as well as in literary journals. She is the author of //The Walking Meditation// (Bodhi Leaves No. 113), also published by BPS.

THE BUDDHIST PUBLICATION SOCIETY

The BPS is an approved charity dedicated to making known the Teaching of the Buddha, which has a vital message for people of all creeds. Founded in 1958, the BPS has published a wide variety of books and booklets covering a great range of topics. Its publications include accurate annotated translations of the Buddha's discourses, standard reference works, as well as original contemporary expositions of Buddhist thought and practice. These works present Buddhism as it truly is -- a dynamic force which has influenced receptive minds for the past 2500 years and is still as relevant today as it was when it first arose. A full list of our publications will be sent upon request with an enclosure of U.S. $1.00 or its equivalent to cover air mail postage.

JOHN TARRANT ROSHI

TEISHO delivered during a ROHATSU SESSHIN
December 5, 1992 Camp Cazadero, California

(Tape starts mid sentence.)

... saw the morning star, gained enlightenment, and said, "Now I
see that all beings of the great earth have in the same moment
attained the way."

In the book of the Denko-roku ("The Transmission of the Light"), which is the first koan book, there's a poem by Keizan Jokin that goes with this case (i.e. Case 1 of Denko-roku "Shakyamuni Buddha"):

> "One branch from the old plum tree extends splendidly forth.
> Thorns become attached to it in time."

Please sit comfortably.

This is one of the primary legends in our particular tradition and this is the time of year when we traditionally celebrate the enlightenment experience. The zen tradition is that each person actually has that experience of the Buddha. You don't have to believe in the Buddha, better if you don't. What you have to do is have that experience for yourself so that you can know for yourself what coffee tastes like and you will not ever again have to read descriptions of what coffee tastes like.

The tradition is that Shakyamuni tried a lot of different paths, including a very ascetic path without eating and became just a living skeleton, but found that that wasn't the way and he accepted nourishment. Somebody offered him some milk and he drank the milk. We might symbolically see that as allowing whatever cows represent into his life, too. Some sort of nurturance, some sort of earthiness. So he accepted the milk and sat up all night, and in the morning he looked up and for the first time he truly saw the morning star. That's the moment when he said, "At the same moment I and all beings of the universe have attained the way." There are different versions of what he said and this is essentially a zen version of his enlightenment story.

So today, I'd like to talk some about enlightenment and what I think it is and what I think it isn't and share with you some stories about this tradition of enlightenment that we have. I want to remind you first of the story from yesterday about YŸn-men Wen-Yen (Jap. Ummon Bun'en), who was the guy who broke his leg when he was enlightened. Yesterday we talked about Lin-chi's

(Jap. Rinzai) enlightenment story. The head monk Mu-chou Tao-ming (Jap. Bokushu Domei) said, "Why don't you go along to the teacher and ask this question" over and over again and Lin-chi could get nowhere. Eventually, through that head monk's initial help he became a great master. YŸn-men came to that head monk much later in the head monk's life when he was about a hundred. The story is told in a number of places. This is the Blue Cliff Record version of the story.

Mu-chou spun devices that turned like lightning so it was difficult to approach and linger. Whenever he received someone, he would grab him as soon as he crossed the threshold and say, "Speak! Speak!", and if there wasn't a reply he'd just push him out saying, "An ancient drill is just turning in a rut."

It took YŸn-men three times before he got let in. And then, as soon as Mu-chou said, "Who's there?", and YŸn-men answered, "Me!" Mu-chou opened the door a little and YŸn-men immediately bounded in (showing his spirit).

Mu-chou, holding fast, said, "Speak! Speak!" YŸn-men hesitated and was pushed out and still had one foot inside when Mu-chou slammed the door breaking his leg. As YŸn-men cried out in pain, he was suddenly greatly enlightened. Subsequently the trend of his words, his whole style emerged from Mu-chou.

After this, eventually Mu-chou directed YŸn-men to go to HsŸeh-feng I-ts'un (Jap. Seppo Gison). So Mu-chou decided that he couldn't teach YŸn-men much further. So this is one of the first things to point out here that while YŸn-men, who really is one of the greatest figures in all of zen, had a very profound enlightenment experience, his teacher didn't think that that was enough. Mr. Reginald Blyth, the haiku translator and the person, really, who taught Aitken Roshi about zen in prison during the war with Japan, compared YŸn-men to Goethe or Shakespeare in his culture. He thought of him as one of those figures who transcends national culture. But even so, after his enlightenment, he had to go and keep working at it.

He arrived at HsŸeh-feng's place and said, "What is Buddha?" and HsŸeh-feng said, "Stop talking in your sleep." And YŸn-men then bowed and he lived there for three years.

One day HsŸeh-feng asked him, "What is your perception?" YŸn-men said, "My view doesn't differ in the slightest from that of all sages since antiquity."

For twenty years Ling-shu JŸ-min did not appoint a head monk. He used to say, "Now my head monk was born today." And all that time he had his head monk's quarters vacant.

Then he would say, "My head monk is tending oxen" like a young boy in the fields.

Then later he would say, "My head monk is travelling around on pilgrimage."

Suddenly, one day he ordered the bell to be struck for everyone to assemble so that people could receive the head monk at the gate. The congregation was rather dubious about this, but YŸn-men actually arrived (a ragged man with a limp). Ling-shu immediately invited him into the head monk's quarters to unpack his bundle.

Ling-shu JŸ-min was an unusual person.

One day the local lord was going to mobilize his army and didn't go to the monastery personally to ask the master to determine whether conditions were favorable or not. Ling-shu didn't want to be part of any of this.

Either way, you know, there's just no good advice you can give sometimes when somebody's planning war.

He knew this before hand and sat down and died.

The lord arrived and said angrily, "Since when was the master

sick?"

The attendant said, "The master hadn't been sick. He had just entrusted a box to me which he ordered me to present to your majesty when you arrived.

The Lord of Kwangtung opened the box and took out a card which said, "The eye of humans and devas. A living buddha is the head monk in the hall."

Then the Lord of Kwangtung calmed down, dismissed his soldiers, and invited YŸn-men to lead the monastery.

I tell you that story to indicate some of the twists and turns of the dharma and some of the mysterious nature of the dharma. I think the most mysterious thing is not Ling-shu's wonderful foreknowledge, but YŸn-men actually breaking his leg and finding that an opportunity for enlightenment. So that circumstances that are harsh, as well as benign, can be awakening devices for us.

To take off on this theme. . . The tradition of Buddhism started we assume around the time of Shakyamuni, and very much emphasized renunciation at first. If you read old Buddhist texts, or if you study Buddhism in Asia, you can't avoid the awareness of the importance of renunciation as an issue in Buddhism. I sometimes think of this as the foundation. This is the ordeal quality that comes with any great learning. That you will have to give up something if you want to practice the dharma well. If you want to become enlightened. In the initial traditions of Buddhism this was a very literal thing. The idea was you couldn't really become enlightened or have a happy life without giving up everything, without living uncertainty, and certainly as a celibate person begging enough food for one day and no more. And each day going out begging and if you didn't get the food, you went hungry. So that was really the idea of renouncing all certainty and protection, in a sense, in this life. And there was very much the idea that lay people didn't quite make it. They had to wait for a

favorable rebirth when they could be become monks or nuns.

As Buddhism progressed some people stopped taking renunciation so literally and started to see it more as an inner matter. There was a great split in Buddhism and these people founded the Mahayana school, which we are members of. And they thought that you could actually be quite asleep, you could follow all the monastic rules perfectly and still be a donkey. And while there can be a laudable intention in renunciation, it doesn't always achieve what is wanted by itself. The Mahayana was founded on the renunciation, but was something else. It was a castle built in the desert. And the Mahayana came out with the idea that whether you are a lay person or a priest or a nun, enlightenment is equally available to everyone no matter what your circumstances. There is no special fortune you must have in this life that makes enlightenment available to you. So you can see this is a very democratic move in some ways--that you don't need to have any special fate. Enlightenment is always available. Renunciation, then, came to be seen more as sort of inner fasting. You might call it a fasting of the heart rather than of the body in which we just don't cling to things. The old zen saying is, "The great way is not difficult, if just avoids picking and choosing." It avoids comparison. It avoids praise and blame.

So there is a great discipline in renunciation as the foundation of zen. I think it is very much an inward matter. At first, I think the primary element of the renunciation is in our attention. We stop following the mind road so that when you hear a bird call and you begin to think of the last time you heard a bird call, and you remember when you were in a forest and saw a beautiful pheasant, and then you think about a caged bird and feel sorrowful for all the caged birds in the world, and then you think, well, maybe I'm a kind of caged bird, and then you think well I can sing anyway. That is the mind road and it's not much use. So there is a renunciation that needs to happen there where we don't follow that well-worn groove in the mind. That the mind when it is doing that is not lively. It is not immediate and vivid. It is just plodding along like the old donkey it is. Sort of like an ox

grinding corn in a traditional village. Just plodding around and around and wearing a furrow in the ground. So we renounce that sort of ox-headed quality about our lives. And actually, that's the great difficulty, the most difficult thing to renounce, really, truly. Who knows how active the mind is in offering routines to us and sort of conventional things. Flaubert, the great French novelist, actually made a dictionary of received ideas which he thought were those idiotic, pompous things that everybody believes. And it's rather shocking when we begin zazen to see how many of those received ideas we just have and how much we just run our lives by them and make major decisions by them. In zen we let go of those opinions. An opinion and ninety cents will get you a cup of coffee. So we let them go. And then you can see that in renunciation there is an act of courage because we have to let them go without knowing what will take their place. Because if we know what will take their place, we're not letting them go. We can't get there from here. And what will take their place is something very magical and shining and vivid, but we can't have it until we let go of what we've got.

I think, again, it was YŸn-men who said, "It was better to have nothing than to have something good." So that is the renunciation of zen. And that's the equivalent of Shakyamuni fasting until his bones showed through his skin. His skin just hung on him. The equivalent of those people who cut off a finger to indicate their sincerity (it's a common thing in some cultures) in the way. You don't have to cut off a finger. It's actually much harder to cut off the mind road so I recommend you go straight to that.

But the renunciation also gives us, I think, a certain. . . We have to be prepared to renounce. We get a certain equanimity with circumstances in zen that really is like the old ascetics in some way. You know it rains, oh, so it rains; it's sunny, so it's sunny. I'm happy today or I'm dying today. That's very interesting. There is an equanimity with the rise and fall of the waves of the world. And that's really true. We really do get that. And the wave will come through and something will happen. We'll be sad or we lose our temper or something like that, but

then it is gone and a new wave is coming through and we don't cling to the past wave. Even if we were stupid, we don't cling to that. Even if we were very successful, we don't hold that either.

In the Mahayana people built up the idea of the bodhisattva and the legend of the bodhisattva is of one who really knows what her purpose is in this world. It is to enlighten and to save other beings. The bodhisattva in the legend, also puts off her own complete enlightenment. A bodhisattva is greatly enlightened, but not completely and utterly enlightened because that would mean she would instantly disappear from this universe and go and live in a pure land teaching people who are almost there instead of us struggling beings. I've thought much about this over the years, this legend, of the idea of putting off your own enlightenment which seems rather dumb, really, when you think about it. How can you help people by being stupid? The very core of zen is the idea that if you are enlightened, your action will be freer and truer and more helpful and if you are not enlightened it's not much use trying to run around the world acting if you don't ever take any time for inwardness. Your actions will go sour and your good actions will not help people because your eye will not be clear enough to see how to help people. You'll be declaring war on things.

So what I came to, and I think this is a solid reading of that myth, is the idea that the bodhisattva is open to and vulnerable to the world in order to join with us. That if we are to be a bodhisattva, we have to be open to being touched by other people. Otherwise, we cannot connect with them and we cannot help them. And if we are opened to being touched, of course, we're open to being harmed and we have to let go of our complete perfection or we'll never get there. So we have to be at ease in the waves of the world rather than trying to flatten them all out. You can see how this view would lead us to believe that you could practice as a bodhisattva as a lay person rather than just as a clerical person. That you can practice as a bodhisattva no matter what you are doing since all circumstances are equally bad and equally confused and turbulent. You notice how in sesshin we try to

control things and sesshin is actually quite a structured environment according to our usual patterns, but you also notice how everything is always out of control in sesshin, too. There is always this sort of creative chaos that goes on in the kitchen and machines go on at the wrong time and obliterate your quiet zazen. Logistics are always breaking down because that is the way of things. Gregory Bateson's daughter asked him, "Daddy, why are things in a mess?" and he pointed out to her that we have very few ideas of what was orderly, but very many ideas of what was messy so things were much more likely to be in a mess than to be orderly. He illustrated that by arranging things on a mantelpiece. But things are always in a mess and the bodhisattva finds a harmony within that.

In Mahayana thought there were some great developments. There was a whole school called mind only which came to the realization that there is that great underlying basis of everything, the great fundamental ground of being, which is what we call emptiness when we chant the "Heart Sutra." And that this is an experience that just comes over us in meditation sometimes. Everything is taken away. This is the true renunciation. It is not an act of will, but an act of understanding. Even to say understanding is saying too much. It's like the moon reflected in the water. It's an instantaneous reflection. The water doesn't think about it and then reflect the moon. It's just like a mirror. So the moonlight is this fundamental ground of being, but it's also intangible. It can't directly be touched. But everything is held in this and we can speak of the compassion of the ground of being, that it holds us and whenever we come home, there it is. It is always there. Whenever we gather our attention, it is always there. And while it is nothing at all, we can rest in it. This is a vivid experience of zazen and also something that you can cling to and destroy you and yourself with it, of course, like everything else.

As the Mahayana went on, people began to develop even more sophisticated images. Perhaps the height of this was the Flower Garland School, which is the Hua-yen (Jap. Kegon) School of Buddhism, which saw that not only are all the things of the world

reflected in the mind, but the mind completely appears in all those things in the world. So the idea of interpenetration arose. If you've ever read or sat with Thich Nhat Hanh, he's very influenced by this idea and talks about it a lot. For him it is the source of all social action. The idea that each being is actually all other beings. The universe is the great net of Indra, is one of the metaphors, and each place the net crosses over, there is a jewel and each jewel holds a reflection of all other jewels. There is a great luminous world here in which each object is alive and vibrant and containing all other objects and at the same time the subject-object boundary is, of course, quite broken down.

About that time philosophy seems to have run out in zen. I think it was a great achievement, that tradition, and something I'm still trying to quite fathom, I think, but also it got kind of fancy and got away people's direct experience. So in zen there is always the move back to direct experience. So that Wu-men Hui'kai (Jap. Mumon Ekai) says, and he's quoting an ancient saying, "When you meet the Buddha on the road; kill the Buddha." Because the Buddha is no use to you. If you are not the Buddha, the Buddha is just a kind of poison. He also said, "Wash your mouth out with soap and water when you speak the word, `Buddha'."

So this is the enlightenment experience when you completely let go of all your ideas and delusions because they are a kind of veil in front of you. There's nothing wrong, really, with walking around with a veil. You still contain every other being in the universe, but if you want to know for yourself, if you want to experience the joy, then you have to fast in that way and let go of that veil. Let go of something good until you have nothing and then the joy will appear.

So I'll talk a little, perhaps, about enlightenment experience. I gave a talk in Berkeley about a week ago and I spent about two minutes talking about enlightenment and it was a rather long talk and almost ninety percent of the questions I was asked were about enlightenment. And so I thought, "Gee, I should wash my mouth out

with soap and water for mentioning the word." But let me mention it and I'll wash my mouth out later.

The idea of enlightenment is the idea of a transforming experience and the experience transforms our point of view. A lot of people focus on the ecstatic qualities of zen experience, but in the tradition we're not that interested in ecstatic qualities. We're somewhat interested in them as a kind of consequence of a real experience, but they themselves are not diagnostic of whether the experience is real. People can get ecstatic over the most amazing nonsense. Look at the history of any religion and you'll find these wonderful ecstatic people who have not a clue about anything. Running around killing each other because their enemies are heretical. But there is a characteristic of the experience as joy. Tung-shan's master asked him, I think it was Tung-shan's master, said, "Are you joyful yet?" And he said, "It's as though I found a pearl in a pile of shit." You see, what's the pile of shit is the mind road itself. Again, you see the Hua-yen, the idea that the mind, the great eternal ground, the original face itself appears in you. It appears in the grass. It appears in the old piano in the corner. It doesn't appear anywhere else except in a pile of shit; fortunately, doesn't appear anywhere else. So there is no way beyond where you are that you'll find eternity, but you will find it if you look. So that was his joy.

The other thing is that enlightenment seems to afflict some people whether they look for it or not. And occasionally you'll find somebody, Mrs Flora Courtois is a good example in the (zen) literature. She just sweats life and has an enlightenment experience. Because they worry about eternity so much it somehow comes over them. Some people will just walk into a zendo and just sit for. . . I knew somebody who came to a zendo and at her first zazenkai she came along and was chanting the "Kannon Gyo" and had an enlightenment experience. She didn't even know the words. She had to hold the sutra book and that's one of the easiest sutras to learn, so you can see how new she was. This was the first time she'd ever chanted and she had an enlightenment experience. But that's kind of a disadvantage when that happens. I think it was

for her, or she felt it was, because there's not enough containment yet to hold it. And what she realized, she saw that everything was taken away. She saw the emptiness side of things and she burst into tears and she didn't have the joy. While she could see something, it wasn't yet enough.

I think what happens with the enlightenment experience is that we do our zazen faithfully and we work within the structure of the precepts however we can. I think that structure is very helpful and gradually we deepen. And some people work with a koan, which I think is very helpful, and some people have these Boom! experiences, Kaboom! And other people don't. Other people just gradually open wider and wider. Some people don't even work with a koan and they just open wider and wider and they become very deep and serene and very clear in that way. So there is no orthodox way to become enlightened.

In zen the idea of sudden enlightenment has been very strong. There is a truth to that because if you're going to change your stance in the world, it completely changes. The suddenness refers to the utter nature of the change. If you're not going to follow the mind road anymore, you just don't follow the mind road and it's a complete change. It's like an egg can't be partly rotten. It's all rotten. It's not good in parts. So there is a suddenness for some people, but for other people in time the suddenness is the complete change of view, but actually they change very slowly and then deepen and get richer over time and sometimes this is a better way because all the time you put in sweating and being stupid is very valuable. And the time you put in not being stupid is not as valuable, which is why the great D. T. Suzuki's dharma name was Daisetz or Great Donkey. So his teacher must have thought very highly of him, I think, to give him such a name.

I've seen different kinds of enlightenment experiences so I'll talk about a few I've seen over the years. I have one friend who had a very classical sort of experience, the kind that people like to write up and publish in books because it's all very neat and

orderly and makes you think everybody has that experience. He was training and he was going along and working at his job. He was a school teacher, I think, at that time, and he'd come and sit sesshin whenever he could and he'd sit a lot. He felt himself to be just getting deeper. And he was the sort of a person who really didn't ask a lot of questions. He worked on the koan Mu and he just worked with that koan and sat a lot and felt that he really didn't have a clue, but that if he kept sitting, it would get better. And, really, it didn't. He didn't get any wiser, he thought, but he did get more serene and became happier gradually and that often happens in zazen, very often you do become happier. Then things started to happen. Like the tanto hit the wall with the stick making that crack sound that tanto's love to make. He jumped off his cushion before he even noticed. He just sort of levitated and fell back down. Then a bird would call and it would go right through him and he would feel like he could hear it calling for hours. Occasionally he'd get excited when he had this experience, but it would go away again. But he felt like he was resonating and for a long time he was like that. He was like a string that's quite taut and even if it's touched a little bit, it will shake, but it didn't really sing out yet. On the last night of sesshin he was in this rather deep place, but quite happy and not thinking about enlightenment, of course. He was studying with Aitken Roshi and Aitken Roshi for some reason, nobody remembers now, had used the words `headless corpses and corpseless heads,' to make some point in teisho, an absurd phrase. The student was sitting up in the dojo and people were sleeping in it because it was very crowded and people were snoring and people and people snore in different overtones, you know. He was sitting there alone meditating with all this snoring around him and this phrase, `headless corpses and corpseless heads' started going around and around in his mind, mixed with the snores and the snores started saying this. He's sitting there all alone meditating pretty happily and the whole world's turning into this absurd saying, going round and round in his mind and the snores and everything. Then after he kind of got sick of this and decided that that was enough and it felt right and he went to bed. He went to bed and then he just turned over, still in bed, and the whole world just

turned over, and he said, "Ah!" So then he sort of shrugged and went to sleep. And then he got up in the morning and everything was shining. Every object in the world was shining. He felt this great joy and love and everything was shining and glowing. It was like that for weeks. And so then he went to Aitken Roshi and couldn't communicate this at all. It was six months before they managed to find a way to talk about it in the koan language. But it didn't matter to him--either of them--but it didn't matter to him because he had had this experience. He had his joy.

So that's a fairly classical experience of the deep kind. I know other people who really sit. There are people I've worked with that I really didn't even give a koan to and I just got to sit and who gradually became wiser and wiser and wiser that way until one day they realized they'd gone the other side of the gate. That is a completely other way to do it. It's not very dramatic and it's hard to describe how it happens because you just walk, live along your life. But that is an equally important way to have the dharma, to experience the dharma. Where you know there is something, a way in which you are out of harmony with the Tao so you shift so that you are in harmony with the Tao and that's all you do. You just do these little shifts all the time and sooner or later you realize that you are the Tao and the Tao is you and it is not a matter of being in harmony with it at all.

In my own--I don't usually like to talk about my own experience, but it's sort of distant now. I think it's sometimes often important to protect an enlightenment experience and not talk about it. You want to be very careful with it. When I had my own experience, I didn't tell anybody for about six months, I guess. I told my teacher, but I didn't tell anybody else until I'd settled down a little bit. In my own experience I had really always wanted to be enlightened and I'd had this really strong sense of effort and struggle. I'd gone to each sesshin thinking, "I will do it this time." I would really meditate very hard. I think as I got deeper in my zazen, I got happier and I didn't really didn't care so much if I got enlightened and I realized that I was living the great life in my ignorance, which is again,

an essential thing of the Hua-yen, isn't it? That each object in the universe contains all other objects, each object manifests the radiance of Buddha nature. So whether you're working on Mu or whether you're sitting there asleep and snoring on your cushion, you still manifest the dharma, but it's good to know it and you don't know it yet. Not knowing in that sense, then, can be painful. So it's good to wake up the desire for the way, but then the desire itself becomes a problem, as it did for me. I had to back myself off in my zazen and stop being so tense and stop struggling so much. I used to throw up all the time. I'd be so tense, I'd rush out at kinhin and throw up, rush back and do more zen. It was sort of just another ritual, you know. I did that for a year or so, I guess, a couple of years. Finally, I thought, "Well, there must be another way." And I got to just enjoying my zazen. I decided I'd be lazy in my zazen, actually. But I couldn't be lazy. What happened was I stopped the interfering mind and the of zazen started doing me. In this particular sesshin I had this dream beforehand that I thought was very significant. In the dream I went past the bones of the ancestral saints on foot. I was in a car and it broke down and I had to proceed on foot. Then I saw some senior students. (Again the importance of friends, rather than the rules and the teacher.) Some senior students showed me the way to a mountain that nobody knew of. It was a secret mountain, but it was the highest mountain in land. They showed me the way up. And all the children were coming down from that mountain into the world to be born and I was going up. I got to the place where the children came from. In the dream I had an ice cream cone and I was licking it. Well, I felt somehow this dream seemed a good sign. So often you'll get intimations like that, but you can't hang onto them because if you hang onto them, you just step backwards. So I felt odd about the dream. But I went into sesshin determined this time I was going to do it. I had a really good first couple of days and then my mind went all to shit, like I'd never had worse zazen in my whole life. The more I tried the worse it got. So I thought, "Well, I just won't try." I'd built up such a head of steam that not trying was good for me; whereas, earlier in my practice I had to try because I would have just stopped practicing

otherwise. Then this experience just came over me then. I just couldn't help it. I was just sitting in the dojo laughing.
Aitken Roshi had just asked me one of his silly questions that he was always asking me. Only this time I went back to the dojo and started laughing at the question. I still didn't know the answer, but I just laughed and laughed at the question. He asked me, "What is the height of the Mu?" I remember. And so I laughed and laughed quietly to myself because I didn't want to disturb other people and it came over me, "I know the answer to that question." And I thought, "Well, there's no need to go in and tell him, is there?" So I sat there for a day or so laughing to myself and eventually I went into dokusan and answered his question and his eyes got big. He asked me a whole lot of other questions which I could answer, but I still didn't know what I was answering. So this went on for a few dokusan and he asked me Hakuin's question about the sound of one hand, which had always rather terrified me. I'd always thought, "I hope I get through koan study without having to do that one." Knowing I'd never pass it and it would embarrass me horribly. I'd be proved to be a fake. This is true. When I was in Australia and I was working without a teacher and I was working on Mu, I was going under general anesthetic for some minor surgery and I decided that it would be a good time to really work on a koan and I chose that koan. And I still remember going under the anesthetic going, "What is the sound a single hand?" sort of circling around me which absolutely wasn't any use at all, of course. I don't know. Maybe it helped. I came out with the koan, too, I remember. I was still stupid. Anyway, Aitken Roshi held out his hand at one stage when he asked me this question and the whole world opened up for me. I was in the dokusan room, this very little room on Maui. I remember the stars and the great wind of the universe. Everything was in that room. He was Hakuin and then I was Hakuin and I met Hakuin in that fashion. I answered all his questions, but it took me a long time to digest that. I actually went out and made a complete mess of my life for a few years. I think that's a common experience. That in a way I couldn't hold it. I didn't know what to do with my inner character work to hold this experience I had had. I, in fact, avoided being a leader for a long time even after I'd had that

experience because I felt I just wasn't fit to help people and I had to digest what had happened. And so it goes on like that. That you have to really let it go and throw it away. Anything you hold onto really becomes another veil in front of you. This is one of the deepest truths of zen. It is not so hard to realize the world of emptiness, but to really express it is the great thing and the great work. That is why we can make mistakes and be stupid afterwards. But the bodhisattva way says that we actually have to make that mistake. We have to go out into the world to try and help beings and gradually we learn and the enlightened action does comes more truly through us.

I'll tell one last story because it occurs to me I forgot to tell a story about a woman by mistake. This is a neat story about a friend of mine who had her enlightenment experience. I was training with her and she had hers about six months or so before I'd had mine. She was a person who as a child had been very unhappy and had a very difficult childhood, but had lived on the edge of town and had gone out into the forest alone a lot, or into the woods alone a lot, and had had certain experiences, of the kind we had in childhood, you know, most of us have had, where the subject-object difference broke down and she just became the tree or the moss or the stones. She had always remembered this and then had found zen and realized that this was a way to enter that world, to consolidate that world. So she really, badly wanted to get enlightened and was really gung ho, and nothing she did really helped. She'd meditate, but sesshin after sesshin she wouldn't be enlightened afterwards and be very disappointed and depressed. As I used to be, too. There was nothing worse than the closing ceremony of sesshin, I remember. Some of the worst moments of my life. I see people going through it now and I just feel for them so much. So anyway, she really flung herself into it and she had a real gift for meditation. I always thought she had a better samadhi gift than I did. She flung herself into it and time and space disappeared for her on day one. That's what it looked from the inside and she went through the whole thing in a kind of trance. From the outside she was throwing up all the time and she had a fever and she had diarrhea. She was rooming with a bunch of

women, about eight women in a big room, which fortunately had a bathroom. They would carry her to and fro from the zendo, to help her, and help her out of bed. She desperately wanted to get to the zendo and she'd start moving toward the zendo and they'd help her. They'd carry her out of the zendo when she fell apart, when she was weeping with tears and snot. Suddenly, on about day five of sesshin, she was sitting in the dokusan line, which is in a big hall in Maui, and there was a big painting of Kuan-yin [Chinese version of the bodhisattva Avalokiteshvara] in front of her on the wall. The dokusan room was set up so you looked at that wall and the painting and then you walked around the corner to go to dokusan. She was sitting there looking at the wall, and she suddenly realized she was looking at the wall, which was her first moment of consciousness in five days. She realized that the wall came down and exactly met the floor and then she burst out laughing. That was her enlightenment realization. The wall meets the floor! She ran into the roshi laughing and told him, "The wall meets the floor!"

One of the things I want to emphasize here is the plainness and the ordinariness of what we discover. After all there's nothing much to Huang-po's [Huang-po Hsi-yŸn (Jap. Obaku Kiun)] dharma, is there? After all the wall meets the floor. The crow goes, `caw, caw.' The birds just go, `cheep, cheep; cheep, cheep.' Everything is plain and clear before your eyes.

I tell you these stories because I think the heart likes to hear stories sometimes and not just be told do more zazen and shut up. But actually do more zazen and shut up are the best instructions. Don't cling to the stories because really it will be different for you. Really some people do open slowly.

One of Aitken Roshi's virtues is his candor, I have always thought. I think it may be published in one of his books. It's the story about his own lack of enlightenment experience. Something shifted in him during a sesshin once in the mid sixties with Soen Nakagawa Roshi. Soen Roshi gave a "Kaatz!" in the dojo and Aitken Roshi found himself joining in. This "Kaatz!" came out

of him. Aitken Roshi was very good about dojo behavior so it was not the sort of thing he was wont to do, but this "Kaatz!" came out of him. He was sitting facing in and Soen Roshi had him turnaround and he hit him with the kyasaku over and over again and calling out "Kaatz! Kaatz! Kaatz!" in the dojo. Aitken Roshi was just exhausted after all that and went to bed and this Kaatz! just kept coming out of him. But then nothing happened, you know. And so he felt like, "Well, back to the zafu," and went on. He essentially considered himself a zen failure for many years, as I'm sure you know. I'm not telling you anything he hasn't written about publicly. I think that's something precious and dear about him. A true donkey. He trained with great teachers--with Soen Roshi and Gempo Yamamoto Roshi and Hakuun Yasutani Roshi. They kept handing him down saying, "Train this guy." Finally, Koun Yamada Roshi inherited him and he was sitting there listening to a story about a koan about a rhinoceros where Enkan (I can't remember his Chinese name, [Yen-kuan Ch'i-an (Jap. Enkan Saian)]) says, "Bring me the rhinoceros fan." And his attendant said, "It's broken." Enkan says, "Well, bring me the rhinoceros." And Aitken Roshi said, "I could bring him the rhinoceros." This wonder came over him. He told one of the leaders. The leader said, "Well, you'd better have a talk with the Roshi. I'll arrange dokusan." Yamada Roshi said, "Well, you've had an experience of some kind, perhaps, long ago, but only now has it come to fruition." There was no great emotion for him.

If you read the enlightenment stories of the people who became great teachers, they're always flamboyant enlightenment experiences; but if you read the history of those people's sanghas, the sanghas often suffered a lot and their character work often wasn't done and often they exploited their students in various ways. Aitken Roshi's been very good about that stuff. So there's something to be said for being a slow, foolish person, That when it goes in, it goes deep. As YŸn-men says, "It's better to have nothing than to have something good.". So be very patient with who you are, be very honest with who you are. It is enough to be truly and deeply and utterly who you are. That will always open the way for you. Trying to be somebody else or to have

somebody else's enlightenment experience is just another veil in front of you and you can't ever get there from here. Naturally, there will be veils and that's okay, too. Be patient with yourself and your veils.

I have spoken so intimately and candidly today to try to encourage you. I don't want this tape distributed and I'd like you not to talk loosely about the kind of experiences I've told you today, if you don't mind, because people will misunderstand hearing it out of the sesshin context. We don't want to mislead people. People always cling to the flamboyance of the experience and they forget that it comes from just this moment, just being who I am. "The wall meets the floor!" That's it. That's it. Oh, now, the bell goes and it is time to cook. That's it. I go and cook.

You know, when I had my experience, I was a server and the head server was a woman, who is still a buddy of mine, who had had an enlightenment experience under Koboyu (sp???) Roshi [Kobori Roshi ? - tmc] in Japan years before, but she had had a great emptiness experience and it had never really flowered. In that sesshin she became happy and got the joy of it. We could tell something was going on with each other and we were both sitting up late at night out on the porch among the mosquitos and neither of us cared. We were just sitting up there. Every night I'd come out and she'd be there, or she'd come out and I'd be there. We started to laugh a little about this. She whispered to me when we were serving once, "There's nothing to realize! There's nothing to realize!" I didn't have a clue what she meant, but I was very pleased she took me into her confidence. Years later I think I know what she meant. But I could tell she knew it; she understood.

So, those are a few stories for you. It was always the ordinariness. I think compassion is something that gets opened in the way, when we are really into the way. That is something. You can check in on your own compassion and see how your doing. That's another judge. There should be a kind of spontaneous sense of opening into the Tao and opening to other people.

Tonight we're not going to do any special night sitting for tonight officially. What we're going to do is invite you to sit for yourselves as so many people have over the years if you wish to sit up. Just sit for yourselves. The leaders will give you instruction about that. I want to emphasize again that this is your matter. This is something that comes out of your own heart and covers the valley and covers the whole continent. It doesn't come from being anybody else than who you are. You can't ever drink anybody else's coffee. You can't ever have anybody else's experience or anybody else's love. It must be your own and start from your own breast.

Thank you very much. Please keep at it.

Some supplementary notes:

Ling-shu JŸ-min, JŸ-min (?-?). Teacher. Head of the Ling-shu Monastery (in Shao-chou, Kwangtung (Guangdong) Province. China.). Recommended his head monk, YŸn-men Wen-yen (J. Unmon Bun'en) as his successor in directing the monastery. Active 9th c. China. [see pp. 283 in: Chang Chung-Yuan (Transl. and Ed.). 1969. Original Teachings of Ch'an Buddhism selected from The Transmission of the Lamp. New York: Pantheon Books.]

In the Zen tradition there are two Zen teachers called Tung-shan: 1) Tung-shan Liang-chieh (Jap. Tozan Ryokai) who was the student and dharma successor of Yun-yen T'an-sheng (Jap. Ungan Donjo) and was the co-founder [together with his disciple Ts'ao-shan Pen-chi (Jap. Sozan Honjaku)] of the Soto school of Zen; 2) Tung-shan Shou-chu (Jap. Tozan Shusho), the student and dharma successor of YŸn-men Wen-yen (Jap. Ummon Bun'en).

Detailed circumstances of the contemporary case of a spontaneus enlightenment are given in: Courtois, Flora. 1986. An experience of enlightenment. Wheaton. Ill: The Theosophical Publishing House, A Quest Book.

Kobori Nanrei [Nanrai] Sohaku (1918-). Teacher. Rinzai line. Tea ceremony master. Painter. Abbot of Ry™k™in. Head of Ryokoin temple at Daitokuji. Former director of First Zen Institute of America in Japan. (tmc 7.03.93)

ÉÍÍÍ

the world. Lack of correct and adequate vision and lack of planning in the interests of the world we live in has led to the overrunning of the activities of man into questionable areas of environment. That industrial waste comes in the wake of industrial production must be obviously clear to planners and policy makers, even though their laying down of policy often remains confined to the papers on their tables. Value judgements must be evident within the framework of their thinking. Otherwise, one has a right to ask as to who accepts responsibility for the consequences of their planning. This serious and grave offence of omission is now being recognised and reckoned with at international level.

Think of the great disaster that has come upon the Great Lakes of North America. Their aquatic life is ruined to the very rock bottom. On this side of the Atlantic, the same is true of the Baltic and the Mediterranean seas. It is so even of Lake Baikal in Soviet Russia. Over the last thirty or forty years the world has been learning the bitter lessons of these. But the obstinacy and the stubbornness of those, both above and below, in this part of the world makes us insensitive to the pollution and destruction of the environment that man, in his search for development, is generating here, right at our door-step. We are making dead seas of what were once flourishing breeding grounds of fish and prawn, and for that very reason veritable sources of pleasure and delight because of the very presence of life therein. Lunawa lagoon, said to be now stacked with industrial waste, is a good example. It is a good example of misguided industrial expansion. I stress here the word misguided because whether in the private sector or at state level these developmental ventures must be launched after careful deliberation and counselling. Bypassing instruction, and even danger signals, primarily in the interests of personal gain has been witnessed too often in Sri Lanka, and that far beyond a point of annoyance.

This approach to the question of development necessarily sets limits on all sides. But it must be admitted that limits are and

have to be a sine qua non of all development, for that is the guarantee, on the one hand, for efficiency and perfection in the very process of development and on the other, against toxication of human life and pollution and contamination of the environment. It must now be emphatically stated that whether here or there, any launching of development projects, without accepting responsibility for the consequences that come in their wake, ie. without any reference to what in cultured societies of rulers or the ruled are called value judgements, is virtually a move in the direction of genocide. At the level of world thinking today, whether the killing or destruction is of human life or animal life or whether the destruction results in death or near death, the social scientists are inclined to hold the policy planners responsible for these mass manoeuvres. Let us, these wise men we are, not forget this level of thinking. Therefore any development policy planning which results in the deterioration of the life of man and the environment in which he lives or eventually leads to the deterioration of his cultural considerations has to be conscientiously condemned and rejected even though such a line of action is known to rip the pockets of a few who are determined to make the money and benefit at the expense of the many. Is any country or any group of people by duty bound to oblige and support an underworld of this kind ?

Let us here take an example. Whether it is the lack of concern or the reluctance to prevent the digging up of the coral belt around the southern shores of Sri Lanka or the raping of the island's forest cover including the Sinharaja range, or the diabolically planned or unplanned increase in the production and consumption of alcohol in the country, all these carry an element of viciousness, a death-dealing sting embedded in the development conscience. Are we to forgive the pioneers and policy makers for these lapses simply because they have placed the telescope on the blind eye ? Whether one directly perceives it or not, the pernicious effects of such actions on the country and the people are neither to be lost sight of nor treated lightly.

I have attempted in this essay to indicate as to what should be

the bed-rock of a development consciousness in Buddhism. Its primary motivation has to be humanitarian and that too essentially in the direction of magnanimous collective welfare, thus all the time leaving no room for the overgrowth of egoistic promptings of individuals or of groups, however large or small. This has to be the true social scientist's attitude of concern for the good of the vast majority of people: bahuno janassa atthaya hitaya sukhaya as the Buddhist texts put it. This thoroughly humanistic approach in determining the correctness or otherwise of man's activities is clearly witnessed in the Buddha's advice to his own son Rahula saying that approval for action depends entirely on the goodness or otherwise of the results of such activity undertaken. One is called upon to ask the question Does such action have good results on oneself or on others ? One has to probe into this aspect very carefully:
paccavekkhitva paccavekkhitva kammam
kattabbam (M.I.415)

This being the Buddhist attitude to activity, in any form, any where and every where, the concept of development must be viewed and examined with sanity and with a down-to-earth realism. Injury to another, man, animal or nature, in any conjured up vision of development, cannot be permitted. This is not merely a religious consideration. At least Buddhism as a religion, does not subordinate man to the divine or subordinate nature to man. Nothing is created for the specific purpose of consumption by man. That is too primitive a belief of only eat and live. Each has its own rightful place and it is their healthy and correct coordination which leads to successful growth and development of the collective total group. The sane world today is becoming aware of it and accepting it in principle. The ozone belt above the earth, adequate forest cover on land, and many such others are vital considerations for our own existence on this earth. Let not development ventures in their warped and distorted patterns ride rough-shod over the peace and happiness of an on earth.

Anything contrary to this, by whatever name one calls it, development or any other, and no matter by whom they are started,

have to be challenged and rejected, at least for the survival of man on earth, if not for anything else. It can be done and has been done by men of courage and sanity in many parts of the world and great catastrophes have been averted. Let those obsessed with ambitious plans of development take serious note of this warning. It is written on the wall.

Yavadeva anatthaya nattam balassa jayate. Dhp.v.72

The knowledge of the fool is born to bring
about his utter ruin and destruction.

The following is an attempt to try to explain the significance of "protectors" in the context of Vajrayana Buddhism. I have to confess with all honesty that my knowledge in this particular subject is extremely limited. Books that I have read regarding "protectors" are usually very vague, brief and even confusing at times. On top of that, I have not personally recieved any extensive teachings from the lineage teachers regarding this matter. And very often, these traditional teachers do not venture into any sophisticated psychological discourse on the significance of these "protectors" - with a few exceptions maybe.

It is important to bear in mind that consistency is not something that is given 100% attention to in Vajrayana. By this I mean that depending on different texts, sources, lineages and teachers, you will get slightly different classifications of things. For example, generally it is said that there are five Buddha-families but occasionally you will get references to a sixth family with Vajrasattva as the lord (in the five family classification, Vajrasattva belongs to the Vajra family with Aksobhya as the lord). Apparently, this six family scheme is rather popular among the Vajrayana lineages in Nepal. Anyway, back to the original point. Therefore, what I write here might not totally agree with what some others might have heard or read. But basically, I think the idea should be the same - that is assuming I am on the right track.

In a particular tradition that I am familiar with, it is said that there are three kinds of protectors. They are dharmapalas, lokapalas and ksetrapalas. Respectively they translate to "dharma-protectors," "world(ly)-protectors" and "field-protectors." Dharma-protectors are those who are highly advanced on the Path. From Vajrayana's point of view, these beings are actually manifestations of the activities of the Buddhas. Some of these beings are considered Buddhas while some are on different levels of the Bodhisattva path. For example, Mahakala and Ekazati are both

considered fully enlightened beings while someone like Dorje Lekpa is considered a tenth stage bodhisattva. The worldly-protectors refer to beings who have pledged to protect the teachings and practitioners. These include powerful worldly gods, local spirits, energies and other beings. It is said that sometimes these beings do not even fully accept the teachings of the Buddha. They are in other words as deluded as we are - some of them more, others less. Field protectors are usually associated with very specific places or buildings. In Tibet, families live in the same place and house for hundred of years. As time passes, it is believed that there are certain protectors especially connected with that particular house, clan or family. Spiritually both the worldly and field protectors are much lower than the Dharma-protectors. Both the worldly and field protectors are not particularly related to Dharma in the same way as Dhama-protectors are.

How should we relate to the protectors? I remember reading His Holiness the Dalai Lama's response to a similiar question. His Holiness advised that it is actually sufficient to regard the Triple Gem (Buddha, Dharma and Sangha) as protectors. In his opinion, if one truly takes refuge in the Triple Gem they will be the best protectors one can have. He further explained that protectors are related to Vajrayana practice and only those who are deeply involved with Vajrayana practices should be concerned with the protectors. I suspect that His Holiness' response in this case is spoken for the general audience and in no way indicates that he is not in favor of protector practices. Other teachers also agree that if one really relies on the Triple Gem, protection is guaranteed.

Very briefly, according to Vajrayana, protectors should never be seen as something separate from oneself. Protectors actually have two levels which we can relate with. On the relative level, there are protectors like Mahakala, Palden Lhamo, Dorje Lekpa or Ekazati. There are numerous sadhanas (practices) associated with these protectors. But ultimately, it is our own rigpa (the natural mind which is empty, spacious and open) that is the protector. The sadhanas usually have a structure where the meditator visualizes him or herself as a particular protector. The meditator is reminded

again and again that his or her own nature is never separate from the protectors'. Some teachers further explain that in a way, these protectors are simply our own awareness and mindfulness. Because we are beings with both body and mind, it is easier in the beginning for us to focus on some being with a form - the various protectors. By meditating on their enlightened form - the various attributes and ornaments (these are related to different enlightened qualities and activities), one is to actualize these same enlightened qualities in oneself. In a sense, we can say that the protectors are our own awareness and mindfulness appearing in enlightened forms. With right awareness and mindfulness, we will be able to relate to things as they truly are (the wisdom aspect) and carry out the bodhisattva activities (the compassionate aspect). Therefore, the effectiveness of these protectors are directly related to our own level of awareness and mindfulness. I have also heard another teacher explaining that the law of karma is the real protector. Here, he means that if one were to truly understand cause and effect, one will then abstain from performing any negative actions but instead only cultivate good.

Perhaps on a more advance level, the Dharma-protectors are related to different forms and levels of energies. These energies are said to be latent in us. By relating to a particular protector, one learns how to channel up a particular energy and to deal with it in an enlightened way. Because energy is simply energy (with negative and positive potentials), there is always a chance of not knowing how to deal with a certain energy that has been aroused through practice. Or perhaps the means of arousing that energy is misused. This is when it is believed that negative effects will occur. This effect might not only affect the practitioner himself but might include other as well. Therefore, some teachers are extremely cautious when it comes to protector practices. In traditional language, protector's practice is something that one does only if one is certain that one can fulfill all the commitments (samaya or damtshig) related to that practice. Unlike practices like Chenrezig meditation or Tara, it is said that when the protector practice is done wrongly or is not done consistently, the protectors will get extremely "wrathful." These protectors are

guardians of the different practices. It is also said that protectors are there to make sure that the purity of the lineage is protected. And to do that, they guard the practices of the practitioners. It is not uncommon to hear people saying that when they became lazy in their practice or got distracted, something mysterious or supernatural happened that pulled them back into the Path again! And devout Tibetans will straightaway acknowledge the protectors for fulfilling their duties. There are also stories of protectors who guard termas - hidden "treasures" (teachings, ritual objects etc, that have supposedly been hidden by masters like Padmasambhava to be retrived in latter days to benefit people). Some of these protectors are even believed to fiecely guard these termas so that if the wrong people get these termas, they might be destroyed or the termas will simply vanish. These protectors are usually not Dharma-protectors but some worldly protectors.

Therefore, on the relative level, these protectors are treated like independent beings who have pledged to protect the Dharma (but since the ultimate and relative can never be taken as distinct, one is always reminded of the ultimate protector - one's own natural mind). Different lineages, teachers and practices have different special protectors. For example, Palden Lhamo and Dharmaraja is particularly associated with the Gelugpas. For the Kagyupas, Mahakala is especially significant. Different aspects of Mahakala (two-armed, four-armed, six-armed, female aspects) are practised by the Sakyas, Gelugs, Kagyus and Nyingmas. In the Drikung-Kagyu (one of the major sects in the Kagyu school), Achi Chokyi Drolma is a protector intimately related to members of this lineage. Milarepa himself is related to the five protector goddesses of Tibet - known as the Tseringmas. Among the Nyingmapas, Ekazati, Rahula and Dorje Lekpa are protectors very closely related to Dzog-chen. The famous deity of the Nechung oracle is the personal protector of the Dalai Lamas. Various elaborate rituals and sadhanas are performed to these protectors in the lives of practitioners. There are certain monasteries that have protector practices carried out 24 hours a day for 365 days a year. If I am not mistaken, there are a group of monks specially charged with the task of performing protector practices for the welfare of His Holiness the Dalai Lama in

particular, and the live of the Dharma in general.

So... if I have not totally confused my readers, I hope some of you will at least get a faint idea of what protectors are. If there is anyone out there that have further knowledge and experience that can be shared, do contribute! Call me a conservative, but part of the problem with trying to explain protector practice is that I am not sure what I should write and what I shouldn't. IMHO, protectors can be easily misunderstood. They can be easily seen as spiritual policeman that are out there to get you if you misbehave. And lots of supersitions can come up from this kind of understanding - this is the last thing that I am trying to do. If I have to summarize the significance of protectors very briefly, in say one or two sentences, the following will be it:

"Protectors, like other Buddhas and dieties related to one's practice, should NEVER be seen as separate from one's natural mind, one's rigpa. And to be mindful at all times of cause and effect is perhaps the most direct protector one can get."

Protection Through Satipatthana

~~~~~~~~~~ ~~~~~~~ ~~~~~~~~~~~~

Once the Buddha told his monks the following story (Satipatthana Samyutta, No. 19):

There was once a pair of jugglers who performed their acrobatic feats on a bamboo pole. One day the master said to his apprentice: "Now get on my shoulders and climb up the bamboo pole." When the apprentice had done so, the master said: "Now protect me well and I shall protect you! By protecting and watching each other in that way, we shall be able to show our skill, make a good profit and safely get down from the bamboo pole." But the apprentice said: "Not so, master! You, O master, should protect yourself, and I too shall protect myself. Thus self-protected and self-guarded we shall safely do our feats."

This is the right way," said the Blessed One and spoke further as follows:

"It is just as the apprentice said: 'I shall protect myself'--in that way the foundations of mindfulness (satipatthana) should be practised. 'I shall protect others'--in that way the foundations of mindfulness should be practised. Protecting oneself, one protects others; protecting others, one protects oneself.

"And how does one, in protecting oneself, protect others? By the repeated and frequent practice of meditation (asevanaya bhavanaya bahulikammena).

"And how does one, in protecting others, protect oneself? By patience and forbearance, by a non-violent and harmless life, by loving kindness and compassion."

This sutta belongs to the considerable number of important and eminently practical teachings of the Buddha which are still hidden like buried treasure, unknown and unused. Yet this text has an important message for us, and the fact that it is stamped with the royal seal of satipatthana gives it an additional claim to our attention.

Individual and Society

The sutta deals with the relations between ourselves and our fellow beings, between individual and society. It sums up in a succinct way the Buddhist attitude to the problems of individual and social ethics, of egoism and altruism. The gist of it is contained in those two concise sentences:

> "Protecting oneself, one protects others."
> (Attanam rakkhanto param rakkhati.)
>
> "Protecting others, one protects oneself." (Param rakkhanto attanam rakkhati.)

These two sentences are supplementary and should not be taken or quoted separately. Nowadays, when social service is so greatly stressed, people may be tempted to support their ideas by quoting only the second sentence. But any such one-sided quotation would misrepresent the Buddha's standpoint. It has to be remembered that in our story the Buddha expressly approved the words of the apprentice, that one has first to watch carefully one's own steps if one wishes to protect others from harm. He who himself is sunk in the mud cannot help others out of it. In that sense, self-protection forms the indispensable basis for the protection and help given to others. But self-protection is not selfish protection. It is self-control, ethical and spiritual self-development.

There are some great truths which are so comprehensive and profound that they seem to have an ever-expanding range of significance that grows with one's own range of understanding and practising them. Such truths are applicable on various levels of understanding, and are valid in various contexts of our life. After reaching the first or second level, one will be surprised that again and again new vistas open themselves to our understanding, illumined by that same truth. This also holds for the great twin truths of our

text which we shall consider now in some detail.

"Protecting oneself, one protects others"--the truth of this statement begins at a very simple and practical level. This first material level of the truth is so self-evident that we need say no more than a few words about it. It is obvious that the protection of our own health will go far in protecting the health of others in our environment, especially where contagious diseases are concerned. Caution and circumspection in all our doings and movements will protect others from the harm that may come to them through our carelessness and negligence. By careful driving, abstention from alcohol, self-restraint in situations that might lead to violence--in all these and many other ways we shall protect others by protecting ourselves.

The Ethical Level

We come now to the ethical level of that truth. Moral self-protection will safeguard others, individuals and society, against our own unrestrained passions and selfish impulses. If we permit the "three roots" of evil--greed, hate and delusion--to take a firm hold in our hearts, then their outgrowths will spread far and wide like a jungle creeper, suffocating much healthy and noble growth all around. But if we protect ourselves against these three roots, our fellow beings too will be safe. They will be safe from our reckless greed for possessions and power, from our unrestrained lust and sensuality, from our envy and jealousy; safe from the disruptive consequences of our hate and enmity which may be destructive or even murderous; safe from the outbursts of our anger and from the resulting atmosphere of antagonism and conflict which may make life unbearable for them.

The harmful effects our greed and hate have upon others are not limited to the times when they become passive objects or victims of our hate, or when their possessions become the object of our greed. Both greed and hate have an infectious power which vastly multiplies

their evil effects. If we ourselves think of nothing else than to crave and to grasp, to acquire and possess, to hold and to cling, then we may rouse or strengthen these possessive instincts in others. Our bad conduct may become the standard of behaviour for those around us--for our children, our friends, our colleagues. Our own conduct may induce others to join us in the common satisfaction of rapacious desires; or we may arouse in them feelings of resentment and competitiveness. If we are full of sensuality, we may also kindle the fire of lust in them. Our own hate may provoke them to hate and vengeance. We may also ally ourselves with others or instigate them to common acts of hate and enmity. Greed and hate are, indeed, like contagious diseases. If we protect ourselves against these evil infections, we shall to some extent at least also protect others.

Protection through Wisdom

As to the third root of evil, delusion or ignorance we know very well how much harm may be done to others through the stupidity, thoughtlessness, prejudices, illusions and delusions of a single person.

Without wisdom and knowledge, attempts to protect oneself and others will usually fail. One will see the danger only when it is too late, one will not make provision for the future; one will not know the right and effective means of protection and help. Therefore, self-protection through wisdom and knowledge is of the greatest importance. By acquiring true wisdom and knowledge, we shall protect others from the harmful consequences of our own ignorance, prejudices, infectious fanaticism and delusions. History shows us that great and destructive mass delusions have often been kindled by a single individual or a small number of people. Self-protection through wisdom and knowledge will protect others from the pernicious effect of such influences.

We have briefly indicated how our own private life may have a

strong impact on the lives of others. If we leave unresolved the actual or potential sources of social evil within ourselves, our external social activity will be either futile or markedly incomplete. Therefore, if we are moved by a spirit of social responsibility, we must not shirk the hard task of moral and spiritual self-development. Preoccupation with social activities must not be made an excuse or escape from the first duty, to tidy up one's own house first.

On the other hand, he who earnestly devotes himself to moral self-improvement and spiritual self-development will be a strong and active force for good in the world, even if he does not engage in any external social service. His silent example alone will give help and encouragement to many, by showing that the ideals of a selfless and harmless life can actually be lived and are not only topics of sermons.

The Meditative Level

~~~ ~~~~~~~~~~~ ~~~~~

We proceed now to the next higher level in the interpretation of our text. It is expressed in the following words of the sutta: "And how does one, by protecting oneself, protect others? By the repeated and frequent practice of meditation." Moral self-protection will lack stability as long as it remains a rigid discipline enforced after a struggle of motives and against conflicting habits of thought and behaviour. Passionate desires and egotistic tendencies may grow in intensity if one tries to silence them by sheer force of will. Even if one temporarily succeeds in suppressing passionate or egotistic impulses, the unresolved inner conflict will impede one's moral and spiritual progress and warp one's character. Furthermore, inner disharmony caused by an enforced suppression of impulses will seek an outlet in external behaviour. It may make the individual irritable, resentful, domineering and aggressive towards others. Thus harm may come to oneself as well as to others by a wrong method of self-protection. Only when moral self-protection has become a %spontaneous% function, when it comes as naturally as the protective
~~~

closing of the eyelid against dust--only then will our moral stature provide real protection and safety for ourselves and others. This naturalness of moral conduct does not come to us as a gift from heaven. It has to be acquired by repeated practice and cultivation. Therefore our sutta says that it is by repeated practice that self-protection becomes strong enough to protect others too.

But if that repeated practice of the good takes place only on the practical, emotional and intellectual levels, its roots will not be firm and deep enough. Such repeated practice must also extend to the level of meditative cultivation. By meditation, the practical, emotional and intellectual motives of moral and spiritual self-protection will become our personal property which cannot easily be lost again. Therefore our sutta speaks here of bhavana, the meditative development of the mind in its widest sense. This is the highest form of protection which our world can bestow. He who has developed his mind by meditation lives in peace with himself and the world. From him no harm or violence will issue. The peace and purity which he radiates will have an inspiring, uplifting power and will be a blessing to the world. He will be a positive factor in society, even if he lives in seclusion and silence. When understanding for, and recognition of, the social value of a meditative life ceases in a nation, it will be one of the first symptoms of spiritual deterioration.

Protection of Others

We have now to consider the second part of the Buddha's utterance, a necessary complement to the first: "Protecting others one protects oneself. And how? By patience and forbearance, by a non-violent and harmless life, by loving-kindness and compassion (khantiya avihimsaya mettataya anuddayataya)."

He whose relation to his fellow-beings is governed by these principles will protect himself better than he could with physical

strength or with any mighty weapon. He who is patient and forbearing will avoid conflicts and quarrels, and will make friends of those for whom he has shown a patient understanding. He who does not resort to force or coercion will, under normal conditions, rarely become an object of violence himself as he provokes no violence from others. And if he should encounter violence, he will bring it to an early end as he will not perpetuate hostility through vengeance. He who has love and compassion for all beings, and is free of enmity, will conquer the ill-will of others and disarm the violent and brutal. A compassionate heart is the refuge of the whole world.

We shall now better understand how those two complementary sentences of our text harmonize. Self-protection is the indispensable basis. But true self-protection is possible only if it does not conflict with the protection of others; for one who seeks self-protection at the expense of others will defile as well as endanger himself. On the other hand, protection of others must not conflict with the four principles of patience, non-violence, loving-kindness and compassion; it also must not interfere with their free spiritual development as it does in the case of various totalitarian doctrines. Thus in the Buddhist conception of self-protection all selfishness is excluded, and in the protection of others violence and interference have no place.

Self-protection and protection of others correspond to the great twin virtues of Buddhism, wisdom and compassion. Right self-protection is the expression of wisdom, right protection of others the expression of compassion. Wisdom and compassion, being the primary elements of Bodhi or Enlightenment, have found their highest perfection in the Fully Enlightened One, the Buddha. The insistence on their harmonious development is a characteristic feature of the entire Dhamma. We meet them in the four sublime states (brahmavihara), where equanimity corresponds to wisdom and self-protection, while loving-kindness, compassion and sympathetic joy correspond to compassion and the protection of others.

These two great principles of self-protection and protection of others are of equal importance to both individual and social ethics

and bring the ends of both into harmony. Their beneficial impact, however, does not stop at the ethical level, but leads the individual upwards to the highest realisation of the Dhamma, while at the same time providing a firm foundation for the welfare of society.

It is the writer's belief that the understanding of those two great principles of self-protection and protection of others, as manifesting the twin virtues of wisdom and compassion, is of vital importance to Buddhist education, for young and old alike. They are the cornerstones of character building and deserve a central place in the present world wide endeavour for a Buddhist revival.

"I shall protect others"--thus should we establish our mindfulness, and guided by it devote ourselves to the practice of meditation, for the sake of our own liberation.

"I shall protect others"--thus should we establish our mindfulness, and guided by it regulate our conduct by patience, harmlessness, loving-kindness and compassion, for the welfare and happiness of many.

The hoisting of flags to ensure good fortune is one of the many customs within the nomadic communities of Tibet that have changed very little for several thousand years. However, the meaning of this ritual has gradually evolved from being of militaristic to religious significance.

That the original use of flags in Tibet was militaristic is illustrated by the term Ru-dar or banner. Ru refers to gathering of nomads before moving on together to fresh pastures and thus, in an archaic sense this assembly referred to a kind of army. The banners (ru-dar) found in ancient literature were military flags. The flying of flags began to acquire religious significance in the Bon tradition and it may be observed that the actual design of the flags also gradually changed. In the corners of some of these flags were images of a tiger, a snow lion, a garuda, and a dragon, and in the center was a horse, around which was written a Bon mantra and a line which read, "May the horse of good fortune run fast and increase the power of life, influence, fortune, wealth, health, and so forth."

This writing of mantras on cloth to produce a flag of religious significance can be traced to the immaculate g.Yung-drung-gtsang-ma-zhang-zhung, a collection of Bonpo teachings, which say that when a mantra is wrapped in five colored silk and placed high in the mountains, it will provide whoever sees it with the good fortune to become enlightened. If you attach a mantra wrapped in this way to the top of a victory banner and pray to it, worship it, and make precious offerings to it, then, according to tradition, you will accomplish all your goals. The meaning of this Bon mantra needs further investigation.

The protective power of mantras is illustrated by the following story. When Buddha was in the Thirty-third realm of the gods, seated on a flat stone, as white as his clothes, Indra, king of the Gods, came and prostrated before him. Indra explained that he and the gods of the Thirty-third realm had suffered a great defeat at the hands of Vemchitra, the king of the anti-gods, and he asked Buddha what he should do. Buddha told him to memorize the mantra contained in the prayer Ornament at the Crest of the Victory Banner. Buddha explained that he had received this mantra from the Tathagata known as Irrepressible and had himself taught it to many disciples. He said that since the time that he learned the mantra he could not remember even a

moment when he felt fear or terror, so he told Indra to carry this mantra into battle to ensure victory.

Great masters have written ritual texts praising the Dra-lha, a deity who helps in overcoming obstacles and enemies, and the hoisting of Dra-lha flags is meant to cause the Dharma to flourish and to promote the welfare of all sentient beings, especially those who engage in these rituals. in an old Dra-lha story, the gods were enjoying the fruits of the wish-fulfilling tree, which grew in the valley of Mt. Meru. As the tree was rooted in the realm of the anti-gods, they claimed that the fruit was also theirs, and a battle ensued. Indra went to Vajrapani and asked him for assistance. Vajrapani told Indra to invite the brothers of Dra-lha and to ask for their help. Nine weapons and nine deities then appeared from the great ocean. Through the worship of these deities Indra was able to defeat the anti-gods and achieve victory.

There are many types of Tibetan flags, for example the dar-ding, a long string of flags flown horizontally between trees or buildings, and the dar-chen, a narrow flag which is flown from a pole.

Tibetan prayer flags can be of any of these 5 colors, blue, white, red, green, and yellow, which symbolize the sky, clouds, fire, water, and earth respectively. If we relate these colors to the physical elements then the blue symbolizes water, green symbolizes wood, red fire, and white iron. There is also a tradition of flying flags which represent the elements of your own body.

Flags are flown on auspicious days such as Sunday, Monday, Wednesday, Thursday, Friday, and when the stars are in auspicious arrangements according to Tibetan almanac.

Flags are flown by families from all economic backgrounds, and they are flown on such important occasions as the third day of the Tibetan new year, marriages, and official functions. Flags are also hoisted in the event of interferences, or illness, in order to avert further misfortunes.

In some parts of Tibet, during the wedding ceremony, the guests gather on the roof of the grooms house and preform a ritual in which the bride touches the prayer flags. These flags are then hoisted on the

building housing the protectors near the site for making incense offerings, and from that moment the bride becomes a member of her new family. After the first year of marriage the bride returns to her home and again preforms the same ceremony and in so doing she separates herself from her original family.

Flags are used as protection against harm when traveling. Before passengers enter a boat to cross a river, they preform a ceremony in which flags are attached to the horse shaped figurehead at the bow of the boat. Prayers are said and incense and grain are offered to the gods. In this way they insure safe passage across the river.

Originally, flag ceremonies were intended to provide benefit in this life, but as they gradually became more imbued with religious meaning, they came to be associated with benefit in future lives and the achievement of spiritual as opposed to material success. Although the actual ceremonies and rituals have changed very little, the significance or content of the rituals has gradually evolved a spiritual element through a mixture of Bon and Buddhist symbolism.

Spontaneous Fulfilment of Wishes

-------- Prayer for a Swift Return ----------

O Gurus abiding in the ten directions' infinite realms,
Buddhas, bodhisattvas, shravakas, pratyekabuddhas and dharmapalas -
Pray oceanic sources of refuge generate the power of compassion
To grant siddhi of our desired wishes' fulfilment here and now!

With long familiar excellent wisdom's force flourishing.
And enthusiasm fully firm in accomplishing others' welfare,
Skilled in bearing Buddha's teachings aloft to the ten directions,
I pray at the feet of the Venerable Guru.

Protector, bearing witness for the conquerors and bodhisattvas,
You are determined always to fulfil the welfare of others;
Yet your having left me and other faithful disciples
To enter the peaceful sphere torments us so!

But since it is never possible that great beings
At any time waver from achieving others' welfare
For trainees of this realm born from your speech -
May you swiftly show the young excellent face of your rebirth!

Scholary, moral and kind, with teaching, debate and composition,
Masterfully spreading the essence of sutra and tantra to the ten directions
As Buddha's supreme representative for the teachings -
May the bright smiling young moon of your re-emanation quickly come!

COLOPHON: This prayer for the swift return of the great spiritual guide of Ganden Jangste Monastery's Gowo College, Geshe Kenrab Tobgye, whose supreme form has passed to peace, was requested on behalf of all his dharma centres, Gowo College of Ganden Jangste, and Losang Donden of the Tseten Norbu household, together with offerings.

Geshe Nyima Gyeltsen composed it based on prayers for swift return

composed by His Holiness the Fourteenth Dalia Lama

Translated from Tibetan by David Molk - December 13, 1993

PURE REALM BUDDHISM CONFERENCE~~~

Buddha). Thus to become spiritually reborn, all we must do is call on Amida by saying
Butsu".Unfortunately mythic expression of spiritual reality is often taken literally, thereby
missing the symbolic embodiment of truth. Pure Land easilylends itself to docetism, the vie
are cosmic Buddhas living inother worlds who answer mankind's prayers and intercede
ofthe world by magical means. Such an approach externalizes spiritual responsibility
idea that "somebody will do it for me". Others look for miraculous events and signs of
manifestations of Buddhas and masters from other dimensions. Pure Realm history has
of such docetic misinterpretation, while standard English presentations of Pure Realm
with a statement of the mythic expression and offer a theology which does not clarify the
soteriological truths embodied in it.Volumes abound on the Shin teaching of Pure Realm; m
leftovers from 19th century misunderstandings of Pure Realm metaphor and its term
The following characterization of Shin is not in its conventional language of presentation
it is an explanation rooted in an 800 year old tradition with consideration for the mode of exp
that is part of the emergent Western Buddhism. My interests do notlie with orthodoxy for i
my allegiance lies with the spirit of free expression and interpretation exemplified by our f
Shinran Shonin. Accordingly, the following characterization of Shin soteriology is an ex

for those of us of the emergent Western Buddhist tradition. Pure Realm SoteriologyPure R
Zen, is exclusively oriented toward the Buddha's enlightenment. Thus both are sometimes
"Dharmakaya Buddhism" because they orient the practitioner directly to the attitude of
(J., nembutsu, Skt. buddhanusmrti) rather than rites, rituals and activities pursued to earn
extraordinary abilities. However for Pure Realm, Amida is the sole object for cultivating relig
awareness, as Shakyamuni Buddha is for Zen. In Zen students the experience of religiou
is termed kensho, while in Pure Realm it is called shinjin. There is one crucial experien
life of every Buddhist; that experience indicates that the truth of the Buddha's teaching is
philosophical or theological, but experiential. Generally Mahayana calls that crucial mome
arising of bodhicitta (bodhi-attitude)". The notion of attitude is fundamental to underst
that experience, but for decades citta and its Sino-Japanese equivalents have been ren
as"mind". Mind is a superfluous term to the process orientation of Buddhist soteriology, sin
practice makes us aware of the fluctuating stream of consciousness that we mistake for a
implies that psychologically we amount to a number of conditioned dispositional tendencie
polar opposite of our attitude is that of those who have awakened to a fuller and enriched
understanding of life. Bodhicitta is the "mystical" experience that transforms speculation
understanding, for until we have a living experience of the attitude of enlightenmen
discussion of it might be called gossip. For that reason Pure Realm advocates shinjin as the
basis of knowing anything of spiritual potency.With shinjin we have known with absolute ce
the claims of Pure Realm are true and real. In that sense alone is faith born. However, S
continues to be badly translated as either "faith" or "faith-mind". The connotation of faith
Western culture means the opposite of this sense of faith, for we take something on faith un
certainty, while Pure Realm says faith is certainty! That turning point establishes a rebirth
understanding; and we acquire several new insights. Weknow that:1. We have experien
rebirth;2. We have momentarily experience the Buddha's attitude;3. We are not enlighte
The Buddha attitude exists;5. Our ultimate freedom lies in the Buddha attitude;6. We must w
rely on the Buddha attitude;7. We cannot cause the Buddha attitude to arise---thatremains o
power;8. Gratitude and thanksgiving naturally arise from ourhearts for having received this
experience.Buddhism is said to be a practice. Some hold that practices are what cause the
to arise; that is, practices cause Buddha attitude as a result or outcome. However, that sin
Buddhism! Practice makes uscritically aware of the habitual, self-centered nature of o
and emotional attitude toward life. To make a Buddha, we have to realistically understand
material that we start with---ourselves. And that raw material turns out to be different than w
imaginedit to be. We find the meaning of the three poisons in our own attitude;even the
for enlightenment is self-centered, not compassionate and wise. Pure Realm calls self-cen
jiriki as the polar opposite of tariki, a centeredness that is other than myself. Tariki is the
attitude ofBuddha. The jiriki-tariki relationship is dynamic, and makes us aware of howimpo
we are in contrast to the unimaginable (for us) wisdom andcompassion of the Buddha atti

reminded that by sincerely and wholeheartedly calling namu amida butsu, the Buddha attitu
momentarily come to us. It would seem that jiriki can manipulate tariki. Notso! We have to
point of desperation within our realm of self-seeking; we have to realize that we cannot do
Try as we might, we cannot become Buddha, we cannot become other than we are. The B
patiently awaits that recognition on our part; once it's there, we are embraced by illuminati
are accepted just as we are. We know at precisely that moment that even the urge to call
Buddhahas been the working of the Buddha within us. Amida Butsu does not exist until th
surrender.Pure Realm Buddhism is called the "nembutsu way". While there is considera
concerning nembutsu practice, nembutsu is generally identified with the expression "namu
Literally, the Chinese characters for nembutsu mean "attitude" (nen) and "enlightenment"
(butsu,Buddha). Pure Realm insists that all and everything constituting the enlightenment
represented in his name and title (name=amida, title=butsu) pronounced as namu amid
Indian Buddhistorigins of this notion may well be tied to magical thinking, or may have bee
